INDEX OF AUTHORS

- Abrams, Thomas W.** See PINTER, OLDBERG and ABRAMS
- Adcock, P. J.** See HUGHES, BELAUD, PEYRAUD and ADCOCK
- Altringham, J. D., Yancey, P. H. and Johnston, I. A.** The effects of osmoregulatory solutes on tension generation by dogfish skinned muscle fibres 96, 443
- Andrews, M. B.** See HARRIS and ANDREWS
- Armstrong, R. B. and Taylor, C. R.** Relationship between muscle force and muscle area showing glycogen loss during locomotion 97, 411
- Atema, Jelle.** See DERBY and ATEMA
- Atwood, Harold L.** See STEPHENS and ATWOOD
- Avery, P.** See BRACKENBURY, GLEESON and AVERY
- Baird, Troy A.** See GRAHAM and BAIRD
- Baldwin, J.** See DOBSON and BALDWIN; I and II
- Batkin, S.** See KIRSCHVINK, TABRAH and BATKIN
- Beadle, D. J.** See BLAGBURN and BEADLE
- Bach, Claus and Nomoto, Shigeki.** Cardiovascular changes associated with treadmill running in the Pekin duck 97, 345
- Belaud, A.** See HUGHES, BELAUD, PEYRAUD and ADCOCK
- Benjamin, P. R.** See EGELHAAF and BENJAMIN
- Bennett, Albert F.** See GLEESON and BENNETT
- Bennet-Clark, H. C.** See STEPHEN and BENNET-CLARK
- Biewener, Andrew A.** Bone strength in small mammals and bipedal birds: do safety factors change with body size 98, 289
- Blagburn, J. M. and Beadle, D. J.** Morphology of identified cercal afferents and giant interneurons in the hatchling cockroach *Periplaneta americana* 97, 421.
- Blest, A. D.** See JACKSON and BLEST
- Bourne, P. K. and Cossins, A. R.** On the instability of K^+ influx in erythrocytes of the rainbow trout, *Salmo gairdneri*, and the role of catecholamine hormones in maintaining *in vivo* influx activity 101, 93
- Boutillier, R. G.** See SHELTON and BOUTILLIER
- Boyd, P. J.** See COLES, GOWERS, BOYD and LEWIS
- Brackenbury, J. H., Gleeson, M. and Avery, P.** Respiration in exercising fowl. III. Ventilation 96, 315
- Bradfish, G. A., Drewes, C. D. and Mutchmor, J. A.** The effects of cooling on an identified reflex pathway in the cockroach (*Periplaneta americana*), in relation to chill-coma 96, 131
- Bradford, S. M. and Taylor, A. C.** The respiration of *Cancer pagurus* (L.) under normoxic and hypoxic conditions 97, 273
- Brines, Michael L. and Gould, James L.** Skylight polarization patterns and animal orientation 96, 69
- Brix, O.** See JOHANSEN, BRIX and LYKKEBOE
- Burggren, W.** See SACCA and BURGGREN
- Burggren, Warren and Johansen, Kjell.** Ventricular haemodynamics in the monitor lizard *Varanus exanthematicus*: pulmonary and systemic pressure separation 96, 343
- Burns, M. D.** See THEOPHILIDIS and BURNS
- Burrows, Malcolm.** The physiology and morphology of median nerve motor neurones in the thoracic ganglion of the locust 96, 325
- Interneurons co-ordinating the ventilatory movements of the thoracic spiracles in the locust 97, 385
- See also FIELD and BURROWS
- Butler, P. J.** Introduction 100, 1
- Respiratory cardiovascular control during diving in birds and mammals 100, 195
- See also KEIJER and BUTLER
- Cameron, J. N.** See SMATRESK and CAMERON; HENRY and CAMERON
- Cameron, J. N. and Kormanik, G. A.** Intracellular and extracellular acid-base status as a function of temperature in the freshwater channel catfish, *Ictalurus punctatus* 99, 127
- The acid-base responses of gills and kidneys to infused acid and base loads in the channel catfish, *Ictalurus punctatus* 99, 143
- Case, James F.** See LATZ and CASE
- Casey, Timothy M.** See HEGEL and CASEY
- Cavagna, G. A.** See HEGLUND, CAVAGNA and TAYLOR; HEGLUND, FEDAK, TAYLOR and CAVAGNA
- Chamberlin, M. and Phillips, J. E.** Metabolic support of chloride-dependent short-circuit current across locust rectum 99, 349
- Claiborne, J. B., Evans, David H. and Goldstein, Leon.** Fish branchial Na^+/NH_4^+ exchange is via basolateral Na^+-K^+ -activated ATPase 96, 431
- Cobb, Melanie H.** See HEAGY, DANNER, LENHOFF, COBB and MARSHALL
- Coles, R. B., Gowers, D. M., Boyd, P. J. and Lewis, D. B.** Acoustic transmission through the head of the common mole, *Talpa europaea* 101, 337
- Coombs, Sheryl and Popper, Arthur N.** Structure and function of the auditory system in the clown knifefish, *Notopterus chitala* 97, 225
- Coote, J. H.** Respiratory and circulatory control during sleep 100, 223
- Cornell, John C.** Sodium and chloride transport in the isolated intestine of the earthworm, *Lumbricus terrestris* (L.) 97, 197

- Cossins, A. R.** See BOURNE and COSSINS
- Cruse, H. and Epstein, S.** Peripheral influences on the movement of the legs in a walking insect *Carausius morosus* 101, 161
- Danner, Jean.** See HEAGY, DANNER, LENHOFF, COBB and MARSHALL
- David, J. A. and Pitman, R. M.** The effects of axotomy upon the extrasynaptic acetylcholine sensitivity of an identified motoneurone in the cockroach *Periplaneta americana* 98, 329
- Davie, Peter S.** Changes in vascular and extravascular volumes of eel muscle in response to catecholamines: the function of the caudal lymphatic heart 96, 195
— See also PERRY, DAVIE, DAXBOECK and RANDALL
- Davie, Peter S., Daxboeck, Charles, Perry, Steve F. and Randall, David J.** Gas transfer in a spontaneously ventilating blood-perfused trout preparation 101, 17
- Daxboeck, Charles.** See DAVIE, DAXBOECK, PERRY and RANDALL
— See also PERRY, DAVIE, DAXBOECK and RANDALL
- de Fur, P. L. and Lukowiak, Ken.** Some *in vivo* and *in vitro* characteristics of *Aplysia californica* haemolymph 101, 347
- Deitmer, Joachim W.** The effects of tetraethylammonium and other agents on the potassium mechanoreceptor current in the ciliate *Stylonychia* 96, 239
- Deitmer, Joachim W. and Machemer, Hans.** Osmotic tolerance of Ca-dependent excitability in the marine ciliate *Paramecium calkinsi* 97, 311
- Derby, Charles D. and Atema, Jelle.** Chemosensitivity of walking legs of the lobster *Homarus americanus*: neurophysiological response spectrum and thresholds 98, 303
— The function of chemo- and mechanoreceptors in lobster (*Homarus americanus*) feeding behaviour 98, 317
- DeVries, A. L.** See O'GRADY, ELLORY and DEVRIES
- DiCaprio, Ralph A.** See YOX, DICAPRIO and FOURTNER
- Dobson, G. P. and Baldwin, J.** Regulation of blood oxygen affinity in the Australian blackfish *Gadopsis marmoratus*. I. Correlations between oxygen-binding properties, habitat and swimming behaviour 99, 223
— Regulation of blood oxygen in the Australian blackfish *Gadopsis marmoratus*. II. Thermal acclimation 99, 245
- Douglas, R. H.** An endogenous crepuscular rhythm of rainbow trout (*Salmo gairdneri*) photomechanical movements 96, 377
— The function of photomechanical movements in the retina of the rainbow trout (*Salmo gairdneri*) 96, 389
- DuBois, Arthur B.** See OGILVY and DuBOIS
- Drewes, C. D.** See BRADFISCH, DREWES and MUTCHMOR
- Drewes, Robert C.** See WITHERS, HILLMAN, DREWES and SOKOL
- Dunlap, Jay C.** See TAYLOR, DUNLAP and HASTINGS
- Duthie, Garry G.** The respiratory metabolism of temperature-adapted flatfish at rest and during swimming activity and the use of anaerobic metabolism at moderate swimming speeds 97, 359
- Eddy, F. B.** See TALBOT, EDDY and JOHNSTON
- Edwards, D. H. Jr.** The cockroach DCMD neurone. I. Lateral inhibition and the effects of light- and dark-adaptation 99, 61
— The cockroach DCMD neurone. II. Dynamics of response habituation and convergence of spectral inputs 99, 91
- Edwards, H. A.** *Aedes aegypti*: energetics of osmoregulation 101, 135
— Ion concentration and activity in the haemolymph of *Aedes aegypti* larvae 101, 143
— Free amino acids as regulators of osmotic pressure in aquatic insect larvae 101, 153
- Egelhaaf, M. and Benjamin, P. R.** Inhibition by recurrent excitation: a mechanism for spike synchronization in a network of coupled neuronal oscillators 96, 447
- Ellory, J. C.** See O'GRADY, ELLORY and DEVRIES
- Epstein, S.** See CRUSE and EPSTEIN
- Evans, David H.** Mechanisms of acid extrusion by two marine fishes: the teleost, *Opsanus beta*, and the elasmobranch, *Squalus acanthias* 97, 289
— See also CLAIBORNE, EVANS and GOLDSTEIN
- Evans, David H., Oikari, Aimo, Kormanik, Gregg A. and Mansberger, Leigh.** Osmoregulation by the prenatal spiny dogfish, *Squalus acanthias* 101, 295
- Eylers, J. P.** Ion-dependent viscosity of holothurian body wall and its implications for the functional morphology of echinoderms 99, 1
- Fedak, M. A., Heglund, N. C. and Taylor, C. R.** Energetics and mechanics of terrestrial locomotion. II. Kinetic energy changes of the limbs and body as a function of speed and body size in birds and mammals 97, 23
— See also HEGLUND, FEDAK, TAYLOR and CAVAGNA
- Field, L. H. and Burrows, M.** Reflex effects of the femoral chordotonal organ upon leg motor neurones in the locust 101, 265
- Florey, E.** Excretion in insects: energetics and functional principles 99, 417
- Fourtner, Charles R.** See YOX, DICAPRIO and FOURTNER
- Fugelli, Kjell and Vislie, Tone.** Physiological response to acid water in brown trout (*Salmo trutta* L.): cell volume regulation in heart ventricle tissue 101, 71
- Fujieda, N.** See SUGI, SUZUKI, TSUCHIYA, GOMI and FUJIEDA

- Besser, H. and Jørgensen, E.** pH_i, contractility and Ca-balance under hypercapnic acidosis in the myocardium of different vertebrate species 96, 405
- Gleeson, M.** See BRACKENBURY, GLEESON and AVERY
- Gleeson, Todd T. and Bennett, Albert F.** Acid-base imbalance in lizards during activity and recovery 98, 439
- Goldberg, Jeff and Lukowiak, Ken.** Transfer of habituation shows an interaction between neuronal circuits of the gill withdrawal reflex in *Aplysia californica* 96, 107
- Goldstein, Leon.** See CLAIBORNE, EVANS and GOLDSTEIN
- Gomi, S.** See SUGI, SUZUKI, TSUCHIYA, GOMI and FUJIEDA
- Gould, James L.** See BRINES and GOULD
- Gowers, D. M.** See COLES, GOWERS, BOYD and LEWIS
- Graham, Jeffrey B. and Baird, Troy A.** The transition to air breathing in fishes. I. Environmental effects on the facultative air breathing of *Ancistrus chagresi* and *Hypostomus plecostomus* (Loricariidae) 96, 53
- Grega, Debra S.** See PRIOR and GREGA
- Grillner, Sten and Wallén, Peter.** On peripheral control mechanisms acting on the central pattern generators for swimming in the dogfish 98, 1
- Hadley, Neil F. and Quinlan, Michael.** Simultaneous measurement of water loss and carbon dioxide production in the cricket, *Acheta domesticus* 101, 343
- Harris, R. R. and Andrews, M. B.** Extracellular fluid volume changes in *Carcinus maenas* during acclimation to low and high environmental salinities 99, 161
- Hastings, J. W.** See TAYLOR, DUNLAP and HASTINGS
- Haydon, P. G.** See WINLOW, HOLDEN and HAYDON
- Heagy, Wyrta, Danner, Jean, Lenhoff, Howard, Cobb, Melanie H. and Marshall, Garland.** Azaserine affinity labelling of γ -glutamyl transferase of *Hydra attenuata* without inactivation of the glutathione receptor 101, 287
- Hegel, Jeri R. and Casey, Timothy M.** Thermoregulation and control of head temperature in the sphinx moth, *Manduca sexta* 101, 1
- Heglund, N. C.** See FEDAK, HEGLUND and TAYLOR; TAYLOR, HEGLUND and MALOY
- Heglund, N. C., Cavagna, G. A. and Taylor, C. R.** Energetics and mechanics of terrestrial locomotion. III. Energy changes of the centre of mass as a function of speed and body size in birds and mammals 97, 41
- Heglund, N. C., Fedak, M. A., Taylor, C. R. and Cavagna, G. A.** Energetics and mechanics of terrestrial locomotion. IV. Total mechanical energy changes as a function of speed and body size in birds and mammals 97, 57
- Heisler, N.** Intracellular and extracellular acid-base regulation in the tropical freshwater teleost fish *Synbranchus marmoratus* in response to the transition from water breathing to air breathing 99, 9
— See TOEWS and HEISLER
- Heitler, W. J.** Non-spiking stretch-receptors in the crayfish swimmeret system 96, 355
— See also MAITLAND, LAVERACK and HEITLER
- Henry, Raymond P. and Cameron, James N.** Acid-base balance in *Callinectes sapidus* during acclimation from high to low salinity 101, 255
- Hertz, Paul E.** See HUEY and HERTZ
- Hetherington, Thomas E. and Lombard, R. Eric.** Biophysics of underwater hearing in anuran amphibians 98, 49
- Hillerton, Eric J. and Vincent, Julian F. V.** The specific location of zinc in insect mandibles 101, 333
- Hillerton, J. E., Reynolds, S. E. and Vincent, J. F. V.** On the indentation hardness of insect cuticle 96, 45
- Hillman, Stanley S.** See WITHERS, HILLMAN, DREWES and SOKOL
- Hills, B. A., Hughes, G. M. and Koyama, T.** Oxygenation and deoxygenation kinetics of red cells in isolated lamellae of fish gills 98, 269
- Hilton, S. M.** The defence-arousal system and its relevance for circulatory and respiratory control 100, 159
- Holden, A. V.** See WINLOW, HOLDEN and HAYDON
- Houlihan, D. F. and Sell, D.** Stimulation of oxygen consumption with fluid absorption in insect recta 101, 233
- Houston, A. H. and Koss, T. F.** Water-electrolyte balance in goldfish *Carassius auratus* L., under constant and diurnally cycling temperature conditions 97, 427
- Hughes, G. M.** See HILLS, HUGHES and KOYAMA
- Hughes, G. M., Belaud, A., Peyraud, C. and Adcock, P. J.** A comparison of two methods for measurement of O₂ content of small (20 μ l) samples of fish blood 96, 417
- Hughes, G. M., Kikuchi, Y. and Watari, H.** A study of the deformability of red blood cells of a teleost fish, the yellowtail (*Seriola quinqueradiata*), and a comparison with human erythrocytes 96, 209
- Huey, Raymond B. and Hertz, Paul E.** Effects of body size and slope on sprint speed of a lizard (*Stellio (Agama) stellio*) 97, 401
- Jacklet, J. W., Schuster, L. and Rolerson, C.** Electrical activity and structure of retinal cells of the *Aplysia* eye: I. Secondary neurones 99, 369
- Jackson, Donald C. and Ultsch, Gordon R.** Long-term submergence at 3 °C of the turtle, *Chrysemys picta belli*, in normoxic and severely hypoxic water. II. Extracellular ionic responses to extreme lactic acidosis 96, 29
— See also ULTSCH and JACKSON

