

INDEX OF AUTHORS

- Abdel Magid, A. M.** See VOKAC, NASR EL DIN AHMED and ABDEL MAGID
- Adams, William B.** Mechanical tuning of the acoustic receptor of *Proderia eridania* (Cramer) (Noctuidae) 297
- Ballingtijn, E. M., van den Burg, A. and Egberink, B. P.** An electromyographic study of the adductor mandibulae complex of a free-swimming carp (*Cyprinus carpio* L.) during feeding 261
- Bernays, E. A., Blaney, W. M. and Chapman, R. F.** Changes in chemoreceptor sensilla on the maxillary palps of *Locusta migratoria* in relation to feeding 745
- Bernays, E. A. and Chapman, R. F.** The control of changes in peripheral sensilla associated with feeding in *Locusta migratoria* (L.) 755
- Berry, Michael S.** Electrotonic coupling between identified large cells in the buccal ganglia of *Planorbis corneus* 173
- Blaney, W. M.** See BERNAYS, BLANEY and CHAPMAN
- Blaxter, J. H. S.** Brightness discrimination in larvae of plaice and sole 693
- Blondeau, A.** See DELALEU, BLONDEAU and HOLLEY
- Brackenbury, John H.** Lung-air-sac anatomy and respiratory pressures in the bird 543
- Bregazzi, P. K.** The effects of low temperature upon the locomotor activity rhythm of *Talitrus saltator* (Montagu) (Crustacea: Amphipoda) 393
- Bregazzi, P. K. and Naylor, E.** The locomotor activity rhythm of *Talitrus saltator* (Montagu) (Crustacea, Amphipoda) 375
- Cameron, James N. and Randall, David J.** The effect of increased ambient CO₂ on arterial CO₂ tension, CO₂ content and PH in rainbow trout 673
- Carlson, Albert D.** A comparison of transmitter and synephrine on luminescence induction in the firefly larvae 737
- Chapman, R. F.** See BERNAYS, BLANEY and CHAPMAN; and BERNAYS and CHAPMAN
- Coggeshall, John C.** The landing response and visual processing in the milkweed bug, *Oncopeltus fasciatus* 401
- Cubbin, C. M.** See JONES, CUBBIN and MARSH
- Dan, Katsuma.** See YONEDA and DAN
- Delaleu, J. C., Blondeau, A. and Holley, A.** Electrophysiology of the heart of an isopod crustacean: *Porcellio dilatatus*. II. Effects of ions and membrane permeability inhibitors 609
- See HOLLEY and DELALEU
- Egberink, B. P.** See BALLINTIJN, VAN DEN BURG and EGBERINK
- Fell, H. B.** Tissue culture and its contribution to biology and medicine (George Bidder Lecture) 1
- Fyhn, H. J., Petersen, J. A. and Johansen, K.** Eco-physiological studies of an intertidal crustacean, *Pollicipes polymerus* (Cirripedia, Lepadomorpha). I. Tolerance to body temperature change, desiccation and osmotic stress 83
- Gentle, Michael J.** The eye and colour change in the minnow (*Phoxinus phoxinus* L.) 701
- A note on the paling centre of the minnow (*Phoxinus phoxinus* L.) 709
- Gradwell, Norman.** On the interactions between suctorial adhesion, gill ventilation and opercular spine erections in *Xenocara occidentalis* 771
- Greenaway, Peter.** Calcium regulation in the freshwater crayfish *Austropotamobius pallipes* (Lereboullet). I. Calcium balance in the intermolt animal 471
- Greenberg, Michael J.** See PIERCE and GREENBERG
- Hisano, Nozomu, Tateda, Hideki and Kuwabara, Masutaro.** Photosensitive neurones in the marine pulmonate mollusc *Onchidium verruculatum* 651
- An electrophysiological study of the photo-excitative neurones of *Onchidium verruculatum* in situ 661
- Holley, A. and Delaleu, J. C.** Electrophysiology of the heart of an isopod crustacean: *Porcellio dilatatus*. I. General properties 589
- see DELALEU, BLONDEAU and HOLLEY
- Hughes, G. M.** The relationship between cardiac and respiratory rhythms in the dogfish, *Scyliorhinus canicula* L. 415
- Isaia, J.** Comparative effects of temperature on the sodium and water permeabilities of the gills of a stenohaline freshwater fish (*Carassius auratus*) and a stenohaline marine fish (*Serranus scriba*, *Serranus cabrilla*) 359
- See MOTAIS and ISAIA
- Johansen, K.** See FYHN, PETERSEN and JOHANSEN
- Jones, David R.** Factors affecting diastolic blood pressures in the systemic and pulmocutaneous arches of anuran amphibia 789
- Jones, M. D. R., Cubbin, C. M. and Marsh, D.** The circadian rhythm of flight activity of the mosquito *Anopheles gambiae*: the light-response rhythm 337

