

Subject Index

- Abdominal muscles**
development in *Drosophila*: LAWRENCE & JOHNSTON 72, 197
- Acetylcholine**
receptor density on amphibian embryonic muscle cells: MOODY-CORBETT & COHEN 72, 53
- Actin**
filaments in early chick embryo ectoderm: WAKELY & BADLEY 69, 169
- Adhesiveness**
and acetylcholine receptor density on embryonic muscle cells: MOODY-CORBETT & COHEN 72, 53
changes in cell surface in mouse embryo: KIMBER, SURANI & BARTON 70, 133
- Agglutinin**
receptors in early postimplantation mouse embryos: NOGUCHI, NOGUCHI, WATANABE & MURAMATSU 72, 39
- Aggregation chimaeras**
formed between teratocarcinomas and mouse embryos: STEWART 67, 167
from mouse embryos: LEWIS & ROSSANT 72, 169
- Ambystoma**
axial polarity in limb regeneration blastema: STOCUM 71, 193
control of pattern formation in limb ontogeny: STOCUM & FALLON 69, 7
neurotrophic control of repair of injured forelimbs: MESCHER 69, 183
- Amputation**
effect on motor projection patterns in chick embryos: LAING 72, 269
- Aneuploid**
mouse embryos: MAGNUSON, SMITH & EPSTEIN 69, 223
- Aneuploidy**
in mouse embryos following ethanol treatment: KAUFMAN 71, 139
- Annulate lamellae**
in oocytes of newt: IMOY 70, 153
- Anophthalmic**
murine strain: SALAÜN 67, 71
- Antennae**
regeneration in the cockroach: FRENCH & DOMICAN 67, 153
- Anthocidaris crassispina***
SEM of gastrulation: AMEMIYA, AKASAKA & TERAYAMA 67, 27
- Antibodies**
to study cell shapes on surface of *Drosophila* wing disc: BROWER, SMITH & WILCOX 67, 137
- Antigen**
in mouse preimplantation embryo: RANDLE 70, 261
- Antiserum**
teratogenic effect on rat yolk-sac function FREEMAN, BRENT & LLOYD 71, 63
- Apical ectodermal ridge**
and limb development in chick: ROWE & FALLON 68, 1
in wingless mutant chicks: SAWYER 68, 69
role in chick development: MACCABE & RICHARDSON 67, 1
- Area opaca vasculosa**
multiple induction in chick blastoderm: ZAGRIS 68, 115
stabilization in chick blastoderm: ZAGRIS: 68, 115
- Autoradiography**
of mouse embryonic ectoderm during gastrulation: BEDDINGTON 69, 265
- Axial organization**
of axolotl regenerating limbs: MADEN & MUSTAFA 70, 197
- Axial polarity**
in urodele limb regeneration blastema: STOCUM 71, 193
- Axolotl**
axial organization of regenerating limb: MADEN & MUSTAFA 70, 197
protein synthesis during limb regeneration: SLACK 70, 241
- Axon guidance**
in development of chick wing: AL-GHAITH & LEWIS 68, 149
- Basal bodies**
in oral apparatus of *Tetrahymena thermophila*: BAKOWSKA, FRANKEL & NELSEN 69, 83
- Basal lamina**
role in induction of bone in chick: HALL & VAN EXAN 69, 37
- Bithorax**
lethals in *Drosophila*: KERRIDGE & MORATA 68, 211