- Jackson, R. R. and Blest, A. D.** The distances at which a primitive jumping spider, *Portia fimbriata*, makes visual discriminations 97, 441
- Johansen, Kjell.** See BURGREN and JOHANSEN; PETERSSON and JOHANSEN
- Johansen, K., Brix, O. and Lykkeboe, G.** Blood gas transport in the cephalopod, *Sepia officinalis* 99, 331
- Johnston, I. A.** See ALTRINGHAM, YANCEY and JOHNSTON
- Johnston, J.** See TALBOT, EDDY and JOHNSTON
- Jones, David R.** See SMITH and JONES
- Jones, David R. and Milsom, William K.** Peripheral receptors affecting breathing and cardiovascular function in non-mammalian vertebrates 100, 59
- Jones, Douglas S. and MacFadden, Bruce J.** Induced magnetization in the monarch butterfly, *Danaus plexippus* (Insecta, Lepidoptera) 96, 1
- Jones, K. A.** See PAGE and JONES
- Jørgensen, E.** See GESSER and JØRGENSEN
- Josephson, Robert K.** See SCHWAB and JOSEPHSON
- Josephson, R. K. and Stokes, D. R.** Electrical properties of fibres from stridulatory and flight muscles of a Tettigoniid 99, 109
- Jüch, P. J. W.** Do the extraocular muscles in the carp compensate for eye displacements induced by respiratory movements? 99, 363
- Kahn, J. A. and Roberts, A.** The central nervous origin of the swimming motor pattern in embryos of *Xenopus laevis* 99, 185
— The neuromuscular basis of rhythmic struggling movements in embryos of *Xenopus laevis* 99, 197
- Kahn, J. A., Roberts, A. and Kashin, S. M.** The neuromuscular basis of swimming movements in embryos of the amphibian *Xenopus laevis* 99, 175
- Kashin, S. M.** See KAHN, ROBERTS and KASHIN
- Kassim, H. and Sykes, A. H.** The respiratory responses of the fowl to hot climates 97, 301
- Kaufman, Susan E., Kaufman, William R. and Phillips, John E.** Mechanism and characteristics of coxal fluid excretion in the argasid tick *Ornithodoros moubata* 98, 343
- Kaufman, William R.** See KAUFMAN, KAUFMAN and PHILLIPS
- Keijer, E. and Butler, P. J.** Volumes of the respiratory and circulatory systems in tufted and mallard ducks 101, 213
- Kikuchi, Y.** See HUGHES, KIKUCHI and WATARI
- Kimmel, Charles B.** See PRUGH, KIMMEL and METCALF
- Kirsch, R. and Meister, M. F.** Progressive processing of ingested water in the gut of sea-water teleosts 98, 67
- Kirschvink, J. L., Tabrah, F. L. and Batkin, S.** Ferromagnetism in two mouse tumours 101, 321
- Koefoed, Bodil M. and Zerahn, Karl.** Transport of sodium and potassium across the isolated midgut of the larvae of *Tenebrio molitor* related to the fine structure of the epithelium 98, 459
- Koehl, M. A. R.** Mechanical design of spicule-reinforced connective tissue: stiffness 98, 239
- Kondoh, Y. and Obara, Y.** Anatomy of motoneurons innervating mesothoracic indirect flight muscles in the silkworm, *Bombyx mori* 98, 23
- Kormanik, G. A.** See CAMERON and KORMANIK; EVANS, OIKARI, KORMANIK and MANSBERGER
- Koss, T. F.** See HOUSTON and KOSS
- Koyama, T.** See HILLS, HUGHES and KOYAMA
- Kristan, William B., Jr.** Sensory and motor neurones responsible for the local bending response in leeches 96, 161
- Kristan, William B., Jr., McGirr, Stephen J. and Simpson, Gregory V.** Behavioural and mechanosensory neurone responses to skin stimulation in leeches 96, 143
- Land, M. F.** Scanning eye movements in a heteropod mollusc 96, 427
- Lanyon, E.** See RUBIN and LANYON
- Latz, Michael and Case, James F.** Light organ and eyestalk compensation to body tilt in the luminescent midwater shrimp, *Sergestes similis* 98, 83
- Laverack, M. S.** See MAITLAND, LAVERACK and HEITLER
- Lenhoff, Howard.** See HEAGY, DANNER, LENHOFF, COBB and MARSHALL
- Leonard, Janet L.** Transient rhythms in the swimming activity of *Sarsia tubulosa* (Hydrozoa) 96, 181
- Lewis, D. B.** See COLES, GOWERS, BOYD and LEWIS
- Linehan, Catherine M.** The effect of temperature on the tension responses of the anterior bysial retractor muscle (ABRM) of *Mytilus edulis* 97, 375
- Lombard, R. Eric.** See HETHERINGTON and LOMBARD
- Lukowiak, Ken.** See DE FUR and LUKOWIAK; GOLDBERG and LUKOWIAK
- Lykkoboe, G.** See JOHANSEN, BRIX and LYKKOBOE
- McClellan, Andrew D.** Movements and motor patterns of the buccal mass of *Pleurobranchaea* during feeding, regurgitation and rejection 98, 195
— Re-examination of presumed feeding motor activity in the isolated nervous system of *Pleurobranchaea* 98, 213
- McDonald, D. G.** See WOOD, McDONALD and MCMAHON
- McDonald, D. G., Walker, R. L., Wilkes, P. R. H. and Wood, C. M.** H⁺ excretion in the marine teleost *Parophrys vetulus* 98, 403

- Lacey, D. J. and Potter, I. C.** The effect of temperature on the oxygen dissociation curves of whole blood of larval and adult lampreys (*Geotria australis*) 97, 253
- MacFadden, Bruce J.** See JONES and MACFADDEN
- McGirr, Stephen J.** See KRISTAN, MCGIRR and SIMPSON
- Machemer, Hans.** See DEITMER and MACHEMER
- McMahon, B. R.** See WOOD, McDONALD and McMAHON; MORGAN and McMAHON; WILKES and McMAHON; WHEATLY and McMAHON
- Maitland, D. P., Laverack, M. S. and Heitler, W. J. A.** A spiking stretch receptor with central cell bodies in the uropod coxopodite of the squat lobster *Galathea strigosa* (Crustacea, Anomura) 101, 221
- Majcherczyk, S.** See O'REGAN and MAJCHERCZYK
- Maloiy, G. M. O.** See TAYLOR, HEGLUND and MALOY
- Mansberger, Leigh.** See EVANS, OIKARI, KORMANIK and MANSBERGER
- Marshall, Garland.** See HEAGY, DANNER, LENHOFF, COBB and MARSHALL
- McWilliams, P. G.** The effects of calcium on sodium fluxes in the brown trout, *Salmo trutta*, in neutral and acid water 96, 439
- Meister, M. F.** See KIRSCH and MEISTER
- Mellon, DeForest Jr.** See WILSON and MELLON
- Metcalf, Walter K.** See PRUGH, KIMMEL and METCALF
- Metcalf, J. D. and Butler, P. J.** Differences between directly measured and calculated values for cardiac output in the dogfish: a criticism of the Fick method 99, 255
- Milligan, C. L. and Wood, C. M.** Disturbances in haematology, fluid volume distribution and circulatory function associated with low environmental pH in the rainbow trout, *Salmo gairdneri* 99, 397
- Milsom, William K.** See JONES and MILSOM
- Morgan, D. O. and McMahon, B. R.** Acid tolerance and effects of sublethal acid exposure on iono-regulation and acid-base status in two crayfish *Procamarus clarki* and *Oronectes rusticus* 97, 241
- Motokawa, T.** Factors regulating the mechanical properties of holothurian dermis 99, 29
- Mott, J. C.** Control of the foetal circulation 100, 129
- Mulloney, Brian.** See SIGVARDT, KAREN A.
- Mutchmor, J. A.** See BRADFISCH, DREWES and MUTCHMOR
- Nilsson, D.-E. and Odselius, R.** A pronounced fovea in the eye of a water flea, revealed by stereographic mapping of ommatidial axes 99, 473
- Nomoto, Shigeki.** See BECH and NOMOTO
- Obara, Y.** See KONDOH and OBARA
- O'Donnell, M. J.** Hydrophilic cuticle - the basis for water vapour absorption by the desert burrowing cockroach, *Arenivaga investigata* 99, 43
- Water vapour absorption by the desert burrowing cockroach, *Arenivaga investigata*: evidence against a solute dependent mechanism 96, 251
- Odselius, R. A.** See NILSSON and ODSELIUS
- Ogilvy, Christopher S. and DuBois, Arthur B.** Tail thrust of bluefish *Pomatomus saltatrix* at different buoyancies, speeds and swimming angles 98, 105
- O'Grady, S. M., Ellory, J. C. and DeVries, A. L.** Protein and glycoprotein antifreezes in the intestinal fluid of polar fishes 98, 429
- Oikari, Aimo.** See EVANS, OIKARI, KORMANIK and MANSBERGER
- Oldberg, Robert M.** See PINTER, OLDBERG and ABRAMS
- O'Regan, R. G. and Majcherczyk, S.** Role of peripheral chemoreceptors and central chemosensitivity in the regulation of respiration and circulation 100, 23
- Page, C. H. and Jones, K. A.** Abdominal motoneurone responses elicited by flexion of a crayfish leg 99, 339
- Pelhate, M. and Zlotkin, E.** Actions of insect toxin and other toxins derived from the venom of the scorpion *Androctonus australis* on isolated giant axons of the cockroach (*Periplaneta americana*) 97, 67
- Perry, Steve F., Davie, Peter S., Daxboeck, Charles and Randall, David J.** A comparison of CO₂ excretion in a spontaneously ventilating blood-perfused trout preparation and saline-perfused gill preparations: contribution of the branchial epithelium and red blood cell 101, 47
- See also DAXBOECK, DAVIE, PERRY and RANDALL
- Pettersson, Knut and Johansen, Kjell.** Hypoxic vasoconstriction and the effects of adrenaline on gas exchange efficiency in fish gills 97, 263
- Peyraud, C.** See HUGHES, BELAUD, PEYRAUD and ADCOCK
- Phillips, J. E.** See KAUFMAN, KAUFMAN and PHILLIPS; CHAMBERLIN and PHILLIPS
- Piiper, J.** Respiratory gas exchange at lungs, gills and tissues: mechanics and adjustments 100, 5
- Pinter, Robert B., Oldberg, Robert M. and Abrams, Thomas W.** Is the locust DCMD a looming detector? 101, 327
- Pitman, Robert M. and Rand, Kathryn A.** Neural lesions can cause dendritic sprouting of an undamaged adult insect motoneurone 96, 125
- Pitman, R. M.** See DAVID and PITMAN
- Popper, Arthur N.** See COOMBS and POPPER
- Potter, I. C.** See MACEY and POTTER
- Pratt, David W.** Saccadic eye movements are coordinated with head movements in walking chickens 97, 217

- Prior, David J. and Grega, Debra S.** Effects of temperature on the endogenous activity and synaptic interactions of the salivary burster neurones in the terrestrial slug *Limax maximus* 98, 415
- Prugh, John I., Kimmel, Charles B. and Metcalf, Walter K.** Noninvasive recording of the Mauthner neurone action potential in larval zebra-fish 101, 83
- Quamme, G. A.** See STRANGE, PHILLIPS and QUAMME
- Quinlan, Michael.** See HADLEY and QUINLAN
- Rand, Kathryn A.** See PITMAN and RAND
- Randall, David.** The control of respiration and circulation in fish during exercise and hypoxia 100, 275
— See also DAXBOECK, DAVIE, PERRY and RANDALL
- Reynolds, S. E.** See HILLERTON, REYNOLDS and VINCENT
- Richter, D. W.** Generation and maintenance of the respiratory rhythm 100, 93
- Roberts, A.** See KAHN, ROBERTS and KASHIN; KAHN and ROBERTS
- Rolerson, C.** See JACKLET, SCHUSTER and ROLERSON; JACKLET and ROLERSON
- Rome, L. C.** Energetic cost of running with different muscle temperatures in Savannah Monitor lizards 99, 269
- Rubin, Clinton T. and Lanyon, Lance E.** Limb mechanics as a function of speed and gait: a study of functional strains in the radius and tibia of horse and dog 101, 187
- Sacca, R. and Burggren, W.** Oxygen uptake in air and water in the air-breathing reedfish *Calamoichthys calabaricus*: role of skin, gills and lungs 97, 179
- Sandeman, D. C.** See VARJÚ and SANDEMAN
- Sandeman, D. C. and Wilkens, L. O.** Sound production by abdominal stridulation in the Australian Murray river crayfish, *Euastacus armatus* 99, 469
- Schlichter, L. C.** Unstirred mucus layers: ion exchange properties and effect on ion regulation in *Lymnaea stagnalis* 98, 363
- Schuster, L.** See JACKLET, SCHUSTER and ROLERSON
- Schwab, Walter E. and Josephson, Robert K.** Lability of conduction velocity during repetitive activation of an excitable epithelium 98, 175
- Sell, D.** See HOULIHAN and SELL
- Shelton, G. and Boutillier, R. G.** Apnoea in amphibians and reptiles 100, 245
- Siegler, Melody V. S.** Electrical couplings between supernumerary motor neurones in the locust 101, 105
- Sigvardt, Karen A. and Mulloney, Brian.** Sensory alteration of motor patterns in the stomatogastric nervous system of the spiny lobster *Panulirus interruptus* 97, 137
- Properties of synapses made by IVN command interneurons in the stomatogastric ganglion of the spiny lobster, *Panulirus interruptus* 97, 153
- Simpson, Gregory.** See KRISTEN, MCGIRR and SIMPSON

