## Pocket Atlas of Human Histology

Robert Meadows

'This is a worthwhile buy for anyone studying for the Diploma in Nursing because it gives a clear insight into what human tissues really look like, and it helps add another dimension to one's view of the body.' *Nursing Mirror*. Illustrated £15  
paper covers £7.50

## Carleton's Histological Technique

R.A.B. Drury and E.A. Wallington

'We have waited long for a new Carleton, and it has arrived as quite the best *vade mecum* for the pathologist; sensible and yet likeable, it is full and yet not dull.' *Journal of Clinical Pathology* reviewing the fourth edition. In this new fifth edition there are new chapters in quantitative methods and autoradiography, a new appendix on SI units, and a new index of suppliers. Much of the text has been revised in the light of recent developments and many new illustrations have been added. Fifth edition illustrated £24