- mutant of *Drosophila*: COLE & PALKA 71, 41
- Blabera craniifer**
regeneration of supernumerary antennae: FRENCH & DOMICAN 67, 153
- Blastema**
determination of axial polarity in urodele STOCUM 71, 193
- Blastocyst**
initiation of implantation in mouse: NILSSON, MAGNUSSON, WIDÉHN, & HILL-ENSJÖ 71, 75
injection in mouse: GARDNER 68, 175
mouse
injections of embryonal carcinoma cells: ROSSANT & MCBURNEY 70, 99
injection of Friend leukemia cells: CALEF, CRIMI, FRUSCALZO & JUCKER 70, 37
with two inner cell masses: TARKOWSKI & WOJEWODZKA 71, 215
- Blastoderm**
chick
effects of hypoblast removal on epiblast: VANROELEN, VERPLANKEN & VAKAET 70, 189
- Blastulation**
effect of lithium in mouse embryos: IZQUIERDO & BECKER 67, 51
- Bromodeoxyuridine**
incorporation and induction of polydactyly in rat embryos: WISE & SCOTT 72, 125
- BUdR** (SEE Bromodeoxyuridine)
- α -bungarotoxin**
effect on motor projection patterns in chick embryos: LAING 72, 269
- Caenorhabditis elegans***
programmed cell death in nerve cord: ROBERTSON & THOMSON 67, 89
- Calcium**
and wound healing in *Xenopus* early embryos: STANISSTREET 67, 195
- Campaniform sensilla**
in *Drosophila* mutants: COLE & PALKA 71, 41
- Cardiac muscle cells**
differentiation in teratocarcinoma embryoid cell lines: UNO 69, 127
- Cavity formation**
in teratocarcinoma embryoid body lines: UNO 69, 127
- Cell behaviour**
in developing somites of mouse *in vitro*: FLINT & EDE 67, 113
- Cell contact**
of limb-bud mesenchymal cells during mouse development: ZIMMERMANN, SCHARLACH & KAATZ 72, 1
- Cell culture**
of amphibian embryonic muscle cells: MOODY-CORBETT & COHEN 72, 53
- Cell death**
effect of bromodeoxyuridine on limb-bud cells of rat embryos: WISE & SCOTT 72, 125
programmed
in nerve cord of *Caenorhabditis* larvae: ROBERTSON & THOMSON 67, 89
- Cell lineage**
analysis of reconstituted mouse blastocysts: PAPAIOANNOU 68, 199
in extraembryonic endoderm of mouse embryo: GARDNER 68, 175
- Cell membrane**
agents which affect it in mouse embryos: PRATT, ZIOMEK, REEVE & JOHNSON 70, 113
regionalization in early mouse embryos: IZQUIERDO & EBENSPERGER 69, 115
- Cell migration**
from chick olfactory placode: MENDOZA, BREIPOHL & MIRAGALL 69, 47
- Cell number**
reduction in mouse embryos after lithium treatment: IZQUIERDO & BECKER 67, 51
- Cell shape**
changes during wound healing in *Xenopus* embryos: STANISSTREET 67, 195
- Cell surface**
adhesiveness in mouse embryos: KIMBER, SURANI & BARTON 70, 133
localization of receptors for *Dolichos biflorus* agglutinin: NOGUCHI, NOGUCHI, WATANABE & MURAMATSU 72, 39
properties in early differentiation of *Dictyostelium*: SHARPE, TREFFRY & WATTS 67, 181
structure during neural induction in *Pleurodeles*: DUPRAT, GUALANDRIS & ROUGE 70, 171
- Cerebellar mutants**
in mouse: WETTS & HERRUP 68, 87
- Chick**
blastoderm
effects of partial hypoblast removal on epiblast: VANROELEN, VERPLANKEN & VAKAET 70, 189
hypoblast induction: ZAGRIS 68, 115
localization of microfilament bundles: VAKAET & VANROELEN 67, 59

- embryo
 actin filaments in early ectoderm: WAKELY & BADLEY 69, 169
 cell migration from olfactory placode: MENDOZA, BREIPOHL & MIRAGALL 69, 47
 differentiation of gonads: MCCARREY & ABBOTT 68, 161
 digestive-tract mesenchymes cultured with quail endoderm: MASUI 72, 117
 effect of testis graft on Müllerian duct regression in the female: MARAUD, RASHEDI & STOLL 67, 81
 effects of ultraviolet light on limb-bud development: HONIG 71, 223
 fibronectin localization: SANDERS 71, 155
 induction of bone by epithelial cell products: HALL & VAN EXAN 69, 37
 interdigital surface changes during digit morphogenesis: HURLE & COLVEE 69, 251
 limb development in wingless mutants: SAWYER 68, 69
 motor projection patterns to hind limbs: LAING 72, 269
 osteogenesis in mandibular arches: HALL 68, 127
 proteoglycans from developing limb buds: VASAN 70, 61
 proximodistal determination in leg: ROWE & FALLON 68, 1
- gonads
 differentiation following depletion of primordial germ cells: MCCARREY & ABBOTT 68, 161
- limb
 control of innervation: SWANSON & LEWIS 71, 121
 development inhibited by polarizing zone cells: FREDERICK & FALLON 67, 13
 further evidence on action of polarizing zone: ROWE & FALLON 69, 1
 in wingless mutants: SAWYER 68, 69
 morphogenetic substance in development: MACCABE & RICHARDSON 67, 1
- wing
 pioneer growth cones: AL-GHAITH & LEWIS 68, 149
- Chimaeras**
 between Lurcher and wild-type mouse: WETTS & HERRUP 68, 87
 between mouse embryo and EC cells: ROSSANT & MCBURNEY 70, 99
 between mouse embryos and teratocarcinomas: STEWART 67, 167
 between two mouse species: ROSSANT, MAURO & CROY 69, 141
- mouse
 produced from aggregates of embryonic cells: LEWIS & ROSSANT 72, 169
 testicular teratocarcinogenesis: REGENASS, FRIEDRICH & STEVENS 72, 153
 of mouse blastocysts: TARKOWSKI & WOJEWODZKA 71, 215
 used to investigate tissue potency in mouse embryos: BEDDINGTON 69, 265
 used to investigate cell lineage in mouse embryos: GARDNER 68, 175
- Chlorocyclizine**
 effects on palatal shelf elevation in mouse
 BRINKLEY & VICKERMAN 69, 193
- Chondrogenesis**
 in chick mandible: HALL 68, 127
 in mouse limb-bud development: ZIMMERMANN, SCHARLACH & KAATZ 72, 1
- Chromosome 19**
 development of monosomic mouse embryos: MAGNUSON, SMITH & EPSTEIN 69, 223
- Ciliary degeneration**
 during conjugation in *Paramecium*: WATANABE 70, 19
- Ciliary pattern**
 in a ciliate *Dileptus*: GOLINSKA 68, 99
- Ciliate**
 pattern regulation in *Tetrahymena*: BAKOWSKA, FRANKEL & NELSEN 69, 83
 regulation of ciliary pattern: GOLINSKA 68, 99
- Cleavage**
 effect of lithium in mouse embryos: IZQUIERDO & BECKER 67, 51
 of *Xenopus* eggs: CHRISTENSEN & MERRIAM 72, 143
- Clonal analysis**
 of *Drosophila* abdomen: LAWRENCE & JOHNSTON 72, 197
 of effects of *Ultrabithorax* alleles of *Drosophila*: KERRIDGE & MORATA 68, 211
- Cockroach**
 regeneration of supernumerary antennae
 FRENCH & DOMICAN 67, 153
- Compaction**
 in mouse embryos: PRATT, ZIOMEK, REEVE & JOHNSON 70, 113
- Compartments**
 developmental
 in *Drosophila* abdominal development: LAWRENCE & JOHNSTON 72, 197
 in *Drosophila* wing imaginal disc: BROWER, SMITH & WILCOX 67, 137

