

## INDEX OF AUTHORS

- Bennet, S., McConnell, T. and Trubatch, S. L.** Quantitative analysis of the speed of snakes as a function of peg spacing 161
- Bergfors, Tommy.** See HANSSON MILD, Løv-TRUP and BERGFORS
- Blaney, W. M.** Electrophysiological responses of the terminal sensilla of the maxillary palps of *Locusta migratoria* (L.) to some electrolytes and non-electrolytes 275
- Bowerman, R. F. and Larimer, J. L.** Command fibres in the circumoesophageal connectives of crayfish
- I. Tonic fibres 95
  - II. Phasic fibres 119
- Cameron, James N. and Polhemus, John A.** Theory of CO<sub>2</sub> exchange in trout gills 183
- Camhi, Jeffrey M. and Hinkle, Maija.** Response modification by the central flight oscillator of locusts 477
- Cavagna, Giovanni A.** See DUBOIS, CAVAGNA and FOX
- Chapman, Grace Y.** See MURDOCK and CHAPMAN
- Chase, Ronald.** The electrophysiology of photoreceptors in the nudibranch mollusc, *Tritonia diomedea* 707
- Clements, A. N. and May, Terry E.** Studies on locust neuromuscular physiology in relation to glutamic acid 673
- Coakley, C. J. and Holwill, M. E. J.** Effects of pressure and temperature changes on the flagellar movement of *Crithidia oncopelti* 605
- Crabtree, Robert L. and Page, Charles T.** Oxygen-sensitive elements in the book gills of *Limulus polyphemus* 631
- Davis, Minh-Tam Bui.** Changes in critical temperature during nymphal and adult development in the rabbit tick, *Haemaphysalis leporispalustris* (Acari: Ixodidae: Ixodidae) 85
- Drewes, C. D. and Pax, R. A.** Neuromuscular physiology of the longitudinal muscle of the earthworm, *Lumbricus terrestris*
- I. Effects of different physiological salines 445
  - II. Patterns of innervation 453
  - III. Mapping of motor fields 469
- Dubois, Arthur B., Cavagna, Giovanni A. and Fox, Richard S.** Pressure distribution on the body surface of swimming fish 581
- Eddy, F. B.** Blood gases of the tench (*Tinca tinca*) in well-aerated and oxygen-deficient waters 71
- Emilio, M. G.** Gas exchanges and blood gas concentrations in the frog *Rana ridibunda* 901
- Emilio, M. G. and Shelton, G.** Gas exchange and its effect on blood gas concentrations in the amphibian, *Xenopus laevis* 567
- Farquarson, Patricia Anne.** A study of the Malpighian tubules of the pill millipede, *Glomeris marginata* (Villers)
- I. The isolation of the tubules in a Ringer solution 13
  - II. The effect of variations in osmotic pressure and sodium and potassium concentrations on fluid production 29
  - III. The permeability characteristics of the tubule 41
- Fleming, Warren R., Nichols, James and Potts, W. T. W.** The effect of low-calcium sea water and actinomycin-D on the sodium metabolism of *Fundulus kansae* 267
- Fox, Richard S.** See DUBOIS, CAVAGNA and FOX
- Freeman, R. F. H.** See SHUTTLEWORTH and FREEMAN
- Gardiner, B. O. C.** See MADDRELL and GARDINER
- Gillary, Howard L.** Light-evoked electrical potentials from the eye and optic nerve of *Strombus*: response waveform and spectral sensitivity 383
- Hansson Mild, Kjell, Løvtrup, Søren and Bergfors, Tommy.** On the mechanical properties of the vitelline membrane of the frog egg 807
- Hendler, P.** See SHIMOZAWA, SUGA, HENDLER and SCHUETZE
- Hinkle, Maija.** See CAMHI and MAIJA
- Holbertson, D. V.** Attachment of *Giardia* - A hydrodynamic model based on flagellar activity 207
- Holwill, M. E. J.** See OAKLEY and HOLWILL
- Holwill, M. E. J. and McGregor, J. L.** Micro-manipulation of the flagellum of *Crithidia oncopelti*. I. Mechanical effects 437
- Koopowitz, Harold and Stone, George.** Neuronal modulation of photoreceptor activity in the bee moth *Galleria mellonella* 795
- Kristensen, K. and Skadhauge, E.** Flow along the gut and intestinal absorption of salt and water in euryhaline teleosts: a theoretical analysis 557
- Larimer, J. L.** See BOWERMAN and LARIMER
- Leader, John P.** See NICOLSON and LEADER
- Lewis, D. B.** The physiology of the Tettigoniid ear
- I. The implications of the anatomy of the ear to its function in sound reception 821
  - II. The response characteristics of the ear to differential inputs: lesion and blocking experiments 839
  - III. The response characteristics of the intact ear and some biophysical considerations 853
  - IV. A new hypothesis for acoustic orientation behaviour 861