- Jones, M. D. R., Cubbin, C. M. and Marsh, D.** Light-on effects and the question of bimodality in the circadian flight activity of the mosquito *Anopheles gambiae* 347
- Kirsch, R.** Plasma chloride and sodium, and chloride space in the European eel, *Anguilla anguilla* L. 113
— The kinetics of peripheral exchanges of water and electrolytes in the silver eel (*Anguilla anguilla* L.) in fresh water and in sea water 489
- Kuwabara, Masutaro.** See HISANO, TATEDA and KUWABARA
- Land, M. F.** Stepping movements made by jumping spiders during turns mediated by the lateral eyes 15
- Lawn, I. D.** See MCFARLANE and LAWN
- Leader, John P.** Osmoregulation in the larva of the marine caddis fly, *Philaniscus plebeius* (Walk.) (Trichoptera) 821
- Lindqvist, Ossi V.** See SALMINEN and LINDQVIST
- McFarlane, I. D. and Lawn, I. D.** Expansion and contraction of the oral disc in the sea anemone *Tealia felina* 633
- Machemer, Hans.** Ciliary activity and the origin of metachrony in *Paramecium*: effects of increased viscosity 239
- Machin, J.** Water exchange in the mantle of a terrestrial snail during periods of reduced evaporative loss 103
- Marsh, D.** See JONES, CUBBIN and MARSH
- Moreton, R. B.** Electrophysiology and ionic movements in the central nervous system of the snail, *Helix aspersa* 513
- Motais, R. and Isaia, J.** Evidence for an effect of ouabain on the branchial sodium-excreting pump of marine teleosts: interaction between the inhibitor and external Na and K 367
- Myrberg, Arthur A., Jr., and Spires, Juanita Y.** Sound discrimination by the bicolor damselfish, *Eupomacentrus partitus* 727
- Nasr El Din Ahmed.** See VOKAC, NASR EL DIN AHMED and ABDEL MAGID
- Naylor, E.** See BREGAZZI and NAYLOR
- Okajima, A.** See SANDEMAN and OKAJIMA
- Okasha, A. Y. K.** Water relations in an insect, *Thermobia domestica*. II. Relationships between water content, water uptake from sub-saturated atmospheres and water loss 285
- Pal, R. A.** The osmoregulatory system of the amoeba, *Acanthamoeba castellanii* 55
- Petersen, J. A.** See FYHN, PETERSEN and JOHANSEN
- Pierce, Sidney K., Jr., and Greenberg, Michael J.** The nature of cellular volume regulation in marine bivalves 681
- Prior, David J.** Electrophysiological analysis of peripheral neurones and their possible role in the local reflexes of a mollusc 133
- A neural correlate of behavioural stimulus intensity discrimination in a mollusc 147
- Randall, David J.** See CAMERON and RANDALL
- Roberts, B. L.** See RUSSELL and ROBERTS
- Roberts, B. L. and Russell, I. J.** The activity of lateral-line efferent neurones in stationary and swimming dogfish 435
- Rossiter, G. T.** See SATCHELL and ROSSITER
- Rumsey, T. J.** Osmotic and ionic regulation in a terrestrial snail, *Pomatias elegans* (Gastropoda, Prosobranchia) with a note on some tropical Pomatiasidae 205
- Russell, I. J.** See ROBERTS and RUSSELL
- Russell, I. J. and Roberts, B. L.** Inhibition of spontaneous lateral-line activity by efferent nerve stimulation 77
- Salminen, Inga and Lindqvist, Ossi V.** Cuticular water content and the rate of evaporation in the terrestrial isopod *Porcellio scaber* Latr. 569
- Sandeman, D. C. and Okajima, A.** Statocyst-induced eye movements in the crab *Scylla serrata*. I. The sensory input from the statocyst 187
- Satchell, G. H. and Rossiter, G. T.** Pulsatile pressures in the cranial fluids of *Heterodontus portusjacksoni* 161
- Sattelle, D. B.** The ionic basis of axonal conduction in the central nervous system of *Viviparus coactatus* (Millett) (Gastropoda: Prosobranchia) 41
- Spires, Juanita Y.** See MYRBERG and SPIRES
- Staddon, B. W.** On the suggestion that the secretion from the metathoracic scent glands of a surface-dwelling aquatic insect, *Gerris najas* (de Geer) (Heteroptera; Gerridae) has a waterproofing function 765
- Suthers, Roderick A.** See THOMAS and SUTHERS
- Tateda, Hideki.** See HISANO, TATEDA and KUWABARA
- Tazaki, Kenro.** The burst activity of different cell regions and intercellular co-ordination in the cardiac ganglion of the crab, *Eriocheir japonicus* 713
- Thomas, Steven P. and Suthers, Roderick A.** The physiology and energetics of bat flight 317
- Truman, J. W.** Physiology of insect rhythms. I. Circadian organization of the endocrine events underlying the moulting cycle of larval tobacco hornworms 805
- van den Burg, A.** See BALLINTIJN, VAN DEN BURG and EGBERINK
- Vokac, Z., Nasr El Din Ahmed and Abdel Magid, A. M.** The *in vitro* respiratory properties of blood of the primitive fish *Polypterus senegalus* 461
- Waldron, Ingrid.** Spatial organization of respiratory neurones in the medulla of tench and goldfish 449

- Wiersma, C. A. G.** *See* YORK, WIERSMA and YANAGISAWA; and YORK, YANAGISAWA and WIERSMA
- Yamamoto, T.** Electrical and mechanical properties of the red and white muscles in the silver carp 551
- Yanagisawa, K.** *See* YORK, WIERSMA and YANAGISAWA; and YORK, YANAGISAWA and WIERSMA
- Yoneda, Mitsuki and Dan, Katsuma.** Tension at the surface of the dividing sea-urchin egg 575
- York, B., Wiersma, C. A. G. and Yanagisawa, K.** Properties of the optokinetic motor fibres in the rock lobster: build-up, flipback, after-discharge and memory, shown by their firing patterns 217
- York, B., Yanagisawa, K. and Wiersma, C. A. G.** Input sources and properties of position-sensitive oculomotor fibres in the rock lobster, *Panulirus interruptus* (Randall) 229
- Young, D.** Specific re-innervation of limbs transplanted between segments in the cockroach, *Periplaneta americana* 305