Compound eyes

- in *Xenopus laevis*: their retinotectal fibre pathways: FAWCETT & GAZE 72, 19
- projection to virgin tectum in *Xenopus*: STRAZNICKY & GAZE 68, 9

Conjugation

- of *Paramecium*: WATANABE 70, 19

Contractility

- of *Xenopus* egg cortex: CHRISTENSEN & MERRIAM 72, 143

Culture

- of normal and mutant mouse embryos: COPP, SELLER & POLANI 69, 151
- of rat embryos with cathepsin inhibitor: BECK & LOWY 71, 1

Cuticle

- effect of juvenile hormone: WILLIS, REZAU & SEHNAL 71, 25

Cuticular polarity

- in *Drosophila melanogaster*: GUBB & GARCÍA-BELLIDO 68, 37

Cynops pyrrhogaster

- maturation of oocytes: IMOH 70, 153

Cytochalasin B

- effect on cleavage of *Xenopus* egg: CHRISTENSEN & MERRIAM 72, 143

Cytochrome oxidase

- and oxygen consumption in mouse blastocysts: NILSSON, MAGNUSSON, WIDÉHN & HILLENSJÖ 71, 75

Cytokinesis

- in mouse morulae: SOŁTYŃSKA 68, 137

Cytoplasmic streaming

- in *Drosophila* oogenesis: GUTZEIT & KOPPA 67, 101

Dermal papillae

- volume determines hair volume in rats and mice: IBRAHIM & WRIGHT 72, 209

Determination

- of cuticular polarity in *Drosophila*: GUBB & GARCÍA-BELLIDO 68, 37
- of proximodistal pattern in chick leg: ROWE & FALLON 68, 1

Dictyostelium discoideum

- early stages of differentiation: SHARPE, TREFFRY & WATTS 67, 181
- size regulation: KOPACHIK 68, 23
- spatial pattern of aggregation centres: WADDELL 70, 75

Digit

- development in chick and duck embryos: HURLE & COLVEE 69, 251

Dileptus

- regulation of ciliary pattern: GOLINSKA 68, 99

Diploid

- mouse embryo development: BORSUK 69, 215

Dolichos biflorus

- agglutinin receptors in mouse embryos: NOGUCHI, NOGUCHI, WATANABE & MURAMATSU 72, 39

Drosophila melanogaster

- campaniform sensilla in wild types and mutants: COLE & PALKA 71, 41
- cell lineage of abdominal epidermis, oenocytes and ventral muscles: LAWRENCE & JOHNSTON 72, 197
- cell shapes on surface of wing imaginal disc: BROWER, SMITH & WILCOX 67, 137
- determination of cuticular polarity: GUBB & GARCÍA-BELLIDO 68, 37
- flightless mutants: DEAK *and others* 69, 61
- time-lapse film analysis of cytoplasmic streaming: GUTZEIT & KOPPA 67, 101
- Ultrabithorax* alleles: KERRIDGE & MORATA 68, 211

Duck

- embryo
 - interdigital surface changes during digit morphogenesis: HURLE & COLVEE 69, 251

Dugesia lugubris

- redifferentiation of germ cell during regeneration: GREMIGNI, NIGRO & PUCCINELLI 70, 29

Ectoderm

- Organization of actin filaments in early chick: WAKELY & BADLEY 69, 169
- tissue potency in different regions during gastrulation: BEDDINGTON 69, 265

Egg cortex

- of *Xenopus*: effect of cytochalasin B: CHRISTENSEN & MERRIAM 72, 143

Electron microscopy

- of cell migration from chick olfactory placode: MENDOZA, BREIPOHL & MIRAGALL 69, 47
- of cell positioning in mouse morulae: SOŁTYŃSKA 68, 137
- of gliogenesis in optic nerve of *Xenopus*: CIMA & GRANT 72, 251
- of limb development in mutant chick embryos: SAWYER 68, 69
- of optic nerve development in *Xenopus*: CIMA & GRANT 72, 225
- transmission
 - in microfilament bundles in chick blastoderm: VAKAET & VANROELEN 67, 59

