

# INDEX OF SUBJECTS

## A

- Abdominal nerve cord:**  
Permeability of the, of the American cockroach, *Periplaneta americana* L. to quaternary ammonium salts (ELDEFRAWI and O'BRIEN) 1
- Abdominal stretch receptors:**  
Some effects of receptor muscle contraction on the responses of slowly adapting, of the crayfish (BROWN) 445
- Action potentials:**  
The initiation of, in the somatic musculature of *Ascaris lumbricoides* (DEL CASTILLO, DE MELLO and MORALES) 263
- Active transport of potassium:**  
And oxygen consumption in the isolated midgut of *Hyalophora cecropia* (HARVEY, HASKELL and ZERAHN) 235
- Adductor muscle efferents**  
Response heterogeneity in, of the surf clam (MELLON and MPITSOS) 585
- American cockroach:**  
Hormonal control of excretion in the. I. Release of diuretic hormone from the terminal abdominal ganglion (MILLS) 35  
*See Periplaneta americana* L.
- Amphipod:**  
*See Gammarus duebeni*
- Anion permeability:**  
The roles of sodium transport and, in generating transepithelial potential differences in larval salamanders (DIETZ, KIRSCHNER and PORTER) 85
- Aplysia:**  
Further studies on the electrophysiological anatomy of the left and right giant cells in (HUGHES) 169
- Ascaris lumbricoides:**  
The initiation of action potentials in the somatic musculature of (DEL CASTILLO, DE MELLO and MORALES) 263
- Axon pathways:**  
Giant neurons and, in the brain of *Tritonia* (DORSETT) 137

## B

- Blood and water:**  
Changes of gas concentrations in, during moderate swimming activity in rainbow trout (STEVENS and RANDALL) 329
- Blood and water afferent and efferent:**  
The effect of hypoxia upon the partial pressure of gases in the, to the gills of rainbow trout (HOLETON and RANDALL) 317  
— Changes in, heart rate and breathing rate during moderate swimming activity in rainbow trout (STEVENS and RANDALL) 307

## Breathing rate:

Changes in blood pressure, heart rate and, during moderate swimming activity in rainbow trout (STEVENS and RANDALL) 307

## Burrowing:

In *Mercenaria mercenaria* (L.) (Bivalvia, Veneridae) (ANSELL and TRUEMAN) 105

## C

### Carausius morosus:

Membrane potentials in the central nervous system of a phytophagous insect (TREHERNE and MADDRELL) 413

### Carcinus:

Excitation and inhibition of the reflex eye withdrawal of the crab (SANDEMAN) 475

### Central nervous system:

- The penetration of acetylcholine into the, of the cockroach *Periplaneta americana* L. (LORD, GREGORY and BURT) 153  
— Command interneurons in the crayfish (ATWOOD and WIERSMA) 249  
— Membrane potentials in the, of a phytophagous insect (*Carausius morosus*) (TREHERNE and MADDRELL) 413

### Circadian rhythms of activity:

Relationships between photoperiodism and, in the house finch (HAMNER and ENRIGHT) 43

### Cockroach:

*See Periplaneta americana* L.

### Cockroach legs:

Conduction velocities and their temperature coefficients in sensory nerve fibres of (CHAPMAN and PANKHURST) 63

### Command interneurons:

In the crayfish central nervous system (ATWOOD and WIERSMA) 249

### Conduction velocities:

And their temperature coefficients in sensory nerve fibres of cockroach legs (CHAPMAN and PANKHURST) 63

### Conus arteriosus:

The function of the, in the Port Jackson shark, *Heterodontus portusjacksoni* (SATCHEL and JONES) 373

### Crab:

*See Carcinus*

### Crayfish:

- Command interneurons in the, central nervous system (ATWOOD and WIERSMA) 249  
— Discharge patterns of neurones supplying tonic abdominal flexor muscles in the (EVOY, KENNEDY and WILSON) 393  
— Some effects of receptor muscle contraction on the responses of slowly adapting abdominal stretch receptors of the (BROWN) 445