- Lockwood, A. P. M.** See RIEGEL, LOCKWOOD, NORFOLK, BULLEID and TAYLOR
- Lotan, R.** See SKADHAUGE and LOTAN
- Løvtrup, Søren.** See HANSSON MILD, LØVTRUP and BERGFORS
- McConnell, T.** See BENNET, MCCONNELL and TRUBATCH
- McFarlane, I. D.** Excitatory and inhibitory control of inherent contractions in the sea anemone *Calliactis parasitica* 397
- McGregor, J. L.** See HOLWILL and MCGREGOR
- McMahon, B. R., Burggren, W. W. and Wilkens, J. L.** Respiratory responses to long-term hypoxic stress in the crayfish *Orconectes virilis* 195
- McVean, Alistair.** The nervous control of autonomy in *Carcinus maenas* 423
- Maddrell, S. H. P. and Gardiner, B. O. C.** The passive permeability of insect Malpighian tubules to organic solutes 641
- May, Terry E.** See CLEMENTS and MAY
- Millard, R. W. and Johansen, K.** Ventricular outflow dynamics in the lizard, *Varanus niloticus*: responses to hypoxia, hypercarbia and diving 871
- Murdock, Larry L. and Chapman, Grace Y.** L-Glutamate in arthropod blood plasma: physiological implications 783
- Nicols, James.** See FLEMING, NICHOLS and POTTS
- Nicolson, Susan W. and Leader, John P.** The permeability to water of the cuticle of the larva of *Opifex fuscus* (Hutton) (Diptera, Culcidae) 593
- Norfolk, J. R. W.** See RIEGEL, LOCKWOOD, NORFOLK, BULLEID and TAYLOR
- O'Shea, M., Rowell, C. H. F. and Williams, J. L. D.** The anatomy of a locust visual interneurone; the descending contralateral movement detector 1
- Page, Charles H.** See CRABTREE and PAGE
- Pax, R. A.** See DREWES and PAX
- Popper, Arthur N.** The response of the swim bladder of the goldfish (*Carassius auratus*) to acoustic stimuli 295
- Potts, W. T. W.** See FLEMING, NICHOLS and POTTS
- Priede, Imants G.** The effect of swimming activity and section of the vagus nerve on heart rate in rainbow trout 305
- Riddiford, Lynn M.** See TRUMAN and RIDDIFORD
- Riegel, J. A., Lockwood, A. P. M., Norfolk, J. R. W., Bulleid, N. C. and Taylor, P. A.** Urinary bladder volume and the reabsorption of water from the urine of crabs 167
- Rosser, B. L.** A study of the afferent pathways of the dragonfly lateral ocellus from extracellularly recorded spike discharges 135
- Rowell, C. H. F.** See O'SHEA, ROWELL and WILLIAMS
- Sand, Olav.** Directional sensitivity of microphonic potentials from the perch ear 881
- Sattelle, D. B.** Electrophysiology of the giant nerve cell bodies of *Limnaea stagnalis* (L.) (Gastropoda, Pulmonata) 653
- Schuetze, S.** See SHIMOZAWA, SUGA, HENDLER and SCHUETZE
- Shelton, G.** See EMILIO and SHELTON
- Shepherd, Peter.** Control of head movement in the locust, *Schistocerca gregaria* 735
- Shimozawa, T., Suga, N., Hendler, P. and Schuetze, S.** Directional sensitivity of echolocation system in bats producing frequency-modulated signals 53
- Shuttleworth, T. J. and Freeman, R. F. H.** Net fluxes of water in the isolated gills of *Anguilla dieffenbachii* 769
- Skaer, Helen Le B.** The water balance of a serpulid polychaete, *Mercierella emigmatic* (Fauvel)
- I. Osmotic concentration and volume regulation 321
  - II. Ion concentration 331
  - III. Accessibility and the extracellular compartment and related studies 339
  - IV. The excitability of the longitudinal muscle cells 351
- Skadhauge, E.** See KRISTENSEN and SKADHAUGE, E.
- Skadhauge, Erik.** Coupling of transmural flows of NaCl and water in the intestine of the eel (*Anguilla anguilla*) 535
- Skadhauge, E. and Lotan, R.** Drinking rate and oxygen consumption in the euryhaline teleost *Aphanius dispar* in waters of high salinity 547
- Spencer, H. J.** Analysis of the electrophysiological responses of the trochanteral hair receptors of the cockroach 223
- Stobbs, R. H.** Electrical potential differences and ionic transport in the larva of the mosquito *Aedes aegypti* (L.) 493
- Stone, George.** See KOPOWITZ and STONE
- Suga, N.** See SHIMOZAWA, SUGA, HENDLER and SCHUETZE
- Trubatch, S. L.** See BENNET, MCCONNELL and TRUBATCH
- Truman, James W. and Riddiford, Lynn M.** Physiology of insect rhythms. III. The temporal organization of the endocrine events underlying pupation of the tobacco hornworm 371
- Williams, J. L. D.** See O'SHEA, ROWELL and WILLIAMS
- Wood, Chris M.** A critical examination of the physical and adrenergic factors affecting blood flow through the gills of the rainbow trout 241

