

Nest 1: Panorama of the nest site

Nest 1: Panorama of the displacement site

Nest 3: Panorama of the nest site

Nest 3: Panorama of the displacement site

Fig. S1 360° Panoramic images of the nest sites 1 & 3 and displacement sites for the Outbound Long Vector 15min Delay 100m condition. Images were taken with a HD bloggie camera with a panoramic lens (Sony). Black triangles in all images denote the direction of the nest. White triangles denote the direction of the foraging tree in the nest site images and the vector direction at the displacement sites.
