

Table S1. Viability of *sff* homozygotes

Genotype	Number of embryos at start	Number of pupae	% of expected	Number of adults	% of expected
wild type	457	373	82	364	80
<i>sff</i> ^{B22}	560	219	39	207	37
'% of expected' for each genotype at each stage is calculated relative to the 'Number of embryos at start'