## D

- Depot fat:**  
Non-dependence of the saturation of, on temperature and photoperiod in a hibernating mosquito (VAN HANDEL) 487
- Diamondback terrapin:**  
*See Malaclemys terrapin centrata*
- Diapause induction:**  
Photoperiodic control of, in the larva of *Lucilia caesar* L. (Diptera: Calliphoridae) (Ring) 117
- Discharge patterns of neurones:**  
Supplying tonic abdominal flexor muscles in the crayfish (EVOY, KENNEDY and WILSON) 393
- Drosophila:**  
Flight in.  
— II. Variations in stroke parameters and wing contour (VOGEL) 383  
— III. Aerodynamic characteristics of fly wings and wing models (VOGEL) 431

## E

- Earthworm:**  
*See Lumbricus terrestris*
- Elasmobranchs:**  
Hepatic vein sphincters in, and their significance in controlling hepatic blood flow (JOHANSEN and HANSON) 195
- Electrophysiological anatomy:**  
Further studies on the, of the left and right giant cells in *Aplysia* (HUGHES) 169
- Exchange of oxygen and carbon dioxide:**  
The, across the gills of rainbow trout (RANDALL, HOLETON and STEVENS) 339
- Excretory products:**  
Lactic and succinic acids as, of *Polymorphus minutus* (Acanthocephala) *in vitro* (CROMPTON and WARD) 423

## F

- Flight:**  
In *Drosophila*.  
— II. Variations in stroke parameters and wing contour (VOGEL) 383  
— III. Aerodynamic characteristics of fly wings and wing models (VOGEL) 431
- Fresh-water amphipod:**  
*See Gammarus lacustris* Sars; and also *Gammarus pulex* (L.)
- Freshwater crayfish:**  
Zinc regulation in the (including some comparative copper analyses) (BRYAN) 281
- Frontal ganglion:**  
Studies on the effects of the removal of the, in *Locusta migratoria* L.  
— I. The effect on protein metabolism (CLARKE and GILLOTT) 13  
— II. Ribonucleic acid synthesis (CLARKE and GILLOTT) 27

## G

- Gammarus duebeni:**  
Sodium regulation in the amphipod, from brackish-water and fresh-water localities in Britain (SUTCLIFFE) 529
- Gammarus lacustris** Sars:  
The sodium balance mechanism in the fresh-water amphipod (SUTCLIFFE and SHAW) 519
- Gammarus pulex** (L.):  
Sodium regulation in the fresh-water amphipod (SUTCLIFFE) 499
- Gas concentrations:**  
Changes of, in blood and water during moderate swimming activity in rainbow trout (STEVENS and RANDALL) 329
- Giant cells:**  
Further studies on the electrophysiological anatomy of the left and right, in *Aplysia* (HUGHES) 169
- Giant neurones:**  
And axon pathways in the brain of *Tritonia* (DORSETT) 137
- Gills:**  
The effect of hypoxia upon the partial pressure of gases in the blood and water afferent and efferent to the, of rainbow trout (HOLETON and RANDALL) 317  
— The exchange of oxygen and carbon dioxide across the, of rainbow trout (RANDALL, HOLETON and STEVENS) 339

## H

- Heart rate:**  
Changes in blood pressure, and breathing rate during moderate swimming activity in rainbow trout (STEVENS and RANDALL) 307
- Hepatic blood flow:**  
Hepatic vein sphincters in elasmobranchs and their significance in controlling (JOHANSEN and HANSON) 195
- Hepatic vein sphincters:**  
In elasmobranchs and their significance in controlling hepatic blood flow (JOHANSEN and HANSON) 195
- Heterodontus portusjacksoni:**  
The function of the conus arteriosus in the Port Jackson shark (SATCHELL and JONES) 373
- Hormonal control of excretion:**  
In the American cockroach. I. Release of a diuretic hormone from the terminal abdominal ganglion (MILLS) 35
- House finch:**  
Relationships between photoperiodism and circadian rhythms of activity in the (HAMNER and ENRIGHT) 43
- Hyalophora cecropia:**  
Active transport of potassium and oxygen consumption in the isolated midgut of (HARVEY, HASKELL and ZERAHN) 235
- Hypoxia:**  
Changes in blood pressure in the rainbow trout during (HOLETON and RANDALL) 297

- The effect of, upon the partial pressure of gases in the blood and water afferent and efferent to the gills of rainbow trout (HOLETON and RANDALL) 317

