

Table S1. Summary of model selection results.

Model Structure	-loglik	AIC	ΔAICc	p>ChiSq.
Luteinizing hormone models (all birds- song experiment)				
Subspecies, Time	-204.2	420.5	0	
Subspecies, Time, Song	-203.9	421.8	1.3	0.405
Subspecies , Time, Song and Song*Time	-202.9	421.9	1.4	
Subspecies, Time, Song and Species*Time, Song*Time	-202.2	422.5	2	
Subspecies, Time, Song and all 2 way interactions	-202.2	424.4	3.9	
Subspecies, Time, Song and all 2 and 3 way interactions	-202.2	426.4	5.9	
Date	-209.2	428.5	8	
Follicle stage score models (all birds- song experiment)				
Subspecies, Time, Song and all 2 and 3 way interactions	-184.1	396.2	0	
*Interaction terms significant, full model retained				
Terminal ovary mass models (all birds- song experiment)				
Subspecies, Structural size and Interaction *post hoc supplementary model	60.2	-108.4		
Subspecies	56.9	-105.9	0	
Subspecies and Song	57.5	-105.1	0.8	0.27
Subspecies, Song and Interaction	57.9	-103.9	2	
Null model	53.9	-101.9	4	
Terminal oviduct mass models (all birds- song experiment)				
Subspecies, Structural size and Interaction *post hoc supplementary model	13.1	-14.2		
Subspecies	10.3	-12.7	0	
Null model	8.6	-11.2	1.5	0.062
Subspecies and Song	10.6	-11.1	1.6	
Subspecies, Song and Interaction	10.7	-9.5	3.2	
Terminal follicle size models (all birds- song experiment)				
Subspecies, Structural size and Interaction *post hoc supplementary model	-47.3	106.6		
Subspecies	-51.9	111.8	0	
Subspecies and Song	-51.7	113.4	1.4	0.522
Subspecies, Song and Interaction	-51.7	115.4	3.8	
Null model	-59.1	124.8	13	
Mass index models (all birds-song experiment)				
Subspecies, Time, and Subspecies*Time	-892	1798.1	0	
Subspecies, Time, Song, and Subspecies*Time	-891.5	1799.1	1	0.3249
Subspecies, Time, Song, Subspecies*Time, and Song*Time	-891.1	1800.2	2.1	
Subspecies, Time, Song and all 2 way	-891	1802	3.9	

interactions				
Subspecies, Time, Song and all 2 and 3 way interactions	-890.8	1803.6	5.5	
Subspecies and Time	-931.4	1874.8	86.7	
Molt score jd 90 models (migrants only- song experiment)				
Song	-30.6	75.1	0	0.0575
Null model	-32.4	76.7	1.6	
Molt score jd 104 models (migrants only- song experiment)				
Song	29.4	72.8	0	0.0245
Null model	-31.9	75.8	3	
Luteinizing hormone models (migrants only- live male experiment)				
Time	-10.6	31.2	0	0.548
Time and Live male	--10.0	34.0	2.8	
Time, Live male and Interaction	-9.0	36.0	4.8	
Null model	-16.8	41.5	10.3	
Follicle stage score models (migrants only- live male experiment)				
Time, Live male or Song and Interaction	-105.6	233.1		
*Interaction term significant, full model retained				
Terminal ovary mass models (migrants only- live male experiment)				
Live male or Song	-171.8	-161.8		
*Main term significant, full model retained				
Terminal follicle size models (migrants only- live male experiment)				
Live male or Song	-8.1	26.2	0	
*Main term significant, full model retained				
Terminal follicle size models (migrants only- live male experiment)				
Null model	93.7	-181.4	0	0.358
Live male or Song	94.8	-179.5	0.9	

Table S2. Summary of best fit model results.
