Jeff Williams (ICRF, Clare Hall)

*The Company of Biologists Limited*, founded in 1925, is a 'Company Limited by Guarantee' having tax-exempt charitable status. There is a Board of Directors consisting of about 20 professional biologists, two of them appointed annually by the Society for Experimental Biology, who receive no salary or fees for their services. The Company's main function is to own and produce *The Journal of Experimental Biology*, the *Journal of Cell Science* and *Development*, and to appoint the Editors of these journals. These are part-time appointments held by established professional biologists of some eminence, and once they have been appointed the Company exercises no control over editorial policy.

The Company is precluded by its charitable status from making a commercial profit on its operations, and its aim is to produce high-quality journals at the lowest possible price. Any surplus on publishing not required for the journals' reserves is transferred to an Educational Trust Fund, which makes substantial grants in aid of societies concerned with the fields of interest covered by the Company's journals. Grants are also made to conferences and summer schools in the fields of its journals.

#### *New Editor*

With effect from January 1st, 1991, Gerry Rubin will take over from Richard Hynes. Gerry Rubin is Professor of Genetics, in the Department of Molecular and Cell Biology, University of California at Berkeley. His particular research interests are in the control of development of invertebrate nervous systems. Manuscripts can be submitted direct to the following address.

Department of Molecular and Cell Biology  
Box 539, LSA Building  
University of California  
Berkeley  
CALIFORNIA 94720 USA  
Phone (415) 643-9945  
Fax (415) 643-9947

Papers can also be sent direct to Professor Doug Melton, to the Editorial office, or to one of the European Editors.
