

# The Journal of Experimental Biology

|   |     |
|---|-----|
| Lent and Dickinson on termination of ingestion by the leech   | 1   |
| Ierusalimsky and Balaban on snail neurones in electric fields   | 17  |
| Lehman and Price on FMRFamide-like peptides in <i>Helix</i>   | 37  |
| Lehman and Price on the actions of FMRFamide-like peptides in <i>Helix</i>                            | 55  |
| Pörtner on pH regulation in animal tissues  | 69  |
| Pörtner on pH regulation in <i>Sipunculus nudus</i>   | 89  |
| Nakaoka, Kinugawa and Kurotani on the photoreceptor potential in<br><i>Paramecium</i>                 | 107 |
| Feldkamp on swimming in the California sea lion   | 117 |
| Houlihan, Agnisola, Hamilton and Trara Genoino on oxygen consumption<br>of <i>Octopus</i> heart       | 137 |
| Lignon on crab gill cuticle ion permeabilities  | 159 |
| Wells, Duthie, Houlihan, Smith and Wells on cardiac performance in<br><i>Octopus</i>                  | 175 |
| Hetherington on the physiology of the opercularis muscle  | 189 |
| Yamana and Toh on the intracellular response of a carbon dioxide<br>receptor                          | 205 |
| Phillips on laboratory studies of newt homing   | 215 |
| Shimahara, Pichon, Lees, Beadle and Beadle on GABA receptors on<br>cockroach neurones                 | 231 |
| Sillar, Clarac and Bush on coordination of neural oscillators for crayfish<br>legs                    | 245 |
| Josephson and Stokes on crab respiratory muscle   | 265 |
| Noble-Nesbitt and Al-Shukur on cockroach water loss   | 289 |
| Newland and Neil on righting reactions in lobsters  | 301 |
| Young and Taylor on <i>Polyphemus</i> eye movements   | 323 |
| Wenning on salt and water regulation in <i>Macrobdella decora</i>                                     | 337 |
| Johansen and Kleinhaus on STX and Na <sup>+</sup> -dependent potentials in leech<br>R cells           | 351 |
| Lutcavage, Lutz and Baier on gas exchange in the sea turtle   | 365 |
| Rheuben and Kammer on the third axillary muscle of <i>Manduca</i>                                     | 373 |
| Gabbott and Jones on habituation and diving in ducks  | 403 |
| Frain on sodium fluxes in minnows   | 417 |
| Steffensen, Tufts and Randall on O <sub>2</sub> consumption and CO <sub>2</sub> excretion in<br>trout | 427 |
| Zettler and Straka on synaptic chloride channels in blowfly neurones                                  | 435 |
| Toolson and Hadley on cicada transcuticular water flux  | 439 |
