SLACK, J. M. W. Introduction	(i)
<i>1. Structure and properties of the oocyte and egg</i>	
WYLIE, C. C., BROWN, D., GODSAVE, S. F., QUARMBY, J. and HEASMAN, J. The cytoskeleton of <i>Xenopus</i> oocytes and its role in development	1–15
HAUSEN, P., WANG, Y. H., DREYER, C. and STICK, R. Distribution of nuclear proteins during maturation of the <i>Xenopus</i> oocyte	17–34
TAYLOR, M. A., ROBINSON, K. R. and SMITH, L. D. Intracellular pH and ribosomal protein S6 phosphorylation: role in translational control in <i>Xenopus</i> oocytes	35–52
MALACINSKI, G. M. and BARONE, D. Towards understanding paternal extragenic contributions to early amphibian pattern specification: the axolotl <i>ts-1</i> gene as a model system	53–68
<i>2. The relationship between egg cytoarchitecture and later pattern formation</i>	
COOKE, J. The system specifying body position in the early development of <i>Xenopus</i> , and its response to early perturbations	69–87
GIMLICH, R. L. Cytoplasmic localization and chordamesoderm induction in the frog embryo	89–111
<i>3. Analysis of developmental commitment using region and stage specific markers</i>	
DAWID, I. B., HAYNES, S. R., JAMRICH, M., JONAS, E., MIYATANI, S., SARGENT, T. D. and WINKLES, J. A. Gene expression in <i>Xenopus</i> embryogenesis	113–124
GURDON, J. B., MOHUN, T. J., BRENNAN, S. and CASCIO, S. Actin genes in <i>Xenopus</i> and their developmental control	125–136
SLACK, J. M. W., CLEINE, J. H. and SMITH, J. C. Regional specificity of glycoconjugates in <i>Xenopus</i> and axolotl embryos	137–153
JONES, E. A. Epidermal development in <i>Xenopus laevis</i> : the definition of a monoclonal antibody to an epidermal marker	155–166
DUPRAT, A. M., KAN, P., GUALANDRIS, L., FOULQUIER, F., MARTY, J. and WEBER, M. Neural induction: embryonic determination elicits full expression of specific neuronal traits	167–183
<i>4. Morphogenetic movements of gastrulation and neurulation</i>	
KELLER, R. E., DANILCHIK, M., GIMLICH, R. and SHIH, J. The function and mechanism of convergent extension during gastrulation of <i>Xenopus laevis</i>	185–209
BOUCAUT, J. C., DARRIBERE, T., LI, S. D., BOULEKBACHE, H., YAMADA, K. M. and THIERY, J. P. Evidence for the role of fibronectin in amphibian gastrulation	211–227
GORDON, R. A review of the theories of vertebrate neurulation and their relationship to the mechanics of neural tube birth defects	229–255
<i>5. The cell cycle and the temporal control of development</i>	
SATOH, N. Recent advances in our understanding of the temporal control of early embryonic development in amphibians	257–270
FORD, C. C. Maturation promoting factor and cell cycle regulation	271–284
LASKEY, R. A. Chromosome replication in early development of <i>Xenopus laevis</i>	285–296
