

Pulsed jet dynamics of squid hatchlings at intermediate Reynolds numbers

Ian K. Bartol, Paul S. Krueger, William J. Stewart and Joseph T. Thompson

10.1242/jeb.033241

There were several errors published in *J. Exp. Biol.* **212**, 1506-1518.

On p. 1507, in paragraph 4 of the Introduction, the fourth and fifth sentences read:

Moreover, for a fixed \dot{U} , $Re \propto L_b$. Thus, weight-specific drag is proportional to $Re^{-1/2}$ at high Re and $1/Re^{-1/2}$ at low Re for swimming at a fixed speed in body lengths s^{-1} .

The text should have read:

Moreover, for a fixed \dot{U} , $Re \propto L_b^2$. Thus, weight-specific drag is proportional to $Re^{1/2}$ at high Re and $Re^{-1/2}$ at low Re for swimming at a fixed speed in body lengths s^{-1} .

We apologise to authors and readers for this error.
