**Cover:** Model of an electron tomogram illustrating the assembly of a nascent flagellar pocket within the confines of the existing flagellar pocket in *Trypanosoma brucei*. This is orchestrated by movement of the new flagellum (left, in pink) around the old flagellum (right, in red); flagellar pocket (orange), Golgi complex (yellow), endoplasmic reticulum (green). See article by S. Lacomble et al. (pp. 2884-2891).