## INDEX OF SUBJECTS

- Acoustic stimuli:**  
The response of the swim bladder of the goldfish (*Carassius auratus*) to (POPPER) 295
- Action potentials:**  
The initiation and conduction of, in the optic nerve of *Tritonia* (CHASE) 721
- Aedes aegypti* (L.):**  
Electrical potential differences and ionic transport in the larva of the mosquito (STROBBART) 493
- Anguilla anguilla:***  
Coupling of transmural flows of NaCl and water in the intestine of the eel (SKADHAUGE) 535
- Anguilla dieffenbachii:***  
Net fluxes of water in the isolated gills of (SHUTTLEWORTH and FREEMAN) 769
- Aphanius dispar:***  
Drinking rate and oxygen consumption in the euryhaline teleost in waters of high salinity (SKADHAUGE and LOTAN) 547
- Autonomy:**  
The nervous control of, in *Carcinus maenas* (MCVEAN) 423
- Bats:**  
Directional sensitivity of echolocation systems in, producing frequency-modulated signals (SHIMOZAWA, SUGA, HENDLER and SCHUETZ) 53
- Bee moth:**  
See *Galleria mellonella*
- Blood flow:**  
A critical examination of the physical and adrenergic factors affecting the, through the gills of the rainbow trout (WOOD) 241
- Blood gas concentrations:**  
Gas exchange and its effect on, in the amphibian *Xenopus laevis* (EMÍLIO and SHELTON) 567  
— Gas exchanges and, in the frog *Rana ridibunda* (EMÍLIO) 901
- Blood gases:**  
Of the tench (*Tinca tinca*) in well-aerated and oxygen-deficient waters (EDDY) 71
- Blood plasma:**  
L-Glutamate in arthropod: physiological implications (MURDOCK and CHAPMAN) 783
- Body surface:**  
Pressure distribution on the, of swimming fish (DUBOIS, CAVAGNA and FOX) 581
- Book gills:**  
Oxygen-sensitive elements in the, of *Limulus polyphemus* (CRABTREE and PAGE) 631
- Calliactis parasitica:***  
Excitatory and inhibitory control of inherent contractions in the sea anemone (MCFARLANE) 397
- Carassius auratus:***  
The response of the swim bladder of the goldfish to acoustic stimuli (POPPER) 295
- Carcinus maenas:***  
The nervous control of autonomy in (MCVEAN) 423
- Cockroach:**  
Analysis of the electrophysiological responses of the trochanteral hair receptors of the (SPENCER) 223
- Contractions:**  
Excitatory and inhibitory control of inherent, in the sea anemone *Calliactis parasitica* (MCFARLANE) 397
- CO<sub>2</sub> exchange:**  
Theory of, in trout gills (CAMERON and POLHEMUS) 183
- Command fibres:**  
In the circumoesophageal connectives of the crayfish  
— I. Tonic fibres (BOWERMAN and LARIMER) 95  
— II. Phasic fibres (BOWERMAN and LARIMER) 119
- Crabs:**  
Urinary bladder volume and the reabsorption of water from the urine of (RIEGLER, LOCKWOOD, NORFOLK, BULLEID and TAYLOR) 167
- Crayfish:**  
Command fibres in the circumoesophageal connectives of  
— I. Tonic fibres (BOWERMAN and LARIMER) 95  
— II. Phasic fibres (BOWERMAN and LARIMER) 119  
— Respiratory responses to long-term hypoxic stress in *Orconectes virilis* (McMAHON, BURRGREN and WILKENS) 195
- Crithidia oncopelti:***  
Effects of pressure and temperature changes on the flagellar movement of (COAKLEY and HOLWILL) 605  
— Micromanipulation of the flagellum of. I. Mechanical effects (HOLWILL and MCGREGOR) 437
- Critical temperature:**  
Changes in, during nymphal and adult development in the rabbit tick, *Haemaphysalis leporispalustris* (Acari: Ixodidae: Ixodidae) (DAVIS) 85
- Cuticle:**  
The permeability to water of the, of the larva of *Opifex fuscus* (Hutton) (Diptera, Culicidae) (NICOLSON and LEADER) 593
- Diving:**  
Ventricular outflow dynamics in the lizard, *Varanus niloticus*: response to hypoxia, hypercarbia and (MILLARD and JOHANSEN) 871