INDEX OF SUBJECTS

***Acanthamoeba castellanii*:**

The osmoregulatory system of the amoeba (PAL) 55

Acoustic receptor:

Mechanical tuning of the, of *Prodenia eridania* (Cramer) (Noctuidae) (Adams) 297

Adductor mandibulae complex:

An electromyographic study of the, of a free-swimming carp (*Cyprinus carpio* L.) during feeding (BALLINTIJN, VAN DEN BURG and EGBERINK) 261

Ambient CO₂:

The effect of increased, on arterial CO₂ tension, CO₂ content and pH in rainbow trout (CAMERON and RANDALL) 673

Amoeba:

See *Acanthamoeba castellanii*

***Anguilla anguilla* L.:**

Plasma chloride and sodium, and chloride space in the European eel (KIRSCH) 113

— The kinetics of peripheral exchanges of water and electrolytes in the silver eel, in fresh water and in sea water (KIRSCH) 489

***Anopheles gambiae*:**

The circadian rhythm of flight activity of the mosquito: the light-response rhythm (JONES, CUBBIN and MARSH) 337

— Light-on effects and the question of bimodality in the circadian flight activity of the mosquito (JONES, CUBBIN and MARSH) 347

Anuran amphibia:

Factors affecting diastolic blood pressures in the systemic and pulmocutaneous arches of (JONES) 789

Arterial CO₂ tension:

The effect of increased ambient CO₂ on, CO₂ content and pH in rainbow trout (CAMERON and RANDALL) 673

***Austropotamobius pallipes* (Lereboullet):**

Calcium regulation in the freshwater Crayfish — I. Calcium balance in the intermoult animal (GREENAWAY) 471

Axonal conduction:

The ionic basis of, in the central nervous system of *Viviparus cunctatus* (Millet) (Gastropoda: Prosobranchia) (Sattelle) 41

Bat flight:

The physiology and energetics of (THOMAS and SUTHERS) 317

Behaviour alstimulus intensity discrimination:

A neural correlate of, in a mollusc (PRIOR) 147

Bimodality:

Light-on effects and the question of, in the circadian flight activity of the mosquito *Anopheles gambiae* (JONES, CUBBIN and MARSH) 347

Biology:

Tissue culture and its contribution to, and medicine (FELL) (George Biddler Lecture) 1

Bird:

Lung-air-sac anatomy and respiratory pressures in the (BRACKENBURY) 543

Branchial sodium-excreting pump:

Evidence for an effect of ovabain on the, of marine teleosts: interaction between the inhibitor and external Na and K (MOTAIS and ISAIA) 367

Brightness discrimination:

In larvae of plaice and sole (BLAXTER) 693

Buccal ganglia:

Electrotonic coupling between identified large cells in the, of *Planorbis corneus* (BERRY) 173

Burst activity:

The, of different cell regions and intercellular co-ordination in the cardiac ganglion of the crab, *Eriocheir japonicus* (TAZAKI) 713

Calcium regulation:

In the freshwater crayfish *Austropotamobius pallipes* (LEREBoullet)

— I. Calcium balance in the intermoult animal (GREENAWAY) 471

***Carassius auratus*:**

Comparative effects of temperature on the sodium and water permeabilities of the gills of a stenohaline freshwater fish, and a stenohaline marine fish (*Serranus scriba*, *Serranus cabrilla*) (ISAIA) 359

Cardiac and respiratory rhythms:

The relationship between, in the dogfish, *Scyliorhinus canicula* L. (HUGHES) 415

Cardiac ganglion:

The burst activity of different cell regions and intercellular co-ordination in the, of the crab *Eriocheir japonicus* (TAZAKI) 713

Carp:

See *Cyprinus carpio* L.

Cell regions:

The burst activity of different, and intercellular co-ordination in the cardiac ganglion of the crab, *Eriocheir japonicus* (TAZAKI) 713

Cells:

Electrotonic coupling between identified large, in the buccal ganglia of *Planorbis corneus* (BERRY) 173

Cellular volume regulation:

The nature of, in marine bivalves (PIERCE and GREENBERG) 681

Central nervous system:

The ionic basis of axonal conduction in the, of *Viviparus cunctatus* (Millet) (Gastropoda: Prosobranchia) 41

— Electrophysiology and ionic movements in the, of the snail, *Helix aspersa* (MORETON) 513

