

INDEX OF AUTHORS

- Ahearn, Gregory A.** Kinetic characteristics of glycine transport by the isolated midgut of the marine shrimp, *Penaeus marginatus* 677
- Bernays, E. A. and Chapman, R. F.** The effect of haemolymph osmotic pressure on the meal size of nymphs of *Locusta migratoria* L. 473
- Birks, Carole.** See CRONLY-DILLON, CARDEN and BIRKS
- Bogan, Margaret B.** See EVANS, CARRIER and BOGAN
- Carden, David.** See CRONLY-DILLON, CARDEN and BIRKS
- Carrier, Jeffrey C.** See EVANS, CARRIER and BOGAN
- Chapman, C. J. and Johnstone, A. D. F.** Some auditory discrimination experiments on marine fish 521
- Chapman, R. F.** See BERNAYS and CHAPMAN
- Clegg, James S.** Interrelationships between water and metabolism in *Artemia salina* cysts: hydration-dehydration from the liquid and vapour phases 291
- Clements, A. N. and May, T. E.** Pharmacological studies on a locust neuromuscular preparation 421
- Cochran, Donald G.** See MULLINS and COCHRAN
- Cronly-Dillon, John, Carden, David and Birks, Carole.** The possible involvement of brain microtubules in memory fixation 443
- Crooks, R. Jane and Simkiss, K.** Respiratory acidosis and eggshell resorption by the chick embryo 197
- Crossley, A. C.** See EVANS and CROSSLEY
- Cyr, D.** See HOUSTON and CYR
- Delaney, R. G., Lahiri, S. and Fishman, A. P.** Aestivation of the African lungfish *Protopterus aethiopicus*: cardiovascular and respiratory functions 111
- Dorsett, D. A.** Neuronal homologies and the control of branchial tuft movements in two species of *Tritonia* 639
- Dorsett, D. A. and Willows, A. O. D.** Interactions between neurones mediating tuft withdrawal in *Tritonia hombergi* 655
- Ehrenfeld, J.** Aspects of ionic transport mechanisms in crayfish *Astacus leptodactylus* 57
- Ellenby, C.** Water uptake and hatching in the potato cyst nematode, *Heterodera rostochiensis*, and the root knot nematode, *Meloidogyne incognita* 773
- Endo, Paul T.** See TRUMAN and ENDO
- Evans, David H., Carrier, Jeffrey C. and Bogan, Margaret B.** The effect of external potassium ions on the electrical potential measured across the gills of the teleost, *Dormitator maculatus* 277
- Evans, P. D. and Crossley, A. C.** Free amino acids in the haematocytes and plasma of the larva of *Calliphora vicina* 463
- Fay, Richard R. and Popper, Arthur N.** Acoustic stimulation of the ear of the goldfish (*Carassius auratus*) 243
- Fishman, A. P.** See DELANEY, LAHIRI and FISHMAN
- Fraser, Peter J.** Interneurones in crab connectives (*Carcinus maenas* (L.)): giant fibres 593
- Interneurones in crab-connectives (*Carcinus maenas* (L.)): directional statocyst fibres 615
- Fyhn, H. J.** See PETERSEN, FYHN and JOHANSEN
- Gardiner, B. O. C.** See MADDRELL, GARDINER, PILCHER and REYNOLDS
- Gee, J. D.** See MADDRELL and GEE
- Gerhardt, H. Carl.** The significance of some spectral features in mating call recognition in the green treefrog (*Hyla cinerea*) 229
- Greenaway, Peter.** Total body calcium and haemolymph calcium concentrations in the crayfish *Austropotamobius pallipes* (Lereboullet) 19
- Calcium balance at the premoult stage of the freshwater crayfish *Austropotamobius pallipes* (Lereboullet) 27
- Calcium balance at the postmoult stage of the freshwater crayfish *Austropotamobius pallipes* (Lereboullet) 35
- Heinrich, Bernd.** See KAMMER and HEINRICH
- Hill, Robert B.** Effects of 5-hydroxytryptamine on action potentials and on contractile force in the ventricle of *Dolabella auricularia* 529
- Effects of acetylcholine on resting and action potentials, and on contractile force in the ventricle of *Dolabella auricularia* 629
- Hirano, Tetsuya.** Some factors regulating water intake by the eel, *Anguilla japonica* 737
- Houston, A. H. and Cyr, D.** Thermoacclimatory variation in the haemoglobin systems of goldfish (*Carassius auratus*) and rainbow trout (*Salmo gairdneri*) 455
- Hynsky, O. B., Spivachenko, D. L. and Shtirbu, E. J.** Efferent regulation of the abdominal stretch receptors of the crayfish 781
- Johansen, K.** See PETERSEN, FYHN and JOHANSEN
- Johnstone, A. D. F.** See CHAPMAN and JOHNSTONE

