

Development

Volume 111 (4)

April 1991

The Company of Biologists Limited

INFORMATION ABOUT THE JOURNAL

DEVELOPMENT (ISSN 0950-1991) is a continuation of *Journal of Embryology and Experimental Morphology* (ISSN 0022-0752).

Development

The **aim of Development** is to act as a forum for all research that offers a genuine insight into mechanisms of development. *Manuscripts will be considered primarily with respect to this aim.*

Studies on both plant and animal development are welcome and can be focused upon any aspect of the developmental process, at all levels of biological organization from the molecular and cellular to the tissue levels.

What Development offers

- (i) Wide international circulation
- (ii) Fast publication – average 13 weeks from acceptance
- (iii) Fast editorial processing
- (iv) No page charges
- (v) 200 free reprints
- (vi) Free colour reproduction (at the editor's discretion).

Rapid publication

Development now offers **rapid publication** (average 9 weeks from acceptance): the following criteria apply:

- (i) the revised manuscript is accompanied by a corresponding word-processor disk
- (ii) no colour plates
- (iii) author does not require to see proofs
- (iv) 200 free reprints only
- (v) manuscript conforms to journal style i.e. no subediting necessary – see Information for contributors.
- (vi) Figures are labelled in journal style.

Subscription rates

USA, Canada and Mexico: Institutional US\$885; Individual US\$105.
Rest of the World: Institutional £510; Individual £75.
(All prices include post and packaging).

Number of issues

Development in 1991 will have 12 normal issues and 2 casebound supplements. The 12 normal issues will be in the form of 3 volumes (111, 112, 113) each of 4 parts. In 1991 the Supplements will be 'Molecular and Cellular Basis of Pattern Formation' and 'Developmental Neurobiology'.

Orders

Orders for 1991, which can be in £ Sterling/Dollars or using Access/Visa credit cards, should be sent to Portland Press Ltd, PO Box 32, Commerce Way, Colchester CO2 8HP, UK [telephone Colchester (0206) 46351; 24-hour ordering by Fax (0206) 549331 – USA 44 206 549331] or to your normal agent or bookseller. Orders must be accompanied by payment.

Delivery

Copies of the journal for subscribers in the USA and Canada are sent by air to New Jersey for delivery with the minimum delay (second class postage paid at Rahway, NJ and at additional mailing offices).

Postmaster (USA mailing only)

Send address corrections to Development, c/o Mercury Airfreight International Inc., 2323 Randolph Avenue, Avenel, New Jersey 07001, USA (US Mailing Agent).

Reagents

Publication of a paper in this journal implies that authors will make available specialized reagents (for example antibodies, DNA probes) to other scientists in the field who require them for bona fide purposes.

For detailed instructions to authors, please see back cover.

Back volumes

Please contact Portland Press Ltd for prices.

Copyright and reproduction

(i) Authors may make copies of their own papers in this journal without seeking permission from The Company of Biologists Limited, *provided that such copies are for free distribution only: they must not be sold.*

(ii) Authors may re-use their own illustrations in other publications appearing under their own name without seeking permission.

(iii) Specific permission will *not* be required for photocopying copyright material in the following circumstances.

(a) For private study, provided the copying is done by the person requiring its use, or by an employee of the institution to which he/she belongs, without charge beyond the actual cost of copying.

(b) For the production of multiple copies of such material, to be used for bona fide educational purposes, provided this is done by a member of the staff of the university, school or other comparable institution, for distribution without profit to student members of that institution, provided the copy is made from the original journal.

(iv) For all other matters relating to the reproduction of copyright material written application must be made to

Dr R. J. Skaer,
Company Secretary,
The Company of Biologists Limited,
Department of Zoology,
Downing Street,
Cambridge CB2 3EJ,
UK.

Cover photograph

Fluorescence micrograph of sagittal section through 64-cell *Xenopus* embryo, with prospective dorsal midline on right side. Deep and peripheral yolk platelets were differentially stained *in vivo* to reveal cytoplasmic movements associated with dorsal-ventral patterning and cleavage furrowing. For more information, see article by Danilchik and Denegre in this issue, *Development* 111, 845-856 (1991).

DEVELOPMENT and JOURNAL OF CELL SCIENCE

Two journals making great strides, at a price you can afford!

We want to give you full access to these major journals

Take out a personal subscription to each for only 1/7 – 1/8 their normal subscription price

Advantages: wide international circulation; Rapid publication – 8 to 13 weeks from acceptance to publication; rapid refereeing; large format; 200 free reprints; highest quality reproduction; all profits put back into science – the journals are published by The Company of Biologists Limited, a registered charity directed by working scientists; all profits are invested in supporting meetings, summer schools, etc.

Cell Science

Personal Subscription Coupon ... Reductions for Individuals

YES, I wish to subscribe for 1991 as indicated:

DEVELOPMENT

- Please send me a 1991 subscription (14 issues) (January to December) to DEVELOPMENT, at the special individual rate of only \$105.00 (U.S. & Canada) £75.00 (rest of world)

n.b. Journals are sent usually by air or ASP to subscribers worldwide.

JOURNAL OF CELL SCIENCE

- Please send me a 1991 subscription (14 issues) (January to December) to JOURNAL OF CELL SCIENCE, at the special individual rate of only \$100.00 (U.S. & Canada) £75.00 (rest of world)

n.b. Journals are sent usually by air or ASP to subscribers worldwide.

Prices include charges for postage and handling

American Express MasterCard

Access Eurocard Visa

We offer:

Speed and quality of publication

We pay referees for review and rapid return of manuscripts
3 month publication time with superb quality halftones
200 free offprints

Savings on library, research and teaching budgets

Directors give their time free – it cuts the cost of publications
No page charges and our journals still cost less per page than many commercial journals
We waive all copyright fees for teaching purposes

Activities of benefit to biology

We finance conferences and summer schools in the field of the journals
We give grants to major biological societies
We give free publications to selected 3rd world libraries

The Company of Biologists Limited, founded in 1925, is a 'Company Limited by Guarantee' having tax-exempt charitable status. There is a Board of Directors consisting of about 20 professional biologists, two of them appointed annually by the Society for Experimental Biology, who receive no salary or fees for their services. The Company's main function is to own and produce *The Journal of Experimental Biology*, the *Journal of Cell Science* and *Development*, and to appoint the Editors of these journals. These are part-time appointments held by established professional biologists of some eminence, and once they have been appointed the Company exercises no control over editorial policy.

The Company is precluded by its charitable status from making a commercial profit on its operations, and its aim is to produce high-quality journals at the lowest possible price. Any surplus on publishing not required for the journals' reserves is transferred to an Educational Trust Fund, which makes substantial grants in aid of societies concerned with the fields of interest covered by the Company's journals. Grants are also made to conferences and summer schools in the fields of its journals.

Erratum

During the editorial processing of the article entitled "Nucleolar distribution of proteins B23 and nucleolin in mouse preimplantation embryos as visualized by immunoelectron microscopy" by Biggiogera *et al.* *Development* **110**, 1263–1270 (1990), an error occurred. While the micrographs were reduced by about 25 %, the indication of the magnification in the figure legends has not been modified.

The correct magnification values are the following:

Figs 1 and 2: $\times 37\,500$; Figs 3 and 4: $\times 21\,300$; Fig. 5: $\times 21\,700$; Fig. 6: $\times 22\,300$; Fig. 7: $\times 20\,900$; Fig. 8: $\times 22\,200$; Fig. 9: $\times 15\,800$.