**Dragonfly:**

A study of the afferent pathways of the lateral ocellus of the, from extracellularly recorded spike discharges (ROSSER) 135

**Drinking rate:**

And oxygen consumption in the euryhaline teleost *Aphanius dispar* in water of high salinity (SKADHAUGE and LOTAN) 547

**Ear:**

Directional sensitivity of microphonic potentials from the perch (SAND) 881

**Earthworm:**

See *Lumbricus terrestris*

**Echolocation system:**

Directional sensitivity of, in bats producing frequency-modulated signals (SHIMOZAWA, SUGA, HENDLER and SCHURTZE) 53

**Eel:**

See *Anguilla anguilla*

**Egg:**

On the mechanical properties of the vitelline membranes of the, of the frog (HANSSON MILD, LØVTRUP and BERGFORS) 807

**Electrolytes and non-electrolytes:**

Electrophysiological responses of the terminal sensilla on the maxillary palps of *Locusta migratoria* (L.) to some (BLANEY) 275

**Euryhaline teleosts:**

Drinking rate and oxygen consumption in *Aphanius dispar* in waters of high salinity (SKADHAUGE and LOTAN) 547

— Flow along the gut and intestinal absorption of salt and water in: a theoretical analysis (KRISTENSEN and SKADHAUGE) 557

**Eye:**

Light-evoked electrical potentials from the, and optic nerve of *Strombus*: response waveform and spectral sensitivity (GILLARY) 383

**Flagellar activity:**

Attachment of *Giardia* - A hydrodynamic model based on (HOLBERTON) 207

**Flagellar movement:**

Effects of pressure and temperature changes on the, of *Crithidia oncopelti* (COAKLEY and HOLWILL) 605

**Flagellum:**

Micromanipulation of the, of *Crithidia oncopelti*. I. Mechanical effects (HOLWILL and MCGREGOR) 437

**Flight oscillator:**

Response modification by the central, of locusts (CAMHI and HINKLE) 477

**Fluxes of water:**

Net, in the isolated gills of *Anguilla dieffenbachii* (SHUTTLEWORTH and FREEMAN) 769