INDEX OF SUBJECTS

Abdominal ganglia:

Identification of the bursicon-containing neurones in, of the tobacco hornworm *Manduca sexta* (TAGHERT and TRUMAN) 98, 385

Abdominal motoneurone responses:

Elicited by flexion of a crayfish leg (PAGE and JONES) 99, 339

Abdominal stridulation:

Sound production by, in the Australian Murray river crayfish, *Euastacus armatus* (SANDEMAN and WILKENS) 99, 469

Acheta domesticus:

Simultaneous measurement of water loss and carbon dioxide production in the cricket (HADLEY and QUINLAN) 101, 343

Acid-base balance:

In *Callinectes sapidus* during acclimation from high to low salinity (HENRY and CAMERON) 101, 255

Acid-base imbalance:

In lizards during activity and recovery (GLEESON and BENNETT) 98, 439

Acid-base physiology:

Respiration and, of the spotted gar, a bimodal breather. I. Normal values and the response to severe hypoxia (SMATRESK and CAMERON) 96, 263

— Respiration and, of the spotted gar, a bimodal breather. II. Responses to temperature change and hypercapnia (SMATRESK and CAMERON) 96, 281

— Respiration and, of the spotted gar, a bimodal breather. III. Response to a transfer from fresh water to 50 % sea water, and control of ventilation (SMATRESK and CAMERON) 96, 295

Acid-base regulation:

The influence of experimental anaemia on blood, *in vivo* and *in vitro* in the starry flounder (*Platichthys stellatus*) and the rainbow trout (*Salmo gairdneri*) (WOOD, McDONALD and McMAHON) 96, 221

— Intracellular and extracellular, in the tropical fresh-water teleost fish *Synbranchus marmoratus* in response to the transition from water breathing to air breathing (HEISLER) 99, 9

— Responses to hypersaline exposure in the euryhaline crayfish *Pacifastacus lemnisculus*. I. The interaction between ionic and (WHEATLY and McMAHON) 99, 425

Acid-base responses:

The, of gills and kidneys to infused acid and base loads in the channel catfish, *Ictalurus punctatus* (CAMERON and KORMANIK) 99, 143

Acid-base status:

Long-term submergence at 3 °C of the

turtle, *Chrysemys picta bellii*, in normoxic and severely hypoxic water. I. Survival, gas exchange and (ULTSCH and JACKSON) 96, 11

— Acid tolerance and effects of sublethal acid exposure on iono-regulation and, in two crayfish *Procambarus clarki* and *Orconectes rusticus* (MORGAN and McMAHON) 97, 241

— Intracellular and extracellular, as a function of temperature in the freshwater channel catfish, *Ictalurus punctatus* (CAMERON and KORMANIK) 99, 127

— The effects of hypercapnia on intracellular and extracellular, in the toad *Bufo marinus* (TOEWS and HEISLER) 97, 79

Acid exposure:

Acid tolerance and effects of sublethal, on iono-regulation and acid-base status in two crayfish *Procambarus clarki* and *Orconectes rusticus* (MORGAN and McMAHON) 97, 241

Acid extrusions:

Mechanisms of, by two marine fishes: the teleost, *Opsanus beta*, and the elasmobranch, *Squalus acanthias* (EVANS) 97, 289

Acid tolerance:

And effects of sublethal acid exposure on iono-regulation and acid-base status in two crayfish *Procambarus clarki* and *Orconectes rusticus* (MORGAN and McMAHON) 97, 241

Acid water:

Physiological response to, in brown trout (*Salmo trutta* L.): cell volume regulation in heart ventricle tissue (FUGELLI and VISLIE) 101, 71

Acoustic transmission:

Through the head of the common mole, *Talpa europaea* (COLES, GOWERS, BOYD and LEWIS) 101, 337

Action potential trajectories:

Characterization of *Lymnaea* neurones by determination of (WINLOW, HOLDEN and HAYDON) 99, 207

Adrenaline:

Hypoxic vasoconstriction and the effects of, on gas exchange efficiency in fish gills (PETTERSSON and JOHANSEN) 97, 263

Aedes aegyptii:

Energetics of osmoregulation (EDWARDS) 101, 135

— Ion concentration and activity in the haemolymph of, larvae (EDWARDS) 101, 143

Air breathing:

Intracellular and extracellular acid-base regulation in the tropical fresh-water teleost fish *Synbranchus marmoratus* in response to the transition from water breathing to (HEISLER) 99, 9

Air breathing in fishes:

The transition to. I. Environmental effects on

Air breathing in fishes (cont.)

the facultative airbreathing of *Ancistrus chagresi* and *Hypostomus plecostomus* (Loricariidae) (GRAHAM and BAIRD) 96, 53

Air-breathing reedfish:

See *Calamoichthys calabaricus*

Amphibian:

See *Xenopus laevis*

Amphibians:

Apnoea in, and reptiles (SHELTON and BOUTILIER) 100, 245

Anaerobic metabolism:

The respiratory metabolism of temperature-adapted flatfish at rest and during swimming activity and the use of, at moderate swimming speeds (DUTHIE) 97, 359

***Ancistrus chagresi*:**

The transition to air breathing in fishes. I. Environmental effects on the facultative air breathing of, and *Hypostomus plecostomus* (Loricariidae) (GRAHAM and BAIRD) 96, 53

***Androctonus australis*:**

Actions of insect toxin and other toxins derived from the venom of the scorpion, on isolated giant axons of the cockroach (*Periplaneta americana*) (PELHATE and ZLOTKIN) 97, 67

Animal orientation:

Skylight polarization patterns and (BRINES and GOULD) 96, 69

Antenna:

Reflex reversal resulting from active movements in the, of the rock lobster (VEDEL) 101, 121

Anterior byasal retractor muscle:

The effect of temperature on the tension responses of the, (ARBM) of *Mytilus edulis* (LINEHAN) 97, 375

Anuran amphibians:

Biophysics of underwater hearing in (HETHERINGTON and LOMBARD) 98, 49

***Aplysia californica*:**

Transfer of habituation shows an interaction between neuronal circuits of the gill withdrawal reflex in (GOLDBERG and LUKOWIAK) 96, 107

— Some *in vivo* and *in vitro* characteristics of, haemolymph (DE FUR and LUKOWIAK) 101, 347

***Aplysia* eye:**

Electrical activity and structure of retinal cells of the: I. Secondary neurones (JACKLET, SCHUSTER and ROLERSON) 99, 369

— Electrical activity and structure of retinal cells of the: II. Photoreceptors (JACKLET and ROLERSON) 99, 381

Apnoea:

In amphibians and reptiles (SHELTON and BOUTILIER) 100, 245

***Arenivaga investigata*:**

Water vapour absorption by the desert burrowing cockroach: evidence against a solute dependent mechanism (O'DONNELL) 96, 251

— Hydrophilic cuticle — the basis for water vapour absorption by the desert burrowing cockroach (O'DONNELL) 99, 43

Argasid tick:

See *Ornithodoros moubata*

***Arius felis*:**

Auditory acuity in the sea catfish (TAVOLGA) 96, 367

Arthropods:

Resting tension and posture in (YOX, DICAPRIO and FOURTNER) 96, 421

Auditory acuity:

In the sea catfish (*Arius felis*) (TAVOLGA) 96, 367

Auditory system:

Structure and function of the, in the clown knifefish, *Notopterus chitala* (COOMBS and POPPER) 97, 225

Australian blackfish:

See *Gadopsis marmoratus*

Axotomy:

The effects of, upon extrasynaptic acetylcholine sensitivity of an identified motoneurone in the cockroach *Periplaneta americana* (DAVID and PITMAN) 98, 329

Azaserine affinity:

Labelling of γ -glutamyl transferase of *Hydra attenuata* without inactivation of the glutathione receptor (HEAGY, DANNER, LENHOFF and COBB) 101, 287

Bimodal breather:

Respiration and acid-base physiology of the spotted gar, A. I. Normal values and the response to severe hypoxia (SMATRESK and CAMERON) 96, 263

— Respiration and acid-base physiology of the spotted gar, A. II. Responses to temperature change and hypercapnia (SMATRESK and CAMERON) 96, 281

— Respiration and acid-base physiology of the spotted gar, A. III. Response to a transfer from fresh water to 50 % sea water, and control of ventilation (SMATRESK and CAMERON) 96, 295

Biophysics:

Of underwater hearing in anuran amphibians (HETHERINGTON and LOMBARD) 98, 49

Birds:

Respiratory cardiovascular control during diving in, and mammals (BUTLER) 100, 195

— Energetics and mechanics of terrestrial locomotion. I. Metabolic energy consumption as a function of speed and body size in, and mammals (TAYLOR, HEGLUND and MALOIN) 97, 1

— Energetics and mechanics of terrestrial locomotion. II. Kinetic energy changes of the limbs and body as a function of speed and body size in, and mammals (FEDAK, HEGLUND and TAYLOR) 97, 23

— Energetics and mechanics of terrestrial locomotion. III. Energy changes of the centre of mass as a function of speed and body size

- Birds (cont.)**
 and mammals (HEGLUND, CAVAGNA and TAYLOR) 97, 41
- Energetics and mechanics of terrestrial locomotion. IV. Total mechanical energy changes as a function of speed and body size in, and mammals (HEGLUND, FEDAK, TAYLOR and CAVAGNA) 97, 57
 - Bone strength in small mammals and bipedal, do safety factors change with body size? (BIEWENER) 98, 289
- Blood:**
 The effect of temperature on the oxygen dissociation curves of whole, of larval and adult lampreys (*Geotria australis*) (MACEY and POTTER) 97, 253
- The effect of changes in, oxygen-carrying capacity on ventilation volume in the rainbow trout (*Salmo gairdneri*) (SMITH and JONES) 97, 325
 - Physiological evidence for the occurrence of pathways shunting, away from the secondary lamellae of eel gills (HUGHES, PEYRAUD, PEYRAUD-WAITZENEGGER and SOULIER) 98, 277
 - Gas transport in the cephalopod, *Sepia officinalis* (JOHANSEN, BRIX and LYKKEBOE) 99, 331
- Blood oxygen affinity:**
 Regulation of, in the Australian blackfish *Gadopsis marmoratus*. I. Correlations between oxygen-binding properties, habitat and swimming behaviour (DOBSON and BALDWIN) 99, 223
- Regulation of, in the Australian blackfish *Gadopsis marmoratus*. II. Thermal acclimation (DOBSON and BALDWIN) 99, 245
- Bluefish:**
 See *Pomatomus saltatrix*
- Body tilt:**
 Light organ and eyestalk compensation to, in the luminescent midwater shrimp, *Sergestes similis* (LATZ and CASE) 98, 83
- Bombyx mori:**
 Anatomy of motoneurons innervating mesothoracic indirect flight muscles in the (KONDOH and OBARA) 98, 23
- Bone strength:**
 In small mammals and bipedal birds: do safety factors change with body size? (BIEWENER) 98, 289
- Branchial epithelium:**
 A comparison of CO₂ excretion in a spontaneously ventilating blood-perfused trout preparation and saline-perfused gill preparations: contribution of the, and red blood cell (PERRY, DAVIE, DAXBOECK and RANDALL) 101, 47
- Branchial heart:**
 The contribution of the, to the accessory branchial pump in the Octopoda (SMITH) 98, 229
- Branchial pump:**
 The contribution of the branchial heart to the accessory, in the Octopoda (SMITH) 98, 229
- Brown trout:**
 See *Salmo trutta* (L.)
- Buccal mass:**
 Movements and motor pattern of the, of *Pleurobranchaea* during feeding, regurgitation and rejection (McCLELLAN) 98, 195
- Bufo marinus:**
 The effects of hypercapnia on intracellular and extracellular acid-base status in the toad (TOEWS and HEISLER) 97, 79
- Burrowing cockroach:**
 See *Arenivaga investigata*
- Burst-and-coast swimming:**
 Energetic advantages of, of fish at high speeds (VIDELER and WEIHS) 97, 169
- Ca-balance:**
 pH_i, contractility and, under hypercapnic acidosis in the myocardium of different vertebrate species (GESSER and JØRGENSEN) 96, 405
- Ca-dependent excitability:**
 Osmotic tolerance of, in the marine ciliate *Paramecium calkinsi* (DEITMER) 97, 311
- Calamoichthys calabaricus:**
 Oxygen uptake in air and water in the air-breathing reedfish: role of skin, gills and lungs (SACCA and BURGGREN) 97, 179
- Calcium:**
 The effects of, on sodium fluxes in the brown trout, *Salmo trutta*, in neutral and acid water (McWILLIAMS) 96, 439
- Physiological and ultrastructural studies on the longitudinal retractor muscle of a sea cucumber *Stichopus japonicus*. II. Intracellular localization and translocation of activator, during mechanical activity (SUZUKI and SUGI) 97, 113
 - Importance of, and magnesium ions for post-excitatory hypersensitivity in the jumping spider (*Menemerus*) eye (YAMASHITA and TATEDA) 97, 187
- Callinectes sapidus:**
 Acid-base balance in, during acclimation from high to low salinity (HENRY and CAMERON) 101, 255
- Cancer pagurus (L.):**
 The respiration of, under normoxic and hypoxic conditions (BRADFORD and TAYLOR) 97, 273
- Carassius auratus (L.):**
 Water-electrolyte balance in goldfish, under constant and diurnally cycling temperature conditions (HOUSTON and KOSS) 97, 427
- Carausius morosus:**
 Peripheral influences on the movement of the legs in a walking insect (CRUSE and EPSTEIN) 101, 161
- Carbon dioxide production:**
 Simultaneous measurement of water loss and, in the cricket, *Acheta domestica* 101, 343

***Carcinus maenas*:**

Extracellular fluid volume changes in, during acclimation to low and high environmental salinities (HARRIS and ANDREWS) 99, 161

