

Cover: *Drosophila* larval brain lobes labelled with ribosomal protein 10Ab (RpL10Ab, green) and Clueless (Clu, red), with DAPI in blue. Clu binds the ribosome at the mitochondrial outer membrane and may function in mitochondrial protein import. Clu and RpL10Ab, as well as other ribosomal proteins, are highly expressed in the frequently dividing larval neuroblast stem cells. For details see the article by Sen and Cox, page 195. Image credit: R.T. Cox.