## I

**Iodine accumulation:**

- In a nemertine, *Lineus ruber* (BALFOUR and WILLMER) 551

**Ionic regulation:**

- In the queen conch, *Strombus gigas* (Gastropoda, Prossobranchia) (LITTLE) 459

## L

**Lactic and succinic acids:**

- As excretory products of *Polymorphus minutus* (Acanthocephala) *in vitro* (CROMPTON and WARD) 423

**Larval salamanders:**

- The roles of sodium transport and anion permeability in generating transepithelial potential differences in (DIETZ, KIRSCHNER and PORTER) 85

***Lepidosiren paradoxa* (Fitz):**

- Respiratory function in the South American lungfish (JOHANSEN and LENFANT) 205

***Limulus*:**

- The ability of, to see visual patterns (VON CAMPENHAUSEN) 557

***Lineus ruber*:**

- Iodine accumulation in a nemertine (BALFOUR and WILLMER) 551

**Locust:**

- The derivation of the motor command to the spiracles of the (MILLER) 349

***Locusta migratoria* L.:**

- Studies on the effects of the removal of the frontal ganglion in

- I. The effect on protein metabolism (CLARKE and GILLOTT) 13  
— II. Ribonucleic acid synthesis (CLARKE and GILLOTT) 27

***Lucilia caesar* L. (Diptera: Calliphoridae):**

- Photoperiodic control of diapause induction of the larva of (RING) 117

- Maternal induction of diapause in the larva of (RING) 123

***Lumbricus terrestris*:**

- Slow activity in the nervous system of the earthworm (ROBERTS) 571

## M

***Malaclemys terrapin centrata*:**

- Osmoregulation in the diamondback terrapin (BENTLEY, BRETZ and SCHMIDT-NIELSEN) 161

**Maternal induction of diapause:**

- In the larva of *Lucilia caesar* L. (Diptera: Calliphoridae) (RING) 123

**Membrane potentials:**

- In the central nervous system of a phytophagous insect (*Carausius morosus*) (TREHERNE and MADDRELL) 413

***Mercenaria mercenaria* (L.) (Bivalvia, Veneridae):**

- Burrowing in (ANSELL and TRUEMAN) 105

**Midgut:**

- Active transport of potassium and oxygen consumption in the isolated, of *Hyalophora cecropia* (HARVEY, HASKELL and ZERAHN) 235

**Mosquito:**

- Non-dependence of the saturation of depot fat on temperature and photoperiod in a hibernating (VAN HANDEL) 487

**Motor command:**

- The derivation of the, to the spiracles of the locust (MILLER) 349

## N

**Nemertine:**

- See *Lineus ruber*

## O

**Osmoregulation:**

- In the diamondback terrapin, *Malaclemys terrapin centrata* (BENTLEY, BRETZ and SCHMIDT-NIELSEN) 161

**Oxygen consumption:**

- Active transport of potassium and, in the isolated midgut of *Hyalophora cecropia* (HARVEY, HASKELL and ZERAHN) 235

## P

**Partial pressure of gases:**

- The effect of hypoxia upon the, in the blood and water afferent and efferent to the gills of rainbow trout (HOLETON and RANDALL) 317

***Pelagohydra mirabilis* Dendy, 1902 (Coelenterata: Hydrozoa):**

- Some responses to light in a specimen of (PILGRIM) 491

**Penetration of acetylcholine:**

- The, into the central nervous system of the cockroach *Periplaneta americana* L. (LORD, GREGORY and BURT) 153

**Pennatulid coelenterate:**

- The respiration of *Pteroides griseum* (Bohadsch) a (BRAFIELD and CHAPMAN) 97

***Periplaneta americana* L.:**

- Permeability of the abdominal nerve cord of the American cockroach, to quaternary ammonium salts (ELDEFRAWI and O'BRIEN)

- The penetration of acetylcholine into the central nervous system of the cockroach (LORD, GREGORY and BURT) 153

**Permeability:**

- Of the abdominal nerve cord of the American cockroach, *Periplaneta americana* L. to quaternary ammonium salts (ELDEFRAWI and O'BRIEN)

**Photoperiodic control:**

Of diapause induction in the larva of *Lucilia caesar* L. (Diptera: Calliphoridae) (RING)

117

**Photoperiodism:**

Relationships between, and circadian rhythms of activity in the house finch (HAMNER and ENRIGHT)

43

**Phytophagous insect**

See *Carausius morosus*

**Pigeon's wing bones:**

The strength of the, in relation to their function (PENNYQUICK)