Cardiac output:

Differences between directly measured and calculated values for, in the dogfish: a criticism of the Fick method (METCALFE and BUTLER) 99, 255

Cardiopulmonary coupling:

During exercise (WHIPP and WARD) 100, 175

Cardiovascular adjustments:

Effect of maintained hypoxic exposure on the crayfish *Orconectes rusticus*. I. Ventilatory, acid-base and (WILKES and McMAHON) 98, 119

Cardiovascular changes:

Associated with treadmill running in the Pekin duck (BECH and NOMOTO) 97, 345

Cardiovascular control:

Central nervous integration of (SPYER) 100, 109

— Respiratory, during diving in birds and mammals (BUTLER) 100, 195

Cardiovascular function:

Peripheral receptors affecting breathing and, in non-mammalian vertebrates (JONES and MILSOM) 100, 59

Carp:

Do the extraocular muscles in the, compensate for eye displacements induced by respiratory movements? (JÜCH) 99, 363

Catecholamine hormones:

On the instability of K⁺ influx in erythrocytes of the rainbow trout, *Salmo gairdneri*, and the role of, in maintaining *in vivo* influx activity (BOURNE and COSSINS) 101, 93

Catecholamines:

Changes in vascular and extravascular volumes of eel muscle in response to: the function of the caudal lymphatic heart (DAVIE) 96, 195

Caudal lymphatic heart:

Changes in vascular and extravascular volumes of eel muscle in response to catecholamines: the function of the (DAVIE) 96, 195

Cell volume regulation:

Physiological response to acid water in brown trout (*Salmo trutta* L.): in heart ventricle tissue (FUGELLI and VISLIE) 101, 71

Central cell bodies:

A spiking stretch receptor with, in the uropod coxopodite of the squat lobster *Galathea strigosa* (Crustacea, Anomura) (MAITLAND, LAVERACK and HEITLER) 101, 221

Central chemosensitivity:

Role of peripheral chemoreceptors and, in the regulation of respiration and circulation (O'REGAN and MAJCHERCZYK) 100, 23

Central nervous origin:

The, of the swimming motor pattern in embryos of *Xenopus laevis* (KAHN and ROBERTS) 99, 185

Central pattern generators:

On peripheral control mechanisms acting on the, for swimming in the dogfish (GRILLNER and WALLÉN) 98, 1

Cephalopod:

See *Sepia officinalis*

Cephalopods:

Ventilatory currents in the mantle of (WELLS and WELLS) 99, 315

Cercal afferents:

Morphology of identified, and giant interneurons in the hatchling cockroach *Periplaneta americana* (BLAGBURN and BRADLE) 97, 421

Chickens:

Saccadic eye movements are coordinated with head movements in walking (PRATT) 97, 217

Chill-coma:

The effects of cooling on an identified reflex pathway in the cockroach (*Periplaneta americana*), in relation to (BRADFISCH, DREWES and MUTCHMOR) 96, 131

Chloride-dependent short-circuit current:

Metabolic support of, across locust rectum (CHAMBERLIN and PHILLIPS) 99, 349

Chloride transport:

Sodium and, in the isolated intestine of the earthworm, *Lumbricus terrestris* (L.) (CORNELL) 97, 197

***Chrysemys picta bellii*:**

Long-term submergence at 3 °C of the turtle, in normoxic and severely hypoxic water. I. Survival, gas exchange and acid-base status (ULTSCH and JACKSON) 96, 11

— Long-term submergence at 3 °C of the turtle, in normoxic and severely hypoxic water. II. Survival, gas exchange and acid-base status (JACKSON and ULTSCH) 96, 29

— Long-term submergence at 3 °C of the turtle, in normoxic and severely hypoxic water. III. Effects of changes in ambient P_{O₂} and subsequent air breathing (ULTSCH and JACKSON) 97, 87

Circulation:

Role of peripheral chemoreceptors and central chemosensitivity in the regulation of respiration and (O'REGAN and MAJCHERCZYK) 100, 23

— The control of respiration and, in fish during exercise and hypoxia (RANDALL) 100, 275

— Control and co-ordination of ventilation and, in crustaceans: responses to hypoxia and exercise (TAYLOR) 100, 291

Circulatory control:

Respiration and, at high altitudes (WEST) 100, 147

— Respiratory and, during sleep (COOTE) 100, 223

— The defence-arousal system and its relevance for, and respiratory control (HILTON) 100, 159

Circulatory function:

Disturbances in haematology, fluid volume

distribution and, associated with low environmental pH in the rainbow trout, *Salmo gairdneri* (MILLIGAN and WOOD) 99, 397

Circulatory systems:

Volumes of the respiratory and, in tufted and mallard ducks (KEIJER and BUTLER) 101, 213

Clown knifefish:

See *Notopterus chitala*

CO₂:

A comparison of, excretion in a spontaneously ventilating blood-perfused trout preparation and saline-perfused gill preparations: contribution of the branchial epithelium and red blood cell (PERRY, DAVIE, DAXBOECK and RANDALL) 101, 47

Cobalt:

A dual effect of, ions on the spontaneous release of transmitter at insect motor nerve terminals (WASHIO) 98, 353

Cockroach:

The, DCMD neurone. I. Lateral inhibition and the effects of light- and dark-adaptation (EDWARDS) 99, 61

— The, DCMD neurone. II. Dynamics of response habituation and convergence of spectral inputs (EDWARDS) 99, 91

— See also *Periplaneta americana*

Common mole:

See *Talpa europaea*

Complex muscle:

A simple method for studying the innervation of a (THEOPHILIDIS) 96, 435

Conduction velocity:

Lability of, during repetitive activation of an excitable epithelium (SCHWAB and JOSEPHSON) 98, 175

Coxal fluid excretion:

Mechanism and characteristics of, in the argasid tick *Ornithodoros moubata* (KAUFMAN, KAUFMAN and PHILLIPS) 98, 343

Crab:

See *Leptograpsus variegatus*

Crayfish:

Non-spiking stretch-receptors in the, swimmeret system (HEITLER) 96, 355

— Acid tolerance and effects of sublethal acid exposure on ionic-regulation and acid-base status in two, *Procambarus clarki* and *Orconectes rusticus* (MORGAN and McMAHON) 97, 241

— Effect of maintained hypoxic exposure on the, *Orconectes rusticus*. I. Ventilatory, acid-base and cardiovascular adjustments (WILKES and McMAHON) 98, 119

— Effect of maintained hypoxic exposure on the, *Orconectes rusticus*. II. Modulation of haemocyanin oxygen affinity (WILKES and McMAHON) 98, 139

— See also *Procambarus clarki*; *Orconectes rusticus*

Crayfish leg:

Abdominal motoneurone responses elicited by flexion of a (PAGE and JONES) 99, 339

Cricket:

See *Acheta domestica*

Crustacean(s):

Control and co-ordination of ventilation and circulation in: responses to hypoxia and exercise (TAYLOR) 100, 291

— Thermal acclimation in a, neuromuscular system (STEPHENS and ATWOOD) 98, 39

Danaus plexippus

Induced magnetization in the monarch butterfly, (Insecta, Lepidoptera) (JONES and MACFADDEN) 96, 1

DCMD:

The cockroach, neurone. I. Lateral inhibition and the effects of light- and dark-adaptation (EDWARDS) 99, 61

— The cockroach, neurone. II. Dynamics of response habituation and convergence of spectral inputs 99, 91

— Is the locust, a looming detector? (PINTER, OLDBERG and ABRAMS) 101, 327

Defence-arousal system:

The, and its relevance for circulatory and respiratory control (HILTON) 100, 159

Dendritic sprouting:

Neural lesions can cause, of an undamaged adult insect motoneurone (PITMAN and RAND) 96, 125

Desert burrowing cockroach:

See *Arenivaga investigata*

Dog:

Limb mechanics as a function of speed and gait: a study of functional strains in the radius and tibia of horse and (RUBIN and LANYON) 101, 187

Dogfish:

The effects of osmoregulatory solutes on tension generation by, skinned muscle fibres (ALTRINGHAM, YANCEY and JOHNSTON) 96, 443

— On peripheral control mechanisms acting on the central pattern generators for swimming in the (GRILLNER and WALLÉN) 98, 1

— Differences between directly measured and calculated values for cardiac output in the: a criticism of the Fick method (METCALFE and BUTLER) 99, 255

Drosophila:

Flight motor pattern: the evidence from interspike intervals (WYMAN and TANOUYE) 96, 413

Ducks:

Volumes of the respiratory and circulatory systems in tufted and mallard (KEIJER and BUTLER) 101, 213

Dye infusion:

A gold-plated suction electrode for extracellular recording and (THEOPHILIDIS and BURNS) 98, 455

Earthworm:

See *Lumbricus terrestris* (L.)

Echinoderms:

Ion-dependent viscosity of holothurian body wall and its implications for the functional morphology of (EYLER) 99, 1

Eel:

Physiological evidence for the occurrence of pathways shunting blood away from the secondary lamellae of, gills (HUGHES, PEYRAUD, PEYRAUD-WAITZENEGGER and SOULIER) 98, 277

Eel muscle:

Changes in vascular and extravascular volumes of, in response to catecholamines: the function of the caudal lymphatic heart (DAVIE) 96, 195

Elasmobranch:

See *Squalus acanthias*

Electrical activity:

And structure of retinal cells of the *Aplysia* eye. I. Secondary neurones (JACKLET, SCHUSTER and ROLERSON) 99, 369

— And structure of retinal cells of the *Aplysia* eye. II. Photoreceptors (JACKLET and ROLERSON) 99, 381

Electrical couplings:

Between supernumerary motor neurones in the locust (SIEGLER) 101, 105

Electrical properties:

Of fibres from stridulatory and flight muscles of a Tettigoniid (JOSEPHSON and STOKES) 99, 109

— The morphology and passive, of claw closer neurones in snapping shrimp (WILSON and MELLON) 101, 307

Embryos:

The neuromuscular basis of swimming movements in, of the amphibian *Xenopus laevis* (KAHN, ROBERTS and KASHIN) 99, 175

— The central nervous origin of the swimming motor pattern in, of *Xenopus laevis* (KAHN and ROBERTS) 99, 185

— The neuromuscular basis of the rhythmic struggling movements in, of *Xenopus laevis* (KAHN and ROBERTS) 99, 197

Endogenous activity:

Effects of temperature on the, and synaptic interactions of the salivary burster neurones in the terrestrial slug *Limax maximus* (PRIOR and GRECA) 98, 415

Endogenous crepuscular rhythm:

An, of rainbow trout (*Salmo gairdneri*) photo-mechanical movements (DOUGLAS) 96, 377

Energetics and functional principles:

Excretion in insects (FLOREY) 99, 417

Environmental salinities:

Extracellular fluid volume changes in *Carcinus maenas* during acclimation to low and high (HARRIS and ANDREWS) 99, 161

Erythrocytes:

On the instability of K^+ influx in, of the rainbow trout, *Salmo gairdneri*, and the role of catecholamine hormones in maintaining *in vivo* influx activity (BOURNE and COSSINS) 101, 93

Euastacus armatus:

Sound production by abdominal stridulation in the Australian Murray river crayfish (SANDEMAN and WILKENS) 99, 469

Euryhaline crayfish:

See *Pacifastacus leniusculus*

Excitable epithelium:

Lability of conduction velocity during repetitive activation of an (SCHWAB and JOSEPHSON) 98, 175

Experimental anaemia:

The influence of, on blood acid-base regulation *in vivo* and *in vitro* in the starry flounder (*Platichthys stellatus*) and the rainbow trout (*Salmo gairdneri*) (WOOD, McDONALD and McMAHON) 96, 221

Extracellular recording:

A gold-plated suction electrode for, and dye infusion (THEOPHILIDIS and BURNS) 98, 455

Extraocular muscles:

Do the, in the carp compensate for eye displacements induced by respiratory movements? (JÜCH) 99, 363

Extrasynaptic acetylcholine sensitivity:

The effects of axotomy upon the, of an identified motoneurone in the cockroach *Periplaneta americana* (DAVID and PITMAN) 98, 329

Eye displacements:

Do the extraocular muscles in the carp compensate for, induced by respiratory movements? (JÜCH) 99, 363

Eye movements:

Scanning, in a heteropod mollusc (LAND) 96, 427

— Of the crab *Leptograpsus variegatus* elicited by imposed leg movements (VARJÚ and SANDEMAN) 98, 151

Eyestalk compensation:

Light organ and, to body tilt in the luminescent midwater shrimp, *Sergestes similis* (LATZ and CASE) 98, 83

Feeding:

Movements and motor patterns of the buccal mass of *Pleurobranchaea* during, regurgitation and rejection (McCLELLAN) 98, 195

— Re-examination of presumed, motor activity in the isolated nervous system of *Pleurobranchaea* (McCLELLAN) 98, 213

Feeding behaviour:

The function of chemo- and mechanoreceptors in lobster (*Homarus americanus*) (DERBY and ATEMA) 98, 317

Foetal circulation:

Control of the (MOTT) 100, 129

Femoral chordotonal organ:

Reflex effects of the, upon leg motor neurones in the locust (FIELD and BURROWS) 101, 265

Ferromagnetism:

In two mouse tumours (KIRSCHVINK, TABRAV and BATKIN) 101, 321

Fish:

Branchial $\text{Na}^+/\text{NH}_4^+$ exchange is via basolateral Na^+-K^+ -activated ATPase (CLAIBORNE, EVANS and GOLDSTEIN) 96, 431

- A study of the deformability of red blood cells of a teleost, the yellowtail (*Seriola quinqueradiata*), and a comparison with human erythrocytes (HUGHES, KIKUCHI and WATARI) 96, 209

- Oxygenation and deoxygenation kinetics of red cells in isolated lamellae of, gills (HILLS, HUGHES and KOYAMA) 98, 269

- The control of respiration and circulation in, during exercise and hypoxia (RANDALL) 100, 275

Fish blood:

A comparison of two methods for measurement of O_2 content of small (20 μl) samples of, (HUGHES, PEYRAUD and ADCOCK) 96, 417

Flatfish:

The respiratory metabolism of temperature-adapted, at rest and during swimming activity and the use of anaerobic metabolism at moderate swimming speeds (DUTHIE) 97, 359

Flight muscles:

Anatomy of motoneurons innervating mesothoracic indirect, in the silkworm, *Bombyx mori* (KONDOH and OBARA) 98, 23

- Electrical properties of fibres from stridulatory and, of a Tettigoniid (JOSEPHSON and STOKES) 99, 109