- Chemoreceptor sensilla:**
Changes in, on the maxillary palps of *Locusta migratoria* in relation to feeding (BERNAYS, BLANEY and CHAPMAN) 745
- Chloride space:**
Plasma chloride and sodium, and, in the European eel, *Anguilla anguilla* L. (KIRSCH) 113
- Ciliary activity:**
And the origin of metachrony in *Paramecium*: effects of increased viscosity (MACHEMER) 239
- Circadian flight activity:**
Light-on effects and the question of bimodality in the, of the mosquito *Anopheles gambiae* (JONES, CUBBIN and MARSH) 347
- Circadian rhythm:**
Of flight activity of the mosquito *Anopheles gambiae*: the light-response rhythm (JONES, CUBBIN and MARSH) 337
- CO₂ content:**
The effect of increased ambient CO₂ on arterial CO₂ tension, and pH in rainbow trout (CAMERON and RANDALL) 673
- Cockroach:**
See *Periplaneta americana*
- Colour change:**
The eye and, in the minnow (*Phoxinus phoxinus* L.) (GENTLE) 701
- Crab:**
See *Eriocheir japonicus*; and *Scylla serrata*
- Cranial fluids:**
Pulsatile pressures in the, of *Heterodontus portusjacksoni* (SATCHELL and ROSSITER) 161
- Crayfish:**
See *Austropotamobius pallipes* (LEREBoullet)
- Cuticular water content:**
And the rate of evaporation in the terrestrial isopod *Porcellio scaber* Latr. (SALMINEN and LINDQVIST) 569
- Cyprinus carpio* L.:**
An electromyographic study of the adductor mandibulae complex of a free-swimming carp, during feeding (BALLINTIJN, VAN DEN BURG and EGGERINK) 261
- Damsel fish:**
See *Eupomacentrus partitus*
- Diastolic blood pressures:**
Factors affecting, in the systemic and pulmonary arches of anuran amphibia (JONES) 789
- Dogfish:**
The activity of lateral-line efferent neurones in stationary and swimming (ROBERTS and RUSSELL) 435
— See *Scyliorhinus canicula* L.
- Eco-physiological studies:**
Of an intertidal crustacean, *Pollicipes polymerus* (Cirripedia, Lepadomorpha)
— I. Tolerance to body temperature change, desiccation and osmotic stress (FYHN, PETERSEN and JOHANSEN) 83
- Efferent nerve stimulation:**
Inhibition of spontaneous lateral-line activity by (RUSSELL and ROBERTS) 77
- Electrical and mechanical properties:**
Of the red and white muscles in the silver carp (YAMAMOTO) 551
- Electromyograph study:**
An, of the adductor mandibulae complex of a free-swimming Carp (*Cyprinus carpio* L.) during feeding (BALLINTIJN, VAN DER BURG and EGGERINK) 261
- Electrophysiological analysis:**
Of peripheral neurones and their possible role in the local reflexes of a mollusc (PRIOR) 133
- Electrophysiological study:**
An, of the photo-excitative neurones of *Onchidium verruculatum in situ* (HISANO, TATEDA and KUWABARA) 661
- Electrophysiology:**
And ionic movements in the central nervous system of the snail, *Helix aspersa* (MORETON) 513
— Of the heart of an isopod crustacean: *Porcellio dilatus*
— I. General properties (HOLLEY and DELALEU) 589
— II. Effects of ions and membrane permeability inhibitors (DELALEU, BLONDEAU and HOLLEY) 609
- Electrotonic coupling:**
Between identified large cells in the buccal ganglia of *Planorbis corneus* (BERRY) 173
- Eriocheir japonicus*:**
The burst activity of different cell regions and intercellular co-ordination in the cardiac ganglion of the crab (TAZAKI) 713
- Eupomacentrus partitus*:**
Sound discrimination by the bicolor damselfish (MYRBERG and SPIRES) 727
- European eel:**
— See *Anguilla anguilla* L.
- Evaporation:**
Cuticular water content and the rate of, in the terrestrial isopod *Porcellio scaber* Latr. (SALMINEN and LINDQVIST) 569
- Evaporative loss:**
Water exchange in the mantle of a terrestrial snail during periods of reduced (MACHIN) 103
- Exchanges of water and electrolytes:**
The kinetics of peripheral, in the silver eel (*Anguilla anguilla* L.) in fresh water and in sea water (KIRSCH) 489
- Expansion and contraction:**
Of the oral disc in the sea anemone *Tealia felina* (McFARLANE and LAWN) 633
- Eye:**
The, and colour change in the minnow (*Phoxinus phoxinus* L.) (GENTLE) 701
- Feeding:**
Changes in chemoreceptor sensilla on the maxillary palps of *Locusta migratoria* in