219

**Polymorphous minutus (Acanthocephala):**

Lactic and succinic acids as excretory products of, *in vitro* (CROMPTON and WARD)

423

**Port Jackson shark:**

See *Heterodontus portusjacksoni*

**Pteroides griseum (Bohadsch):**

The respiration of, a pennatulid coelenterate (BRAFIELD and CHAPMAN)

97

## Q

**Quaternary ammonium salts:**

Permeability of the abdominal nerve cord of the American cockroach, *Periplaneta americana* L. to (ELDEFRAWI and O'BRIEN)

1

**Queen conch:**

See *Strombus gigas* (Gastropoda, Prosobranchia)

## R

**Rainbow trout:**

Changes in blood pressure in the, during hypoxia (HOLETON and RANDALL)

297

— Changes in blood pressure, heart rate and breathing rate during moderate swimming activity in (STEVENS and RANDALL)

307

— The effect of hypoxia upon the partial pressure of gases in the blood and water afferent and efferent to the gills of (HOLETON and RANDALL)

317

— Changes of gas concentrations in blood and water during moderate swimming activity in (STEVENS and RANDALL)

329

— The exchange of oxygen and carbon dioxide across the gills of (RANDALL, HOLETON and STEVENS)

339

**Receptor muscle contraction:**

Some effects of, on the responses of slowly adapting abdominal stretch receptors of the crayfish (BROWN)

445

**Reflex eye withdrawal:**

Excitation and inhibition of the, of the crab *Carcinus* (SANDEMAN)

475

**Respiration:**

The, of *Pteroides griseum* (Bohadsch) a pennatulid coelenterate (BRAFIELD and CHAPMAN)

97

**Respiratory function:**

In the South American lungfish, *Lepidosiren paradoxa* (Fitz) (JOHANSEN and LENFANT)

205

**Response heterogeneity:**

In adductor muscle efferents of the surf clam (MELLON and MPITSOS)

585

**Responses to light:**

Some, in a specimen of *Pelagohydra mirabilis* Dendy, 1902 (Coelenterata: Hydrozoa) (PILGRIM)

491

## S

**Sensory nerve fibres:**

Conduction velocities and their temperature coefficients in, of cockroach legs (CHAPMAN and PANKHURST)

63

**Slow activity in the nervous system:**

Of the earthworm, *Lumbricus terrestris* (ROBERTS)

571

**Sodium balance mechanism:**

The, in the fresh-water amphipod, *Gammarus lacustris* Sars (SUTCLIFFE and SHAW)

519

**Sodium regulation:**

In the fresh-water amphipod, *Gammarus pulex* (L.) (SUTCLIFFE)

499

— In the amphipod *Gammarus duebeni* from brackish-water and fresh-water localities in Britain (SUTCLIFFE)

529

**Sodium transport:**

The roles of, and anion permeability in generating transepithelial potential differences in larval salamanders (DIETZ, KIRSCHNER and PORTER)

85

**Somatic musculature:**

The initiation of action potentials in the, of *Ascaris lumbricoides* (DEL CASTILLO, DE MELLO and MORALES)

263

**South American lungfish:**

See *Lepidosiren paradoxa* (Fitz)

**Spiracles:**

The derivation of the motor command to the, of the locust (MILLER)

349

**Strombus gigas (Gastropoda, Prosobranchia):**

Ionic regulation in the queen conch (LITTLE)

459

**Surf clam:**

Response heterogeneity in adductor muscle efferents of the (MELLON and MPITSOS)

585

**Swimming activity:**

Changes in blood pressure, heart rate and breathing rate during moderate, in rainbow trout (STEVENS and RANDALL)

307

— Changes of gas concentrations in blood and water during moderate, in rainbow trout (STEVENS and RANDALL)

329

## T

**Temperature and photoperiod:**

Non-dependence of the saturation of depot fat on, in a hibernating mosquito (VAN HANDEL)

487

**Temperature coefficients:**

Conductor velocities and their, in sensory nerve fibres of cockroach legs (CHAPMAN and PANKHURST)

63

**Tonic abdominal flexor muscles:**

Discharge patterns of neurones supplying, in the crayfish (EVOY, KENNEDY and WILSON) 393

**Transepithelial potential differences:**

The roles of sodium transport and anion permeability in generating, in larval salamanders (DIETZ, KIRSCHNER and PORTER) 85