Fluid volume changes:

Extracellular, in *Carcinus maenas* during acclimation to low and high environmental salinities (HARRIS and ANDREWS) 99, 161

Fluid volume distribution:

Disturbances in haematology, and circulatory function associated with low environmental pH in the rainbow trout, *Salmo gairdneri* (MILLIGAN and WOOD) 99, 397

Fowl:

Respiration in exercising. III. Ventilation (BRACKENBURY, GLEESON and AVERY) 96, 315

- The respiratory responses of the, to hot climates (KASSIM and SYKES) 97, 301

Fovea:

A pronounced, in the eye of a water flea, revealed by stereographic mapping of ommatidial axes (NILSSON and ODSELIUS) 99, 473

Free amino acids:

As regulators of osmotic pressure in aquatic insect larvae (EDWARDS) 101, 153

Freshwater channel catfish:

See *Ictalurus punctatus*

Frequency analysis:

The anatomical and mechanical basis of stimulation and, in the locust ear (STEPHEN and BENNET-CLARK) 99, 279

Functional morphology:

Ion-dependent viscosity of holothurian body wall and its implications for the, of echinoderms (EYLLERS) 99, 1

Functional strains:

Limb mechanics as a function of speed and gait: a study of, in the radius and tibia of horse and dog (RUBIN and LANYON) 101, 187

***Gadopsis marmoratus*:**

Regulation of blood oxygen affinity in the Australian blackfish. I. Correlations between oxygen-binding properties, habitat and swimming behaviour (DOBSON and BALDWIN) 99, 223

- Regulation of blood oxygen affinity in the Australian blackfish. II. Thermal acclimation (DOBSON and BALDWIN) 99, 245

***Galathea strigosa*:**

A spiking stretch receptor with central cell bodies in the uropod coxopodite of the squat lobster, (Crustacea, Anomura) (MAITLAND, LAVERACK and HEITLER) 101, 221

Gas exchange:

Long-term submergence at 3 °C of the turtle, *Chrysemys picta belli*, in normoxic and severely hypoxic water. I. Survival, and acid-base status (ULTSCH and JACKSON) 96, 11

- Hypoxic vasoconstriction and the effects of adrenaline on, efficiency in fish gills (PETTERSSON and JOHANSEN) 97, 263

- Respiratory, at lungs, gills and tissues: mechanics and adjustments (PIIPER) 100, 5

Gas transfers:

In a spontaneously ventilating blood-perfused trout preparation (DAVIE, DAXBOECK, PERRY and RANDALL) 101, 17

Gas transport:

Blood, in the cephalopod, *Sepia officinalis* (JOHANSEN, BRIX and LYKKEBOE) 99, 331

***Geotria australis*:**

The effect of temperature on the oxygen dissociation curves of whole blood of larval and adult lampreys (MACEY and POTTER) 97, 253

Gill(s):

Transfer of habituation shows an interaction between neuronal circuits of the, withdrawal reflex in *Aplysia californica* (GOLDBERG and LUKOWIAK) 96, 107

- Oxygen uptake in air and water in the air-breathing reedfish *Calamoichthys calabaricus*: role of skin, and lungs (SACCA and BURGGREN) 97, 179

- Hypoxic vasoconstriction and the effects of adrenaline on gas exchange efficiency in fish (PETTERSSON and JOHANSEN) 97, 263

- Oxygenation and deoxygenation kinetics of red cells in isolated lamellae of fish (HILLS, HUGHES and KOYAMA) 98, 269

- Physiological evidence for the occurrence of pathways shunting blood away from the secondary lamellae of eel (HUGHES, PEYRAUD, PEYRAUD-WAITZENEGGER and SOULIER) 98, 277

- The acid-base responses of, and kidneys to infused acid and base loads in the channel

Gill(s) (cont.)

catfish, *Ictalurus punctatus* (CAMERON and KORMANIK) 99, 143

— Respiratory gas exchange at lungs, and tissues: mechanics and adjustments (PIIPER) 100, 5

— A comparison of CO₂ excretion in a spontaneously ventilating blood-perfused trout preparation and saline perfused, preparations: contribution of the branchial epithelium and red blood cell (PERRY, DAVIE, DAXBOECK and RANDALL) 101, 47

 γ -glutamyl transferase:

Azaserine affinity of, of *Hydra attenuata* without inactivation of the glutathione receptor (HEAGY, DANNER, LENHOFF and COBB) 101, 287

Glutathione receptor:

Azaserine affinity labelling of γ -glutamyl transferase of *Hydra attenuata* without inactivation of the (HEAGY, DANNER, LENHOFF and COBB) 101, 287

Glycogen loss:

Relationship between muscle force and muscle area showing, during locomotion (ARMSTRONG and TAYLOR) 97, 411

Goldfish:

See *Carassius auratus* L.

***Gonyaulax* clock:**

Inhibitors of protein synthesis on 80s ribosomes phase shift the (TAYLOR, DUNLAP and HASTINGS) 97, 121

H⁺:

Excretion in the marine teleost *Parophrys vetulus* (MCDONALD, WALKER, WILKES and WOOD) 98, 403

Haemolymph:

Ion concentration and activity in the, of *Aedes aegypti* larvae (EDWARDS) 101, 143

— Some *in vivo* and *in vitro* characteristics of *Aplysia californica* (DE FUR and LUKOWIAK) 101, 347

Haemocyanin:

Responses to hypersaline exposure in the euryhaline crayfish *Pacifastacus leniusculus*. II. Modulation of, oxygen binding *in vitro* and *in vivo* (WHEATLY and MCMAHON) 99, 447

HCO₃⁻:

Active, secretion in the rectal salt gland of a mosquito larva inhabiting NaHCO₃CO₂ lakes (STRANGE, PHILLIPS and QUAMME) 101, 171

Heart ventricle tissue:

Physiological response to acid water in brown trout (*Salmo trutta* L.): cell volume regulation in (FUGELLI and VISLIE) 101, 71

Heteropod mollusc:

Scanning eye movements in a (LAND) 96, 427

Holothurian body wall:

Ion-dependent viscosity of, and its implications for the functional morphology of echinoderms (EYLER) 99, 1

Holothurian dermis:

Factors regulating the mechanical properties of (MOTOKAWA) 99, 29

***Homarus americanus*:**

Chemosensitivity of walking legs of the lobster: neurophysiological response spectrum and thresholds (DERBY and ATEMA) 98, 303

— The function of chemo- and mechanoreceptors in lobster, feeding behaviour (DERBY and ATEMA) 98, 317

Hormone bursicon:

The distribution and molecular characteristics of the tanning, in the tobacco hornworm *Manduca sexta* (TAGHERT and TRUMAN) 98, 373

Horse:

Limb mechanics as a function of speed and gait: a study of functional strains in the radius and tibia of, and dog (RUBIN and LANYON) 101, 187

Human erythrocytes:

A study of the deformability of red blood cells of a teleost fish, the yellowtail (*Seriola quinqueradiata*), and a comparison with (HUGHES, KIKUCHI and WATARI) 96, 209

***Hyalophora cecropia*:**

Inhibition of active K transport in the isolated midgut of, by TI⁺ (ZERAHN) 96, 307

***Hydra attenuata*:**

Azaserine affinity labelling of γ -glutamyl transferase of, without inactivation of the glutathione receptor (HEAGY, DANNER, LENHOFF and COBB) 101, 287

Hydrophilic cuticle:

The basis for water vapour absorption by the desert burrowing cockroach, *Arenivaga investigata* (O'DONNELL) 99, 43

Hypercapnia:

Respiration and acid-base physiology of the spotted gar, a bimodal breather. II. Responses to temperature change and (SMATRESK and CAMERON) 96, 281

— The effects of, on intracellular and extracellular acid-base status in the toad *Bufo marinus* (TOEWS and HEISLER) 97, 79

Hypercapnia acidosis:

pH_i, contractility and Ca-balance under, in the myocardium of different vertebrate species (GROSS and JØRGENSEN) 96, 405

***Hyperolius nasutus*:**

Water loss and nitrogen excretion in sharp-nosed reed frogs (Anura, Hyperoliidae) (WITHERS, HILLMAN, DREWES and SOKOL) 97, 335

Hypersaline exposure:

Responses to, in the euryhaline crayfish *Pacifastacus leniusculus*. I. The interaction between ionic and acid-base regulation (WHEATLY and MCMAHON) 99, 425

— Responses to, in the euryhaline crayfish *Pacifastacus leniusculus*. II. Modulation of haemocyanin oxygen binding *in vitro* and *in vivo* (WHEATLY and MCMAHON) 99, 441

Hypostomus plecostomus (Loricariidae):

The transition to air breathing in fishes. I. Environmental effects on the facultative air breathing of *Ancistrus chagresi* and (GRAHAM and BAIRD) 96, 53

Hypoxia:

The control of respiration and circulation in fish during exercise and (RANDALL) 100, 275

— Control and co-ordination of ventilation and circulation in crustaceans: responses to, and exercise (TAYLOR) 100, 291

Hypoxic exposure:

Effect of maintained, on the crayfish *Orconectes rusticus*. I. Ventilatory, acid-base and cardiovascular adjustments (WILKES and MCMAHON) 98, 119

— Effect of maintained, on the crayfish *Orconectes rusticus*. II. Modulation of haemocyanin oxygen affinity (WILKES and MCMAHON) 98, 139

Hypoxic vasoconstriction:

And the effects of adrenaline on gas exchange efficiency in fish gills (PETTERSSON and JOHANSEN) 97, 263

Ictalurus punctatus:

Intracellular and extracellular acid-base status as a function of temperature in the freshwater channel catfish (CAMERON and KORMANIK) 99, 127

— The acid-base responses of gills and kidneys to infused acid and base loads in the channel catfish (CAMERON and KORMANIK) 99, 143

Identified reflex pathway:

The effects of cooling on an, in the cockroach (*Periplaneta americana*), in relation to chill-coma (BRADFISCH, DREWES and MUTCHMOR) 96, 131

Induced magnetization:

In the monarch butterfly, *Danaus plexippus* (Insecta, Lepidoptera) (JONES and MACFADDEN) 96, 1

Infused acid:

The acid-base responses of gills and kidneys to, and base loads in the channel catfish, *Ictalurus punctatus* (CAMERON and KORMANIK) 99, 143

Insect(s):

On the indentation hardness of, cuticle (HILLERTON, REYNOLDS and VINCENT) 96, 45

— Neural lesions can cause dendritic sprouting of an undamaged adult, motoneurone (PITMAN and RAND) 96, 125

— A dual effect of cobalt ions on the spontaneous release of transmitter at, motor nerve terminals (WASHIO) 98, 353

— Excretion in: energetics and functional principles (FLORRY) 99, 417

— Free amino acids as regulators of osmotic pressure in aquatic, larvae (EDWARDS) 101, 153

— Stimulation of oxygen consumption with fluid absorption in, recta (HOULIHAN and SELL) 101, 233

— Reflex effects of the femoral chordotonal organ upon leg motor neurones in the (FIELD and BURROWS) 101, 265

Insect mandibles:

The specific location of zinc in (HILLERTON and VINCENT) 101, 333

Insect toxin:

Actions of, and other toxins derived from the venom of the scorpion *Androctonus australis* on isolated giant axons of the cockroach (*Periplaneta americana*) (PELHATE and ZLOT-KIN) 97, 67

Interneurones:

Co-ordinating the ventilatory movements of the thoracic spiracles in the locust (BURROWS) 97, 385

— Morphology of identified cercal afferents and giant, in the hatchling cockroach *Periplaneta americana* (BLAGBURN and BEADLE) 97, 421

Interspike intervals:

Drosophila flight motor pattern: the evidence from (WYMAN and TANOUYE) 96, 413

Intestinal fluid:

Protein and glycoprotein antifreezes in the, of polar fishes (O'GRADY and DÉVRIES) 98, 429

Ion concentration:

And activity in the haemolymph of *Aedes aegypti* larvae (EDWARDS) 101, 143

Ion-dependent viscosity:

Of holothurian body wall and its implications for the functional morphology of echinoderms (EYLER) 99, 1

Ion exchange:

Unstirred mucus layers: properties and effect on ion regulation in *Lymnaea stagnalis* (SCHLICHTER) 98, 363

Ion regulation:

Unstirred mucus layers: ion exchange properties and effect on, in *Lymnaea stagnalis* (SCHLICHTER) 98, 363

Ionic responses:

Long-term submergence at 3 °C of the turtle, *Chrysemys picta bellii*, in normoxic and severely hypoxic water. II. Extracellular, to extreme lactic acidosis (JACKSON and ULTSCH) 96, 29

Ions:

Importance of calcium and magnesium, for postexcitatory hypersensitivity in the jumping spider (*Menemerus*) eye (YAMASHITA and TATEDA) 97, 187

— A dual effect of cobalt, on the spontaneous release of transmitter at insect motor nerve terminals (WASHIO) 98, 353

Isolated giant axons:

Actions of insect toxin and other toxins derived from the venom of the scorpion *Androctonus australis* on, of the cockroach (*Periplaneta americana*) (PELHATE and ZLOT-KIN) 97, 67

Isolated intestine:

Sodium and chloride transport in the, of the earthworm, *Lumbricus terrestris* (L.) (CORNELL) 97, 197

Isolated lamellae:

Oxygenation and deoxygenation kinetics of red cells in, of fish gills (HILLS, HUGHES and KOYAMA) 98, 269

Isolated midgut:

Inhibition of active K transport in the, of *Hyalophora cecropia* by TI^+ (ZERAHN) 96, 307

— Transport of sodium and potassium across the, of the larvae of *Tenebrio molitor* related to the fine structure of the epithelium (KORFOED and ZERAHN) 98, 459

Isolated nervous system:

Re-examination of presumed feeding motor activity in the, of *Pleurobranchaea* (McCLELLAN) 98, 213

IVN command-interneurons:

Properties of synapses made by, in the stomatogastric ganglion of the spiny lobster, *Panulirus interruptus* (SIGVARDT and MUL-LONEY) 97, 153

Jumping spider:

See *Portia fimbriata*

— See also *Menemerus*

K⁺:

On the instability of, influx in erythrocytes of the rainbow trout, *Salmo gairdneri*, and the role of catecholamine hormones in maintaining *in vivo* influx (BOURNE and COSSINS) 101, 93

Kidneys:

The acid-base responses of gills and, to infused acid base loads in the channel catfish, *Ictalurus punctatus* (CAMERON and KORMANIK) 99, 143