- Electrophoresis**
study of protein synthesis in mouse: VAN BLERKOM, JANZEN & RUNNER 72, 97
- Embryoid body**
lines of mouse teratocarcinoma: UNO 69, 127
- Embryonal carcinoma (EC)**
injection into mouse blastocysts: ROSSANT & MCBURNEY 70, 99
monoclonal antibody against used in mouse embryos: RANDLE 70, 261
- Enzyme activity**
in cell membrane of early mouse embryos
IZQUIERDO & EBENSPEGER 69, 115
- Epiblast**
cell morphology in chick blastoderm: VANROELEN, VERPLANKEN & VAKAET 70, 189
X-chromosome inactivation in mouse embryos: RASTAN 71, 11
- Epithelia**
induction of bone by cell products: HALL & VAN EXAN 69, 37
osteogenically inductive in chick mandible
HALL 68, 127
- Ethanol**
induced parthenogenesis in mouse: KAUFMAN 71, 139
- Extraembryonic endoderm**
cell lineage and differentiation in mouse:
GARDNER 68, 175
- Extraocular muscle**
differentiation of fibre types in rat: NAG & CHENG 71, 171
- Eye**
transplantations
and visuotectal projections in *Xenopus*:
MUNRO & BEAZLEY 71, 97
- Fate maps**
of mutations affecting indirect flight muscles
in *Drosophila*: DEAK and others 69, 61
- Fibre**
differentiation in extraocular muscle of rat
NAG & CHENG 71, 171
- Fibre pathways**
from *Xenopus* normal and compound eyes
FAWCETT & GAZE 72, 19
- Fibronectin**
localization in early chick embryo:
SANDERS 71, 155
- Filament bundles**
in cells of mouse morulae: SOŁTYŃSKA 68, 137
- Friend leukemia cells**
injected into mouse blastocysts: CALEF, CRIMI, FRUSCALZO & JUCKER 70, 37
- Gastrulation**
and localization of fibronectin: SANDERS 71, 155
in the mouse – tissue potency in different regions: BEDDINGTON 69, 265
of chick embryos: VAKAET & VANROELEN 67, 59
of sea urchin embryos: AMEMIYA, AKASAKA & TERAYAMA 67, 27
- Genetic analysis**
of mutations affecting indirect flight muscles in *Drosophila*: DEAK and others 69, 61
- Gene expression**
in preimplantation mouse embryos: KIDDER & PEDERSEN 67, 37
- Genotype**
of trophoblast and survival of interspecific chimaeras: ROSSANT, MAURO & CROY 69, 141
- Germ cells**
effects of depletion on chick gonad development: MCCARREY & ABBOTT 68, 161
redifferentiation in planarian regeneration:
GREMIGNI, NIGRO & PUCCINELLI 70, 29
- Germinal plate**
structure and segmentation in leech
Hirudo medicinalis: FERNÁNDEZ & STENT 72, 71
- Germ line**
of *Tetradontophora* (Insecta): KLAG 72, 183
- Gliogenesis**
in optic nerve of *Xenopus laevis*: CIMA & GRANT 72, 251
- Glycoconjugate**
in postimplantation mouse embryos:
NOGUCHI, NOGUCHI, WATANABE & MURAMATSU 72, 39
- Glycosaminoglycans**
role in palatal shelf elevation in mouse embryo: BRINKLEY & VICKERMAN 69, 193
- Gonad**
regulation of meiosis in foetal mouse:
EVANS, ROBB, TUCKETT & CHALLONER 68, 59
- Gonadal differentiation**
in chick embryos: MCCARREY & ABBOTT 68, 161
- Grafting experiments**
on anophthalmic mouse embryos: SALAÜN 67, 71
on antennae of the cockroach: FRENCH & DOMICAN 67, 153
operations on axolotl regenerating limbs:
MADEN & MUSTAFA 70, 197