- Jones, M. D. R.** The effect of acoustic signals on the chirp rhythm in the bush cricket *Pholidoptera griseoptera* 345
- Kammer, Ann E. and Heinrich, Bernd.** Metabolic rates related to muscle activity in bumblebees 219
- Kendall, J.** See STEVENS, LAM and KENDALL
- Kennedy, J. S. and Ludlow, A. R.** Co-ordination of two kinds of flight activity in an aphid 173
- Kiceniuk, J. and Phillips, J. E.** Magnesium regulation in mosquito larvae (*Aedes campestris*) living in waters of high $MgSO_4$ content 749
- Krishnamoorthy, R. V. and Shakunthala, N.** Increased RBC count and pulmonary respiration in cold-adapted frogs 285
- Lahiri, S.** See DELANEY, LAHIRI and FISHMAN
- Lam, How Man.** See STEVENS, LAM and KENDALL
- Little, Colin.** A method for determining total carbon dioxide in nanolitre volumes of liquid 667
- Lombard, R. Eric and Straughan, Ian R.** Functional aspects of anuran middle ear structures 71
- Løvtrup, Søren.** See MILD and LØVTRUP
- Ludlow, A. R.** See KENNEDY and LUDLOW
- McFarlane, I. D.** Control of the pacemaker system of the nerve-net in the sea anemone *Calliactis parasitica* 129
- Maddrell, S. H. P.** See PHILLIPS and MADIRELL
- Maddrell, S. H. P., Gardiner, B. O. C., Pilcher, D. E. M. and Reynolds, S. E.** Active transport by insect Malpighian tubules of acidic dyes and of acylamides 357
- Maddrell, S. H. P. and Gee, J. D.** Potassium-induced release of the diuretic hormones of *Rhodnius prolixus* and *Glossina auteni*: Ca dependence, time course and localization of neurohaemal areas 155
- May, T. E.** See CLEMENTS and MAY
- Mild, Kjell Hansson and Løvtrup, Søren.** Diffusion and permeation of water in the frog egg: the effect of tension and tonicity 697
- Morris, R. W.** Function of the anuran conus arteriosus 503
- Mullins, Donald E.** Nitrogen metabolism in the American cockroach: an examination of whole body ammonium and other cations excreted in relation to water requirements 541
- Mullins, Donald E. and Cochran, Donald.** Nitrogen metabolism in the American cockroach: an examination of whole body and fat body regulation of cations in response to nitrogen balance 557
- Nijhout, H. Frederick and Williams, Carroll M.** Control of moulting and metamorphosis in the tobacco hornworm, *Manduca sexta* (L.): growth of the last-instar larva and the decision to pupate 481
- Control of moulting and metamorphosis in the tobacco hornworm, *Manduca sexta* (L.): cessation of juvenile hormone secretion as a trigger for pupation 493
- Normann, Tom Christian.** Calcium-dependence of neuro-secretion by exocytosis 401
- Packard, A. and Trueman, E. R.** Muscular activity of the mantle of *Sepia* and *Loligo* (Cephalopoda) during respiratory movements and jetting, and its physiological interpretation 411
- Petersen, J. A., Fyhn, H. J. and Johansen, K.** Eco-physiological studies of an intertidal crustacean, *Pollicipes polymerus* (Cirripedia, Lepodomorpha): aquatic and aerial respiration 309
- Phillips, J. E.** See KICENIUK and PHILLIPS
- Phillips, J. E. and Maddrell, S. H. P.** Active transport of magnesium by the Malpighian tubules of the larvae of the mosquito, *Aedes campestris* 761
- Pichon, Y. and Treherne, J. E.** The effects of sodium-transport inhibitors and cooling on membrane potentials in cockroach central nervous connectives 203
- Pilcher, D. E. M.** See MADIRELL, GARDINER, PILCHER and REYNOLDS
- Popper, Arthur N.** See FAY and POPPER
- Prusch, Robert D.** Active ion transport in the larval hindgut of *Sarcophaga bullata* (Diptera: Sarcophagidae) 95
- Rees, D.** The effect of metabolic inhibitors on the cockroach nerve-muscle synapse 331
- Reynolds, S. E.** See MADIRELL, GARDINER, PILCHER and REYNOLDS
- Reynolds, Stuart E.** Pharmacological induction of plasticization in the abdominal cuticle of *Rhodnius* 705
- Shakunthala, N.** See KRISHNAMOORTHY and SHAKUNTHALA
- Shimozawa, T.** See SUGA, SIMMONS and SHIMOZAWA
- Shtirbu, E. J.** See ILYNSKY, SPIVACHENKO and SHTIRBU
- Simkiss, K.** See CROOKS and SIMKISS
- Simmons, J. A.** See SUGA, SIMMONS and SHIMOZAWA
- Skadhauge, Erik.** Renal concentrating ability in selected West Australian birds 269
- Spivachenko, D. L.** See ILYNSKY, SPIVACHENKO and SHTIRBU
- Stevens, E. Don, Lam, How Man and Kendall, J.** Vascular anatomy of the counter-current heat exchanger of skipjack tuna, 145
- Stevenson, R. A.** See TURNER and STEVENSON
- Straughan, Ian R.** See LOMBARD and STRAUGHAN
- Suga, N., Simmons, J. A. and Shimozawa, T.** Neurophysiological studies on echolocation systems in awake bats producing CF-FM orientation sounds 371