Kinetic energy changes:

Energetics and mechanics of terrestrial locomotion. II. Of the limbs and body as a function of speed and body size in birds and mammals (FEDAK, HEGLUND and TAYLOR) 97, 23

Kinetics:

Oxygenation and deoxygenation, of red cells in isolated lamellae of fish gills (HILLS, HUGHES and KOYAMA) 98, 269

K transport:

Inhibition of active, in the isolated midgut of *Hyalophora cecropia* by TI^+ (ZERAHN) 96, 307

Lactic acidosis:

Long-term submergence at 3 °C of the turtle, *Chrysemys picta bellii*, in normoxic and severely hypoxic water. II. Extracellular ionic responses to extreme (JACKSON and ULTSCH) 96, 29

Lampreys:

See *Geotria australis*

Larvae:

Ion concentration and activity in the haemolymph of *Aedes aegypti* (EDWARDS) 101, 143

— Free amino acids as regulators of osmotic

pressure in aquatic insect (EDWARDS) 101, 153

Larval:

The effect of temperature on the oxygen dissociation curves of whole blood of, and adult lampreys (*Geotria australis*) (MACEY and POTTER) 97, 253

Larval zebrafish:

Noninvasive recording of the Mauthner neurone action potential in (PRUGH, KIMMEL and METCALF) 101, 83

Lateral inhibition:

The cockroach DCMD neurone. I. And the effects of light- and dark-adaptation (EDWARDS) 99, 61

Leeches:

Behavioural and mechanosensory neurone responses to skin stimulation in (KRISTAN, MCGIRR and SIMPSON) 96, 143

— Sensory and motor neurones responsible for the local bending response in (KRISTAN) 96, 161

Leg movements:

Eye movements of the crab *Leptograpsus variegatus* elicited by imposed (VARJÚ and SANDEMAN) 98, 151

Leptograpsus variegatus:

Eye movements of the crab, elicited by imposed leg movements (VARJÚ and SANDEMAN) 98, 151

Light- and dark-adaptation:

The cockroach DCMD neurone. I. Lateral inhibition and the effects of (EDWARDS) 99, 61

Limax maximus:

Effects of temperature on the endogenous activity and synaptic interactions of the salivary burster neurones in the terrestrial slug (PRIOR and GREGA) 98, 415

Limb mechanics:

As a function of speed and gait: a study of functional strains in the radius and tibia of horse and dog (RUBIN and LANYON) 101, 187

Lizard(s)

See *Stellio (Agama) stellio*

— Acid-base imbalance in, during activity and recovery (GLEESON and BENNETT) 98, 439

Lobster:

See *Homarus americanus*

Locust:

The physiology and morphology of median motor neurones in the thoracic ganglia of the (BURROWS) 96, 325

— Interneurons co-ordinating the ventilatory movements of the thoracic spiracles in the (BURROWS) 97, 385

— Electrical couplings between supernumerary motor neurones in the (SIEGLER) 101, 105

— Is the, DCMD a looming detector? (PINTER, OLDBERG and ABRAMS) 101, 327

Locust ear:

The anatomical and mechanical basis of stimulation and frequency analysis in the (STEPHEN and BENNET-CLARK) 99, 279

Locust rectum:

Metabolic support of chloride-dependent short-circuit current across (CHAMBERLIN and PHILLIPS) 99, 349

Longitudinal retractor muscle:

Physiological and ultrastructural studies on the, of a sea cucumber *Stichopus japonica*. I. Factors influencing the mechanical response (SUGI, SUZUKI, TSUCHIYA, GOMI and FUJIEDA) 97, 101

— Physiological and ultrastructural studies on the, of a sea cucumber *Stichopus japonica*. II. Intracellular localization and translocation of activator calcium during mechanical activity (SUZUKI and SUGI) 97, 113

Lumbricus terrestris (L.):

Sodium and chloride transport in the isolated intestine of the earthworm (CORNBELL) 97, 197

Lungs:

Respiratory gas exchange at, gills and tissues: mechanics and adjustments (PIPER) 100, 5

— Oxygen uptake in air and water in the air-breathing reedfish *Calamoichthys calabaricus*: role of skin, gills and (SACCA and BURGREN) 97, 179

Lymnaea:

Characterization of, neurones by determination of action potential trajectories (WINLOW, HOLDEN and HAYDON) 99, 207

Lymnaea stagnalis:

Unstirred mucus layers: ion exchange properties and effect on ion regulation in (SCHLICHTER) 98, 363

Magnesium:

Importance of calcium and, ions for post-excitatory hypersensitivity in the jumping spider (*Menemerus*) eye (YAMASHITA and TATEDA) 97, 187

Mammals:

Respiratory cardiovascular control during diving in birds and (BUTLER) 100, 195

— Bone strength in small, and bipedal birds: do safety factors change with body size? (BIEWENER) 98, 289

— Energetics and mechanics of terrestrial locomotion. I. Metabolic energy consumption as a function of speed and body size in birds and (TAYLOR, HEGLUND and MALOIJ) 97, 1

— Energetics and mechanics of terrestrial locomotion. II. Kinetic energy changes of the limbs and body as a function of speed and body size in birds and (FEDAK, HEGLUND and TAYLOR) 97, 23

— Energetics and mechanics of terrestrial locomotion. III. Energy changes of the centre of mass as a function of speed and body size in birds and (HEGLUND, CAVAGNA and TAYLOR) 97, 41

— Energetics and mechanics of terrestrial locomotion. IV. Total mechanical energy changes as a function of speed and body size in

birds and (HEGLUND, FEDAK, TAYLOR and CAVAGNA) 97, 57

Manduca sexta:

The distribution and molecular characteristics of the tanning hormone bursicon, in the tobacco hornworm (TAGHERT and TRUMAN) 98, 373

— Identification of the bursicon-containing neurones in abdominal ganglia of the tobacco hornworm (TAGHERT and TRUMAN) 98, 385

— Thermoregulation and control of head temperature in the sphinx moth (HEGEL and CASEY) 101, 1

Marine ciliate:

See *Paramecium calkinsi*

Marine teleost:

See *Parophrys vetulus*

Mechanical design:

Of spicule-reinforced connective tissue: stiffness (KOSHL) 98, 239

Mechanical energy changes:

Energetics and mechanics of terrestrial locomotion. IV. Total, as a function of speed and body size in birds and mammals (HEGLUND, FEDAK, TAYLOR and CAVAGNA) 97, 57

Mechanical properties:

Factors regulating the, of holothurian dermis (MOTOKAWA) 99, 29

Mechanoreceptors:

The function of chemo- and, in lobster (*Homarus americanus*) feeding behaviour (DERBY and ATEMA) 98, 317

Menemerus:

Importance of calcium and magnesium ions for postexcitatory hypersensitivity in the jumping spider, eye (YAMASHITA and TATEDA) 97, 187

Metabolic energy consumption:

Energetics and mechanics of terrestrial locomotion. I. As a function of speed and body size in birds and mammals (TAYLOR, HEGLUND and MALOIJ) 97, 1

Metabolic support:

Of chloride-dependent short-circuit current across locust rectum (CHAMBERLIN and PHILLIPS) 99, 349

Midwater shrimp:

See *Sergestes similis*

Monarch butterfly:

Induced magnetization in the, *Danaus plexippus* (Insecta, Lepidoptera) (JONES and MACFADDEN) 96, 1

Monitor lizard:

See *Varanus exanthematicus*

Mosquito larva:

Active HCO_3^- secretion in the rectal salt gland of a, inhabiting $\text{NaHCO}_3\text{-CO}_2$ lakes (STRANGE, PHILLIPS and QUAMME) 101, 171

Motoneurone(s):

Neural lesions can cause dendritic sprouting of an undamaged adult insect (PITMAN and RAND) 96, 125

Motoneurone(s) (cont.)

- The effects of axotomy upon the extrasynaptic acetylcholine sensitivity of an identified, in the cockroach *Periplaneta americana* (DAVID and PITMAN) 98, 329
- Anatomy of, innervating mesothoracic indirect flight muscles in the silkworm, *Bombyx mori* (KONDOH and OBARA) 98, 23

Motor activity:

Re-examination of presumed feeding, in the isolated nervous system of *Pleurobranchaea* (McCLELLAN) 98, 213

Motor nerve terminals:

A dual effect of cobalt ions on the spontaneous release of transmitter at insect (WASHIO) 98, 353

Motor neurones:

- The physiology and morphology of median nerve, in the thoracic ganglia of the locust (BURROWS) 96, 325
- Electrical couplings between supernumerary, in the locust (SIEGLER) 101, 105

Motor pattern(s)

- Drosophila* flight: the evidence from interspike intervals (WYMAN and TANOUYE) 96, 413
- Sensory alteration of, in the stomatogastric nervous system of the spiny lobster *Panulirus interruptus* (SIGVARDT and MULLONEY) 97, 137
- Movements and, of the buccal mass of *Pleurobranchaea* during feeding, regurgitation and rejection (McCLELLAN) 98, 195
- The central nervous origin of the swimming, in embryos of *Xenopus laevis* (KAHN and ROBERTS) 99, 185

Mouse tumours:

Ferromagnetism in two (KIRSCHVINK, TABRAH and BATKIN) 101, 321

Murray river crayfish:

See *Euastacus armatus*

Muscle area:

Relationship between muscle force and, showing glycogen loss during locomotion (ARMSTRONG and TAYLOR) 97, 411

Muscle fibres:

The effects of osmoregulatory solutes on tension generation by dogfish skinned (ALTRINGHAM, YANCEY and JOHNSTON) 96, 443

Muscle force:

Relationship between, and muscle area showing glycogen loss during locomotion (ARMSTRONG and TAYLOR) 97, 411

Muscle temperatures:

Energetic cost of running with different, in Savannah Monitor lizards (ROME), 99, 269

Myocardium:

pH_i, contractility and Ca-balance under hypercapnic acidosis in the, of different vertebrate species (GESSER and JØRGENSEN) 96, 405

Mytilus edulis:

The effect of temperature on the tension responses of the anterior byssal retractor muscle (ABRM) of (LINEHAN) 97, 375

NaHCO₃-CO₂:

Active HCO₃⁻ secretion in the rectal salt gland of a mosquito larva inhabiting, lakes (STRANGE, PHILLIPS and QUAMME) 101, 171

Na⁺/NH₄⁺ exchange:

Fish branchial, is via basolateral Na⁺-K⁺-captivated ATPase (CLAIBORNE, EVANS and GOLDSTEIN) 96, 431

Nervous integration:

Central, of cardiovascular control (SPYER) 100, 109

Neural lesions:

Can cause dendritic sprouting of an undamaged adult insect motoneurone (PITMAN and RAND) 96, 125

Neuromuscular system:

Thermal acclimation in a crustacean (STEPHENS and ATWOOD) 98, 39

Neuronal circuits:

Transfer of habituation shows an interaction between, of the gill withdrawal reflex in *Aplysia californica* (GOLDBERG and LUKOWIAK) 96, 107

Neurone(s):

- Sensory and motor, responsible for the local bending response in leeches (KRISTAN) 96, 161
- Behavioural and mechanosensory, responses to skin stimulation in leeches (KRISTAN, MCGIRR and SIMPSON) 96, 143
- The physiology and morphology of median motor, in the thoracic ganglia of the locust (BURROWS) 96, 325
- Identification of the bursicon-containing, in abdominal ganglia of the tobacco hornworm *Manduca sexta* (TAGHERT and TRUMAN) 98, 385
- Effects of temperature on the endogenous activity and synaptic interactions of the salivary burster, in the terrestrial slug *Limax maximus* (PRIOR and GREGA) 98, 415
- The cockroach DCMD. I. Lateral inhibition and the effects of light- and dark-adaptation (EDWARDS) 99, 61
- The cockroach DCMD. II. Dynamics of response habituation and convergence of spectral inputs (EDWARDS) 99, 61
- Characterization of *Lymnaea*, by determination of action potential trajectories (WINLOW, HOLDEN and HAYDON) 99, 207
- Electrical activity and structure of retinal cells of the *Aplysia* eye: I. Secondary (JACKLET, SCHUSTER and ROLERSON) 99, 369
- Noninvasive recording of the Mauthner, action potential in larval zebrafish (PRUGH, KIMMEL and METCALF) 101, 83
- The morphology and passive electrical properties of claw closer, in snapping shrimp (WILSON and MELLON) 101, 307
- Reflex effects of the femoral chordotonal organ upon leg motor, in the locust (FIELD and BURROWS) 101, 265

Neurophysiological response spectrum:

Chemosensitivity of walking legs of the

- lobster *Homarus americanus*: and thresholds (DERBY and ATEMA) 98, 303
- Nitrogen excretion:**
Water loss and, in sharp-nosed reed frogs (*Hyperolius nasutus*: Anura, Hyperoliidae) 97, 335
- Non-mammalian vertebrates:**
Peripheral receptors affecting breathing and cardiovascular function in (Jones and MILSOM) 100, 59
- Non-spiking stretch-receptors:**
In the crayfish swimmeret system (HEITLER) 96, 355
- Notopterus chitala*:**
Structure and function of the auditory system in the clown knifefish (COOMBS and POPPER) 97, 225
- O₁:**
A comparison of two methods for measurement of, content of small (20 μ l) samples of fish blood (HUGHES, PEYRAUD and ADCOCK) 96, 417
- Octopoda:**
The contribution of the branchial heart to the accessory branchial pump in the (SMITH) 98, 229
- Ommatidial axes:**
A pronounced fovea in the eye of a water flea, revealed by stereographic mapping of (NILSSON and ONSLIUS) 99, 473
- Opsanus beta*:**
Mechanisms of acid extrusion by two marine fishes: the teleost, and the elasmobranch, *Squalus acanthias* (EVANS) 97, 289
- Orconectes rusticus*:**
Acid tolerance and effects of sublethal acid exposure on iono-regulation and acid-base status in two crayfish *Procambarus clarki* and (MORGAN and McMAHON) 97, 241
— Effect of maintained hypoxic exposure on the crayfish. I. Ventilatory, acid-base and cardiovascular adjustments (WILKES and McMAHON) 98, 119
— Effect of maintained hypoxic exposure on the crayfish. II. Modulation of haemocyanin oxygen affinity (WILKES and McMAHON) 98, 139
- Ornithodoros moubata*:**
Mechanism and characteristics of coxal fluid excretion in the argasid tick (KAUFMAN, KAUFMAN and PHILLIPS) 98, 343
- Oscillators:**
Inhibition by recurrent excitation: a mechanism for spike synchronization in a network of coupled neuronal (EGELHAUF and BENJAMIN) 96, 447
- Osmoregulation:**
In salmon and sea trout alevins (TALBOT, EDDY and JOHNSTON) 101, 61
- Osmoregulatory solutes:**
The effects of, on tension generation by dogfish skinned muscle fibres (ALTRINGHAM, YANCEY and JOHNSTON) 96, 443
- Osmoregulation:**
Aedes aegypti: energetics of (EDWARDS) 101, 135
— By the prenatal spiny dogfish, *Squalus acanthias* (EVANS, OIKARI, KORMANIK and MANSBERGER) 101, 295
- Osmotic pressure:**
Free amino acids as regulators of, in aquatic insect larvae (EDWARDS) 101, 153
- Osmotic tolerance:**
Of Ca-dependent excitability in the marine ciliate *Paramecium calkinsi* (DEITMER and MACHEMER) 97, 311
- Oxygen:**
Uptake in air and water in the air-breathing reedfish *Calamoichthys calabaricus*: role of skin, gills and lungs (SACCA and BURGGREN) 97, 179
— The effect of temperature on the, dissociation curves of whole blood of larval and adult lampreys (*Geotria australis*) (MACEY and POTTER) 97, 253
- Oxygen binding:**
Responses to hypersaline exposure in the euryhaline crayfish *Pacifastacus leniusculus*. II. Modulation of haemocyanin, *in vitro* and *in vivo* (WHEATLY and McMAHON) 99, 447
- Oxygen-binding properties:**
Regulation of blood oxygen affinity in the Australian blackfish *Gadopsis marmoratus*. I. Correlations between, habitat and swimming behaviour (DOBSON and BALDWIN) 99, 223
- Oxygen consumption:**
Stimulation of, with fluid absorption in insect recta (HOULIHAN and SELL) 101, 233
- Oxygen uptake:**
In a spontaneously ventilating blood-perfused trout preparation (DAXBOECK, DAVIE, PERRY and RANDALL) 101, 35
- P_{O₂}:**
Long-term submergence at 3 °C of the turtle *Chrysemys picta belli* in normoxic and severely hypoxic water. III. Effects of changes in ambient, and subsequent air breathing (ULTSCH and JACKSON) 97, 87
- Pacifastacus leniusculus*:**
Responses to hypersaline exposure in the euryhaline crayfish. I. The interaction between ionic and acid-base regulation (WHEATLY and McMAHON) 99, 425
— Responses to hypersaline exposure in the euryhaline crayfish. II. Modulation of haemocyanin oxygen binding *in vitro* and *in vivo* (WHEATLY and McMAHON) 99, 447
- Panulirus interruptus*:**
Sensory alteration of motor patterns in the stomatogastric nervous system of the spiny lobster (SIGVARDT and MULLONEY) 97, 137
— Properties of synapses made by IVN command-interneurons in the stomatogastric ganglion of the spiny lobster (SIGVARDT and MULLONEY) 97, 153

***Paramecium calkinsi*:**

Osmotic tolerance of Ca-dependent excitability in the marine ciliate (DEITMER and MACHEMER) 97, 311

***Parophrys vetulus*:**

H⁺ excretion in the marine teleost (McDONALD, WALKER, WILKES and WOOD) 98, 403

Pekin duck:

Cardiovascular changes associated with treadmill running in the (BECH and NOMOTO) 97, 345

Peripheral chemoreceptors:

Role of, and central chemosensitivity in the regulation of respiration and circulation (O'REGAN and MAJCHERCZYK) 100, 23

Peripheral control mechanisms:

On, acting on the central pattern generators for swimming in the dogfish (GRILLNER and WALLEN) 98, 1

Peripheral influences:

On the movement of the legs in a walking insect *Carausius morosus* (CRUSE and EPSTEIN) 101, 161

Peripheral receptors:

Affecting breathing and cardiovascular function in non-mammalian vertebrates (JONES and MILSOM) 100, 59

***Periplaneta americana*:**

The effects of cooling on an identified reflex pathway in the cockroach, in relation to chill-coma (BRADFISCH, DREWES and MUTCHMOR) 96, 131

- Actions of insect toxin and other toxins derived from the venom of the scorpion *Androctonus australis* on isolated giant axons of the cockroach (PELHATE and ZLOTKIN) 97, 67
- Morphology of identified cercal afferents and giant interneurons in the hatchling cockroach (BLAGBURN and BEADLE) 97, 421
- The effects of axotomy upon the extrasynaptic acetylcholine sensitivity of an identified motoneurone in the cockroach (DAVID and PITMAN) 98, 329

pH:

Disturbances in haematology, fluid volume distribution and circulatory function associated with low environmental, in the rainbow trout, *Salmo gairdneri* (MILLIGAN and WOOD) 99, 397

pH_i:

Contractility and Ca-balance under hypercapnic acidosis in the myocardium of different vertebrate species (GESSER and JØRGENSEN) 96, 405

Photomechanical movements:

An endogenous crepuscular rhythm of rainbow trout (*Salmo gairdneri*) (DOUGLAS) 96, 377

- The function of, in the retina of the rainbow trout (*Salmo gairdneri*) (DOUGLAS) 96, 389

Photoreceptors:

Electrical activity and structure of retinal cells

of the *Aplysia* eye. II. (JACKLET and ROLERSON) 99, 381

Physiological response:

To acid water in brown trout (*Salmo trutta* L.): cell volume regulation in heart ventricle tissue (FUGELLI and VISLIE) 101, 71

***Platichthys stellatus*:**

The influence of experimental anaemia on blood acid-base regulation *in vivo* and *in vitro* in the starry flounder, and the rainbow trout (*Salmo gairdneri*) (WOOD, McDONALD and McMAHON) 96, 221

Pleurobranchaea:

Movements and motor patterns of the buccal mass of, during feeding, regurgitation and rejection (McCLELLAN) 98, 195

- Re-examination of presumed feeding motor activity in the isolated nervous system of (McCLELLAN) 98, 213

Polar fishes:

Protein and glycoprotein antifreezes in the intestinal fluid of (O'GRADY, ELLORY and DeVRIES) 98, 429

***Pomatomus saltatrix*:**

Tail thrust of bluefish, at different buoyancies, speeds and swimming angles (OGILVY and DEBOIS) 98, 105

***Portia fimbriata*:**

The distances at which a primitive jumping spider, makes visual discriminations (JACKSON and BLEST) 97, 441

Postexcitatory hypersensitivity:

Importance of calcium and magnesium ions for, in the jumping spider (*Menemerus*) eye (YAMASHITA and TATEDA) 97, 187

Potassium:

Transport of sodium and, across the isolated midgut of the larvae of *Tenebrio molitor* related to the fine structure of the epithelium (KOEFOED and ZWRAHN) 98, 459

Potassium mechanoreceptor current:

The effects of tetraethylammonium and other agents on the, in the ciliate *Stylonychia* (DEITMER) 96, 239

Pressure separation:

Ventricular haemodynamics in the monitor lizard *Varanus exanthematicus*: pulmonary and systemic (BURGGREN and JOHANSEN) 96, 343

***Procambarus clarkii*:**

Acid tolerance and effects of sublethal acid exposure on iono-regulation and acid-base status in two crayfish, and *Orconectes rusticus* (MORGAN and McMAHON) 97, 241

Protein and glycoprotein antifreezes:

In the intestinal fluid of polar fishes (O'GRADY, ELLORY and DeVRIES) 98, 429

Protein synthesis:

Inhibitors of, on 80s ribosomes phase shift the *Gonyaulax* clock (TAYLOR, DUNLAP and HASTINGS) 97, 121

Radius:

Limb mechanics as a function of speed and gait: a study of functional strains in the, ar

- tibia of horse and dog (RUBIN and LANYON) 101, 187
- Rainbow trout:**
See *Salmo gairdneri*
- Rectal salt gland:**
Active HCO_3^- secretion in the, of a mosquito larva inhabiting $\text{NaHCO}_3\text{-CO}_2$ lakes (STRANGE, PHILLIPS and QUAMME) 101, 171
- Recurrent excitation:**
Inhibition by: a mechanism for spike synchronization in a network of coupled neuronal oscillators (EGELHAUF and BENJAMIN) 96, 447
- Red blood cells:**
A comparison of CO_2 excretion in a spontaneously ventilating blood-perfused trout preparation and saline-perfused gill preparations: contribution of the branchial epithelium (PERRY, DAVIE, DAXBOECK and RANDALL) 101, 47
- Red cells:**
Oxygenation and deoxygenation kinetics of, in isolated lamellae of fish gills (HILLS, HUGHES and KOYAMA) 98, 269
- Reed frogs:**
See *Hyperolius nasutus*
- Reflex reversal:**
Resulting from active movements in the antenna of the rock lobster (VEDEL) 101, 121
- Regurgitation and rejection:**
Movements and motor pattern of the buccal mass of *Pleurobranchaea* during feeding (McCLELLAN) 98, 195
- Reptiles:**
Apnoea in amphibians and (SHELTON and BOUTILIER) 100, 245
- Repetitive activation:**
Lability of conduction velocity during, of an excitable epithelium (SCHWAB and JOSEPHSON) 98, 175
- Respiration:**
And acid-base physiology of the spotted gar, a bimodal breather. I. Normal values and the response to severe hypoxia (SMATRESK and CAMERON) 96, 263
— And acid-base physiology of the spotted gar, a bimodal breather. II. Responses to temperature change and hypercapnia (SMATRESK and CAMERON) 96, 281
— And acid-base physiology of the spotted gar, a bimodal breather. III. Response to a transfer from fresh water to 50% sea water, and control of ventilation (SMATRESK and CAMERON) 96, 295
— And circulatory control at high altitudes (WEST) 100, 147
— In exercising fowl. III. Ventilation (BRACKENBURY, GLEESON and AVERY) 96, 315
— Role of peripheral chemoreceptors and central chemosensitivity in the regulation of, and circulation (O'REGAN and MAJCHERCZYK) 100, 23
- The control of, and circulation in fish during exercise and hypoxia (RANDALL) 100, 275
— The, of *Cancer pagurus* (L.) under normoxic and hypoxic conditions (BRADFORD and TAYLOR) 97, 273
- Respiratory control:**
The defence-arousal system and its relevance for circulatory and (HILTON) 100, 159
— And circulatory control during sleep (COOTE) 100, 223
- Respiratory metabolism:**
The, of temperature-adapted flatfish at rest and during swimming activity and the use of anaerobic metabolism at moderate swimming speeds (DUTHIE) 97, 359
- Respiratory movements:**
Do the extraocular muscles in the carp compensate for eye displacements induced by (JÜCH) 99, 363
- Respiratory responses:**
The, of the fowl to hot climates (KASSIM and SYKES) 97, 301
- Respiratory rhythm:**
Generation and maintenance of the (RICHTER) 100, 93
- Respiratory systems:**
Volumes of the, and circulatory systems in tufted and mallard ducks (KEIJER and BUTLER) 101, 213
- Response habituation:**
The cockroach DCMD neurone. II. Dynamics of, and convergence of spectral inputs (EDWARDS) 99, 91
- Resting tension:**
And posture in arthropods (YOX, DiCAPRIO and FOURTNER) 96, 421
- Retina:**
The function of photomechanical movements in the, of the rainbow trout (*Salmo gairdneri*) (DOUGLAS) 96, 389
- Retinal cells:**
Electrical activity and structure of, of the *Aplysia* eye. I. Secondary neurones (JACKLET, SCHUSTER and ROLERSON) 99, 369
— Electrical activity and structure of, of the *Aplysia* eye. II. Photoreceptors (JACKLET and ROLERSON) 99, 381
- Rhythmic struggling movements:**
The neuromuscular basis of, in embryos of *Xenopus laevis* (KAHN and ROBERTS) 99, 197
- Ribosomes phase shift:**
Inhibitors of protein synthesis on 80s, the *Gonyaulax* clock (TAYLOR, DUNLAP and HASTINGS) 97, 121
- Rock lobster:**
Reflex reversal resulting from active movements in the antenna of the (VEDEL) 101, 121
- Saccadic eye movements:**
Are coordinated with head movements in walking chickens (PRATT) 97, 217

Salinity:

Acid-base balance in *Callinectes sapidus* during acclimation from high to low (HENRY and CAMERON) 101, 255

Salmo gairdneri:

The influence of experimental anaemia on blood acid-base regulation *in vivo* and *in vitro* in the starry flounder (*Platichthys stellatus*) and the rainbow trout (WOOD, McDONALD and McMAHON) 96, 221

— An endogenous crepuscular rhythm of rainbow trout, photomechanical movements (DOUGLAS) 96, 377

— The function of photomechanical movements in the retina of the rainbow trout (DOUGLAS) 96, 389

— The effect of changes in blood oxygen-carrying capacity on ventilation volume in the rainbow trout (SMITH and JONES) 97, 325

— Disturbances in haematology, fluid volume distribution and circulatory function associated with low environmental pH in the rainbow trout (MILLIGAN and WOOD) 99, 397

Salmo trutta (L.):

Physiological response to acid water in brown trout: cell volume regulation in heart ventricle tissue (FUGELLI and VISLIE) 101, 71

— The effects of calcium on sodium fluxes in the brown trout, in neutral and acid water (McWILLIAMS) 96, 439

Salmon:

Osmoregulation in, and sea trout alevins (TALBOT, EDDY and JOHNSTON) 101, 61

— On the instability of K⁺ influx in erythrocytes of the rainbow trout, and the role of catecholamine hormones in maintaining *in vivo* influx activity (BOURNE and COSSINS) 101, 93

Sarsia tubulosa (Hydrozoa):

Transient rhythms in the swimming activity of (LEONARD) 96, 181

Savannah Monitor lizards:

Energetic cost of running with different muscle temperatures in (ROME) 99, 269

Scorpion:

See *Androctonus australis*

Sea catfish:

See *Arius felis*

Sea cucumber:

See *Stichopus japonicus*

Sea trout alevins:

Osmoregulation in salmon and (TALBOT, EDDY and JOHNSTON) 101, 61

Secondary lamellae:

Physiological evidence for the occurrence of pathways shunting blood away from the, of eel gills (HUGHES, PEYRAUD, PEYRAUD-WAITZENEGGER and SOULIER) 98, 277

Sepia officinalis:

Blood gas transport in the cephalopod (JOHANSEN, BRIX and LYKKEBOE) 99, 331

Sergestes similis:

Light organ and eyestalk compensation to

body tilt in the luminescent midwater shrimp (LATZ and CASE) 98, 83

Seriola quinqueradiata:

A study of the deformability of red blood cells of a teleost fish, the yellowtail, and a comparison with human erythrocytes (HUGHES, KIKUCHI and WATARI) 96, 209

Silkmoth:

See *Bombyx mori*

Skin stimulation:

Behavioural and mechanosensory neurone responses to, in leeches (KRISTAN, MCGIRR and SIMPSON) 96, 143

Skylight polarization pattern:

And animal orientation (BRINES and GOULD) 96, 69

Snapping shrimp:

The morphology and passive electrical properties of claw closer neurones in (WILSON and MELLON) 101, 307

Sodium:

The effects of calcium on, fluxes in the brown trout, *Salmo trutta*, in neutral and acid water (McWILLIAMS) 96, 439

— And chloride transport in the isolated intestine of the earthworm, *Lumbricus terrestris* (L.) (CORNELL) 97, 197

— Transport of, and potassium across the isolated midgut of the larvae of *Tenebrio molitor* related to the fine structure of the epithelium (KOEFOED and ZERAHN) 98, 459

Spectral inputs:

The cockroach DCMD neurone. II. Dynamics of response habituation and convergence of (EDWARDS) 99, 91

Sphinx moth:

See *Manduca sexta*

Spicule-reinforced connective tissue:

Mechanical design: stiffness (KOEHL) 98, 239

Spike synchronization:

Inhibition by recurrent excitation: a mechanism for, in a network of coupled neuronal oscillators (EGELHAFF and BENJAMIN) 96, 447

Spiking stretch receptor:

With central cell bodies in the uropod coxopodite of the squat lobster *Galathea strigosa* (Crustacea, Anomura) (MAITLAND, LAVERACK and HEITLER) 101, 221

Spiny dogfish:

See *Squalus acanthias*

Spiny lobster:

See *Panulirus interruptus*

Spotted gar:

Respiration and acid-base physiology of the, a bimodal breather. I. Normal values and the response to severe hypoxia (SMATRESK and CAMERON) 96, 263

— Respiration and acid-base physiology of the, a bimodal breather. II. Responses to temperature change and hypercapnia (SMATRESK and CAMERON) 96, 281

— Respiration and acid-base physiology of the

a bimodal breather. III. Response to a transfer from fresh water to 50 % sea water, and control of ventilation (SMATREK and CAMERON) 96, 295

***Squalus acanthias*:**

Mechanisms of acid extrusion by two marine fishes: the teleost, *Opsanus beta*, and the elasmobranch (EVANS) 97, 289

— Osmoregulation by the prenatal spiny dogfish (EVANS, OIKARI, KORMANIK and MANSBERGER) 101, 295

Squat lobster:

See *Galathea strigosa*

Starry flounder:

See *Platichthys stellatus*

***Stellio (Agamo) stellio*:**

Effects of body size and slope on sprint speed of a lizard (HUEY and HERTZ) 97, 401

Stereographic mapping:

A pronounced fovea in the eye of a water flea, revealed by, of ommatidial axes (NILSSON and ODSELIUS) 99, 473

***Stichopus japonicus*:**

Physiological and ultrastructural studies on the longitudinal retractor muscle of a sea cucumber. I. Factors influencing the mechanical response (SUGI, TSUCHIYA, GOMI and FUJIEDA) 97, 101

— Physiological and ultrastructural studies on the longitudinal retractor muscle of a sea cucumber. II. Intracellular localization and translocation of activator calcium during mechanical activity (SUZUKI and SUGI) 97, 113

Stiffness:

Mechanical design of spicule-reinforced connective tissue (KOEHL) 98, 239

Stomatogastric ganglion:

Properties of synapses made by IVN command-interneurons in the, of the spiny lobster, *Panulirus interruptus* (SIGVARDT and MULLONEY) 97, 153

Stomatogastric nervous system:

Sensory alteration of motor pattern in the, of the spiny lobster *Panulirus interruptus* (SIGVARDT and MULLONEY) 97, 137

***Stylonychia*:**

The effects of tetraethylammonium and other agents on the potassium mechanoreceptor current in the ciliate (DEITMER) 96, 239

Suction electrode:

A gold-plated, for extracellular recording and dye infusion (THEOPHILIDIS and BURNS) 98, 455

Swimmeret system:

Non-spiking stretch-receptors in the crayfish (HEITLER) 96, 355

Swimming:

The central nervous origin of the, motor pattern in embryos of *Xenopus laevis* (KAHN and ROBERTS) 99, 185

Swimming angles:

Tail thrust of bluefish *Pomatomus saltatrix* at

different buoyancies, speeds and (OGILVY and DuBOIS) 98, 105

Swimming behaviour:

Regulation of blood oxygen affinity in the Australian blackfish *Gadopsis marmoratus*. I. Correlations between oxygen-binding properties, habitat and (DOBSON and BALDWIN) 99, 223

Swimming movements:

The neuromuscular basis of, in embryos of the amphibian, *Xenopus laevis* (KAHN, ROBERTS and KASHIN) 99, 175

Synaptic interactions:

Effects of temperature on the endogenous activity and, of the salivary burster neurones in the terrestrial slug *Limax maximus* (PRIOR and GREGA) 98, 429

***Synbranchus marmoratus*:**

Intracellular and extracellular acid-base regulation in the tropical fresh-water teleost fish, in response to the transition from water breathing to air breathing (HEISLER) 99, 9

***Talpa europaea*:**

Acoustic transmission through the head of the common mole (COLES, GOWERS, BOYD and LEWIS) 101, 337

Teleost(s):

A study of the deformability of red blood cells of a, fish, the yellowtail (*Seriola quinqueradiata*), and a comparison with human erythrocytes (HUGHES, KIKUCHI and WATARI) 96, 209

— Progressive processing of ingested water in the gut of sea-water (KIRSCH and MEISTER) 98, 67

— See also *Opsanus beta*

Temperature:

Effects of, on the endogenous activity and synaptic interactions of the salivary burster neurones in the terrestrial slug *Limax maximus* (PRIOR and GREGA) 98, 415

— Thermoregulation and control of head, in the sphinx moth, *Manduca sexta* (HEGEL and CASEY) 101, 1

— Intracellular and extracellular acid-base status as a function of, in the freshwater channel catfish, *Ictalurus punctatus* (CAMERON and KORMANIK) 99, 127

***Tensbrio molitor*:**

Transport of sodium and potassium across the isolated midgut of the larvae of, related to the fine structure of the epithelium (KOEFOED and ZERAHN) 98, 459

Tension generation:

The effects of osmoregulatory solutes on, by dogfish skinned muscle fibres (ALTRINGHAM, YANCEY and JOHNSTON) 96, 443

Tension responses:

The effect of temperature on the, of the anterior byssal retractor muscle (ABRM) of *Mytilus edulis* (LINEHAN) 97, 375

Terrestrial locomotion:

Energetics and mechanics of. I. Metabolic

Terrestrial locomotion (cont.)

energy consumption as a function of speed and body size in birds and mammals (TAYLOR HEGLUND and MOLOY) 97, 1

- Energetics and mechanics of. II. Kinetic energy changes of the limbs and body as a function of speed and body size in birds and mammals (FEDAK, HEGLUND and TAYLOR) 97, 23

- Energetics and mechanics of. III. Energy changes of the centre of mass as a function of speed and body size in birds and mammals (HEGLUND, CAVAGNA and TAYLOR) 97, 41

- Energetics and mechanics of. IV. Total mechanical energy changes as a function of speed and body size in birds and mammals (HEGLUND, FEDAK, TAYLOR and CAVAGNA) 97, 57

Terrestrial slug:

See *Limax maximus*

Tetraethylammonium:

The effects of, and other agents on the potassium mechanoreceptor current in the ciliate *Stylonychia* (DBITMER) 96, 239

Tettigoniid:

Electrical properties of fibres from stridulatory and flight muscles of a (JOSEPHSON and STOKES) 99, 109

Thermal acclimation:

In a crustacean neuromuscular system (STEPHENS and ATWOOD) 98, 39

- Regulation of blood oxygen affinity in the Australian blackfish *Gadopsis marmoratus*. II. (DOBSON and BALDWIN) 99, 245

Thoracic ganglia:

The physiology and morphology of median nerve motor neurones in the, of the locust (BURROWS) 96, 325

Thoracic spiracles:

Interneurones co-ordinating the ventilatory movements of the, in the locust (BURROWS) 97, 385

Tibia:

Limb mechanics as a function of speed and gait: a study of functional strains in the radius and, of horse and dog (RUBIN and LANYON) 101, 187

Tissues:

Respiratory gas exchange at lungs, gills and: mechanics and adjustments (PIIPER) 100, 5

Toad:

See *Bufo marinus*

Tobacco hornworm:

See *Manduca sexta*

Trace receptors:

Pulmonary and respiratory (WIDDICOME) 100, 41

Transient rhythms:

In the swimming activity of *Sarsia tubulosa* (Hydrozoa) (LEONARD) 96, 181

Tropical fresh-water teleost fish:

See *Synbranchus marmoratus*

Trout:

Fast-start resistance of (WEBB) 96, 93

Trout preparation:

Gas transfer in a spontaneously ventilating blood-perfused (DAVIE, DAXBOECK, PERRY and RANDALL) 101, 17

- Oxygen uptake in a spontaneously ventilating blood-perfused (DAXBOECK, DAVIE, PERRY and RANDALL) 101, 35
- A comparison of CO₂ excretion in a spontaneously ventilating blood-perfused, and saline-perfused gill preparations: contribution of the branchial epithelium and red blood cell (PERRY, DAVIE, DAXBOECK and RANDALL) 101, 47

Turtle:

See *Chrysemys picta bellii*

Underwater hearing:

Biophysics of, in anuran amphibians (HETHERINGTON and LOMBARD) 98, 49

Unstirred mucus layers:

Ion exchange properties and effect on ion regulation in *Lymnaea stagnalis* (SCHLICHTER) 98, 363

Uropod coxopodite:

A spiking stretch receptor with central cell bodies in the, of the squat lobster *Galathea strigosa* (Crustacea, Anomura) (MAITLAND, LAVERACK and HEITLER) 101, 221

Vapour absorption:

Water, by the desert burrowing cockroach, *Arenivaga investigata*: evidence against a solute dependent mechanism (O'DONNELL) 96, 251

Varanus exanthematicus:

Ventricular haemodynamics in the monitor lizard: pulmonary and systemic pressure separation (BURGGREN and JOHANSEN) 96, 343

Ventilation:

Respiration and acid-base physiology of the spotted gar, a bimodal breather. III. Response to a transfer from fresh water to 50 % sea water, and control of (SMATRESK and CAMERON) 96, 295

- Respiration in exercising fowl. III. (BRACKENBURY, GLEESON and AVERY) 96, 315
- The effect of changes in blood oxygen-carrying capacity on, volumes in the rainbow trout (*Salmo gairdneri*) (SMITH and JONES) 97, 325
- Control and co-ordination of, and circulation in crustaceans: responses to hypoxia and exercise (TAYLOR) 100, 291

Ventilatory currents:

In the mantle of cephalopods (WELLS and WELLS) 99, 315

Ventilatory movements:

Interneurones co-ordinating the, of the thoracic spiracles in the locust (BURROWS) 97, 385

Ventricular haemodynamics:

In the monitor lizard *Varanus exanthematicus*: pulmonary and systemic pressure separation (BURGGREN and JOHANSEN) 96, 343

Water:

- Long-term submergence at 3 °C of the turtle, *Chrysemys picta bellii*, in normoxic and severely hypoxic. I. Survival, gas exchange and acid-base status (ULTSCH and JACKSON) 96, 11
- Long-term submergence at 3 °C of the turtle, *Chrysemys picta bellii*, in normoxic and severely hypoxic. II. Extracellular ionic responses to extreme lactic acidosis (JACKSON and ULTSCH) 96, 29
- Vapour absorption by the desert burrowing cockroach, *Arenivaga investigata*: evidence against a solute dependent mechanism (O'DONNELL) 96, 251
- Respiration and acid-base physiology of the spotted gar, a bimodal breather. III. Response to a transfer from fresh, to 50 % sea, and control of ventilation (SMATRESK and CAMERON) 96, 295
- The effects of calcium on sodium fluxes in the brown trout, *Salmo trutta*, in neutral and acid (McWILLIAMS) 96, 439
- Long-term submergence at 3 °C of the turtle *Chrysemys picta bellii* in normoxic and severely hypoxic. III. Effects of changes in ambient P_{O_2} and subsequent air breathing (ULTSCH and JACKSON) 97, 87
- Oxygen uptake in air and, in the air-breathing reedfish *Calamoichthys calabaricus*: role of skin, gills and lungs (SACCA and BURGREN) 97, 179
- Loss and nitrogen excretion in sharp-nosed frogs (*Hyperolius nasutus*: Anura, Hyperoliidae) (WITHERS, HILLMAN, DREWES and SOKOL) 97, 335
- Progressive processing of ingested, in the gut of sea-water teleosts (KIRSCH and MEISTER) 98, 67

Water breathing:

Intracellular and extracellular acid-base regulation in the tropical fresh-water teleost

fish *Synbranchus marmoratus* in response to the transition from, to air breathing (HEISLER) 99, 9

Water-electrolyte balance:

In goldfish *Carassius auratus* L., under constant and diurnally cycling temperature conditions (HOUSTON and KOSS) 97, 427

Water flea:

A pronounced fovea in the eye of a, revealed by stereographic mapping of ommatidial axes (NILSSON and ODBELIUS) 99, 473

Water loss:

Simultaneous measurement of, and carbon dioxide production in the cricket, *Acheta domesticus* (HADLEY and QUINLAN) 101, 343

Water vapour absorption:

Hydrophilic cuticle - the basis for, by the desert burrowing cockroach, *Arenivaga investigata* (O'DONNELL) 99, 43

Walking insect:

See *Carausius morosus*

Walking legs:

Chemosensitivity of, of the lobster *Homarus americanus*: neurophysiological response spectrum and thresholds (DERBY and ATEMA) 98, 303

Xenopus laevis:

The neuromuscular basis of swimming movements in embryos of the amphibian (KAHN, ROBERTS and KASHIN) 99, 175

- The neuromuscular basis of rhythmic struggling movements in embryos of (KAHN and ROBERTS) 99, 197

Yellowtail:

See *Seriola quinqueradiata*

Zinc:

The specific location of, in insect mandibles (HILLERTON and VINCENT) 101, 333