- used to study regression of Müllerian ducts
MARAUD, RASHEDI & STOLL 67, 81
- Growth cones**
in chick wing mesenchyme: AL-GHAITH &
LEWIS 68, 149
- Gynogenetic**
diploid mouse embryo development: BOR-
SUK 69, 215
- Hair growth**
study using rat and mouse vibrissal
follicles: IBRAHIM & WRIGHT 72, 209
- Haploid**
mouse embryos following ethanol acti-
vation: KAUFMAN 71, 139
- Hirudo medicinalis***
embryonic development: FERNÁNDEZ &
STENT 72, 71
- H-2K^k**
antigen in developing mouse palates:
MELNICK, JASKOLL & MARAZITA 70, 45
- Homeotic mutants**
of *Drosophila melanogaster*: COLE & PALKA
71, 41
- Hypoblast**
effects of removal in chick blastoderm:
VANROELEN, VERPLANKEN & VAKAET 70,
189
induction in chick blastoderm: ZAGRIS 68,
115
- Imaginal discs**
of *Drosophila* – study of surface cell
shapes: BROWER, SMITH & WILCOX 67, 137
- Immunocytochemical study**
of actin filaments in early chick embryo:
WAKELY & BADLEY 69, 169
of fibronectin localization in chick embryos
SANDERS 71, 155
- Implantation**
of delayed mouse blastocysts: NILSSON,
MAGNUSSON, WIDÉHN & HILLENSJÖ 71, 75
- Indirect flight muscles**
mutations in *Drosophila*: DEAK and others
69, 61
- Induction**
neural
and cell surface structure: DUPRAT,
GUALANDRIS & ROUGE 70, 171
of bone by epithelial cell products:
HALL & VAN EXAN 69, 37
of cartilage and bone in chick mandible:
HALL 68, 127
- Inhibition**
of meiosis in foetal mouse gonad: EVANS,
ROBB, TUCKETT & CHALLONER 68, 59
- Injury**
repair of larval urodele forelimbs: MESCHER
69, 183
- Inner cell masses (ICM)**
in chimaeric mouse blastocysts: TARKOW-
SKI & WOJEWODZKA 71, 215
of mouse embryos – lineage analysis:
PAPAIOANNOU 68, 199
- Innervation**
in *Xenopus* embryos: DAVIES, KITSON &
ROBERTS 70, 215
- Insect**
cuticle
effect of juvenile hormone: WILLIS,
REZAUR & SEHNAL 71, 25
Tetradontophora bielensis
origin of primordial germ cells: KLAG
72, 183
- Interdigital epithelium**
in chick and duck foot development:
HURLE & COLVEE 69, 251
- Intestinalization**
of quail area-vitellina endoderm: MASUI
72, 117
- Intrafoetal grafts**
of optic anlage in mouse embryos:
SALAÜN 67, 71
- In vitro**
culture of rat embryos: FREEMAN, BRENT &
LLOYD 71, 63
development of normal and mutant mouse
embryo somites: FLINT & EDE 67, 113
differentiation of optic cups in mouse
embryos: SALAÜN 67, 71
- Juvenile hormone**
and composite insect cuticle: WILLIS,
REZAUR & SEHNAL 71, 25
- Lectins**
and neural induction in *Pleurodeles*:
DUPRAT, GUALANDRIS & ROUGE 70,
171
- Leech**
embryonic development of *Hirudo medici-
nalis*: FERNÁNDEZ & STENT 72, 71
- Leg**
development in the chick: ROWE & FALLON
68, 1
- Leupeptin**
effect on rat embryo cultures: BECK &
LOWY 71, 1
- Light microscopy**
of cell migration from chick olfactory
placode: MENDOZA, BREIPOHL & MIRA-
GALL 69, 47

Limb

- grafts in salamanders: DINSMORE 71, 109
- innervation
 - in chick wing bud: SWANSON & LEWIS 71, 121
 - in developing chick wing: AL GHAITH & LEWIS 68, 149
- morphogenesis
 - in chick and duck embryos: HURLE & COLVEE 69, 251
- ontogeny
 - pattern formation in urodeles: STOCUM & FALLON 69, 7

Limb bud

- cell contact and surface coat alterations of mesenchyme: ZIMMERMANN, SCHARLACH & KAATZ 72, 1
- chick
 - proteoglycans during development: VASAN 70, 61
 - development and effect of bromodeoxyuridine in rat embryos: WISE & SCOTT 72, 125

Limb development

- in chick
 - action of polarizing zone: ROWE & FALLON 69, 1
 - characterization of a morphogenetic factor: MACCABE & RICHARDSON 67, 1
 - morphogenetic inhibition by polarizing zone cells: FREDERICK & FALLON 67, 13
 - Proximodistal determination: ROWE & FALLON 68, 1

Limb regeneration

- blastema
 - in axolotl: SLACK 70, 241
 - in larval urodeles: MESCHER 69, 183
 - in urodeles: STOCUM 71, 193

Lithium effect

- on preimplantation mouse embryos: IZQUIERDO & BECKER 67, 51

Lurcher

- mutant in mice: WETTS & HERRUP 68, 87

Maintenance factor

- in developing chick limb: MACCABE & RICHARDSON 67, 1

Maternal immune rejection

- in the mouse: ROSSANT, MAURO & CROY 69, 141

Maturation

- of oocytes in newt: IMOH 70, 153

Meiosis

- regulation in foetal mouse gonad: EVANS, ROBB, TUCKETT & CHALLONER 68, 59

Mesectoderm

- capabilities of avian trunk neural crest: NAKAMURA & AYER-LE LIEVRE 70, 1

Mesenchyme

- cell contact and surface coat alterations in mouse development: ZIMMERMANN, SCHARLACH & KAATZ 72, 1
- role in gastrulation of sea-urchin embryos: AMEMIYA, AKASAKA & TERAYAMA 67, 27

Mesoderm formation

- in teratocarcinoma embryoid cell lines: UNO 69, 127

Messenger RNA

- turnover in preimplantation mouse embryos: KIDDER & PEDERSEN 67, 37

Metamorphosis

- effect of juvenile hormone on cuticle: WILLIS, REZAUER & SEHNAL 71, 25

Microfilament bundles

- in chick blastoderm: VAKAET & VANROELEN 67, 59

Microsurgery

- on mouse blastocysts: PAPAIOANNOU 68, 199

Monoclonal antibody

- in mouse embryos: RANDLE 70, 261
- study of mouse palate: MELNICK, JASKOLL & MARAZITA 70, 45