**Frog:**

On the mechanical properties of the vitelline membrane of the egg of the (HANSSON MILD, LØVTRUP and BERGFORS) 807

— See also *Rana ridibunda*

***Fundulus kansae*:**

The effect of low-calcium sea water and actinomycin-D on the sodium metabolism of (FLEMING, NICHOLS and POTTS) 267

***Galleria mellonella*:**

Neuronal modulation of photoreceptor activity in the bee moth (KOOPOWITZ and STONE) 795

**Gas exchanges:**

And blood gas concentrations in the frog *Rana ridibunda* (EMILIO) 901

**Giant nerve cell bodies:**

Electrophysiology of the, of *Limnaea stagnalis* (L.) (Gastropoda: Pulmonata) (SATTTELLE) 653

***Giardia*:**

Attachment of. A hydrodynamic model based on flagellar activity (HOLBERTON) 207

**Gills:**

Net fluxes of water in the isolated, of *Anguilla dieffenbachii* (SHUTTLEWORTH and FREEMAN) 769

***Glomeris marginata*:**

A study of the Malpighian tubules of the pill millipede

— I. The isolation of the tubules in a Ringer solution (FARQUARSON) 13

— II. The effect of variations in osmotic pressure and sodium and potassium concentrations on fluid production (FARQUARSON) 29

— III. The permeability characteristics of the tubule (FARQUARSON) 41

**L-Glutamate:**

In arthropod blood plasma: physiological implications (MURDOCK and CHAPMAN) 783

**Glutamic acid:**

Studies on locust neuromuscular physiology in relation to (CLEMENTS and MAY) 673

**Goldfish:** See *Carassius auratus*

***Haemaphysalis leporispalustris*:**

Changes in critical temperature during nymphal and adult development in the rabbit tick (Acari: Ixodidae: Ixodidae) (DAVIS) 85

**Head movement:**

Control of in the locust, *Schistocerca gregaria* (SHEPHEARD) 735

**Heart rate:**

The effect of swimming activity and section of the vagus nerves on, in rainbow trout (PRIEDE) 305

**Hypercarbia:**

Ventricular outflow dynamics in the lizard, *Varanus niloticus*: responses to hypoxia, diving and (MILLARD and JOHANSEN) 871

**Hypoxia:**

Ventricular outflow dynamics in the lizard, *Varanus niloticus*: responses to hypercarbia, diving and (MILLARD and JOHANSEN) 871

**Hypoxic stress:**

Respiratory responses to long-term, in the crayfish *Orconectes virilis* (MCMAHON, BURGREN and WILKENS) 195

**Insect rhythms:**

Physiology of. III. The temporal organization of the endocrine events underlying pupation of the tobacco hornworm (TRUMAN) 371

**Intestinal absorption:**

Flow along the gut and, of salt and water in euryhaline teleosts: a theoretical analysis (KRISTENSEN and SKADHAUGE) 557

**Intestine:**

Coupling of transmural flows of NaCl and water in the, of the eel (*Anguilla anguilla*) (SKADHAUGE) 535

**Ionic transport:**

Electrical potential differences and, in the larva of the mosquito *Aedes aegypti* (L.) (STOBBART) 493

***Limnaea stagnalis* (L.) (Gastropoda: Pulmonata):**

Electrophysiology of the giant nerve cell bodies of (SATTELLE) 653

***Limulus polyphemus*:**

Oxygen-sensitive elements in the book gills of (CRABTREE and PAGE) 631

**Lizard:**

See *Varanus niloticus*

**Locust:**

The anatomy of a visual interneurone in; the descending contralateral movement detector (O'SHEA, ROWELL and WILLIAMS) 1

— Response modification by the central flight oscillator of locusts (CAMHI and HINKLE) 477

— Studies on, neuromuscular physiology in relation to glutamic acid (CLEMENTS and MAY) 673

— See also *Locusta migratoria* and *Schistocerca gregaria*

***Locusta migratoria* (L.):**

Electrophysiological responses of the terminal sensilla on the maxillary palps of, to some electrolytes and non-electrolytes (BLANEY) 275

