PIP5K-dependent production of PIP2 sustains microtubule organization to establish polarized transport in the *Drosophila* oocyte

Louis Gervais, Sandra Claret, Jens Januschke, Siegfried Roth and Antoine Guichet

There was an error published in the ePress version of *Development* **135**, 3829-3838 on 23rd October 2008.

The first name and surname of Sandra Claret were reversed. The correct name appears above.

The final online and print versions are correct.
