## Review

### Cottrell, G. A.

The first peptide-gated ion channel 2377-2386

---

### Matsushita, A. and Arikawa, K.

Actin-based vesicular transport in the first 20 min after dusk is crucial for daily rhabdom synthesis in the compound eye of the grapsid crab *Hemigrapsus sanguineus* 2387-2392

### Yamagishi, H. and Hirose, E.

Transfer of the heart pacemaker during juvenile development in the isopod crustacean *Ligia exotica* 2393-2404

### Jellema, T. and Heitler, W. J.

The influence of proprioceptors signalling tibial position and movement on the kick motor programme in the locust 2405-2414

### Makanya, A. N., Maina, J. N., Mayhew, T. M., Tschanz, S. A. and Burri, P. H.

A stereological comparison of villous and microvillous surfaces in small intestines of frugivorous and entomophagous bats: species, inter-individual and craniocaudal differences 2415-2423

### Milligan, B. J., Curtin, N. A. and Bone, Q.

Contractile properties of obliquely striated muscle from the mantle of squid (*Alloteuthis subulata*) and cuttlefish (*Sepia officinalis*) 2425-2436

### Zanotto, F. P., Gouveia, S. M., Simpson, S. J., Raubenheimer, D. and Calder, P. C.

Nutritional homeostasis in locusts: is there a mechanism for increased energy expenditure during carbohydrate overfeeding? 2437-2448

### Connaughton, M. A., Fine, M. L. and Taylor, M. H.

The effects of seasonal hypertrophy and atrophy on fiber morphology, metabolic substrate concentration and sound characteristics of the weakfish sonic muscle 2449-2457

### Rombough, P. J. and Moroz, B. M.

The scaling and potential importance of cutaneous and branchial surfaces in respiratory gas exchange in larval and juvenile walleye *Stizostedion vitreum* 2459-2468

### Chase, M. R., Bennett, R. R. and White, R. H.

Three opsin-encoding cDNAs from the compound eye of *Manduca sexta* 2469-2478

### Dunlop, S. A., Moore, S. R. and Beazley, L. D.

Changing patterns of vasculature in the developing amphibian retina 2479-2492