**Tritonia:**

Giant neurons and axon pathways in the brain of (DORSETT) 137

**V**

**Visual patterns:**

The ability of *Limulus* to see (VON CAMPENHAUSEN) 557

**Z**

**Zinc regulation**

In the freshwater crayfish (including some comparative copper analyses) (BRYAN) 281

## INDEX OF AUTHORS

### A

- Ansell, A. D. and Trueman, E. R.** Burrowing in *Mercenaria mercenaria* (L.) (Bivalvia, Veneridae) 105
- Atwood, H. L. and Wiersma, C. A. G.** Command interneurons in the crayfish central nervous system 249

### B

- Balfour, W. E. and Willmer, E. N.** Iodine accumulation in a nemertine, *Lineus ruber* 551
- Bentley, P. J., Bretz, W. L. and Schmidt-Nielsen, Knut.** Osmoregulation in the diamondback terrapin, *Malaclemys terrapin centrata* 161
- Brafield, A. E. and Chapman, G.** The respiration of *Pteroides griseum* (Bohadsch) a penatulid coelenterate 97
- Bretz, W. L.** See BENTLEY, BRETZ and SCHMIDT-NIELSEN
- Brown, M. C.** Some effects of receptor muscle contraction on the responses of slowly adapting abdominal stretch receptors of the crayfish 445
- Bryan, G. W.** Zinc regulator in the freshwater crayfish (including some comparative copper analyses) 281
- Burt, P. E.** See LORD, GREGORY and BURT

### C

- Chapman, G.** See BRAFIELD and CHAPMAN
- Chapman, K. M. and Pankhurst, J. H.** Conduction velocities and their temperature coefficients in sensory nerve fibres of cockroach legs 63
- Clarke, Kenneth U. and Gillott, Cedric.** Studies on the effects of the removal of the frontal ganglion in *Locusta migratoria* L.
- I. The effect on protein metabolism 13
- II. Ribonucleic acid synthesis 27
- Crompton, D. W. T. and Ward, P. F. V.** Lactic and succinic acids as excretory products of *Polymorphous minutus* (Acanthocephala) *in vitro* 423

### D

- del Castillo, J., de Mello, W. E. and Morales, T.** The initiation of action potentials in the somatic musculature of *Ascaris lumbricoides* 263
- de Mello, W. C.** See DEL CASTILLO, DE MELLO and MORALES

- Dietz, Thomas H., Kirschner, Leonard B. and Porter, David.** The roles of sodium transport and anion permeability in generating transepithelial potential differences in larval salamanders 85
- Dorsett, D. A.** Giant neurons and axon pathways in the brain of *Tritonia* 137

### E

- Eldefrawi, M. E. and O'Brien, R. D.** Permeability of the abdominal nerve cord of the American cockroach, *Periplaneta americana* L. to quaternary ammonium salts 1
- Enright, J. T.** See HAMNER and ENRIGHT
- Evoy, William H., Kennedy, Donald and Wilson, Donald M.** Discharge patterns of neurones supplying tonic abdominal flexor muscles in the crayfish 393

### G

- Gillott, Cedric.** See CLARKE and GILLOTT
- Gregory, G. E.** See LORD, GREGORY and BURT

### H

- Hamner, W. M. and Enright, J. T.** Relationships between photoperiodism and circadian rhythms of activity in the house finch 43
- Hanson, David.** See JOHANSEN and HANSON
- Harvey, W. R., Haskell, J. A. and Zerahn, K.** Active transport of potassium and oxygen consumption in the isolated midgut of *Hyalophora cecropia* 235
- Haskell, J. A.** See HARVEY, HASKELL and ZERAHN
- Holeton, G. F.** See RANDALL, HOLETON and STEVENS
- Holeton, G. F. and Randall, D. J.** Changes in blood pressure in the rainbow trout during hypoxia 297
- The effect of hypoxia upon the partial pressure of gases in the blood and water afferent and efferent to the gills of rainbow trout 317
- Hughes, G. M.** Further studies on electrophysiological anatomy of the left and right giant cells in *Aplysia* 169

### J

- Johansen, Kjell and Hanson, David.** Hepatic vein sphincters in elasmobranchs and their significance in controlling hepatic blood flow 195

