

Fig. S1. Negative controls for *in situ* hybridization and immunohistochemistry experiments in D16 mouse placentas. Sense *in situ* hybridization probes for (A) *H19* and (B) *Psg23*. Secondary antibody only control used in immunohistochemistry experiments for (C) cleaved caspase-3 and (D) Ki67. Black boxes represent the area magnified in the image below. Black bar represents 1 mm. Red bar represents 100 μ m.

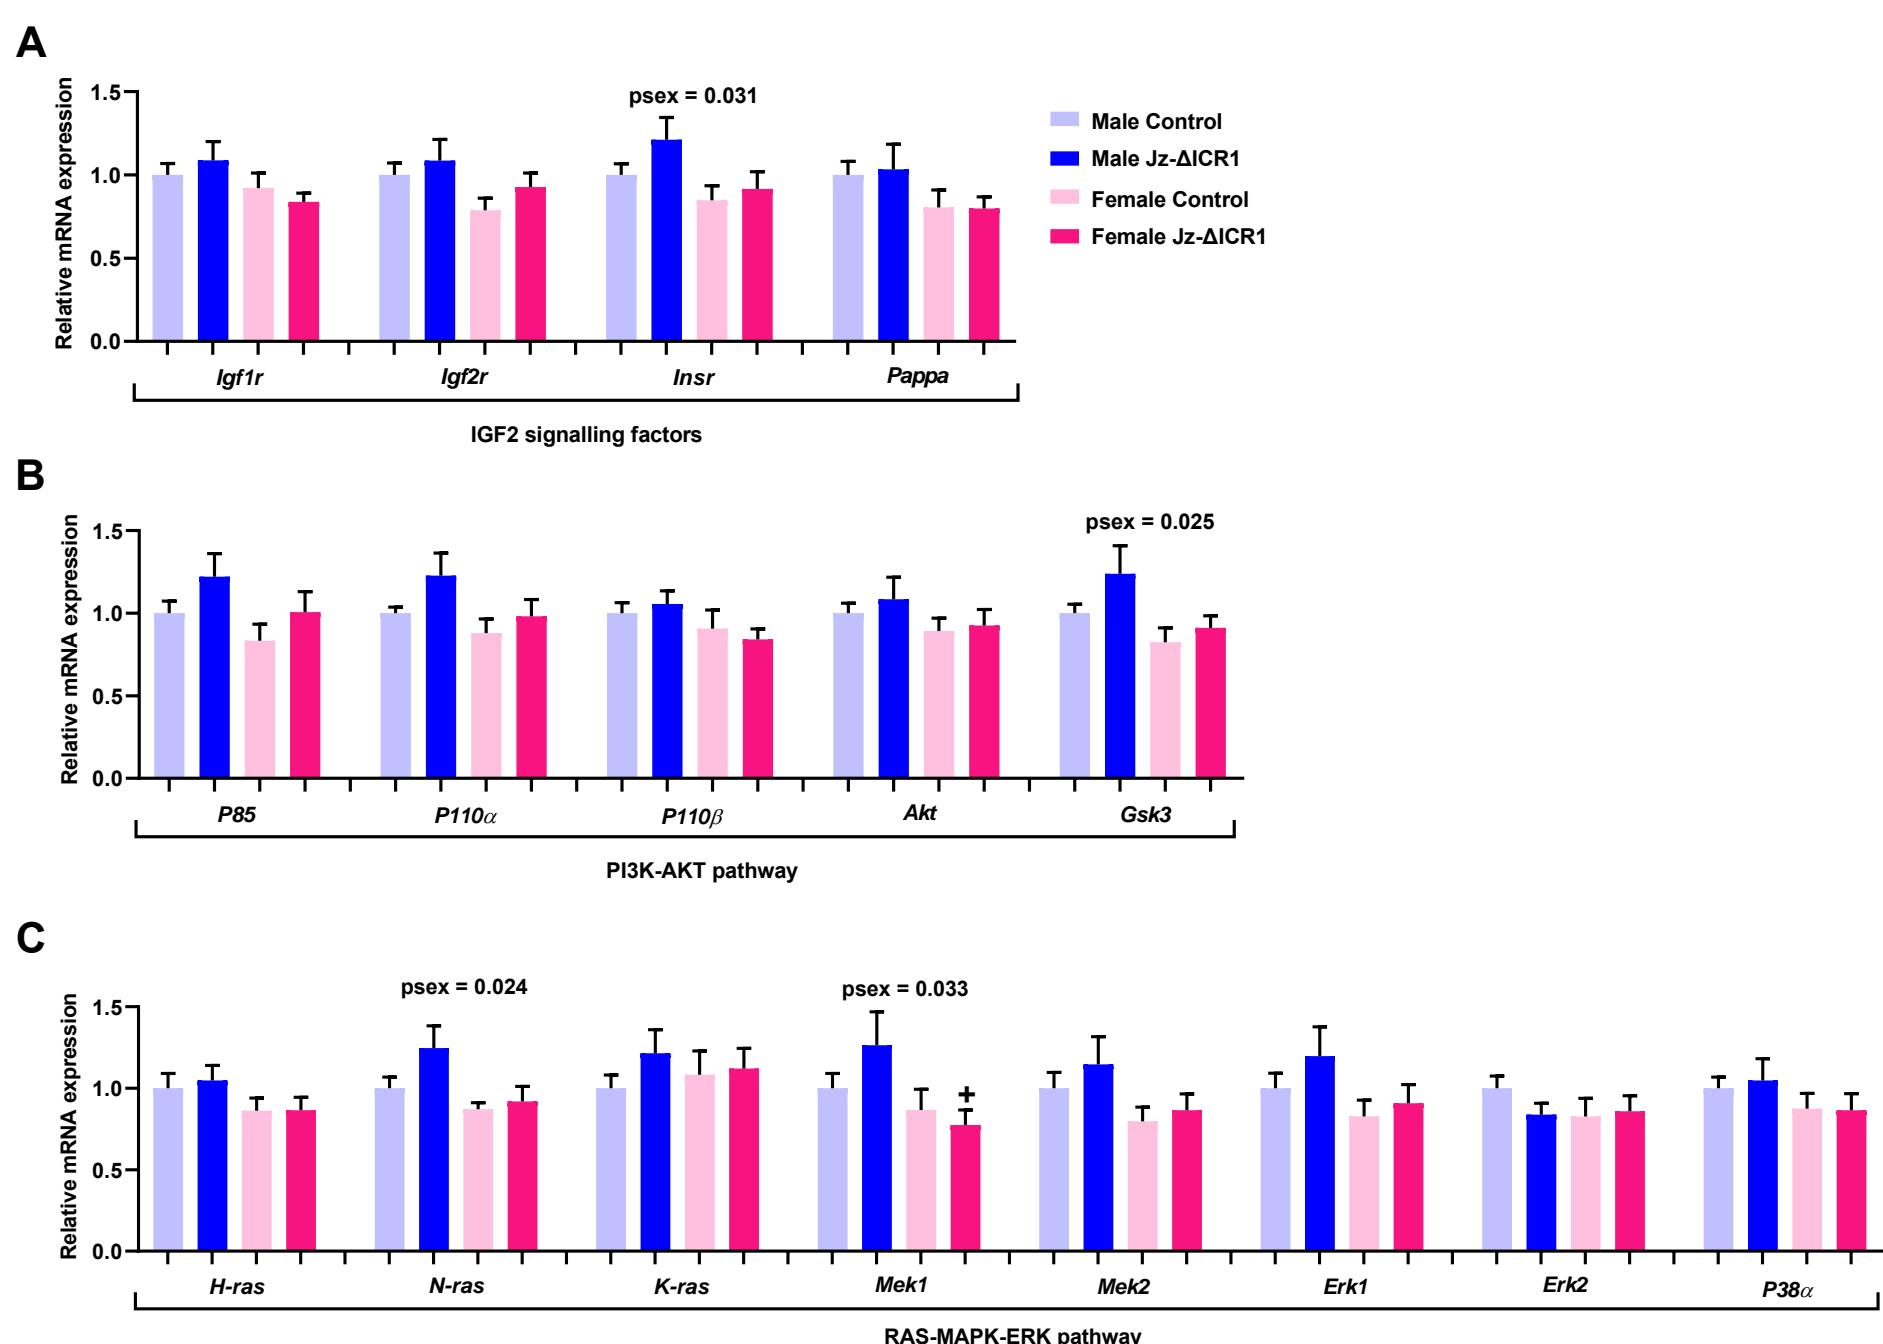

Fig. S2. Jz-ΔICR1 does not alter the gene expression of IGF2 signalling factors or downstream members of the PI3K-AKT and MAPK pathways. Expression of (A) IGF2 signalling factors, (B) PI3K-AKT pathway genes and (C) RAS-MAPK-ERK pathway genes in Jz samples relative to the geometric mean of housekeeping genes (*Hprt* and *Ywhaz*) using qPCR (n = 8-10 per genotype/sex, across 11 litters). Data were obtained on D16. Values presented as mean + SEM with significance assessed by two-way ANOVA and pairwise T-test (psex < 0.05 = +).

