

# The Journal of Experimental Biology

EDITED BY  
J. E. TREHERNE

WITH W.A. FOSTER & P.K. SCHOFIELD

	PAGE
COOPER, PAUL D., SCHAFER, WILLIAM M. AND BUCHMANN, STEPHEN L. Temperature regulation of honey bees ( <i>Apis mellifera</i> ) foraging in the Sonoran desert . . . . .	1
DOHERTY, JOHN A. Temperature coupling and 'trade-off' phenomena in the acoustic communication system of the cricket, <i>Gryllus bimaculatus</i> De Geer . . . . .	17
GLASS, M. L., BOUTILIER, R. G. AND HEISLER, N. Effects of body temperature on respiration, blood gases and acid-base status in the turtle <i>Chrysemys picta bellii</i> . . . . .	37
SMITH, KATHLEEN K. AND HYLANDER, WILLIAM L. Strain gauge measurement of mesokinetic movement in the lizard <i>Varanus exanthematicus</i> . . . . .	53
RUSSELL, DAVID F. Pattern and reset analysis of the gastric mill rhythm in a spiny lobster, <i>Panulirus interruptus</i> . . . . .	71
RUSSELL, DAVID F. Neural basis of teeth coordination during gastric mill rhythms in spiny lobsters, <i>Panulirus interruptus</i> . . . . .	99
BARNAS, G. M. AND BURGER, R. E. Intrapulmonary chemoreceptor control of ventilatory movements in the self-ventilating chicken. . . . .	121
GRAHAM, D. Influence of coxa-thorax joint receptors on retractor motor output during walking in <i>Carausius morosus</i> . . . . .	131
STEFFENSEN, JOHN FLENG. The transition between branchial pumping and ram ventilation in fishes: energetic consequences and dependence on water oxygen tension . . . . .	141
WOOD, CHRIS M. AND CAMERON, JAMES N. Temperature and the physiology of intracellular and extracellular acid-base regulation in the blue crab <i>Callinectes sapidus</i> . . . . .	151
CAMERON, JAMES N. AND WOOD, CHRIS M. Apparent H <sup>+</sup> excretion and CO <sub>2</sub> dynamics accompanying carapace mineralization in the blue crab ( <i>Callinectes sapidus</i> ) following moulting . . . . .	181
CAMERON, JAMES N. Compensation of hypercapnic acidosis in the aquatic blue crab, <i>Callinectes sapidus</i> : the predominance of external sea water over carapace carbonate as the proton sink. . . . .	197
HOFMANN, T., KOCH, U. T. AND BÄSSLER, U. Physiology of the femoral chordotonal organ in the stick insect, <i>Cuniculina impigra</i> . . . . .	207
HOFMANN, T. AND KOCH, U. T. Acceleration receptors in the femoral chordotonal organ of the stick insect, <i>Cuniculina impigra</i> . . . . .	225
SHADWICK, ROBERT E. AND GOSLINE, JOHN M. Physical and chemical properties of rubber-like elastic fibres from the octopus aorta . . . . .	239
SHADWICK, ROBERT E. AND GOSLINE, JOHN M. Mechanical properties of the octopus aorta. . . . .	259
HEPPNER, FRANK H. AND ANDERSON, JOHN G. T. Leg thrust important in flight take-off in the pigeon. . . . .	285
PETTIT, MICHAEL J. AND BEITINGER, THOMAS L. Oxygen acquisition of the reedfish, <i>Erpetoichthys calabaricus</i> . . . . .	289
TRIMMER, BARRY ANDREW. Serotonin and the control of salivation in the blowfly <i>Calliphora</i> . . . . .	307

ILLUSTRATIONS should be assigned figure numbers. Photographs should only be used where essential, for example for electron micrographs. Wherever possible, oscillographs should be made suitable for reproduction as line drawings. The cost of colour plates must be defrayed by the author.

*Line drawings* must be about twice final size. Maximum final size is 200×125 mm. Pen drawings should be in black Indian ink on unfolded heavy white paper, good quality tracing paper, or graph paper ruled in pale blue. Oscillographs should have a white background. *Lettering* will be inserted by the printers and should be indicated on the duplicate copies; it may also be indicated on the original either in soft blue pencil, or on a tracing paper overlay.

