

FRONT RUNNERS

A motionless mouse in a behavioral test for emotionality. Photo courtesy of Alessio Chirieleison. See research article by Bartolomucci et al. on page 459.

DMM PODCAST

dmm.biologists.org

IN THIS ISSUE

- 397** A zebrafish model for liver regeneration
 Polycystin toxicity in *C. elegans*
 Fatty liver disease in ricefish
 Mouse susceptibility to depression
 Functional conservation of FXR genes
 Fracture repair in *Ccr2* knockout mice
 Tissue regeneration

RESEARCH HIGHLIGHTS

- 398** Metabolism and aging: ER stress prolongs life
Neurodegeneration: Alzheimer's disease
Mental health: spadin, a fast-acting antidepressant
Angiogenesis: coupling ephrin-B2 and VEGF

JOURNAL CLUB

- 399** Preventing Parkinson's pathology
 Morgan E. DeSantis and Devin Dersh

COMMUNITY NEWS

- 401** Pharmaceutical training for clinicians
 DMM Travelling Fellowships
 Professor Stephen O'Rahilly wins the 2010 InBev-Baillet Latour Prize

A MODEL FOR LIFE

- 403** Engineering new medicine: an interview with James Collins
 Kristin H. Kain

CLINICAL PUZZLE

- 407** Preventing preterm birth: the past limitations and new potential of animal models
 Christine K. Ratajczak, Justin C. Fay and Louis J. Muglia

PRIMER

- 415** The role of insulin/IGF-like signaling in *C. elegans* longevity and aging
 Rachel Kaletsky and Coleen T. Murphy

COMMENTARIES

- 421** Potential and pitfalls of stem cell therapy in old age
 David Piccin and Cindi M. Morshead
- 426** Sweetness and light: perspectives for rodent models of type 1 diabetes
 Philip R. Avner

ORIGINAL RESEARCH

RESEARCH ARTICLES

- 431 Medaka as a model for human nonalcoholic steatohepatitis**
Toshihiko Matsumoto, Shuji Terai, Toshiyuki Oishi, Shinya Kuwashiro, Koichi Fujisawa, Naoki Yamamoto, Yusuke Fujita, Yoshihiko Hamamoto, Makoto Furutani-Seiki, Hiroshi Nishina and Isao Sakaida
- 441 A latent capacity of the *C. elegans* polycystins to disrupt sensory transduction is repressed by the single-pass ciliary membrane protein CWP-5**
Renee M. Miller and Douglas S. Portman
- 451 Multiple roles for CCR2 during fracture healing**
Zhiqing Xing, Chuanyong Lu, Diane Hu, Yan-yiu Yu, Xiaodong Wang, Celine Colnot, Mary Nakamura, Yalei Wu, Theodore Miclau and Ralph S. Marcucio
- 459 Increased vulnerability to psychosocial stress in heterozygous serotonin transporter knockout mice**
Alessandro Bartolomucci, Valeria Carola, Tiziana Pascucci, Stefano Puglisi-Allegra, Simona Cabib, Klaus-Peter Lesch, Stefano Parmigiani, Paola Palanza and Cornelius Gross
- 471 Fragile X mental retardation protein has a unique, evolutionarily conserved neuronal function not shared with FXR1P or FXR2P**
R. Lane Coffee, Jr, Charles R. Tessier, Elvin A. Woodruff, III and Kendal Broadie
- 486 The mitochondrial import gene *tomm22* is specifically required for hepatocyte survival and provides a liver regeneration model**
Silvia Curado, Elke A. Ober, Susan Walsh, Paulina Cortes-Hernandez, Heather Verkade, Carla M. Koehler and Didier Y. R. Stainier

RESEARCH REPORT

- 496 Ras controls melanocyte expansion during zebrafish fin stripe regeneration**
Yoonsung Lee, Gregory Nachtrab, Pai W. Klinsawat, Danyal Hami and Kenneth D. Poss