**Longitudinal muscle:**

See *Lumbricus terrestris*

***Lumbricus terrestris*:**

Neuromuscular physiology of the longitudinal muscle of the earthworm

— I. Effects of different physiological salines (DREWES and PAX) 445

— II. Patterns of innervation (DREWES and PAX) 453

— III. Mapping of motor fields (DREWES and PAX) 469

**Malpighian tubules:**

The passive permeability of insect, to organic solutes (MADDRELL and GARDINER) 641

— A study of the, in the pill millipede, *Glomeris marginata* (Villers)

— I. The isolation of the tubules in a Ringer solution (FARQUARSON) 13

— II. The effect of variations in osmotic pressure and sodium and potassium concentrations on fluid production (FARQUARSON) 29

— III. The permeability characteristics of the tubule (FARQUARSON) 41

***Mercierella enigmatica* (Fauvel):**

The water balance of the serpulid polychaete

— I. Osmotic concentration and volume regulation (SKAER) 321

— II. Ion concentration (SKAER) 331

— III. Accessibility of the extracellular compartment and related studies (SKAER) 339

— IV. The excitability of the longitudinal muscle cells (SKAER) 351

**Mosquito:**

See *Aedes aegypti* (L.)

**Neuronal modulation:**

Of photoreceptor activity in the bee moth *Galleria mellonella* (KOOPOWITZ and STONE) 795

**Ocellus:**

A study of the afferent pathways of the lateral, in the dragonfly, from extracellularly recorded spike discharges (ROSSER) 135

***Opifex fuscus* (Hutton) (Diptera, Culicidae):**

The permeability to water of the cuticle of the larva of (NICOLSON and LEADER) 593

**Optic nerve:**

Light-evoked electrical potentials from the eye and, of *Strombus*: response waveform and spectral sensitivity (GILLARY) 383

— The initiation and conduction of action potentials in the, of *Tritonia* (CHASE) 721

***Orconectes virilis*:**

See Crayfish

**Oxygen consumption:**

Drinking rate and, in the euryhaline teleost *Aphanius dispar* in waters of high salinity (SKADHAUGE and LOTANA) 547

**Peg spacing:**

Quantitative analysis of the speed of snakes as a function of (BENNET, MCCONNELL and TRUBATCH) 161

**Perch:**

Directional sensitivity of microphonic potentials from the ear of the (SAND) 881

**Permeability to water:**

The, of the cuticle of the larva of *Opifex fuscus* (Hutton) (Diptera, Culicidae) (NICOLSON and LEADER) 593

**Photoreceptor activity:**

Neuronal modulation of, in the bee moth *Galleria mellonella* (KOOPOWITZ and STONE) 795

**Photoreceptors:**

The electrophysiology of, in the nudibranch mollusc, *Tritonia diomedea* (CHASE) 707

**Pill millipede:**

See *Glomeris marginata*

**Potential differences:**

Electrical, and ionic transport in the larva of the mosquito *Aedes aegypti* (L.) (STOBBART) 493

