

JEEM

Journal of Embryology and Experimental Morphology

Volume 64 August 1981

| | |
|--|---------|
| Eto, Kazuhiro, Figueroa, Alvaro, Tamara, Gakuzo and Pratt, Robert M. Induction of cleft lip in cultured rat embryos by localized administration of tunicamycin | 1-9 |
| Fabian, Barry and Eyal-Giladi, Hefzibah. A SEM study of cell shedding during the formation of the area pellucida in the chick embryo | 11-22 |
| Youn, B. Woo and Malacinski, George M. Somitogenesis in the amphibian <i>Xenopus laevis</i> : Scanning electron microscopic analysis of intrasomitic cellular arrangements during somite rotation | 23-43 |
| Kemler, Rolf, Brûlet, Philippe, Schnebelen, Marie-Thérèse, Gaillard, Jean and Jacob, François. Reactivity of monoclonal antibodies against intermediate filament proteins during embryonic development | 45-60 |
| Satoh, Noriyuki and Ikegami, Susumu. On the 'clock' mechanism determining the time of tissue-specific enzyme development during ascidian embryogenesis. II. Evidence for association of the clock with the cycle of DNA replication | 61-71 |
| Fukuda-Taira, Sumiko. Location of pre-hepatic cells in the early developmental stages of quail embryos | 73-85 |
| Beddington, R. S. P. An autoradiographic analysis of the potency of embryonic ectoderm in the 8th day postimplantation mouse embryo | 87-104 |
| Nichols, David H. Neural crest formation in the head of the mouse embryo as observed using a new histological technique | 105-120 |
| Reeve, Julie G. and Wild, Arthur E. Secondary lens formation from the cornea following implantation of larval tissues between the inner and outer corneas of <i>Xenopus laevis</i> tadpoles | 121-132 |
| Tam, P. P. L. and Snow, M. H. L. Proliferation and migration of primordial germ cells during compensatory growth in mouse embryos | 133-147 |
| Le Blanc, Jacqueline and Brick, Irving. Calcium and spreading behaviour of amphibian blastula and gastrula cells | 149-168 |
| Shankland, Marty. Development of a sensory afferent projection in the grasshopper embryo. I. Growth of peripheral pioneer axons within the central nervous system | 169-185 |
| Shankland, Marty. Development of a sensory afferent projection in the grasshopper embryo. II. Growth and branching of peripheral sensory axons within the central nervous system | 187-209 |
| Lewis, Julian, Chevallier, Alain, Kieny, Madeleine and Wolpert, Lewis. Muscle nerve branches do not develop in chick wings devoid of muscle | 211-232 |
| Zimmerman, Ernest F., Wee, Elizabeth L., Phillips, Nancy and Roberts, Nancy. Presence of serotonin in the palate just prior to shelf elevation | 233-250 |
| McMahon, Andy, Fosten, Mandy and Monk, Marilyn. Random X-chromosome inactivation in female primordial germ cells in the mouse | 251-258 |
| Aimar, Christian, Delarue, Michel and Vilain, Claude. Cytoplasmic regulation of the duration of cleavage in amphibian eggs | 259-274 |
| Nagel, M. D., Nagel, J. and Jacquot, R. Early erythropoiesis in foetal rat bone marrow: evidence for a liver-to-bone marrow relay | 275-293 |
| Kietbówna, Leokadia. The formation of somites and early myotomal myogenesis in <i>Xenopus laevis</i> , <i>Bombina variegata</i> and <i>Pelobates fuscus</i> | 295-304 |
| Hall, Brian K. The induction of neural crest-derived cartilage and bone by embryonic epithelia: an analysis of the mode of action of an epithelial-mesenchymal interaction | 305-320 |
| Lawrence, Peter A. A general cell marker for clonal analysis of <i>Drosophila</i> development | 321-332 |
| MacMillan, Gillian J. Experimental evidence for autonomous action of the periodic albinism (<i>ap</i>) gene within developing retinal pigment cells and melanophores of <i>Xenopus laevis</i> | 333-341 |
| Index of Authors | 343 |
