

Supplementary Figure 4. Checkpoint defect induced by BubR1 RNAi.

(A) Low mitotic index in BubR1 RNAi. The mitotic index of asynchronously growing S2 cells after control (red bar) or BubR1 RNAi (green bar; n=1000 for both). **(B)** Failure to arrest in overnight colchicine treatment after BubR1 RNAi. The mitotic index of S2 cells, treated overnight with colchicine, after control (red bar) or BubR1 RNAi (green bar; n=1000 for both).
