

Table S6. Nubp1 silencing increases the proportion of multi-nucleated cells in the population (single-factor ANOVA, $P=6.15 \times 10^{-6}$)

siRNA		Control	Nubp1
Total number of cells counted		4139	4077
Interphase cells with	1 nucleus	4053 (97.9%)	3854 (94.5%)
Interphase cells with	2 nuclei	79 (1.9%)	213 (5.2%)
	3 nuclei	7 (0.17%)	8 (0.2%)
Apoptotic cells		–	2 (0.05%)
Cells with multiple nuclei (total)		86 (2.08%)	221 (5.42%)
(% of interphase cells)