- Pressure distribution:**  
On the body surface of swimming fish (DUBOIS, CAVAGNA and FOX) 581
- Rabbit tick:**  
*See Haemaphysalis leporispalustris*
- Rainbow trout:**  
A critical examination of the physical and adrenergic factors affecting blood flow through the gills of the (WOOD) 241  
— The effect of swimming activity and section of the vagus nerves on heart rate in (PRIEDE) 305
- Rana ridibunda:**  
Gas exchanges and blood gas concentrations in the frog (EMILIO) 901
- Reabsorption of water from urine:**  
Urinary bladder volume and the, of crabs (RIEGL, LOCKWOOD, NORFOLK, BULLEID and TAYLOR) 167
- Respiratory responses:**  
To long-term hypoxic stress in the crayfish *Orconectes virilis* (MCMAHON, BURRGREN and WILKENS) 195
- Schistocerca gregaria:**  
Control of head movement in the locust (SHEPHEARD) 735
- Sea anemone:**  
*See Calliactis parasitica*
- Snakes:**  
Quantitative analysis of the speed of, as a function of peg spacing (BENNET, MCCONNELL and TRUBATCH) 161
- Sodium metabolism:**  
The effect of low-calcium sea water and actinomycin-D on the, of *Fundulus kansae* (FLEMING, NICHOLS and POTTS) 267
- Speed of snakes:**  
Quantitative analysis of, as a function of peg spacing (BENNET, MCCONNELL and TRUBATCH) 161
- Strombus:**  
Light-evoked electrical potentials from the eye and optic nerve of: response waveform and spectral sensitivity (GILLARY) 383
- Swim bladder:**  
The response of the, of the goldfish (*Carassius auratus*) to acoustic stimuli (POPPER) 295
- Swimming fish:**  
Pressure distribution on the body surface of the (DUBOIS, CAVAGNA and FOX) 581
- Tettigoniid ear:**  
The physiology of the  
— I. The implications of the anatomy of the ear to its function in sound reception (LEWIS) 821  
— II. The response characteristics of the ear to differential inputs: Lesion and blocking experiments (LEWIS) 839  
— III. The response characteristics of the intact ear and some biophysical considerations (LEWIS) 853
- IV. A new hypothesis for acoustic orientation behaviour (LEWIS) 861
- Tinca tinca:**  
Blood gases in the tench in well-aerated and oxygen-deficient waters (EDDY) 71
- Tobacco hornworm:**  
Physiology of insect rhythms. III. The temporal organization of the endocrine events underlying pupation of the (TRUMAN and RIDDIFORD) 371
- Transmural flows:**  
Coupling of, of NaCl and water in the intestine of the eel (*Anguilla anguilla*) (SKADHAUGE) 535
- Tritonia:**  
The initiation and conduction of action potentials in the optic nerve of (CHASE) 721
- Tritonia diomedea:**  
The electrophysiology of photoreceptors in the nudibranch mollusc (CHASE) 707
- Trochanteral hair receptors:**  
Analysis of the electrophysiological responses of the, of the cockroach (SPENCER) 223
- Trout:**  
Theory of CO<sub>2</sub> exchange in the gills of (CAMERON and POLHEMUS) 183
- Urinary bladder volume:**  
And the reabsorption of water from the urine of crabs (RIEGL, LOCKWOOD, NORFOLK, BULLEID and TAYLOR) 167
- Varanus niloticus:**  
Ventricular outflow dynamics in the lizard: responses to hypoxia, hypercarbia and diving (MILLARD and JOHANSEN) 871
- Ventricular outflow dynamics:**  
*See Varanus niloticus*
- Visual interneurone:**  
The anatomy of, in the locust; the descending contralateral movement detector (O'SHEA, ROWELL and WILLIAMS) 1
- Vitelline membrane:**  
On the mechanical properties of the, of the frog egg (HANSSON MILD, LØVTRUP and BERGFORS) 807
- Water balance:**  
The, of a serpulid polychaete, *Mercierella enigmatica*  
— I. Osmotic concentration and volume regulation (SKAER) 321  
— II. Ion concentration (SKAER) 331  
— III. Accessibility of the extracellular compartment and related studies (SKAER) 339  
— IV. The excitability of the longitudinal muscle cells (SKAER) 351
- Xenopus laevis:**  
Gas exchange and its effect on blood gas concentrations in the amphibian (EMILIO and SHELTON) 567

All communications should be addressed to the Editors,

The Journal of Experimental Biology, Zoological Laboratory,  
Downing Street, Cambridge CB2 3EJ, England

#### MANUSCRIPTS

Authors are requested to present their work in as *concise* a form as possible. MSS. should be *typewritten* (double spacing) on one side only of the paper, and the pages numbered. *Tables* and *Legends* should be on separate sheets from the rest of the MS. and should be numbered. The place where they are to be inserted in the text should be indicated in the margin of the MS. *Bibliography* should be given under the heading of 'References' and in the following form: Surname of authors (in alphabetical order), initials, date of publication, title of paper, title of journal (abbreviated according to the *World List of Scientific Periodicals*), volume and pages of references (first and last). In the text a reference should be quoted by the author's name and date (in brackets), and not by the numerical order of the paper in the list of references. Every paper must contain a summary of the chief results of the enquiry.

