

INDEX TO VOL. XXXIII,

NEW SERIES.

- Acanthodrilus, development of, by
Beddard, 497
- Ascidians from Japan, 313
- Bacilli of leprosy and tubercle, by
Charles Slater, 219
- Beddard on a new branchiate Oligo-
chæte, *Branchiura Sowerbyi*,
325
- " on certain points in the de-
velopment of *Acanthodrilus*, 497
- Benham on some aquatic Oligochæta,
187
- " on two *Acanthodriloid* earth-
worms from New Zealand, 289
- Boden and Sprawson on the pigment
cells of the retina, 365
- Brain, primitive segmentation of, by
B. H. Waters, 457
- Branchiura Sowerbyi*, a new
branchiate Oligochæte, by F. E.
Beddard, 325
- Crangon vulgaris*, germ-layers of,
by W. F. R. Weldon, 343
- Cunningham, J. T., on spermatogene-
sis in *Myxine*, 169
- Decapods, nauplius eye of, 283
- Durham on wandering cells in Echino-
derms, 81
- Earthworms from New Zealand, by
W. B. Benham, 289
- Echinoderms, wandering cells in, by
Herbert Durham, 81
- Elasmobranchs, notes on their de-
velopment, by A. Sedgwick, 559
- Erlanger, R. von, on the nephridia of
Prosobranchs and their relation to
the gonad and genital duct, 587
- Eye, nauplius, persisting in Decapods,
283
- Frog, development of the oviduct in,
by MacBride, 273
- Gametogeny, a comparative study of,
by Marcus M. Hartog, 1
- Harmer on the nature of the excre-
tory processes in Polyzoa, 123
- Hartog on rejuvenescence and se-
nescence, 1
- Herdman on the innervation of the
cerata of some Nudibranchiata, 541
- Leucosolenia clathrus*, oscula
and anatomy of, by Minchin, 477
- " sieve-like membrane of,
by Minchin, 251
- MacBride on the development of the
oviduct in the frog, 273
- Mammals, development of, by Arthur
Robinson, 369
- Minchin, E. A., on a sieve-like mem-
brane across the oscula of *Leuco-
solenia*, 251

- Minchin, E. A., on the oscula and anatomy of *Leucosolenia clathrus*, 477
- Myxine, spermatogenesis in, 169
- Nauplius eye in Decapods, by Margaret Robinson, 283
- Nephridia of Prosobranchs, by von Etlanger, 587
- Nudibranchiata, the innervation of the cerata of, by Herdman, 541.
- Oka and Willey on Synascidians from Japan, 313
- Oligochaeta, researches into the embryology of, No. I, by Beddard, 497
 ,, some aquatic forms of, by W. B. Benham, 187
- Oligochaete, a new branchiate, by Beddard, 325
- Onchnesoma, by Arthur Shipley, 233
- Ornithorhynchus, true teeth of, by Charles Stewart, 229
- Oviduct of the frog, development of, by MacBride, 273
- Polyzoa, excretory processes in, by S. F. Harmer, 123
- Prosobranchs, nephridia of, by von Etlanger, 587
- Rejuvenescence and senescence, by Hartog, 1
- Retina, pigment cells of, by Boden and Sprawson, 365
- Robinson, Arthur, on the development of mammals, 369
- Robinson, M., on the nauplius eye persisting in some Decapods, 283
- Sedgwick, notes on Elasmobranch development, 559
- Senescence and rejuvenescence, by Hartog, 1
- Shiplely on Onchnesoma, 233
- Slater on the differentiation of leprosy and tubercle bacilli, 219
- Spermatogenesis in Myxine, by J. T. Cunningham, 169
- Sponges, histology of, by Minchin, 251 and 477
- Sprawson and Boden on the pigment cells of the retina, 365
- Stewart on the true teeth of Ornithorhynchus, 229
- Synascidians from Japan, 313
- Teeth of Ornithorhynchus, by Charles Stewart, 229
- Waters on the primitive segmentation of the Vertebrate brain, 457
- Weldon on the germ-layers of *Cranigon vulgaris*, 343
- Willey and Oka on Synascidians from Japan, 313