- Feeding (cont.)**
 relation to (BERNAYS, BLANEY and CHAPMAN) 745
 — The central of changes in peripheral sensilla associated with, in *Locusta migratoria* (L.) (BERNAYS and CHAPMAN) 755
- Firefly larva:**
 A comparison of transmitter and synephrine on luminescence induction in the (CARLSON) 737
- Flight activity:**
 The circadian rhythm of, of the mosquito *Anopheles gambiae*: the light-response rhythm (JONES, CUBBIN and MARSH) 337
- Gerris najas** (de Geer) (Heteroptera; Gerriidae):
 On the suggestion that the secretion from the metathoracic scent glands of a surface-dwelling aquatic insect, has a waterproofing function (STADDON) 765
- Gill ventilation:**
 On the interactions between suctorial adhesion, and opercular spine erections in *Xenocara occidentalis* (GRADWELL) 771
- Gills:**
 Comparative effects of temperature on the sodium and water permeabilities of the, of a stenohaline freshwater fish (*Carassius auratus*) and a stenohaline marine fish (*Serranus scriba*, *Serranus cabrilla*) (ISAIA) 359
- Goldfish:**
 Spatial organization of respiratory neurones in the medulla of tench and (WALDRON) 449
- Heart:**
 Electrophysiology of the, of an isopod crustacean: *Porcellio dilatatus*
 — I. General properties (HOLLEY and DELALEU) 589
 — II. Effects of ions and membrane permeability inhibitors (DELALEU, BLONDEAU and HOLLEY) 609
- Helix aspersa:**
 Electrophysiology and ionic movements in the central nervous system of the snail (MORETON) 513
- Heterodontus portusjacksoni:**
 Pulsatile pressures in the cranial fluids of (SACHELL and ROSSITER) 161
- Inhibition:**
 Of spontaneous lateral-line activity by efferent nerve stimulation (RUSSELL and ROBERTS) 77
- Insect:**
See Thermobia domestica
- Insect rhythms:**
 Physiology of
 — I. Circadian organization of the endocrine events underlying the moulting cycle of larval tobacco hornworms (TRUMAN) 805
- Intercellular co-ordination:**
 The burst activity of different cell regions and, in the cardiac ganglion of the crab *Eriocheir japonicus* (TAZAKI) 713
- Intertidal crustacean:**
See Pollicipes polymerus (Cirripedia, Lepodomorpha)
- Ionic basis:**
 The, of axonal conduction in the central nervous system of *Viviparus contectus* (Millet) (Gastropoda: Prosobranchia) (SATTELLE) 41
- Ionic movements:**
 Electrophysiology and, in the central nervous system of the snail, *Helix aspersa* (MORETON) 513
- Isopod crustacean:**
See Porcellio dilatatus
- Jumping spiders:**
 Stepping movements made by, during turns mediated by the lateral eyes (LAND) 15
- Landing response:**
 The, and visual processing in the milkweed bug, *Oncopeltus fasciatus* (COGGSHALL) 401
- Larva:**
 Osmoregulation in the, of the marine caddis fly, *Philanisus plebeius* (Walk.) (Trichoptera) (LEADER) 821
- Larvae of plaice and sole:**
 Brightness discrimination in (BLAXTER) 693
- Lateral eyes:**
 Stepping movements made by jumping spiders during turns mediated by the (LAND) 15
- Lateral-line activity:**
 Inhibition of spontaneous, by efferent nerve stimulation (RUSSELL and ROBERTS) 77
- Lateral-line efferent neurones:**
 The activity of, in stationary and swimming dogfish (ROBERTS and RUSSELL) 435
- Light-on effects:**
 And the question of bimodality in the circadian flight activity of the mosquito *Anopheles gambiae* (JONES, CUBBIN and MARSH) 347
- Light-response rhythm:**
 The circadian rhythm of flight activity of the mosquito *Anopheles gambiae*: the (JONES, CUBBIN and MARSH) 337
- Local reflexes:**
 Electrophysiological analysis of peripheral neurones and their possible role in the, of a mollusc (PRIOR) 133
- Locomotor activity rhythm:**
 The, of *Talitrus saltator* (Montagu) (Crustacea, Amphipoda) (BREGAZZI and NAYLOR) 375
 — The effects of low temperature upon the, of *Talitrus saltator* (Montagu) (Crustacea: Amphipoda) (BREGAZZI) 393
- Locusta migratoria:**
 Changes in chemoreceptor sensilla on the maxillary palps of, in relation to feeding (BERNAYS, BLANEY and CHAPMAN) 745

***Locusta migratoria* (cont.)**

The control of changes in peripheral sensilla associated with feeding in (BERNAYS and CHAPMAN) 755

Luminescence induction:

A comparison of transmitter and synephrine on, in the firefly larva (CARLSON) 737

Lung-air-sac anatomy:

And respiratory pressures in the bird (BRACKENBURY) 543

Mantle:

Water exchange in the, of a terrestrial snail during periods of reduced evaporative loss (MACHIN) 103

Marine bivalves:

The nature of cellular volume regulation in (PIERCE and GREENBERG) 681

Marine caddis fly:

See *Philaniscus plebeius* (Walk.) (Trichoptera)

Marine pulmonate mollusc:

See *Onchidium verruculatum*

Marine teleosts:

Evidence for an effect of ovabain on the branchial sodium-excreting pump of: interaction between the inhibitor and external Na and K (MOTAIS and ISAIA) 367

Maxillary palps:

Changes in chemoreceptor sensilla on the, of *Locusta migratoria* in relation to feeding (BERNAYS, BLANEY and CHAPMAN) 745

Mechanical tuning:

Of the acoustic receptor of *Prodenia eridania* (Cramer) (Noctuidae) (ADAMS) 297

Medicine:

Tissue culture and its contribution to biology and (FELL) (George Bidder Lecture) 1

Medulla:

Spatial organization of respiratory neurones in the, of tench and goldfish (WALDRON) 449

Metachrony:

Ciliary activity and the origin of, in *Paramecium*: effects of increased viscosity (MACHEMER) 239

Metathoracic scent glands:

On the suggestion that the secretion from the, of a surface-dwelling aquatic insect, *Gerris najas* (de Geer) (Heteroptera; Gerridae) has a waterproofing function (STADDON) 765

Milkweed bug:

See *Oncopeltus fasciatus*

Minnow:

See *Phoxinus phoxinus* L.

