

Contents

Volume 200 (16) 1997

Goller, F. and Larsen, O. N.

In situ biomechanics of the syrinx and sound generation in pigeons 2165–2176

Farley, C. T. and Ko, T. C.

Mechanics of locomotion in lizards 2177–2188

Farley, C. T.

Maximum speed and mechanical power output in lizards 2189–2195

Rast, G. F. and Bräunig, P.

Pilocarpine-induced motor rhythms in the isolated locust suboesophageal ganglion 2197–2207

Judge, S. J. and Rind, F. C.

The locust DCMD, a movement-detecting neurone tightly tuned to collision trajectories 2209–2216

Zerbst-Boroffka, I., Bazin, B. and Wenning, A.

Chloride secretion drives urine formation in leech nephridia 2217–2227

Jia, X. X. and Burggren, W. W.

Developmental changes in chemoreceptive control of gill ventilation in larval bullfrogs (*Rana catesbeiana*). I. Reflex ventilatory responses to ambient hyperoxia, hypoxia and NaCN 2229–2236

Jia, X. X. and Burggren, W. W.

Developmental changes in chemoreceptive control of gill ventilation in larval bullfrogs (*Rana catesbeiana*). II. Sites of O₂-sensitive chemoreceptors 2237–2248

Shiono, H. and Naitoh, Y.

Cellular contraction precedes membrane depolarization in *Vorticella convallaria* 2249–2261

Egginton, S. and Cordiner, S.

Cold-induced angiogenesis in seasonally acclimatized rainbow trout (*Oncorhynchus mykiss*) 2263–2268

Chappell, J.

An analysis of clock-shift experiments: is scatter increased and deflection reduced in clock-shifted homing pigeons? 2269–2277