#### ILLUSTRATIONS

(i) *Line blocks*. These should be used whenever possible. Illustrations should be pen drawings in Indian ink (*jet black and waterproof*) on smooth white Bristol board, heavy drawing paper or good quality tracing paper. Drawings must not be folded or creased in any way. Where a drawing is labelled, *the label lines should be drawn in black but the lettering should be put in lightly in soft pencil*. Where considerable reduction is required it is essential that the drawings be of such a character as to bear such reduction. *All brush work, tinting or pencil shading is to be avoided*. Mechanical stipple, if too fine, may not stand reduction in size when the block is made.

Charts and curves can often be drawn to best advantage on *graph paper ruled in pale blue*. The blue lines, while ensuring accuracy, are easily eliminated by the printer, only the blackened lines that are desired remaining.

(ii) *Text half-tone blocks*. These are suitable for illustrations involving brushwork, or in which the depth of shading is an essential feature. They can be used for such things as oscillograph records and some photographs can be produced in this way, a good glossy bromide print being required. Illustrations should be gummed on *white card*, grouped and numbered as they are to appear in print. All lettering should be drawn in position on a covering sheet of transparent paper.

(iii) *Plates*. Plates should be used only for illustrations, such as photomicrographs, in which the most accurate reproduction of fine detail is called for. Plates are expensive and the Editors may require an author to defray the cost of plates which in their opinion are not essential. The photographs making up the plate should be gummed on *white card*, grouped and numbered, as they are to appear in print. Exclusive of margin, the plate figures should not cover, when reduced an area greater than  $7\frac{1}{2}$  in. in length  $\times$  5 in. in width when ready for reproduction as a single plate, or  $7\frac{1}{2}$  in.  $\times$   $11\frac{1}{2}$  in., in the case of double plates. All lettering should be shown in position on a covering sheet of transparent paper. Authors are asked not to submit sheets of illustrations which are more than foolscap size; or, if this cannot be avoided, to include photographic reductions for the convenience of referees.

#### ABSTRACTS

Authors should submit with their MSS. *five copies* (typewritten, double spacing) of an abstract suitable for biological abstracting journals. The abstract will not appear in *The Journal of Experimental Biology* but will be scrutinized by the Editors before being passed for publication. The text of the summary may serve as an abstract provided that it conforms to the following requirements. The abstract should outline as briefly as possible the results and the definitive conclusions of the work. Details of methods are generally not required. A paper of average length should be abstracted in about 100 words and the abstract should never exceed 3% of the original. Each copy of the abstract should bear the title of the paper, the name(s) of the author(s) and an address to which applications for offprints may be sent.

#### PROOFSHEETS AND OFFPRINTS

Authors will receive one set of slip proofs for correction and return to the Editors. A page proof will also be sent if the slip proof is marked by the author 'Revise'. An allowance of 50p per sheet of sixteen pages will be made for alteration apart from printer's errors. Authors may be charged for any excess over this average. Authors will receive 50 copies of their papers free; additional copies may be purchased and should be ordered when the proofs are returned to the Editors.

Enquiries about the reproduction of material from *The Journal of Experimental Biology* should be sent to:

DR R. J. SKAER,

Secretary, Company of Biologists Limited, Department of Medicine, University of Cambridge,  
Hills Road, Cambridge CB2 1QT

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

## THE SOCIETY FOR EXPERIMENTAL BIOLOGY

The Society holds Conferences four times a year at which the results of experimental investigations are presented and discussed. Enquiries about membership of the Society should be addressed to one of the Secretaries:

#### Zoological Secretary

Dr P. SPENCER DAVIES  
Department of Zoology,  
University of Glasgow,  
Glasgow G12 8QQ  
Tel. Glasgow (041) 339-8855 Ext. 7156

#### Botanical Secretary

Dr N. SUNDERLAND,  
John Innes Institute,  
Colney Lane,  
Norwich, NOR 70F  
Tel. Norwich (0603) 52571