Index of Authors

801

- Butcliffe, D. W.** Sodium regulation and adaptation to fresh water in the isopod genus *Asellus* 719
- Treherne, J. E.** *See* PICHON and TREHERNE
- Trueman, E. R.** *See* PACKARD and TRUEMAN
- Truman, James W. and Endo, Paul T.** Physiology of insect ecdysis: neural and hormonal factors involved in wing-spreading behaviour of moths 47
- Turner, B. D. and Stevenson, R. A.** An electrolytic, digital recording, multichannel micro-respirometer 321
- White, Peter J.** Experimental studies on the circulatory system of the late chick embryo 571
- Williams, Carroll M.** *See* NIJHOUT and WILLIAMS
- Willows, A. O. D.** *See* DORSETT and WILLOWS
- Young, J. Z.** George Bidder Lecture 1973. Brains and worlds: the cerebral cosmologies 5
- Young, Stephen.** Directional differences in the colour sensitivity of *Daphnia magna* 261

INDEX OF SUBJECTS

- Acetylcholine:**
Effects of, on resting and action potentials, and on contractile force in the ventricle of *Dolabella auricularia* (HILL) 629
- Acidic dyes:**
Active transport by insect Malpighian tubules of, and of acylamides (MADDRELL, GARDINER, PILCHER and REYNOLDS) 357
- Acidosis:**
Respiratory, and eggshell resorption by the chick embryo (CROOKS and SIMKISS) 197
- Acoustic signals:**
The effect of, on the chirp rhythm in the bush cricket (*Pholidoptera griseoptera*) (JONES) 345
- Acoustic stimulation:**
Of the ear of the goldfish (*Carassius auratus*) (FAY and POPPER) 243
- Action potentials:**
Effects of 5-hydroxytryptamine on, and on contractile force in the ventricle of *Dolabella auricularia* (HILL) 529
— Effects of acetylcholine on resting and, and on contractile force in the ventricle of *Dolabella auricularia* (HILL) 629
- Acylamides:**
Active transport by insect Malpighian tubules of acidic dyes and of (MADDRELL, GARDINER, PILCHER and REYNOLDS) 357
- Adaptation to fresh water:**
Sodium regulation and, in the isopod genus *Asellus* (SUTCLIFFE) 719
- Aedes campestris:**
Magnesium regulation in mosquito larvae, living in waters of high $MgSO_4$ content (KICENIUK and PHILLIPS) 749
— Active transport of magnesium by the Malpighian tubules of the larvae of the mosquito (PHILLIPS and MADDRELL) 761
- Aestivation:**
Of the African lungfish *Protopterus aethiopicus*: cardiovascular and respiratory functions (DELANEY, LAHIRI and FISHMAN) 111
- Amino acids:**
Free, in the haemocytes and plasma of the larva of *Calliphora vicina* (EVANS and CROSSLEY) 463
- Ammonium:**
Nitrogen metabolism in the American cockroach: an examination of whole body, and other cations excreted in relation to water requirements (MULLINS) 541
- Anguilla japonica:**
Some factors regulating water intake by the eel (HIRANO) 737
- Anuran middle ear:**
Functional aspects of, structures (LOMBARD and STRAUGHAN) 71
- Aphid:**
Co-ordination of two kinds of flight activity in an (KENNEDY and LUDLOW) 173
- Artemia salina:**
Interrelationships between water and metabolism in, cysts: hydration-dehydration from the liquid and vapour phases (CLEGG) 291
- Asellus:**
Sodium regulation and adaptation to fresh water in the isopod genus (SUTCLIFFE) 719
- Astacus dactylus:**
Aspects of ionic transport mechanisms in crayfish (EHRENFELD) 57
- Auditory discrimination:**
Some, experiments on marine fish (CHAPMAN and JOHNSTONE) 521
- Austropotamobius pallipes (Lereboullet)**
Total body calcium and haemolymph calcium concentrations in the crayfish (GREENAWAY) 19
— Calcium balance at the premoult stage of the freshwater crayfish (GREENAWAY) 27
— Calcium balance at the postmoult stage of the freshwater crayfish (GREENAWAY) 35
- Bats:**
Neurophysiological studies on echolocation systems in awake, producing CF-FM orientation sounds (SUGA, SIMMONS and SHIMIZAWA) 379
- Birds:**
Renal concentrating ability in selected West Australian (SKADHAUGE) 269
- Brain microtubules:**
The possible involvement of, in memory fixation (CRONLY-DILLON, CARDEN and BIRKS) 443
- Brains:**
And worlds: the cerebral cosmologies (YOUNG) 5
- Bumblebees:**
Metabolic rates related to muscle activity in (KAMMER and HEINRICH) 219
- Bush cricket:**
See Pholidoptera griseoptera
- Calcium:**
Total body, and haemolymph calcium concentrations in the crayfish *Austropotamobius pallipes* (Lereboullet) (GREENAWAY) 19
— Balance at the premoult stage of the freshwater crayfish *Austropotamobius pallipes* (Lereboullet) (GREENAWAY) 27
— Balance at the postmoult stage of the freshwater crayfish *Austropotamobius pallipes* (Lereboullet) (GREENAWAY) 35
— Dependence of neurosecretion by exocytosis (NORMANN) 49

