INDEX OF SUBJECTS

- Adhesion**
 in embryonic chick neural cells: COOK & LILIEEN 85
 in embryonic chick neural cells: GRUNWALD, PRATT & LILIEEN 69
 of L5222 cells on various substrata: KOWALCZYŃSKA, NOVAK, DOWJAT & DOROSZEWSKI 317
- Aggregation-inhibition**
 in *Dictyostelium discoideum*: LAROY & WEEKS 277
- Algae**
 protein synthesis in cell cycle: JOHN, LAMBE, MCGOOKIN, ORR & ROLLINS 51
- Alveolar sacs**
 of *Tetrahymena*, ultrastructure: SATIR & WISSIG 13
- Amino acid transport**
 in epithelium of rat Peyer's patch: SMITH & SYME 147
- Antibodies**
 in study of embryonic cell adhesion: GRUNWALD, PRATT & LILIEEN 69
- Antigen**
 effects of dexamethasone on production in sarcoma virus-transformed cells: WAINBERG, SILBER, KAUFMAN & COHEN 287
- BHK cell morphology**
 abnormal, in polyoma-transformed cells: KNOX & GRIFFITHS 301
- Calcium**
 -dependence of surface glycoproteins of neural retina cells: COOK & LILIEEN 85
- Calcium-binding sites**
 on plasma membrane of *Beroe* muscle, EM and X-ray study: NICAISE, HERNANDEZ-NICAISE & MALAVAL 353
- Cell division**
 in sea-urchin eggs, effect of halothane on: HINKLEY & CHAMBERS 327
- Cell surface**
 proteins in fibroblast adhesion to polystyrene: LANKS & CHIN 137
- Cell-surface glycoprotein**
 accessibility in embryonic chick neural cells: COOK & LILIEEN 85
 in adhesion of chick embryonic neural cells: GRUNWALD, PRATT & LILIEEN 69
- Chicken erythrocyte**
 nuclei, EM study of large granule complexes: PEARSON & DAVIES 157
- Chlorella**
 cell cycle, protein synthesis in: JOHN, LAMBE, MCGOOKIN, ORR & ROLLINS 51
- Collagen**
 co-distribution with fibronectin in matrix formation by cultured embryonic fibroblasts: LITTLE & CHEN 35
- Cytochemistry**
 of large granule complexes in chicken erythrocyte nuclei: PEARSON & DAVIES 157
- Dexamethasone**
 effects on antigen expression and virus production in sarcoma virus-transformed cells: WAINBERG, SILBER, KAUFMAN & COHEN 287
- Dictyostelium discoideum**
 macrocyst development: SAGA & YANAGISAWA 341
 membrane factors that inhibit aggregation: LAROY & WEEKS 277
- Double immunofluorescence**
 studies of matrix formation by cultured embryonic fibroblasts: LITTLE & CHEN 35
- Electrokinetic potential**
 in fertilized sea-urchin eggs: OSHIMA 105
- Electron microscopy**
 of large granule complexes in chicken erythrocyte nuclei: PEARSON & DAVIES 157
- Electrophoresis**
 of fertilized sea-urchin eggs: OSHIMA 105
- Endothelial cells**
 aortic, effect of tumour angiogenesis factor on proliferation of: KEEGAN, HILL, KUMAR, PHILLIPS, SCHOR & WEISS 261
 capillary effect, of tumour angiogenesis factor on proliferation of: KEEGAN, HILL, KUMAR, PHILLIPS, SCHOR & WEISS 261
- Enterocyte differentiation**
 in epithelium of rat Peyer's patch: SMITH & SYME 147

Euglena gracilis

- membrane specializations: MELKONIAN, ROBENEK & RASSAT 115
- paraflagellar rod, structure and biochemistry: HYAMS 199

Extracellular collagen

- masking of, in matrix formation by cultured embryonic fibroblasts: LITTLE & CHEN 35

Fibrillar centres

- in nucleolus of mouse Sertoli cells: MIRRE & KNIBIEHLER 247

Fibroblasts

- acquisition of β -glucuronidase by deficient cells: OLSEN, DEAN, MUIR & HARRIS 211

Fibronectin

- co-distribution with collagen in matrix formation by cultured embryonic fibroblasts: LITTLE & CHEN 35
- in adhesion of fibroblasts to polystyrene: LANKS & CHIN 137