*Photographs* should be at final size. Maximum final size is 200×130 mm for a single plate, and 200×290 mm for a double plate. Photographs should be glossy bromide prints with good definition. They should be gummed on to white card, grouped and numbered as they are to appear (e.g. Fig 1A, B etc.). *Lettering* will be inserted by the printers and should be indicated on a tracing paper overlay. Magnification should be indicated, when relevant, by a scale line drawn in Indian ink on or beside the illustration.

SHORT COMMUNICATIONS must be original contributions to the literature and not preliminary reports. Methodological papers will only be accepted as *Short Communications*. All above instructions apply except that the communications must not exceed four published pages in length (including illustrations), no *Summary* is required, and line drawings must be at final size.

PROOFSHEETS AND OFFPRINTS. Authors will receive one set of slip proofs for correction and return to the Editor. A page proof will also be sent if the slip proof is marked by the author 'Revise'. An allowance of 50p per sheet of sixteen pages will be made for alteration errors not made by the printers: any excess may be charged to the author. Authors will receive 200 complimentary copies of their papers: additional copies may be purchased at modest cost, and should be ordered when the proofs are returned to the Editor.

Published and Printed by The Company of Biologists Limited,  
Department of Zoology, University of Cambridge,  
Downing Street, Cambridge CB2 3EJ

© The Company of Biologists Limited 1985

**The Company of Biologists Limited** is a non-profit-making organization whose members are active professional biologists. The Company, which was founded in 1925, is the owner of this journal and the Journal of Cell Science and Journal of Embryology and Experimental Morphology.

**Copyright and Reproduction.** Authors may make copies of their own papers in this journal without seeking permission from The Company of Biologists Limited, *provided that such copies are for free distribution only: they must not be sold.*

Authors may re-use their own illustrations in other publications appearing under their own name, without seeking permission.

Specific permission will *not* be required for photocopying copyright material in the following circumstances:

1. For private study, provided the copying is done by the person requiring its use, or by an employee of the institution to which he/she belongs, without charge beyond the actual cost of copying.
2. For the production of multiple copies of such material, to be used for *bona fide* educational purposes, provided this is done by a member of the staff of the university, school or other comparable institution, for distribution without profit to student members of that institution provided the copy is made from the original journal.

For all other matters relating to the reproduction of copyright material written application must be made to Dr R. J. Skaer, Company Secretary, The Company of Biologists Limited, Department of Zoology, Downing Street, Cambridge CB2 3EJ, U.K.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, U.S.A. is authorized to supply single copies of separate articles for private use only.

**Subscriptions.** The *Journal of Experimental Biology* (ISSN 0022-0949) is published as six volumes a year in January, March, May, July, September and November. The subscription price of volumes 114–119 (1985) is £115.00 U.K. (U.S.A. and Canada US \$315.00, Japan £130.00) per annum, payable in advance; postage is included. Individual volumes may be purchased at £22.00 (U.S.A. and Canada US \$60.00) each, plus postage. Orders for 1985, which must be accompanied by payment, may be sent to any bookseller or subscription agent or direct to The Biochemical Society Book Depot, P.O. Box 32, Commerce Way, Colchester CO2 8HP, U.K. Copies of the journal for subscribers in the U.S.A. and Canada are sent by air to New York to arrive with minimum delay. Second class postage paid at New York, N.Y. and at additional mailing offices.

POSTMASTER, send address corrections to: The Journal of Experimental Biology, C/O Expeditors of the Printed Word Ltd, 527 Madison Avenue, New York, N.Y. 10022, U.S.A. (U.S. Mailing Agent).

**Claims** for missing parts can only be considered if made immediately upon receipt of the subsequent issue.

**Back Volumes.** Vols 1–21: Enquiries should be sent to Johnson Reprint Co. Ltd, 24–28 Oval Road, London N.W.1. Vols 22 onwards are available from Wm Dawson & Sons Ltd, Cannon House, Folkestone, Kent, U.K. at £45.00 each for volumes 22–65 and £15.00 each for volumes 66–95. Volumes 96–113 may be purchased at £22.00 (U.S.A. and Canada US \$60.00) each, plus postage, from The Biochemical Society Book Depot.

**Index.** An annual index will appear in the last volume each year.