Mollusc:

Electrophysiological analysis of peripheral neurones and their possible role in the local reflexes of a (PRIOR) 133

— A neural correlate of behavioural stimulus intensity discrimination in a (PRIOR) 147

Mosquito:

See *Anopheles gambiae*

Neural correlate:

A, of behavioural stimulus intensity discrimination in a mollusc (PRIOR) 147

Oculomotor fibres:

Input sources and properties of position-sensitive, in the rock lobster, *Panulirus interruptus* (Randall) (YORK, YANAGISAWA and WIERSMA) 229

***Onchidium verruculatum*:**

Photosensitive neurons in the marine pulmonate mollusc (HISANO, TATEDA and KUWABARA) 651

***Oncopeltus fasciatus*:**

The landing response and visual processing in the milkweed bug (COGGSHALL) 401

Opercular spine erections:

On the interactions between suctorial adhesion, gill ventilation and, in *Xenocara occidentalis* (GRADWELL) 771

Optokinetic motor fibres:

Properties of the, in the rock lobster: build-up, flipback, afterdischarge and memory, shown by their firing patterns (YORK, WIERSMA and YANAGISAWA) 217

Oral disc:

Expansion and contraction of the, in the sea anemone *Tealia felina* (McFARLANE and LAWN) 633

Osmoregulation:

In the larva of the marine caddis fly, *Philaniscus plebeius* (Walk.) (Trichoptera) (LEADER) 821

Osmoregulatory system:

The, of the amoeba, *Acanthamoeba castellanii* (PAL) 55

Osmotic and ionic regulation:

In a terrestrial snail, *Pomatias elegans* (Gastropoda, Prosobranchia) with a note on some tropical Pomatiidae (RUMSEY) 205

Ouabain:

Evidence for an effect of, on the branchial sodium excreting pump of marine teleosts: interaction between the inhibitor and external Na and K (MOTAIS and ISAIA) 367

Paling centre:

A note on the, of the minnow (*Phoxinus phoxinus*) (GENTLE) 709

***Panulirus interruptus* (Randall):**

Input sources and properties of position-sensitive oculomotor fibres in the rock lobster (YORK, YANAGISAWA and WIERSMA) 229

***Paramecium*:**

Ciliary activity and the origin of metachrony in: effects of increased viscosity (MACHEMER) 239

Peripheral neurones:

Electrophysiological analysis of, and their possible role in the local reflexes of a mollusc (PRIOR) 133

Peripheral sensilla:

The control of changes in, associated with feeding in *Locusta migratoria* (L.) (BERNAYS and CHAPMAN) 755

- Periplaneta americana*:**
Specific re-innervation of limbs transplanted between segments in the cockroach (YOUNG) 305
- Philanisus plebeius* (Walk.) (Trichoptera):**
Osmoregulation in the larva of the marine caddis fly (LEADER) 821
- Photo-excitative neurones:**
An electrophysiological study of the, of *Onchidium verruculatum in situ* (HISANO, TATEDA and KUWABARA) 661
- Photosensitive neurones:**
In the marine pulmonate mollusc *Onchidium verruculatum* (HISANO, TATEDA and KUWABARA) 651
- Phoxinus phoxinus* L.:**
The eye and colour change in the minnow (GENTLE) 701
— A note on the paling centre of the minnow (GENTLE) 709
- Planorbis corneus*:**
Electrotonic coupling between identified large cells in the buccal ganglia of (BERRY) 173
- Plasma chloride and sodium:**
And chloride space in the European eel *Anguilla anguilla* L. (KIRSCH) 113
- Pollicipes polymerus* (Cirripedia, Lepodomorpha):**
Eco-physiological studies of an intertidal crustacean
— I. Tolerance to body temperature change, desiccation and osmotic stress (FYHN, PETERSEN and JOHANSEN) 83
- Polypterus senegalus*:**
The *in vitro* respiratory properties of blood of the primitive fish (VOKAC, NASR EL DIN AHMED and ABDEL MAGID) 461
- Pomatias elegans* (Gastropoda, Prosobranchia):**
Osmotic and ionic regulation in a terrestrial snail, with a note on some tropical Pomatiasidae (RUMSEY) 205
- Pomatiasidae:**
Osmotic and ionic regulation in a terrestrial snail, *Pomatias elegans* (Gastropoda, Prosobranchia) with a note on some tropical (RUMSEY) 205
- Porcellio dilatatus*:**
Electrophysiology of the heart of an isopod crustacean
— I. General properties (HOLLEY and DELALEU) 589
— II. Effects of ions and membrane permeability inhibitors (DELALEU, BLONDEAU and HOLLEY) 609
- Porcellio scaber* Latr.:**
Cuticular water content and the rate of evaporation in the terrestrial isopod (SALMINEN and LINQVIST) 569
- Primitive fish:**
See Polypterus senegalus
- Prodenia eridania* (Cramer) (Noctuidae):**
Mechanical tuning of the acoustic receptor of (ADAMS) 297
- Pulsatile pressures:**
In the cranial fluids of *Heterodontus portus-jacksoni* (SATCHELL and ROSSITER) 161
- Rainbow trout:**
The effect of increased ambient CO₂ on arterial CO₂ tension, CO₂ content and pH in (CAMERON and RANDALL) 673
- Red and white muscles:**
Electrical and mechanical properties of the, in the silver carp (YAMAMOTO) 551
- Re-innervation of limbs:**
Specific, of limbs transplanted between segments in the cockroach, *Periplaneta americana* (YOUNG) 305
- Respiratory neurones:**
Spatial organization of, in the medulla of tench and goldfish (WALDRON) 449
- Respiratory pressures:**
Lung-air-sac anatomy and, in the bird (BRACKENBURY) 543
- Respiratory properties of blood:**
The *in vitro*, of the primitive fish *Polypterus senegalus* (VOKAC, NASR EL DIN AHMED and ABDEL MAGID) 461
- Rock lobster:**
Properties of the optokinetic motor fibres in the: build-up, flipback, afterdischarge and memory, shown by their firing patterns (YORK, WIERSMA and YANAGISAWA) 217
— *See also Panulirus interruptus* (Randall)
- Scyliorhinus canicula* L.:**
The relationship between cardiac and respiratory rhythms in the dogfish (HUGHES) 415
- Scylla serrata*:**
Statocyst-induced eye movements in the crab
— I. The sensory input from the statocyst (SANDEMAN and OKAJIMA) 187
- Sea anemone:**
See Tealia felina
- Sea-urchin egg:**
Tension at the surface of the dividing (YONEDA and DAN) 575
- Secretion:**
On the suggestion that the, from the meta-thoracic scent glands of a surface-dwelling aquatic insect, *Gerris najas* (de Geer) (Heteroptera; Gerridae) has a waterproofing function (STADDON) 765
- Serranus cabrilla*:**
Comparative effects of temperature on the sodium and water permeabilities of the gills of a stenohaline freshwater fish (*Carassius auratus*) and a stenohaline marine fish (*Serranus scriba*), (ISAIA) 359
- Serranus scriba*:**
Comparative effects of temperature on the sodium and water permeabilities of the gills of a stenohaline freshwater fish (*Carassius auratus*) and a stenohaline marine fish (, *Serranus cabrilla*) (ISAIA) 359