Flagellum

- membrane specialization in *Euglena*: MELKONIAN, ROBENEK & RASSAT 115
- structure relations and biochemistry in *Euglena*: HYAMS 199

Fractionation

- in comparative study of rat liver and sea-urchin embryo nuclear matrices: ŠEVALJEVIĆ, PETROVIĆ, KONSTANTINOVIĆ & KRTOLICA 189

Freeze-fracture

- of uterine cell membranes in implantation in rat: MURPHY, SWIFT, MUKHERJEE & ROGERS 1

Giant smooth muscle

- plasma membrane of *Beroe*, EM and X-ray study: NICAISE, HERNANDEZ-NICAISE & MALAVAL 353

 β -Glucuronidase

- acquired activity in fibroblasts: OLSEN, DEAN, MUIR & HARRIS 211

Halothane

- induced structural changes in sea-urchin eggs: HINKLEY & CHAMBERS 327

Hepatocytes

- infiltration of tumour cells into cultures of: ROOS & van de PAVERT 233

Infiltration

- of tumour cells into primary hepatic cultures: ROOS & van de PAVERT 233

Intermediate filaments

- in adhesion of fibroblasts to polystyrene: LANKS & CHIN 137
- in fibroblast adhesion: LANKS & CHIN 137

Invasion

- by tumour cells of primary hepatic cultures: ROOS & van de PAVERT 233

L5222 cells

- Adhesion and locomotion of various substrata: KOWALCZYŃSKA, NOVAK, DOWJAT & DOROSZEWSKI 317

Lactoperoxidase

- labelling of murine fibroblasts in adhesion: LANKS & CHIN 137

Large granule complex

- in chicken erythrocyte nuclei, EM study: PEARSON & DAVIES 157

Locomotion

- of L5222 cells on various substrata: KOWALCZYŃSKA, NOWAK, DOWJAT & DOROSZEWSKI 317

Lymphoid cells

- in contact with fibroblasts, acquisition of β -glucuronidase activity by fibroblasts: OLSEN, DEAN, MUIR & HARRIS 211

Macrocyst

- development in *Dictyostelium discoideum*: SAGA & YANAGISAWA 341

Mastigonemes

- in relation to microtubules in *Euglena* membranes: MELKONIAN, ROBENEK & RASSAT 115

Membrane

- factors extracted that inhibit aggregation in *Dictyostelium discoideum*: LAROY & WEEKS 277

Membrane structure

- changes in endometrial epithelial cells in implantation in rat: MURPHY, SWIFT, MUKHERJEE & ROGERS 1

Microfilaments

- in adhesion of fibroblasts to polystyrene: LANKS & CHIN 137

Microtubules

- in relation to mastigoneme in *Euglena* membranes: MELKONIAN, ROBENEK & RASSAT 115
- nucleation in *Physarum polycephalum*: ROOBOL, HAVERCROFT & GULL 365

Mitosis

- in fission yeast, relations between events: FANTES 383

Mitotic apparatus

- in sea-urchin eggs, effect of volatile anaesthetics: HINKLEY & CHAMBERS 327

Myxamoebae

- of *Physarum polycephalum*, microtubule nucleation in: ROOBOL, HAVERCROFT & GULL 365

