

Table S2. Expression domains of Hh targets after overexpression of Shf/WIF1 chimeric proteins in the posterior compartment of the wing disc

Genotype	Ptc	Ci
WT	7	12
<i>hhGal4>Shf</i>	10.7*	16.7*
<i>hhGal4>hWIF1</i>	7.4	11.6
<i>hhGal4>NT^{Dm}WD^{Hs}EGF^{Dm}</i>	6.7	12.2
<i>hhGal4>NT^{Dm}WD^{Dm}EGF^{Hs}</i>	10.6*	18.1*

Shown is the mean number of cells expressing the Hh targets, assessed as an average of two regions and in at least ten different discs for each genotype.

* $P < 0.05$, Student's *t*-test, comparison with wild-type (WT) genotype.
