

# PROSPECTS IN CELL BIOLOGY

---

## CONTENTS

### STRUCTURE AND FUNCTION – SUBCELLULAR SYSTEMS

- page 1 LASKEY, R. A. Prospects for reassembling the cell nucleus
- 11 RINGERTZ, N., HADLACZKY, G., HALLMAN, H., NYMAN, U., PETTERSSON, I. and SHARP, G. C. Computer analysis of the distribution of nuclear antigens: studies on the spatial and functional organization of the interphase nucleus
- 29 STERN, H. Meiosis: some considerations
- 45 COOK, G. W. M. Cell surface carbohydrates: molecules in search of a function?
- 71 BRAY, D., HEATH, J. and MOSS, D. The membrane-associated 'cortex' of animal cells: its structure and mechanical properties
- 89 TAYLOR, E. W. Cell motility
- 103 BROKAW, C. J. Future directions for studies of mechanisms for generating flagellar bending waves
- 115 NORTHCOTE, D. H. Molecular and cell biology of plant cells

### SIGNALS AND CONTROLS

- 137 BERRIDGE, M. J. Cell signalling through phospholipid metabolism
- 155 HAYLES, J. and NURSE, P. Cell cycle regulation in yeast
- 171 PARDEE, A. B., COPPOCK, D. L. and YANG, H. C. Regulation of cell proliferation at the onset of DNA synthesis
- 181 SCHWEIGER, H.-G., HARTWIG, R. and SCHWEIGER, M. Cellular aspects of circadian rhythms

### CELLS AND TISSUES

- 201 GERISCH, G. Inter-relation of cell adhesion and differentiation in *Dictyostelium discoideum*
- 221 GARROD, D. R. Desmosomes, cell adhesion molecules and the adhesive properties of cells in tissues
- 239 PITTS, J. D. and FINBOW, M. E. The gap junction
- 267 GORDON, S. Biology of the macrophage

### REGULATION OF GENE ACTIVITY

- 287 GURDON, J. B. Nuclear transplantation in eggs and oocytes
- 319 WEATHERALL, D. J. The regulation of the differential expression of the human globin genes during development

### CELLS IN DEVELOPMENT

- 337 GARDNER, R. L. Cell mingling during mammalian embryogenesis
- 357 MEINHARDT, H. Hierarchical inductions of cell states: a model for segmentation in *Drosophila*

### CELLS AND DISEASE

- 383 GIANNELLI, F. DNA maintenance and its relation to human pathology
- 417 MARSHALL, C. J. Oncogenes
- 431 HARRIS, H. The genetic analysis of malignancy
- 445 BROWNLEE, G. G. The molecular genetics of haemophilia A and B