Silver carp:

Electrical and mechanical properties of the red and white muscles in the (YAMAMOTO)

551

Silver eel:

See *Anguilla anguilla* L.

Snail:

See *Helix aspersa*

Sodium and water permeabilities:

Comparative effects of temperature on the, of the gills of a stenohaline freshwater fish (*Carassius auratus*) and a stenohaline marine fish (*Serranus scriba*, *Serranus cabrilla*) (ISAIA)

359

Sound discrimination:

By the bicolor damselfish, *Eupomacentrus partitus* (MYRBERG and SPIRES)

727

Spatial organization:

Of respiratory neurones in the medulla of tench and goldfish (WALDRON)

449

Statocyst-induced eye movements:

In the crab *Scylla serrata*

— I. The sensory input from the statocyst (SANDEMAN and OKAJIMA)

187

Stenohaline freshwater fish:

See *Carassius auratus*

Stenohaline marine fish:

See *Serranus scriba*, and *Serranus cabrilla*

Stepping movements:

— Made by jumping spiders during turns mediated by the lateral eyes (LAND)

15

Suctorial adhesion:

On the interactions between, gill ventilation and opercular spine erections in *Xenocara occidentalis* (GRADWELL)

771

Surface-dwelling aquatic insect:

See *Gerris najas* (de Geer) (Heteroptera; Gerridae)

Synephrine:

A comparison of transmitter and, on luminescence induction in the firefly larva (CARLSON)

737

Systemic and pulmocutaneous arches:

Factors affecting diastolic blood pressures in the, of anuran amphibia (JONES)

789

***Talitrus saltator* (Montagu) (Crustacea, Amphipoda):**

The locomotor activity rhythm of (BREGAZZI and NAYLOR)

375

— The effects of low temperature upon the locomotor activity rhythm of (BREGAZZI)

393

***Tealia felina*:**

Expansion and contraction of the oral disc in the sea anemone (MCFARLANE and LAWN)

633

Temperature:

Comparative effects of, on the sodium and water permeabilities of the gills of a stenohaline freshwater fish (*Carassius auratus*) and a stenohaline marine fish (*Serranus scriba*, *Serranus cabrilla*) (ISAIA)

359

— The effects of low, upon the locomotor activity rhythm of *Talitrus saltator* (Montagu) (Crustacea: Amphipoda) (BREGAZZI)

393

Tench:

Spatial organization of respiratory neurones in the medulla of, and goldfish (WALDRON)

449

Tension:

At the surface of the dividing sea-urchin egg (YONEDA and DAN)

575

Terrestrial isopod:

See *Porcellio scaber* Latr.

Terrestrial snail:

Water exchange in the mantle of a, during periods of reduced evaporative loss (MACHIN)

103

— See *Pomatias elegans*

***Thermobia domestica*:**

Water relations in an insect

— II. Relationships between water content, Water uptake from subsaturated atmospheres and water loss (OKASHA)

285

Tissue culture:

And its contribution to biology and medicine (FELL) (George Bidder Lecture)

1

Transmitter:

A comparison of, and synephrine on luminescence induction in the firefly larva (CARLSON)

737

Viscosity:

Ciliary activity and the origin of metachrony in *Paramecium*: effects of increased (MACHEMER)

239

Visual processing:

The landing response and, in the milkweed bug, *Oncopeltus fasciatus* (COGGSHALL)

