Figure S1. The description of c-kit+ cell in fetus retina (13 weeks). A, C-kit+ cell distributed in the inner neuroblastic layer of ora serrate. B, C-kit+ cell distributed in the inner neuroblastic layer of . C, C-kit+ cell distributed in the optic nerve. Scale bar: 50 μm. RPE: retinal pigment epithelium, ONbL: outer neuroblastic layer, INbL: inner neuroblastic layer, ON: optic nerve.
Figure S2. The description of c-kit+ cell in fetus cornea(13 weeks). A, description of c-kit+ cell in fetus cornea. B, regions in A at higher magnification(Scale bar=50μm).