- Johansen, Kjell and Lenfant, Claude.** Respiratory function in the South American lungfish *Lepidosiren paradoxa* (Fitz) 205
- Jones, M. P.** See SATCHELL and JONES
- K**
- Kennedy, Donald.** See EVOY, KENNEDY and WILSON
- Kirschner, Leonard B.** See DIETZ, KIRSCHNER and PORTER
- L**
- Lenfant, Claude.** See JOHANSEN and LENFANT
- Little, Colin.** Ionic regulation in the queen conch, *Strombus gigas* (Gastropoda, Prosobranchia) 459
- Lord, K. A., Gregory, G. E. and Burt, P. E.** The penetration of acetylcholine into the central nervous system of the cockroach *Periplaneta americana* L. 153
- M**
- Maddrell, S. H. P.** See TREHERNE and MADURELL
- Mellon, DeForest Jr. and Mpitsos, George J.** Response heterogeneity in adductor muscle efferents of the surf clam 585
- Miller, P. L.** The derivation of the motor command to the spiracles of the locust 349
- Mills, Richard R.** Hormonal control of excretion in the American cockroach. I. Release of a diuretic hormone from the terminal abdominal ganglion 35
- Morales, J.** See DEL CASTILLO, DE MELLO and MORALES
- Mpitsos, George J.** See MELLON and MPITSOS
- O**
- O'Brien, R. D.** See ELDEFRAWI and O'BRIEN
- P**
- Pankhurst, J. H.** See CHAPMAN and PANKHURST
- Pennycuik, C. J.** The strength of the pigeon's wing bones in relation to their function 219
- Pilgrim, R. L. C.** Some responses to light in a specimen of *Pelagohydra mirabilis* Dendy, 1902 (Coelenterata: Hydrozoa) 491
- Porter, David.** See DIETZ, KIRSCHNER and PORTER
- R**
- Randall, D. J.** See HOLETON and RANDALL; and also STEVENS and RANDALL
- Randall, D. J., Holeton, G. F. and Stevens, E. Don.** The exchange of oxygen and carbon dioxide across the gills of rainbow trout 339
- Ring, R. A.** Photoperiodic control of diapause induction in the larva of *Lucilia caesar* L. (Diptera: Calliphoridae) 117
- Maternal induction of diapause in the larva of *Lucilia caesar* L. (Diptera: Calliphoridae) 123
- Roberts, M. B. V.** Slow activity in the nervous system of the earthworm, *Lumbricus terrestris* 571
- S**
- Sandeman, D. C.** Excitation and inhibition of the reflex eye withdrawal of the crab *Carcinus* 475
- Satchell, G. H. and Jones, M. P.** The function of the conus arteriosus in the Port Jackson shark, *Heterodontus portusjacksoni* 373
- Schmidt-Nielsen, Knut.** See BENTLEY, BRETZ and SCHMIDT-NIELSEN
- Shaw, J.** See SUTCLIFFE and SHAW
- Stevens, E. Don.** See RANDALL, HOLETON and STEVENS
- Stevens, E. Don and Randall, D. J.** Changes in blood pressure, heart rate and breathing rate during moderate swimming activity in rainbow trout 307
- Changes of gas concentrations in blood and water during moderate swimming activity in rainbow trout 329
- Sutcliffe, D. W.** Sodium regulation in the freshwater amphipod, *Gammarus pulex* (L.) 499
- Sodium regulation in the amphipod *Gammarus duebeni* from brackish-water and fresh-water localities in Britain 529
- Sutcliffe, D. W. and Shaw, J.** The sodium balance mechanism in the fresh-water amphipod, *Gammarus lacustris* Sars 519
- T**
- Treherne, J. E. and Maddrell, S. H. P.** Membrane potentials in the central nervous system of a phytophagous insect (*Carausius morosus*) 413
- Trueman, E. R.** See ANSELL and TRUEMAN
- V**
- Van Handel, Emile.** Non-dependence of the saturation of depot fat on temperature and photoperiod in a hibernating mosquito 487
- Vogel, Steven.** Flight in *Drosophila*.
- II. Variations in stroke parameters and wing contour 383
- III. Aerodynamic characteristics of fly wings and wing models 431
- von Campenhausen, Christoph.** The ability of *Limulus* to see visual patterns 557
- W**
- Ward, P. F. V.** See CROMPTON and WARD

All communications should be addressed to the Editors,

The Journal of Experimental Biology, Zoological Laboratory,  
Downing Street, Cambridge, England.

