

Table S2. Analysis of *nclb* mutant clones in the female germline and follicle cells

		Day 2 (n)	Day 5 (n)	Day 10 (n)	Day 15 (n)
GSC clones	Control	nd*	21.3% (80)	14.4% (118)	8.9 % (80)
	<i>nclb</i> ²	nd*	30% (80)	14.3% (105)	12.9% (70)
GC clones	Control	17.3% (81)	50% (80)	23.7% (118)	25% (80)
	<i>nclb</i> ²	20.6 (97)	52.5% (80)	29.5% (105)	25.7% (70)
FC clones	Control	47.2% (53)	74.2% (66)	53.1% (64)	20.3% (59)
	<i>nclb</i> ²	42.9% (56)	69% (71)	10.9% (64)	7.8% (38)

Table shows the percentage of ovaries with GSC, GC and FC clones.

*The clonal marking system used did not allow identification of GSC clones at this early stage.