- Iliaetis parasitica*:**
Control of the pacemaker system of the nerve-net in the sea anemone (MCFARLANE) 129
- Calliphora vicina*:**
Free amino acids in the haemocytes and plasma of the larva of (EVANS and CROSSLEY) 463
- Carassius auratus*:**
Acoustic stimulation of the ear of the goldfish (FAY and POPPER) 243
— Thermoacclimatory variation in the haemoglobin systems of goldfish and rainbow trout (*Salmo gairdneri*) (HOUSTON and CYR) 455
- Carbon dioxide:**
A method for determining total, in nanolitre volumes of liquid (LITTLE) 667
- Carcinus maenas* (L.):**
Interneurons in crab connectives: giant fibres (FRASER) 593
— Interneurons in crab connectives: directional statocyst fibres (FRASER) 615
- Cations:**
Nitrogen metabolism in the American cockroach: an examination of whole body ammonium and other, excreted in relation to water requirements (MULLINS) 541
— Nitrogen metabolism in the American cockroach: an examination of whole body on fat body regulation of, in response to nitrogen balance (MULLINS and COCHRAN) 557
- Cerebral cosmologies:**
Brains and worlds: the (YOUNG) 5
- Chick embryo:**
Respiratory acidosis and eggshell resorption by the (CROOKS and SIMKISS) 197
— Experimental studies on the circulatory system of the late (WHITE) 571
- Chirp rhythm:**
The effect of acoustic signals on the, in the bush cricket *Pholidoptera griseoptera* (JONES) 345
- Circulatory system:**
Experimental studies on the, of the late chick embryo (WHITE) 571
- Cockroach:**
The effects of sodium-transport inhibitors and cooling on membrane potentials in, central nervous connectives (PICHON and TREHERNE) 203
— The effect of metabolic inhibitors on the, nerve-muscle synapse (REES) 331
— Nitrogen metabolism in the American: an examination of whole body ammonium and other cations excreted in relation to water requirements (MULLINS) 541
— Nitrogen metabolism in the American: an examination of whole body and fat body regulation of cations in response to nitrogen balance (MULLINS and COCHRAN) 557
- Colour sensitivity:**
Directional differences in the, of *Daphnia magna* (YOUNG) 261
- Conus arteriosus:**
Function of the anuran (MORRIS) 503
- Crab:**
See *Carcinus maenas* (L.)
- Crayfish:**
Efferent regulation of the abdominal stretch receptors of the (ILYINSKY, SPIVACHENKO and SHTIRBU) 781
— See also *Astacus leptodactylus*, *Austropotamobius pallipes*
- Cuticle:**
Pharmacological induction of plasticization in the abdominal, of *Rhodnius* (REYNOLDS) 705
- Cysts:**
Interrelationships between water and metabolism in *Artemia salina*: hydration - dehydration from the liquid and vapour phases (CLEGG) 291
- Daphnia magna*:**
Directional differences in the colour sensitivity of (YOUNG) 261
- Directional statocyst fibres:**
Interneurons in crab connectives (*Carcinus maenas* (L.)) (FRASER) 615
- Diuretic hormones:**