401

***Viviporus connectus* (Millet) (Gastropoda: Prosobranchia):**

The ionic basis of axonal conduction in the central nervous system of (SATTELLE)

41

Water exchange:

In the mantle of a terrestrial snail during periods of reduced evaporative loss (MACHIN)

103

Waterproofing function:

On the suggestion that the secretion from the metathoracic scent glands of a surface-dwelling aquatic insect, *Gerris najas* (de Geer) (Heteroptera; Gerridae) has a (STADDON)

765

Water relations:

In an insect, *Thermobia domestica*

— II. Relationships between water content, water uptake from subsaturated atmospheres and water loss (OKASHA)

285

***Xenocara occidentalis*:**

On the interactions between suctorial adhesion, gill ventilation and opercular spine erections in (GRADWELL)

All communications should be addressed to the Editors,

The Journal of Experimental Biology, Zoological Laboratory,
Downing Street, Cambridge CB2 3EJ, England

MANUSCRIPTS

Authors are requested to present their work in as *concise* a form as possible. MSS. should be *typewritten* (double spacing) on one side only of the paper, and the pages numbered. *Tables* and *Legends* should be on separate sheets from the rest of the MS. and should be numbered. The place where they are to be inserted in the text should be indicated in the margin of the MS. *Bibliography* should be given under the heading of 'References' and in the following form: Surname of authors (in alphabetical order), initials, date of publication, title of paper, title of journal (abbreviated according to the *World List of Scientific Periodicals*), volume and pages of references (first and last). In the text a reference should be quoted by the author's name and date (in brackets), and not by the numerical order of the paper in the list of references. Every paper must contain a summary of the chief results of the enquiry.

ILLUSTRATIONS

(i) *Line blocks*. These should be used whenever possible. Illustrations should be pen drawings in Indian ink (*jet black and waterproof*) on smooth white Bristol board, heavy drawing paper or good quality tracing paper. Drawings must not be folded or creased in any way. Where a drawing is labelled, *the label lines should be drawn in black but the lettering should be put in lightly in soft pencil*. Where considerable reduction is required it is essential that the drawings be of such a character as to bear such reduction. *All brush work, tinting or pencil shading is to be avoided*. Mechanical stipple, if too fine, may not stand reduction in size when the block is made.

Charts and curves can often be drawn to best advantage on *graph paper ruled in pale blue*. The blue lines, while ensuring accuracy, are easily eliminated by the printer, only the blackened lines that are desired remaining.

(ii) *Text half-tone blocks*. These are suitable for illustrations involving brushwork, or in which the depth of shading is an essential feature. They can be used for such things as oscillograph records and some photographs can be produced in this way, a good glossy bromide print being required. Illustrations should be gummed on *white card*, grouped and numbered as they are to appear in print. All lettering should be drawn in position on a covering sheet of transparent paper.

(iii) *Plates*. Plates should be used only for illustrations, such as photomicrographs, in which the most accurate reproduction of fine detail is called for. Plates are expensive and the Editors may require an author to defray the cost of plates which in their opinion are not essential. The photographs making up the plate should be gummed on *white card*, grouped and numbered, as they are to appear in print. Exclusive of margin, the plate figures should not cover, when reduced an area greater than $7\frac{1}{2}$ in. in length \times 5 in. in width when ready for reproduction as a single plate, or $7\frac{1}{2}$ in. \times $11\frac{1}{2}$ in., in the case of double plates. All lettering should be shown in position on a covering sheet of transparent paper. Authors are asked not to submit sheets of illustrations which are more than foolscap size; or, if this cannot be avoided, to include photographic reductions for the convenience of referees.

ABSTRACTS

Authors should submit with their MSS. *five copies* (typewritten, double spacing) of an abstract suitable for biological abstracting journals. The abstract will not appear in *The Journal of Experimental Biology* but will be scrutinized by the Editors before being passed for publication. The text of the summary may serve as an abstract provided that it conforms to the following requirements. The abstract should outline as briefly as possible the results and the definitive conclusions of the work. Details of methods are generally not required. A paper of average length should be abstracted in about 100 words and the abstract should never exceed 3% of the original. Each copy of the abstract should bear the title of the paper, the name(s) of the author(s) and an address to which applications for offprints may be sent.

PROOFSHEETS AND OFFPRINTS

Authors will receive one set of slip proofs for correction and return to the Editors. A page proof will also be sent if the slip proof is marked by the author 'Revise'. An allowance of 50p per sheet of sixteen pages will be made for alteration apart from printer's errors. Authors may be charged for any excess over this average. Authors will receive 50 copies of their papers free; additional copies may be purchased and should be ordered when the proofs are returned to the Editors.

Enquiries about the reproduction of material from *The Journal of Experimental Biology* should be sent to:

DR D. W. T. CROMPTON,
Secretary, Company of Biologists Limited, The Molteno Institute,
Downing Street, Cambridge CB2 3EE, U.K.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

THE SOCIETY FOR EXPERIMENTAL BIOLOGY

The Society holds Conferences four times a year at which the results of experimental investigations are presented and discussed. Enquiries about membership of the Society should be addressed to one of the Secretaries:

Zoological Secretary
Dr A. P. M. LOCKWOOD
Department of Oceanography,
The University,
Southampton, SO9 5NH

Botanical Secretary
Dr N. SUNDERLAND,
John Innes Institute,
Colney Lane,
Norwich, NOR 70F
