

Movie 1. High-speed footage of Western grebes rushing. Footage was recorded at 325 fps and is played back at 32 fps. The file has been reduced to 50% of its original resolution and compressed, reducing video quality. The clip likely shows an aggressive behavior by a male against a group of males preparing to rush near his pair-bonded female.

Movie 2. Close-up high-speed footage of a Western grebe rushing. Footage was recorded at 325 fps and is played back at 32 fps. The file has been cropped around the rushing grebe to highlight its hindlimb movements.