Potassium-induced release of the, of *Rhodnius prolixus* and *Glossina austeni*: Ca dependence, time course and localization of neurohaemal areas (MADDELL and GEE) 155
- Dolabella auricularia*:**
Effects of 5-hydroxytryptamine on action potentials and on contractile force in the ventricle of (HILL) 529
— Effects of acetylcholine on resting and action potentials, and on contractile force in the ventricle of (HILL) 629
- Dormitator maculatus*:**
The effect of external potassium ions on the electrical potential measured across the gills of the teleost (EVANS, CARRIER and BOGAN) 277
- Ear:**
Acoustic stimulation of the, of the goldfish (*Carassius auratus*) (FAY and POPPER) 243
- Ecdysis:**
Physiology of insect: neural and hormonal factors involved in wing-spreading behaviour of moths (TRUMAN and ENDO) 47
- Echolocation systems:**
Neurophysiological studies on, in awake bats producing CF-FM orientation sounds (SUGA, SIMMONS and SHIMOZAWA) 379
- Eel:**
See *Anguilla japonica*
- Egg:**
Diffusion and permeation of water in the frog: the effect of tension and tonicity (MILD and LØVTRUP) 697
- Eggshell resorption:**
Respiratory acidosis and, by the chick embryo (CROOKS and SIMKISS) 197
- Exocytosis:**
Calcium-dependence of neurosecretion by (NORMANN) 401

Flight:

Co-ordination of two kinds of, activity in an aphid (KENNEDY and LUDLOW) 173

Frog:

Increased RBC count and pulmonary respiration in cold-adapted frogs (KRISHNA-MOORTHY and SHAKUNTHALA) 285

— Diffusion and permeation of water in the, egg: the effect of tension and tonicity (MILD and LØVTRUP) 697

Giant fibres:

Interneurons in crab connectives (*Carcinus maenas* (L.)) (FRASER) 593

Gills:

The effect of external potassium ions on the electrical potential across the, of the teleost, *Dormitor maculatus* (EVANS, CARRIER and BOGAN) 277

Glossina austeni:

Potassium-induced release of the diuretic hormones of *Rhodnius prolixus* and: Ca dependence, time course and localization of neurohaemal areas (MADDRELL and GEE) 155

Glycine transport:

Kinetic characteristics of, by the isolated midgut of the marine shrimp, *Penaeus marginatus* (AHEARN) 677

Goldfish:

See *Carassius auratus*

Green treefrog:

See *Hyla cinerea*

Haemocytes:

Free amino acids in the, and plasma of the larva of *Calliphora vicina* (EVANS and CROSSLEY) 463

Haemolymph osmotic pressure:

The effect of, on the meal size of nymphs of *Locusta migratoria* L. (BERNAYS and CHAPMAN) 473

Heat exchanger:

Vascular anatomy of the counter-current, of skipjack tuna (STEVENS, LAM and KENDALL) 145

Heterodera rostochiensis:

Water uptake and hatching in the potato cyst nematode, and the root knot nematode, *Meloidogyne incognita* (ELLENBY) 773

Hormone secretion:

Control of moulting and metamorphosis in the tobacco hornworm, *Manduca sexta* (L.): cessation of juvenile, as a trigger for pupation (NIJHOUT and WILLIAMS) 493

Hormones:

Potassium-induced release of the diuretic, of *Rhodnius prolixus* and *Glossina austeni*: Ca dependence, time course and localization of neurohaemal areas (MADDRELL and GEE) 155

5-Hydroxytryptamine:

Effects of, on action potentials and on contractile force in the ventricle of *Dolabella auricularia* (HILL) 529

Hyla cinerea:

The significance of some spectral features in mating call recognition in the green treefrog (GERHARDT) 229

Interneurons:

In crab connectives (*Carcinus maenas* (L.)): giant fibres (FRASER) 593

— In crab connectives (*Carcinus maenas* (L.)) (FRASER) 615

Ion transport:

Aspects of ionic transport mechanisms in crayfish *Astacus leptodactylus* (EHRENFELD) 57

— Active, in the larval hindgut of *Sarcophaga bullata* (Diptera: Sarcophagiadae) (PRUSCH) 95

Jetting:

Muscular activity of the mantle of *Sepia* and *Loligo* (Cephalopoda) during respiratory movements and, and its physiological interpretation (PACKARD and TRUEMAN) 411

Juvenile hormone secretion:

Control of moulting and metamorphosis in the tobacco hornworm, *Manduca sexta* (L.): cessation of, as a trigger for pupation (NIJHOUT and WILLIAMS) 493

Larva:

Free amino acids in the haemocytes and plasma of the, of *Calliphora vicina* (EVANS and CROSSLEY) 463

Locust:

Pharmacological studies on a, neuromuscular preparation (CLEMENTS and MAY) 421

Locusta migratoria L.:

The effect of haemolymph osmotic pressure on the meal size of nymphs of (BERNAYS and CHAPMAN) 473

Loligo:

Muscular activity of the mantle of *Sepia* and, (Cephalopoda) during respiratory movements and jetting, and its physiological interpretation (PACKARD and TRUEMAN) 411

Lungfish:

See *Protopterus aethiopicus*

Magnesium:

Regulation in mosquito larvae (*Aedes campestris*) living in waters of high MgSO₄ (KICENIUK and PHILLIPS) 749

— Active transport of, by the Malpighian tubules of the larvae of the mosquito, *Aedes campestris* (PHILLIPS and MADDRELL) 761

Malpighian tubules:

Active transport by insect, of acidic dyes and of acylamides (MADDRELL, GARDINER, PILCHER and REYNOLDS) 357

— Active transport of magnesium by the, of the larvae of the mosquito, *Aedes campestris* (PHILLIPS and MADDRELL) 761

