

# The Journal of Experimental Biology

EDITED BY  
J. E. TREHERNE

WITH W. A. FOSTER & P. K. SCHOFIELD

	PAGE
NEUMANN, PETER, HOLETON, GEORGE F. AND HEISLER, NORBERT. Cardiac output and regional blood flow in gills and muscles after exhaustive exercise in rainbow trout ( <i>Salmo gairdneri</i> )	1
HEISLER, N., NEUMANN, P. AND MALOY, G. M. O. The mechanism of intracardiac shunting in the lizard <i>Varanus exanthematicus</i>	15
NAGY, F. AND DICKINSON, P. S. Control of a central pattern generator by an identified modulatory interneurone in crustacea. I. Modulation of the pyloric motor output	33
DICKINSON, P. S. AND NAGY, F. Control of a central pattern generator by an identified modulatory interneurone in crustacea. II. Induction and modification of plateau properties in pyloric neurones	59
PRIMOR, NAFTALI. Pardaxin produces sodium influx in the teleost gill-like opercular epithelia	83
NARINS, PETER M. Synchronous vocal response mediated by the amphibian papilla in a neotropical treefrog: behavioural evidence	95
CAMERON, JAMES N. AND HEISLER, NORBERT. Studies of ammonia in the rainbow trout: physico-chemical parameters, acid-base behaviour and respiratory clearance	107
BÄSSLER, ULRICH AND WEGNER, UTA. Motor output of the denervated thoracic ventral nerve cord in the stick insect <i>Carausius morosus</i>	127
BIEWENER, ANDREW A. Allometry of quadruped locomotion: the scaling of duty factor, bone curvature and limb orientation to body size	147
WASSERSUG, RICHARD J. AND FEDER, MARTIN E. The effects of aquatic oxygen concentration, body size and respiratory behaviour on the stamina of obligate aquatic ( <i>Bufo americanus</i> ) and facultative air-breathing ( <i>Xenopus laevis</i> and <i>Rana berlandieri</i> ) anuran larvae	173
BURGGREN, WARREN AND MWALUKOMA, ANGANYILE. Respiration during chronic hypoxia and hyperoxia in larval and adult bullfrogs ( <i>Rana catesbeiana</i> ). I. Morphological responses of lungs, skin and gills	191
PINDER, ALAN AND BURGGREN, WARREN. Respiration during chronic hypoxia and hyperoxia in larval and adult bullfrogs ( <i>Rana catesbeiana</i> ). II. Changes in respiratory properties of whole blood	205
EPSTEIN, S. AND GRAHAM, D. Behaviour and motor output of stick insects walking on a slippery surface. I. Forward walking	215
KING, DAVID G. AND TANOUYE, MARK A. Anatomy of motor axons to direct flight muscles in <i>Drosophila</i>	231

**All communications should be addressed to the Editor,  
The Journal of Experimental Biology, Department of Zoology,  
Downing Street, Cambridge CB2 3EJ, England.**

**STYLE.** Papers should be as concise as possible, be written in English (spelling as in Oxford English Dictionary), and use S.I. units.

**SUBMISSIONS** must include two copies of the text, one set of original illustrations and two sets of copy figures.

**TEXT** (including tables, references and figure legends) must be typewritten, in double-spacing, with numbered pages. The position of the figures and tables should be indicated in the margin. The *title page* must include the address(es) where the work was carried out, a *page heading* of up to 40 characters, and three or more *key words*. Where applicable, the present address and address for correspondence should also be given. A *Summary* must be the first section of the ms, stating as briefly as possible (typically 150–200 words) the results and conclusions of the work. Each *table* must be on a separate page. *Figure legends* must be in a single series at the end of the ms. *References* must be listed alphabetically. The titles of journals should be abbreviated according to the *World List of Scientific Periodicals*, 4th edn (1963), and should be presented as follows:

BRINES, M. L. & GOULD, J. L. (1982). Skylight polarization patterns and animal orientation. *J. exp. Biol.* **96**, 69–91.

MAZIA, D. (1961). Mitosis and physiology of cell division. In *The Cell*, Vol. 3, (eds J. Brachet & A. E. Mirsky), pp. 77–412. New York and London: Academic Press.

Citations in the text are as 'Jones & Smith (1980)' or '(Jones & Smith, 1980)'. The form 'Jones *et al.*' is used after the first citation if there are 3 or 4 authors, and is used throughout where there are 5 or more authors. The form 'Jones (1980a,b)' is used to cite papers by authors with the same name in the same year.

**ILLUSTRATIONS** should be assigned figure numbers. Photographs should only be used where essential, for example for electron micrographs. Wherever possible, oscillographs should be made suitable for reproduction as line drawings. The cost of colour plates must be defrayed by the author.

*Line drawings* must be about twice final size. Maximum final size is 200 × 125 mm. Pen drawings should be in black Indian ink on unfolded heavy white paper, good quality tracing paper, or graph paper ruled in pale blue. Oscillographs should have a white background. *Lettering* will be inserted by the printers and should be indicated on the duplicate copies; it may also be indicated on the original either in soft blue pencil, or on a tracing paper overlay.

*Photographs* should be at final size. Maximum final size is 200 × 140 mm for a single plate, and 200 × 290 mm for a double plate. Photographs should be glossy bromide prints with good definition. They should be gummed on to white card, grouped and numbered as they are to appear (e.g. Fig. 1A, B etc.). *Lettering* will be inserted by the printers and should be indicated on a tracing paper overlay. Magnification should be indicated, when relevant, by a scale line drawn in Indian ink on or beside the illustration.

**SHORT COMMUNICATIONS** must be original contributions to the literature and not preliminary reports. Methodological papers will only be accepted as *Short Communications*. All above instructions apply except that the communications must not exceed four published pages in length (including illustrations), no *Summary* is required, and line drawings must be at final size.

**PROOFSHEETS AND OFFPRINTS.** Authors will receive one set of slip proofs for correction and return to the Editor. A page proof will also be sent if the slip proof is marked by the author 'Revise'. An allowance of 50p per sheet of sixteen pages will be made for alteration errors not made by the printers: any excess may be charged to the author. Authors will receive 200 complimentary copies of their papers: additional copies may be purchased at modest cost, and should be ordered when the proofs are returned to the Editor.
