Volume 122 (2) January 15, 2009

Cover: Keratinocyte migration and wound healing are increased in the absence of integrin $\alpha 3\beta 1$. Localization of paxillin (blue), F-actin (red), and laminin-332 (green) in migrating integrin $\alpha 3^{-/-}$ keratinocytes. See article by C. Margadant et al. (pp. 278-288).

- Editorial**
157 **Integrin Special Issue.** Sonnenberg, A. and Watt, F. M.
- Cell Science at a Glance**
159 **Integrin signalling at a glance.** Harburger, D. S. and Calderwood, D. A.
- Commentaries**
165 **Linking integrin conformation to function.** Askari, J. A., Buckley, P. A., Mould, A. P. and Humphries, M. J.
171 **Integrins and cell-fate determination.** Streuli, C. H.
179 **The mechanical integrin cycle.** Puklin-Faucher, E. and Sheetz, M. P.
187 **Mechanisms that regulate adaptor binding to β -integrin cytoplasmic tails.** Legate, K. R. and Fässler, R.
199 **Integrins in cell migration – the actin connection.** Vicente-Manzanares, M., Choi, C. K. and Horwitz, A. R.
207 **Integrins in mammary-stem-cell biology and breast-cancer progression – a role in cancer stem cells?** Pontier, S. M. and Muller, W. J.
215 **Integrins in immunity.** Evans, R., Patzak, I., Svensson, L., De Filippo, K., Jones, K., McDowall, A. and Hogg, N.
- Short Report**
227 **Mice that lack activity of $\alpha v\beta 6$ - and $\alpha v\beta 8$ -integrins reproduce the abnormalities of *Tgfb1*- and *Tgfb3*-null mice.** Aluwihare, P., Mu, Z., Zhao, Z., Yu, D., Weinreb, P. H., Horan, G. S., Violette, S. M. and Munger, J.
- Research Articles**
233 **Integrins are required for the differentiation of visceral endoderm.** Liu, J., He, X., Corbett, S. A., Lowry, S. F., Graham, A. M., Fässler, R. and Li, S.
243 **EphA1 interacts with integrin-linked kinase and regulates cell morphology and motility.** Yamazaki, T., Masuda, J., Omori, T., Usui, R., Akiyama, H. and Maru, Y.
256 **Integrin-linked kinase is required for vitronectin-mediated internalization of *Streptococcus pneumoniae* by host cells.** Bergmann, S., Lang, A., Rohde, M., Agarwal, V., Rennemeier, C., Grashoff, C., Preissner, K. T. and Hammerschmidt, S.
- 268 **JAM-A promotes neutrophil chemotaxis by controlling integrin internalization and recycling.** Cera, M. R., Fabbri, M., Molendini, C., Corada, M., Orsenigo, F., Rehberg, M., Reichel, C. A., Krombach, F., Pardi, R. and Dejana, E.
278 **Integrin $\alpha 3\beta 1$ inhibits directional migration and wound re-epithelialization in the skin.** Margadant, C., Raymond, K., Kreft, M., Sachs, N., Janssen, H. and Sonnenberg, A.
289 **Binding of laminin-1 to monosialoganglioside GM1 in lipid rafts is crucial for neurite outgrowth.** Ichikawa, N., Iwabuchi, K., Kurihara, H., Ishii, K., Kobayashi, T., Sasaki, T., Hattori, N., Mizuno, Y., Hozumi, K., Yamada, Y. and Arikawa-Hirasawa, E.
