

Contents

Volume 199 (5) 1996

- Jäger, D., Novak, F. J. S., Harvey, W. R., Wieczorek, H. and Klein, U.**
Temporal and spatial distribution of V-ATPase and its mRNA in the midgut of moulting *Manduca sexta* 1019–1027
- Tambutté, E., Allemand, D., Mueller, E. and Jaubert, J.**
A compartmental approach to the mechanism of calcification in hermatypic corals 1029–1041
- Kakizawa, S., Kaneko, T. and Hirano, T.**
Elevation of plasma somatolactin concentrations during acidosis in rainbow trout (*Oncorhynchus mykiss*) 1043–1051
- Meredith, J., Ring, M., Macins, A., Marschall, J., Cheng, N. N., Theilmann, D., Brock, H. W. and Phillips, J. E.**
Locust ion transport peptide (ITP): primary structure, cDNA and expression in a baculovirus system 1053–1061
- Stengl, M. and Zintl, R.**
NADPH diaphorase activity in the antennae of the hawkmoth *Manduca sexta* 1063–1072
- Smith, M. J. C., Wilkin, P. J. and Williams, M. H.**
The advantages of an unsteady panel method in modelling the aerodynamic forces on rigid flapping wings 1073–1083
- Wharton, D. A.**
Water loss and morphological changes during desiccation of the anhydrobiotic nematode *Ditylenchus dipsaci* 1085–1093
- Kingan, T. G., Shabanowitz, J., Hunt, D. F. and Witten, J. L.**
Characterization of two myotrophic neuropeptides in the FMRFamide family from the segmental ganglia of the moth *Manduca sexta*: candidate neurohormones and neuromodulators 1095–1104
- Christopher, K. J., Chang, J. P. and Goldberg, J. I.**
Stimulation of ciliary beat frequency by serotonin is mediated by a Ca²⁺ influx in ciliated cells of *Helisoma trivolvis* embryos 1105–1113
- Corotto, F. S., Piper, D. R., Chen, N. and Michel, W. C.**
Voltage- and Ca²⁺-gated currents in zebrafish olfactory receptor neurons 1115–1126
- Kelber, A.**
Colour learning in the hawkmoth *Macroglossum stellatarum* 1127–1131
- Kasapi, M. A. and Gosline, J. M.**
Strain-rate-dependent mechanical properties of the equine hoof wall 1133–1146
- Supekova, L., Sbia, M., Supek, F., Ma, Y. and Nelson, N.**
A novel subunit of vacuolar H⁺-ATPase related to the *b* subunits of F-ATPases 1147–1156
- Haman, F. and Weber, J.-M.**
Continuous tracer infusion to measure *in vivo* metabolite turnover rates in trout 1157–1162
- O'Donnell, M. J., Dow, J. A. T., Huesmann, G. R., Tublitz, N. J. and Maddrell, S. H. P.**
Separate control of anion and cation transport in Malpighian tubules of *Drosophila melanogaster* 1163–1175
- Loi, P. K., Saunders, R. G., Young, D. C. and Tublitz, N. J.**
Peptidergic regulation of chromatophore function in the European cuttlefish *Sepia officinalis* 1177–1187
- Innocenti, A., Bertolucci, C., Minutini, L. and Foà, A.**
Seasonal variations of pineal involvement in the circadian organization of the ruin lizard *Podarcis sicula* 1189–1194
- Zhuang, Z. and Ahearn, G. A.**
Ca²⁺ transport processes of lobster hepatopancreatic brush-border membrane vesicles 1195–1208
- Wainwright, P. C. and Turingan, R. G.**
Muscular basis of buccal pressure: inflation behavior in the striped burrfish *Chilomycterus schoepfi* 1209–1218
- Reilly, S. M.**
The metamorphosis of feeding kinematics in *Salamandra salamandra* and the evolution of terrestrial feeding behavior 1219–1227
- Shapiro, D. F.**
Size-dependent neural integration between genetically different colonies of a marine bryozoan 1229–1239
- Beason, R. C. and Semm, P.**
Does the avian ophthalmic nerve carry magnetic navigational information? 1241–1244