- Manduca sexta* (L.):**
 Control of moulting and metamorphosis in the tobacco hornworm: growth of the last-instar larva and the decision to pupate (NIJHOUT and WILLIAMS) 481
 — Control of moulting and metamorphosis in the tobacco hornworm: cessation of juvenile hormone secretion as a trigger for pupation (NIJHOUT and WILLIAMS) 493
- Mantle:**
 Muscular activity of the, of *Sepia* and *Loligo* (Cephalopoda) during respiratory movements and jetting, and its physiological interpretation (PACKARD and TRUEMAN) 411
- Mating call recognition:**
 The significance of some spectral features in, in the green treefrog (*Hyla cinerea*) (GERHARDT) 229
- Meal size:**
 The effect of haemolymph osmotic pressure on the, of nymphs of *Locusta migratoria* L. (BERNAYS and CHAPMAN) 473
- Meloidogyne incognita*:**
 Water uptake and hatching in the potato cyst nematode, *Heterodera rostochiensis*, and the root knot nematode (ELLENBY) 773
- Memory fixation:**
 The possible involvement of brain microtubules in (CRONLY-DILLON, CARDEN and BIRKS) 443
- Metabolic inhibitors:**
 The effect of, on the cockroach nerve-muscle synapse (REES) 331
- Metabolic rates**
 Related to muscle activity in bumblebees (KAMMER and HEINRICH) 219
- Metabolism:**
 Interrelationships between water and, in *Artemia salina* cysts: hydration-dehydration from the liquid and vapour phases (CLEGG) 291
 — Nitrogen, in the American cockroach: an examination of whole body ammonium and other cations excreted in relation to water requirements (MULLINS) 541
 — Nitrogen, in the American cockroach: an examination of whole body and fat body regulation of cations in response to nitrogen balance (MULLINS and COCHRAN) 557
- Metamorphosis:**
 Control of moulting and, in the tobacco hornworm, *Manduca sexta* (L.): growth of the last-instar larva and the decision to pupate (NIJHOUT and WILLIAMS) 481
- MgSO₄:**
 Magnesium regulation in mosquito larvae (*Aedes campestris*) living in waters of high, content (KICENIUK and PHILLIPS) 749
- Micro-respirometer:**
 An electrolytic, digital recording, multi-channel (TURNER and STEVENSON) 321
- Middle ear:**
 Functional aspects of anuran, structures (LOMBARD and STRAUGHAN) 71
- Midgut:**
 Kinetic characteristics of glycine transport by the isolated, of the marine shrimp, *Penaeus marginatus* (AHEARN) 677
- Mosquito:**
See Aedes campestris
- Moths:**
 Physiology of insect ecdysis: neural and hormonal factors involved in wing-spreading behaviour of (TRUMAN and ENDO) 47
- Moulting:**
 Control of, and metamorphosis in the tobacco hornworm, *Manduca sexta* (L.): growth of the last-instar larva and the decision to pupate (NIJHOUT and WILLIAMS) 481
 — Control of, and metamorphosis in the tobacco hornworm, *Manduca sexta* (L.): cessation of juvenile hormone secretion as a trigger for pupation (NIJHOUT and WILLIAMS) 493
- Muscular activity:**
 Metabolic rates related to muscle activity in bumblebees (KAMMER and HEINRICH) 219
 — Of the mantle of *Sepia* and *Loligo* (Cephalopoda) during respiratory movements and jetting, and its physiological interpretation (PACKARD and TRUEMAN) 411
- Nerve-muscle synapse:**
 The effect of metabolic inhibitors on the cockroach (REES) 331
- Nerve-net:**
 Control of the pacemaker system of the, in the sea anemone *Calliactis parasitica* (McFARLANE) 129
- Neuronal homologies:**
 And the control of branchial tuft movements in two species of *Tritonia* (DORSETT) 639
- Neurones:**
 Interactions between, mediating tuft withdrawal in *Tritonia hombergi* (DORSETT and WILLOWS) 655
- Neurosecretion:**
 Calcium-dependence of, by exocytosis (NORMANN) 401
- Nitrogen metabolism:**
 In the American cockroach: an examination of whole body ammonium and other cations excreted in relation to water requirements (MULLINS) 541
 — In the American cockroach: an examination of whole body and fat body regulation of cations in response to nitrogen balance (MULLINS and COCHRAN) 557
- Osmotic pressure:**
 The effect of haemolymph, on the meal size of nymphs of *Locusta migratoria* L. (BERNAYS and CHAPMAN) 473
- Pacemaker system:**
 Control of the, of the nerve-net in the sea anemone *Calliactis parasitica* (McFARLANE) 129

***Penaeus marginatus*:**

Kinetic characteristics of glycine transport by the isolated midgut of the marine shrimp (AHEARN) 677

***Pholidoptera griseoptera*:**

The effect of acoustic signals on the chirp rhythm in the bush cricket (JONES) 345

Physiology:

Of insect ecdysis: neural and hormonal factors involved in wing spreading behaviour of moths (TRUMAN and ENDO) 47

Plasma:

Free amino acids in the haemocytes and, of the larva of *Calliphora vicina* (EVANS and CROSSLEY) 463

Plasticization:

Pharmacological induction of, in the abdominal cuticle of *Rhodnius* (REYNOLDS) 705

***Pollicipes polymerus*:**

Eco-physiological studies of an intertidal crustacean (Cirripedia, Lepodomorpha): aquatic and aerial respiration (PETERSEN, FYHN and JOHANSEN) 309

Potassium ions:

The effects of external, on the electrical potential measured across the gills of the teleost, *Dormitor maculatus* (EVANS, CARRIER and BOGAN) 277

Potato cyst nematode:

See *Heterodera rostochiensis*

***Protopterus aethiopicus*:**

Aestivation of the African lungfish: cardiovascular and respiratory functions (DELANEY, LAHIRI and FISHMAN) 111

Pupation:

Control of moulting and metamorphosis in the tobacco hornworm, *Manduca sexta* (L.): growth of the last-instar larva and the decision to pupate (NIJHOUT and WILLIAMS) 481

— Control of moulting and metamorphosis in the tobacco hornworm, *Manduca sexta* (L.): cessation of juvenile hormone secretion as a trigger for (NIJHOUT and WILLIAMS) 493