Monosomy 19

- mouse embryos: MAGNUSON, SMITH & EPSTEIN 69, 223

Morphogen

- in the developing chick limb: MACCABE & RICHARDSON 67, 1
- role in chick leg development: ROWE & FALLON 69, 1

Morphogenesis

- in a ciliate *Dileptus*: GOLINSKA 68, 99

Morphogenetic

- effects of tail skin on urodele limb grafts: DINSMORE 71, 109

Morphogenetic inhibition

- of chick limb development by polarizing zone cells: FREDERICK & FALLON 67, 13

Morphology

- of epiblast in chick blastoderm: VANROELEN, VERPLANKEN & VAKAET 70, 189
- of programmed cell death in nerve cord of *Caenorhabditis*: ROBERTSON & THOMSON 67, 89

Motoneuron

- death in hind limb of normal and paralysed chick embryos: LAING 72, 269

Mouse

blastocyst

cell lineage in extraembryonic endoderm: GARDNER 68, 175

cytochrome oxidase and oxygen consumption: NILSSON, MAGNUSSON, WIDÉHN & HILLENSJÖ 71, 75

lineage analysis of ICM and trophectoderm: PAPAIOANNOU 68, 199

with two inner cell masses: TARKOWSKI & WOJEWODZKA 71, 215

chimaeras

role of trophoblast genotype in survival: ROSSANT, MAURO & CROY 69, 141

embryo

cell contact and surface coat alterations of limb bud mesenchyme: ZIMMERMANN, SCHARLACH & KAATZ 72, 1

cell interactions in developing somite: FLINT & EDE 67, 113

cell membrane regionalization: IZQUIERDO & EBENSPERGER 69, 115

cell surface adhesiveness: KIMBER, SURANI & BARTON 70, 133

compaction: PRATT, ZIOMEK, REEVE & JOHNSON 70, 113

development of euploid male teratocarcinoma cell line: ROSSANT & MCBURNEY 70, 99

differentiation of optic cups *in vitro* and in grafts: SALAÜN 67, 71

effect of lithium on development: IZQUIERDO & BECKER 67, 51

ethanol-induced aneuploidy: KAUFMAN 71, 139

formation of chimaeras with teratocarcinomas: STEWART 67, 167

glycosaminoglycans role in palatal shelf elevation: BRINKLEY & VICKERMAN 69, 193

in monosomy 19 individuals: MAGNUSON SMITH & EPSTEIN 69, 223

localization of H-2K^k using monoclonal antibody: MELNICK, JASKOLL & MARAZITA 70, 45

monoclonal antibody reactivity: RANDLE 70, 261

normal and mutant, neural tube development: COPP, SELLER & POLANI 69, 151

paternal X inactivation in extraembryonic tissues: HARPER, FOSTEN & MONK 67, 127

phenotypic expression of a $t^6/t^6/t^6$ genotype: MCGRATH & HILLMAN 69, 107

preimplantation development of gynogenetic diploids: BORSUK 69, 215

protein synthesis patterns: VAN BLERKOM JANZEN & RUNNER 72, 97

receptors for *Dolichos biflorus* agglutinin: NOGUCHI, NOGUCHI, WATANABE & MURAMATSU 72, 39

regulation of meiosis in gonad: EVANS, ROBB, TUCKETT & CHALLONER 68, 59

role of neoplastic cells in development: CALEF, CRIMI, FRUSCALZO & JUCKER 70, 37

size regulation in aggregates: LEWIS & ROSSANT 72, 169

testicular teratomas in chimaeric gonads REGENASS, FRIEDRICH & STEVENS 72, 153

timing of X-chromosome inactivation: RASTAN 71, 11

tissue potency in different regions of ectoderm during gastrulation: BEDDINGTON 69, 265