- Nuclear matrix**
in rat liver and sea-urchin embryos, a comparison: ŠEVALJEVIĆ, PETROVIĆ, KONSTANTINOVIĆ & KRTOLICA 189
- Nucleolus-organizing centres**
in mouse Sertoli cells, relation to fibrillar centres: MIRRE & KNIBIEHLER 247
- Paraflagellar rod** 555
in *Euglena*, structure relations and biochemistry: HYAMS 199
- Peyer's patch**
epithelium, differentiation of enterocytes in: SMITH & SYME 147
- Physarum polycephalum**
microtubule nucleation in: ROOBOL, HAVERCROFT & GULL 365
- Plasma membrane**
of *Beroe* muscle fibre, EM and X-ray study: NICAISE, HERNANDEZ-NICAISE & MALAVAL 353
of endometrial epithelial cells in implantation in rat: MURPHY, SWIFT, MUKHERJEE & ROGERS I
- Poly(A)⁺**
RNA populations in cell cycle of *Chlorella*: JOHN, LAMBE, MCGOOKIN, ORR & ROLLINS 51
- Protein kinase activity**
in comparative study of rat liver and sea-urchin embryo nuclear matrices: ŠEVALJEVIĆ, PETROVIĆ, KONSTANTINOVIĆ & KRTOLICA 189
- Protein synthesis**
in cell cycle of *Chlorella*: JOHN, LAMBE, MCGOOKIN, ORR & ROLLINS 51
- Radioiodination**
of murine fibroblast proteins involved in adhesion to polystyrene: LANKS & CHIN 137
- Reticulated nucleolus**
in mouse Sertoli cells, nucleolar-organizing centres in: MIRRE & KNIBIEHLER 247
- Retina**
cells of chick embryos, adhesion of: GRUNWALD, PRATT & LILIE 69
cells of chick embryos, surface glycoproteins: COOK & LILIE 85
- RNA**
poly(A)⁺, in cell cycle of *Chlorella*: JOHN, LAMBE, MCGOOKIN, ORR & ROLLINS 51
- Sarcoma virus**
-transformed cells, antigen expression and virus production in: WAINBERG, SILBER, KAUFMAN & COHEN 287
- Schizosaccharomyces pombe**
mitosis, relations between events: FANTES 383
- Sea-urchin eggs**
fertilized, electrophoretic movement in: OSHIMA 105
- Sertoli cells**
of mouse fibrillar centres in nucleolus of: MIRRE & KNIBIEHLER 247
- Spreading factor**
response in polyoma-transformed BHK cells: KNOX & GRIFFITHS 301
- Subsurface cisterns**
of muscle and nerve in *Tetrahymena*: SATIR & WISSIG 13
- Surface charge**
of fertilization membrane in sea-urchin eggs: OSHIMA 105
- Synchronous culture**
in *Chlorella*, poly(A)⁺ RNA populations: JOHN, LAMBE, MCGOOKIN, ORR & ROLLINS 51
- Synchronous development**
of macrocysts in *Dictyostelium*: SAGA & YANAGISAWA 341
- Tetrahymena**
alveolar sacs, ultrastructure: SATIR & WISSIG 13
- Transformation**
of BHK cells by polyoma, abnormal morphology: KNOX & GRIFFITHS 301
- Tubulin**
-binding agents, effect on infiltration of tumour cells into primary hepatocyte cultures: ROOS & van de PAVERT 233
- Tumour angiogenesis factor**
effect on proliferation of capillary and aortic endothelial cells: KEGAN, HILL, KUMAR, SCHOR & WEISS 261
- Uterine epithelium**
freeze-fracture of membrane in implantation in rat: MURPHY, SWIFT, MUKHERJEE & ROGERS I
- Volatile anaesthetics**
induce structural changes in sea-urchin eggs: HINKLEY & CHAMBERS 327

Primordial Germ Cells In the Invertebrates

P. D. NIEUWKOOP and L. A. SUTASURYA

In the invertebrates (as well as the vertebrates) the primordial germ cells represent a very special cell type characterised by the fact that all the developmental potentialities of the species are maintained in the germ cells notwithstanding their special cellular differentiation. This book deals with the origin and development of the primordial germ cells during sexual reproduction in the primitive invertebrates and during embryonic development in the more highly developed groups. **£30.00 net**

Developmental and Cell Biology 10

Cell Behaviour

A Tribute to Michael Abercrombie

Edited by RUTH BELLAIRS, ADAM CURTIS and GRAHAM DUNN

Michael Abercrombie was a pioneer in the analysis of the motile behaviour of cells. This book commemorates his work by bringing together for the first time a series of original essays which cover the topics now included in the science of cell behaviour. These range from investigations of the way in which cells in culture interact with their environments, including neighbouring cells, to how fundamental principles derived from such studies may be applied. **£45.00 net**

The Cell Cycle

Edited by P. C. L. JOHN

This book comprises a series of concise accounts which together describe current research and future objectives for study of the cell cycle. There are chapters dealing with prokaryote and eukaryote cells, and the complexity of eukaryote cells is accommodated in chapters concerned with fungal and algal microorganisms, as well as the cells of higher animals and plants.

Biology of the Chemotactic Response

Edited by J. M. LACKIE and P. C. WILKINSON

Motile single cells sense the presence of chemical substances in the fluids around them and their movement is determined by the presence of these substances. This directional response is called chemotaxis. Without directed cell movement important biological functions such as fertilisation, food gathering, and the movement of defender cells into sites of infection, could never take place. The contributions to this volume form an integrated account of a topic that is of central importance in many fields of biology.