#### MANUSCRIPTS

Authors are requested to present their work in as *concise* a form as possible. MSS. should be *typewritten* (double spacing) on one side only of the paper, and the pages numbered. *Tables* and *Legends* should be on separate sheets from the rest of the MS. and should be numbered. The place where they are to be inserted in the text should be indicated in the margin of the MS. *Bibliography* should be given under the heading of 'References' and in the following form: Surname of authors (in alphabetical order), initials, date of publication, title of paper, title of journal (abbreviated according to the *World List of Scientific Periodicals*), volume and pages of references (first and last). In the text a reference should be quoted by the author's name and date (in brackets), and not by the numerical order of the paper in the list of references. Every paper must contain a summary of the chief results of the enquiry.

#### ILLUSTRATIONS

(i) *Line blocks*. These should be used whenever possible. Illustrations should be pen drawings in Indian ink (*jet black and waterproof*) on smooth white Bristol board, heavy drawing paper or good quality tracing paper. Drawings must not be folded or creased in any way. Where a drawing is labelled, *the label lines should be drawn in black but the lettering should be put in lightly in soft pencil*. Where considerable reduction is required it is essential that the drawings be of such a character as to bear such reduction. *All brush work, tinting or pencil shading is to be avoided*. Mechanical stipple, if too fine, may not stand reduction in size when the block is made.

Charts and curves can often be drawn to best advantage on *graph paper ruled in pale blue*. The blue lines, while ensuring accuracy, are easily eliminated by the printer, only the blackened lines that are desired remaining.

(ii) *Text half-tone blocks*. These are suitable for illustrations involving brushwork, or in which the depth of shading is an essential feature. They can be used for such things as oscillograph records and some photographs can be produced in this way, a *good glossy bromide print being required*. Illustrations should be gummed on *white* card, grouped and numbered as they are to appear in print. All lettering should be shown in position on a covering sheet of transparent paper.

(iii) *Plates*. Plates should be used only for illustrations, such as photomicrographs, in which the most accurate reproduction of fine detail is called for. Plates are expensive and the Editors may require an author to defray the cost of plates which in their opinion are not essential. The photographs making up the plate should be gummed on *white* card, grouped and numbered as they are to appear in print. Exclusive of margin, the plate figures should not cover when reduced, an area greater than  $7\frac{1}{2}$  in. in length  $\times$  5 in. in width when ready for reproduction as a single plate, or  $7\frac{1}{2}$  in.  $\times$   $11\frac{1}{2}$  in. in the case of double plates. All lettering should be shown in position on a covering sheet of transparent paper. Authors are asked not to submit sheets of illustrations which are more than foolscap size; or, if this cannot be avoided, to include photographic reductions for the convenience of referees.

#### ABSTRACTS

Authors should submit with their MSS. *five copies* (typewritten, double spacing) of an abstract suitable for biological abstracting journals. The abstract will not appear in the *Journal of Experimental Biology* but will be scrutinised by the Editors before being passed for publication. The summary of a paper may serve as an abstract provided that it conforms to the following requirements. The abstract should outline as briefly as possible the results and the definitive conclusions of the work. Details of methods are generally not required. A paper of average length should be abstracted in about 100 words and the abstract should never exceed 3% of the original. Each copy of the abstract should bear the title of the paper, the name(s) of the author(s) and an address to which applications for offprints may be sent.

#### PROOFSHEETS AND OFFPRINTS:

Authors will receive one set of slip proofs for correction and return to the Editors. A page proof will also be sent if the slip proof is marked by the author 'Revise'. An allowance of ten shillings per sheet of sixteen pages will be made for alteration apart from printer's errors. Authors may be charged for any excess over this average. Authors will receive 50 copies of their papers free; additional copies may be purchased and should be ordered when the proofs are returned to the Editors.

---

## THE SOCIETY FOR EXPERIMENTAL BIOLOGY

The Society holds Conferences four times a year at which the results of experimental investigations are presented and discussed. Enquiries about membership of the Society should be addressed to one of the Secretaries:

Dr M. A. SLEIGH, Department of Zoology,  
The University, Bristol, 8

Dr B. C. LOUGHMAN, Department of Agriculture,  
Parks Road, Oxford