turnover of messenger RNA: KIDDER & PEDERSEN 67, 37

hair growth

a quantitative study: IBRAHIM & WRIGHT 72, 209

lurcher mutant

neurological studies: WETTS & HERRUP 68, 87

morulae

ultrastructural study of cell positioning: SOLTYŃSKA 68, 137

Müllerian duct

regression in female chick embryo: MARAUD, RASHEDI & STOLL 67, 81

Multiple area vasculosae

induction in chick blastoderm: ZAGRIS 68, 115

Muscle

amphibian

embryonic cells cultured without nerve: MOODY-CORBETT & COHEN 72, 53

differentiation in rat embryos: NAG & CHENG 71, 171

Muscles

abdominal

of *Drosophila*: LAWRENCE & JOHNSTON 72, 197

Mutant

amputated (am/am) in mouse embryo: FLINT & EDE 67, 113

bithorax complex of *Drosophila*: COLE & PALKA 71, 41

curly tail in mouse: COPP, SELLER & POLANI 69, 151

- Lurcher of mouse: WETTS & HERRUP 68, 87
 wingless of chick: SAWYER 68, 69
 ZRDT/an an anophthalmic murine strain: SALAÜN 67, 71
- Mutants**
 polarity in *Drosophila melanogaster*: GUBB & GARCÍA-BELLIDO 68, 37
- Mutation**
 r^6 in mouse embryos: MCGRATH & HILLMAN 69, 107
 Ultrabithorax in *Drosophila*: KERRIDGE & MORATA 68, 211
- Mutations**
 affecting indirect flight muscles in *Drosophila*: DEAK and others 69, 61
- Myelination**
 in optic nerve of *Xenopus laevis*: CIMA & GRANT 72, 251
- Nematode**
 nerve cord development in *Caenorhabditis*: ROBERTSON & THOMSON 67, 89
- Nerve**
 pathways
 in chick wing buds: SWANSON & LEWIS 71, 121
- Nerve cord**
 development in larvae of *Caenorhabditis*: ROBERTSON & THOMSON 67, 89
- Neural crest**
 mesectodermal capabilities in birds: NAKAMURA & AYER-LE LIEVRE 70, 1
 role in osteogenesis in the chick: HALL & VAN EXAN 69, 37
 role in osteogenesis of chick mandibular arches: HALL 68, 127
- Neural induction**
 in *Pleurodeles* and cell surface structure: DUPRAT, GUALANDRIS & ROUGE 70, 171
- Neural tube**
 development in mouse embryos: COPP, SELLER & POLANI 69, 151
- Neurite network**
 scanning e.m. study in *Xenopus*: ROBERTS & TAYLOR 69, 237
- Neurites**
 in *Xenopus* embryo development: DAVIES, KITSON & ROBERTS 70, 215
- Neuronotrophic**
 effects of skeletal muscle fractions on spinal cord: HSU, NATYZAK & TRUPIN 71, 83
- Neurotrophic**
 control of repair of injured forelimbs: MESCHER 69, 183
- Newt**
 oocyte
 behaviour of annulate lamellae: IMOHO 70, 153
- Nuage granules**
 in primordial germ cells in *Tetradontophora* (Insecta): KLAG 72, 183
- 5' Nucleotidase**
 activity in early mouse embryonic cell membranes: IZQUIERDO & EBENSBERGER 69, 115
- Oenocytes**
 clonal analysis in *Drosophila*: LAWRENCE & JOHNSTON 72, 197
- Olfactory placode**
 of chick—ultrastructural study of cell migration: MENDOZA, BREIPOHL & MIRAGALL 69, 47
- Ontogeny**
 of urodele limbs: STOCUM & FALLON 69, 7
- Oogenesis**
 of *Drosophila*—cytoplasmic streaming: GUTZEIT & KOPPA 67, 101
- Optic cup**
 differentiation from an anophthalmic murine strain: SALAÜN 67, 71
- Optic nerve**
 development in *Xenopus laevis*: CIMA & GRANT 72, 225
 gliogenesis, myelination and metamorphic remodelling in *Xenopus*: CIMA & GRANT 72, 251
- Oral apparatus**
 of *Tetrahymena thermophila*: BAKOWSKA, FRANKEL & NELSEN 69, 83
- Organ development**
 in mouse and protein synthesis: VAN BLERKOM, JANZEN & RUNNER 72, 97
- Organelle transformation**
 in ciliate *Dileptus*: GOLINSKA 68, 99
- Osteogenesis**
 in chick mandibular arches: HALL 68, 127
 in embryonic chicks: HALL & VAN EXAN 69, 37
- Oxygen consumption**
 and cytochrome oxidase reaction in mouse blastocysts: NILSSON, MAGNUSSON, WIDÉHN & HILLENSJÖ 71, 75
- Palate development**
 in mouse embryos: MELNICK, JASKOLL & MARAZITA 70, 45
- Palate elevation**
 role of glycosaminoglycans in mouse: BRINKLEY & VICKERMAN 69, 193

