

Cover: Third instar *Drosophila* larval brain stained for the pan-neuroblast protein Deadpan (magenta) and the type II lineage reporter *Dichaete-gal4* driving membrane-bound GFP (green). Type II neuroblasts form in the embryo, undergo quiescence, and produce progeny that contribute to the adult central complex. Image courtesy of Omer Bayraktar. **See Research article by Walsh and Doe on p. 4552.**

SPOTLIGHT

- 4473** An interview with Claudio Stern
Grewal, S.

MEETING REVIEW

- 4476** The TGF β superfamily in Lisbon: navigating through development and disease
Christian, J. L. and Heldin, C.-H.

REVIEWS

- 4481** The hallmarks of cell-cell fusion
Hernández, J. M. and Podbilewicz, B.
- 4496** Mechanisms of gene regulation in human embryos and pluripotent stem cells
Theunissen, T. W. and Jaenisch, R.

HUMAN DEVELOPMENT

- 4510** The long non-coding RNA *ROCR* contributes to SOX9 expression and chondrogenic differentiation of human mesenchymal stem cells
Barter, M. J., Gomez, R., Hyatt, S., Cheung, K., Skelton, A. J., Xu, Y., Clark, I. M. and Young, D. A.

STEM CELLS AND REGENERATION

- 4522** Co-expression of Tbx6 and Sox2 identifies a novel transient neuromesoderm progenitor cell state
Javali, A., Misra, A., Leonavicius, K., Acharyya, D., Vyas, B. and Sambasivan, R.
- 4530** Notch is required for the formation of all nephron segments and primes nephron progenitors for differentiation
Chung, E., Deacon, P. and Park, J.-S.
- 4540** FOX and ETS family transcription factors regulate the pigment cell lineage in planarians
He, X., Lindsay-Mosher, N., Li, Y., Molinaro, A. M., Pellettieri, J. and Pearson, B. J.
- 4552** *Drosophila* embryonic type II neuroblasts: origin, temporal patterning, and contribution to the adult central complex
Walsh, K. T. and Doe, C. Q.

RESEARCH ARTICLES

- 4563** FGF receptors control alveolar elastogenesis
Li, R., Herriges, J. C., Chen, L., Mecham, R. P. and Sun, X.
- 4573** *Drosophila* β -Tubulin 97EF is upregulated at low temperature and stabilizes microtubules
Myachina, F., Bosshardt, F., Bischof, J., Kirschmann, M. and Lehner, C. F.
- 4588** Knockout of the Arp2/3 complex in epidermis causes a psoriasis-like disease hallmarked by hyperactivation of transcription factor Nrf2
van der Kammen, R., Song, J.-Y., de Rink, I., Janssen, H., Madonna, S., Scarponi, C., Albanesi, C., Brugman, W. and Innocenti, M.
- 4604** Neuronal LRP4 regulates synapse formation in the developing CNS
Karakatsani, A., Marichal, N., Urban, S., Kalamakis, G., Ghanem, A., Schick, A., Zhang, Y., Conzelmann, K.-K., Rüegg, M. A., Berninger, B., Ruiz de Almodovar, C., Gascón, S. and Kröger, S.
- 4616** Unique developmental trajectories and genetic regulation of ventricular and outflow tract progenitors in the zebrafish second heart field
Paffett-Lugassy, N., Novikov, N., Jeffrey, S., Abrial, M., Guner-Ataman, B., Sakthivel, S., Burns, C. E. and Burns, C. G.
- 4625** Conservation and variation in pair-rule gene expression and function in the intermediate-germ beetle *Dermestes maculatus*
Xiang, J., Reding, K., Heffer, A. and Pick, L.
- 4637** Juvenile hormone signaling in short germ-band hemimetabolism embryos
Fernandez-Nicolas, A. and Belles, X.
- 4645** Motor neurons with limb-innervating character in the cervical spinal cord are sculpted by apoptosis based on the Hox code in chick embryo
Mukaigasa, K., Sakuma, C., Okada, T., Homma, S., Shimada, T., Nishiyama, K., Sato, N. and Yaginuma, H.
- 4658** RPM-1 regulates axon termination by affecting growth cone collapse and microtubule stability
Borgen, M. A., Wang, D. and Grill, B.
- 4673** Different modes of APC/C activation control growth and neuron-glia interaction in the developing *Drosophila* eye
Neuert, H., Yuva-Aydemir, Y., Silies, M. and Klämbt, C.
- 4684** Axonemal dynein assembly requires the R2TP complex component Pontin
Li, Y., Zhao, L., Yuan, S., Zhang, J. and Sun, Z.
- 4694** *Hedgehog* participates in the establishment of left-right asymmetry during amphioxus development by controlling *Cerberus* expression
Hu, G., Li, G., Wang, H. and Wang, Y.
- 4704** HNF1B controls epithelial organization and cell polarity during ureteric bud branching and collecting duct morphogenesis
Desgrange, A., Heliot, C., Skovorodkin, I., Akram, S. U., Heikkilä, J., Ronkainen, V.-P., Miinalainen, I., Vainio, S. J. and Cereghini, S.