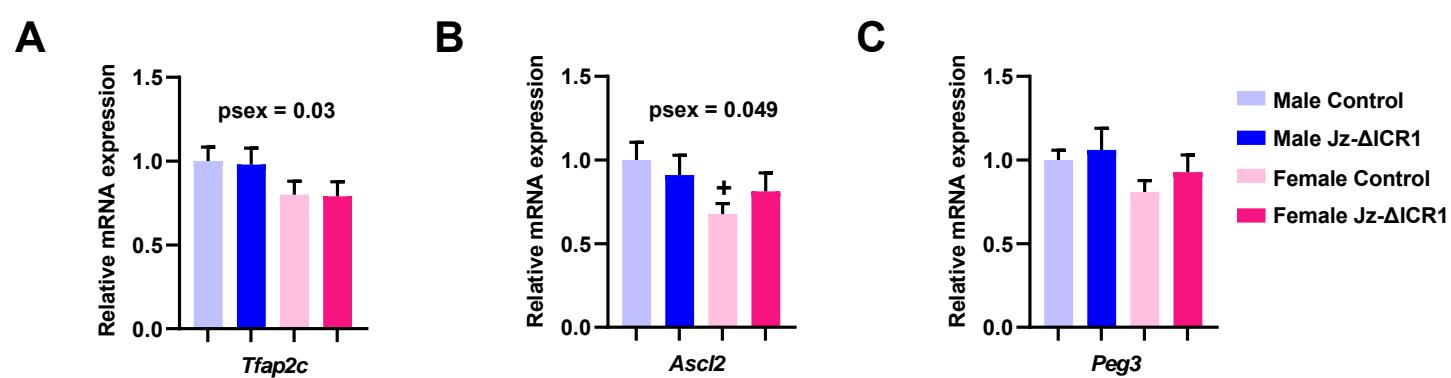

Fig. S3. Jz-ΔICR1 does not alter the gene expression of *Tfap2c*, *Ascl2* or *Peg3*. Expression of (A) *Tfap2c*, (B) *Ascl2* and (C) *Peg3* in Jz samples relative to the geometric mean of housekeeping genes (*Hprt* and *Ywhaz*) using qPCR ($n = 9-10$ per genotype/sex, across 11 litters). Data were obtained on D16. Values presented as mean + SEM with significance assessed by two-way ANOVA and pairwise T-test ($p_{\text{sex}} < 0.05 = +$).

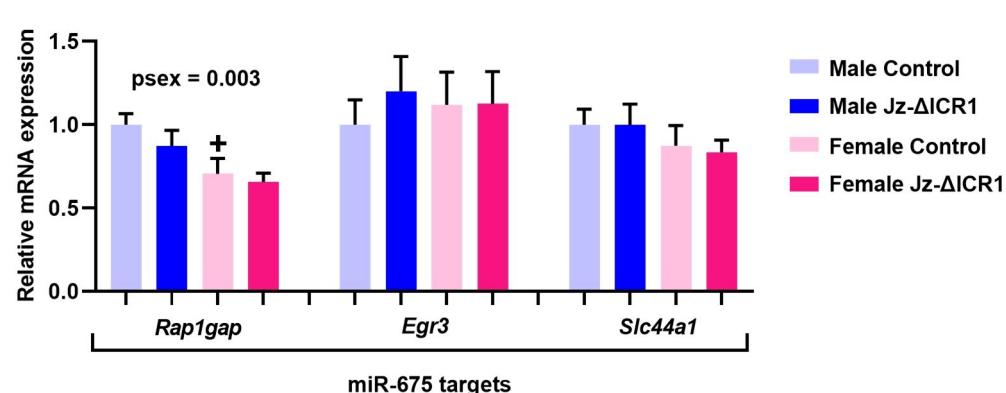

Fig. S4.**A**

Fig. S4. Jz-ΔICR1 does not alter the gene expression of miR-675 targets. (A) Expression of miR-675 target genes in Jz samples relative to the geometric mean of housekeeping genes (*Hprt* and *Ywhaz*) using qPCR (n = 8-10 per genotype/sex, across 11 litters). Data were obtained on D16. Values presented as mean + SEM with significance assessed by two-way ANOVA and pairwise T-test (psex < 0.05 = +).

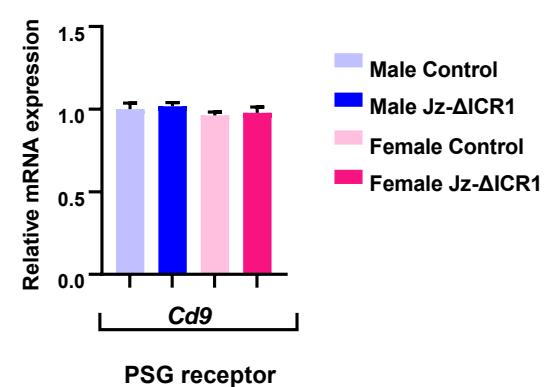

A

Fig. S5. Jz-ΔICR1 did not alter the expression of the PSG receptor Cd9 in the Lz. (A) Expression *Cd9* in Lz samples relative to the geometric mean of housekeeping genes (*Hprt* and *Polr2a*) with Jz-ICR1Δ using qPCR (n = 9-10 per genotype/sex, across 11 litters). Data were obtained on D16. Values presented as mean + SEM with significance assessed by two-way ANOVA.

Table S1. The effect of Jz-ΔICR1 on conceptus weight, placental volume and the proportion of cell types within the Jz and Db of D16 mouse placentas in males and females.

	Male		Female		Overall P Values		
	Control	Jz-ΔICR1	Control	Jz-ΔICR1	Genotype	Sex	Interaction
