Contents

VOLUME 96 PART 3 JULY 1990

Commentaries
Harrison, A. and Hyams, J. S.
Mapping MAP-2

Flügge, U.-I.
Import of proteins into chloroplasts

Review
Cortical endoplasmic reticulum in plants

Schweitzer, E. S. and Paddock, S.
Localization of human growth hormone to a sub-set of cytoplasmic vesicles in transfected PC12 cells

Solnica-Krezel, L., Diggins-Gilicinski, M., Burland, T. G. and Dove, W. F.
Variable pathways for developmental changes in composition and organization of microtubules in Physarum polycephalum

Martindale, V. E. and Salisbury, J. L.
Phosphorylation of algal centrin is rapidly responsive to changes in the external milieu

Debec, A., Courgeon, A.-M., Maingourd, M. and Maisonnhaute, C.
The response of the centrosome to heat shock and related stresses in a Drosophila cell line

Haass, C., Klein, U. and Kloetzel, P.-M.
Developmental expression of Drosophila melanogaster small heat-shock proteins

Arrigo, A.-P.
The monovalent ionophore monensin maintains the nuclear localization of the human stress protein hsp28 during heat shock recovery

Novak, B. and Mitchison, J. M.
Changes in the rate of oxygen consumption in synchronous cultures of the fission yeast Schizosaccharomyces pombe

Creanor, J. and Mitchison, J. M.
Continued DNA synthesis after a mitotic block in the double mutant cut1 cdc11 of the fission yeast Schizosaccharomyces pombe

Cardenas, M. E., Laroche, T. and Gasser, S. M.
The composition and morphology of yeast nuclear scaffolds

Karwan, R. M., Laroche, T., Wintersberger, U., Gasser, S. M. and Binder, M.
Ribonuclease H(70) is a component of the yeast nuclear scaffold

Zlatanova, J. S., Srebreva, L. N., Banchev, T. B., Taseva, B. T. and Tanev, R. G.
Cytoplasmic pool of histone H1 in mammalian cells

Allen, R. D., Ueno, M. S., Pollard, L. W. and Fok, A. K.
Monoclonal antibody study of the decorated spongiosome of contractile vacuole complexes of Paramecium

Fujimoto, T. and Ogawa, K.
Fodrin in the human polymorphonuclear leucocyte: redistribution induced by the chemotactic peptide

Souto-Padrón, T., Campetella, O. E., Cazzulo, J. J. and de Souza, W.
Cysteine proteinase in Trypanosoma cruzi: immunocytochemical localization and involvement in parasite–host cell interaction

Ebert, D. L., Jordan, K. B. and Dimond, R. L.
Lysozymal enzyme secretory mutants of Dictyostelium discoideum

Hassell, T. and Butler, M.
Adaptation to non-ammoniagenic medium and selective substrate feeding lead to enhanced yields in animal cell cultures

Chopra, D. P., Sullivan, J. K. and Reece-Kooyer, S.
Regulation by calcium of proliferation and morphology of normal human tracheobronchial epithelial cell cultures

Joseph, L. B., Kreutzer, D. L. and Tanzer, M. L.
Characterization of Chinese hamster ovary cells with impaired spreading properties on fibronectin

Bee, J. A. and von der Mark, K.
An analysis of chick limb bud intercellular adhesion underlying the establishment of cartilage aggregates in suspension culture

Skaer, H. le B., Harrison, J. B. and Maddrell, S. H. P.
Physiological and structural maturation of a polarised epithelium: the Malpighian tubules of a blood-sucking insect, Rhodnius prolixus

McNeil, P. L. and Ito, S.
Molecular traffic through plasma membrane disruptions of cells in vivo
