

Journal of CELL SCIENCE

Volume 2 Number 1 March 1967

- page 1 CALLAN, H. G.
The organization of genetic units in chromosomes
- 9 WHITEHOUSE, H. L. K.
A cycloid model for the chromosome
- 23 HARRIS, H.
The reactivation of the red cell nucleus
- 33 BLENKINSOPP, W. K.
Mast cell proliferation in adult rats
- 39 OWEN, MAUREEN
Uptake of [³H]uridine into precursor pools and RNA in osteogenic cells
- 57 LING, N. R. and HOLT, P. J. L.
The activation and reactivation of peripheral lymphocytes in culture
- 71 MEISELMAN, N., KOHN, A. and DANON, D.
Electron microscopic study of penetration of Newcastle disease virus into cells leading to formation of polykaryocytes
- 77 JEFFS, R. A. and NORTHCOTE, D. H.
The influence of indol-3yl acetic acid and sugar on the pattern of induced differentiation in plant tissue culture
- 89 BERRIDGE, M. J. and GUPTA, B. L.
Fine-structural changes in relation to ion and water transport in the rectal papillae of the blowfly, *Calliphora*
- 113 GILLIS, J. M. and PAGE, SALLY G.
Localization of ATPase activity in striated muscle and probable sources of artifact
- 119 MADDRELL, S. H. P. and TREHERNE, J. E.
The ultrastructure of the perineurium in two insect species, *Carausius morosus* and *Periplaneta americana*
- 129 SMITH, J. W., PETERS, T. J. and SERAFINI-FRACASSINI, A.
Observations on the distribution of the proteinpolysaccharide complex and collagen in bovine articular cartilage
- 137 MACGREGOR, H. C. and MACKIE, J. B.
Fine structure of the cytoplasm in salivary glands of *Simulium*