- Paramecium**
 ciliary degeneration during conjugation:
 WATANABE 70, 19
- Parietal**
 endoderm-cell lineage and differentiation
 in mouse: GARDNER 68, 175
- Parthenogenesis**
 in mouse embryos following ethanol
 treatment: KAUFMAN 71, 139
- Partitioning**
 during early differentiation of *Dictyostelium*: SHARPE, TREFFRY & WATTS 67, 181
- Pattern formation**
 during chick limb development: FREDERICK
 & FALLON 67, 13
 in aggregation centres of *Dictyostelium*:
 WADDELL 70, 75
 in chick leg development: ROWE & FALLON
 69, 1
 in *Dictyostelium*: KOPACHIK 68, 23
- Pattern regulation**
 in oral apparatus of *Tetrahymena thermo-*
phila: BAKOWSKA, FRANKEL & NELSEN 69,
 83
- Peripheral neurites**
 development in *Xenopus*: ROBERTS &
 TAYLOR 69, 237
- Phosphoglycerate kinase-1**
 in preferential paternal X inactivation in
 early mouse embryos: HARPER, FOSTEN &
 MONK 67, 127
- Pioneer neurites**
 during development of *Xenopus* trigeminal
 innervation: DAVIES, KITSON & ROBERTS
 70, 215
- Planaria**
 redifferentiation of germ cells in regenera-
 tion: GREMIGNI, NIGRO & PUCCINELLI 70,
 29
- Plethodon cinereus**
 limb regeneration: DINSMORE 71, 109
- Pleurodeles waltl**
 neural induction and cell surface structure:
 DUPRAT, GUALANDRIS & ROUGE 70, 171
- Polarity**
 mutants of cuticular processes in *Droso-*
phila: GUBB & GARCÍA-BELLIDO 68, 37
- Polarizing factor**
 in the developing chick limb: MACCABE &
 RICHARDSON 67, 1
- Polarizing activity**
 in avian limb buds and effects of u.v. light:
 HONIG 71, 223
- Polarizing zone cells**
 effect on chick limb development: FREDER-
 ICK & FALLON 67, 13
 influence on chick leg development: ROWE
 & FALLON 69, 1
- Polydactyly**
 induction by bromodeoxyuridine in rat
 embryos: WISE & SCOTT 72, 125
- Positional information**
 during limb regeneration in axolotl:
 SLACK 70, 241
 effect of ultraviolet light in avian limb buds:
 HONIG 71, 223
 in early differentiation of *Dictyostelium*:
 SHARPE, TREFFRY & WATTS 67, 181
 in visuotectal system of *Xenopus*: MUNRO
 & BEAZLEY 71, 97
- Posterior neuropore closure (PNP)**
 in mouse embryos: COPP, SELLER & POLANI
 69, 151
- Postnatal development**
 of mouse; protein synthesis: VAN BLERKÖM,
 JANZEN & RUNNER 72, 97
- Potency**
 in different regions of mouse embryonic
 ectoderm: BEDDINGTON 69, 265
- Preimplantation**
 mouse embryos
 development and 5'-nucleotidase acti-
 vity: IZQUIERDO & EBENSPERGER 69, 115
 development of gynogenetic diploid
 mouse embryos: BORSUK 69, 215
 monoclonal antibody reactivity: RANDLE
 70, 261
 turnover of mRNA: KIDDER & PEDERSEN
 67, 37

 cell cloning from mouse embryo: GARDNER
 68, 175
- Primitive streak stage**
 chick embryos—localization of microfila-
 ments: VAKAET & VANROELEN 67, 59
- Primordial germ cells**
 and chick gonad development: MCCARREY
 & ABBOTT 68, 161
- Primordial germ cells (PGSs)**
 in *Tetradontophora* (Insecta): KLAG 72, 183
- Protein patterns**
 in mutant *Drosophila* flight muscles: DEAK
 and others 69, 61
- Protein synthesis**
 during limb regeneration in axolotl:
 SLACK 70, 241
- Protein synthesis**
 in mouse foetal and neonatal organs: VAN
 BLERKOM, JANZEN & RUNNER 72, 97
- Proteoglycans**
 from developing chick limb buds: VASAN
 70, 61

- Proteolytic inhibition**
in rat embryo cultures: BECK & LOWY 71, 1
- Prothoracic transformation**
in *Drosophila* bearing *Bithorax* alleles: KERRIDGE & MORATA 68, 211
- Protozoa**
pattern regulation in *Tetrahymena*: BAKOWSKA, FRANKEL & NELSEN 69, 83
- Purkinje cells**
in Lurcher chimaeric mice: WETTS & HERRUP 68, 87
- Quail**
embryo
effects of ultraviolet light on limb-bud development: HONIG 71, 223
intestinalization of area-vitellina endoderm: MASUI 72, 117
- Quail-chick**
nuclear marker system: NAKAMURA & AYER-LE LIEVRE 70, 1
- Rat**
embryo
differentiation of muscle types: NAG & CHENG 71, 171
effect of teratogenic antiserum on yolk-sac function: FREEMAN, BRENT & LLOYD 71, 63
effect of cathepsin inhibitor: BECK & LOWY 71, 1
formation of yolk-sac-derived teratomas: SOBIS, VAN HOVE & VANDEPUTTE 70, 225
induction of polydactyly by BUdR: WISE & SCOTT 72, 125
hair growth
a quantitative study: IBRAHIM & WRIGHT 72, 209
- Recombinant limbs**
inhibition of development by polarizing zone cells: FREDERICK & FALLON 67, 13
- Redifferentiation**
of male germ cells in planarian regeneration: GREMIGNI, NIGRO & PUCCINELLI 70, 29
- Regeneration**
in planaria and redifferentiation of germ cells: GREMIGNI, NIGRO & PUCCINELLI 70, 29
in urodele limb: STOCUM 71, 193
of axolotl limb: MADEN & MUSTAFA 70, 197
of limb in salamander: DINSMORE 71, 109
of supernumerary cockroach antennae: FRENCH & DOMICAN 67, 153
of urodele forelimbs: MESCHER 69, 183
- Regulation**
of ciliary pattern in *Dileptus*: GOLINSKA 68, 99
of meiosis in foetal mouse gonad: EVANS, ROBB, TUCKETT & CHALLONER 68, 59
- Retinotectal connections**
from *Xenopus* compound eyes: STRAZNICKY & GAZE 68, 9
- Retinotectal pathways**
from normal and compound *Xenopus* eyes: FAWCETT & GAZE 72, 19
- Ribonucleic acid (RNA)**
turnover in preimplantation mouse embryos: KIDDER & PEDERSEN 67, 37