Rainbow trout:

See *Salmo gairdneri*

RBC count:

Increased, and pulmonary respiration in cold-adapted frogs (KRISHNAMOORTHY and SHAKUNTHALA) 285

Renal concentrating ability:

In selected West Australian birds (SKADHAUGE) 269

Respiration:

Increased RBC count and pulmonary, in cold-adapted frogs (KRISHNAMOORTHY and SHAKUNTHALA) 285

— Eco-physiological studies of an intertidal crustacean, *Pollicipes polymerus* (Cirripedia, Lepodomorpha): aquatic and aerial (PETERSEN, FYHN and JOHANSEN) 309

Respirometer:

An electrolytic, digital recording, multi-

channel micro- (TURNER and STEVENSON)

321

Resting potentials:

Effects of acetylcholine on, and action potentials, and on contractile force in the ventricle of *Dolabella auricularia* (HILL) 629

***Rhodnius*:**

Pharmacological induction of plasticization in the abdominal cuticle of (REYNOLDS) 705

***Rhodnius prolixus*:**

Potassium-induced release of the diuretic hormones of, and *Glossina austeni*: Ca dependence, time course and localization of neurohaemal areas (MADDELL and GEE) 155

Root knot nematode:

See *Meloidogyne incognita*

***Salmo gairdneri*:**

Thermoacclimatory variation in the haemoglobin systems of goldfish (*Carassius auratus*) and rainbow-trout (HOUSTON and CYR) 455

***Sarcophaga bullata*:**

Active ion transport in the larval hindgut of (Diptera: Sarcophagiadae) (PRUSCH) 95

Sea anemone:

See *Calliactis parasitica*

***Sepia*:**

Muscular activity of the mantle of, and *Loligo* (Cephalopoda) during respiratory movements and jetting, and its physiological interpretation (PACKARD and TRUEMAN) 411

Shrimp:

See *Penaeus marginatus*

Sodium regulation:

And adaptation to fresh water in the isopod genus *Asellus* (SUTCLIFFE) 719

Sodium-transport inhibitors:

The effects of, and cooling on membrane potentials in cockroach central nervous connectives (PICHON and TREHERNE) 203

Statocyst fibres:

Interneurons in crab connectives (*Carcinus maenas* (L.)): directional (FRASER) 615

Stretch receptors:

Efferent regulation of the abdominal, of the crayfish (ILYINSKY, SPIVACHENKO and SHTIRBU) 781

Thermoacclimatory variation:

In the haemoglobin systems of goldfish (*Carassius auratus*) and rainbow trout (*Salmo gairdneri*) (HOUSTON and CYR) 455

Tobacco hornworm:

See *Manduca sexta* (L.)

Treefrog:

See *Hyla cinerea*

***Tritonia*:**

Neuronal homologies and the control of branchial tuft movements in two species of (DORSETT) 639

***Tritonia hombergi*:**

Interactions between neurones mediating tuft withdrawal in (DORSETT and WILLOWS) 655

Tuft:

Neuronal homologies and the control of branchial, movements in two species of *Tritonia* (DORSETT) 639

- Interactions between neurones mediating, withdrawal in *Tritonia hombergi* (DORSETT and WILLOWS) 655

Tuna:

Vascular anatomy of the counter-current heat exchanger of skipjack (STEVENS, LAM and KENDALL) 145

Ventricle:

Effects of 5-hydroxytryptamine on action potentials and on contractile force in the, of *Dolabella auricularia* (HILL) 529

- Effects of acetylcholine on resting and action potentials, and on contractile force in the, of *Dolabella auricularia* (HILL) 629

Water:

Interrelationships between, and metabolism in *Artemia salina* cysts: hydration – dehydra-

tion from the liquid and vapour phases (CLEGG) 281

- Nitrogen metabolism in the American cockroach: an examination of whole body ammonium and other cations excreted in relation to requirements (MULLINS) 541

- Diffusion and permeation of, in the frog egg: the effect of tension and tonicity (MILD and LØVTRUP) 697

- Some factors regulating, intake by the eel, *Anguilla japonica* (HIRANO) 737

- Uptake and hatching in the potato cyst nematode, *Heterodera rostochiensis*, and the root knot nematode, *Meloidogyne incognita* (ELLENBY) 773

West Australian birds:

Renal concentrating ability in selected (SKADHAUGE) 269

Wing-spreading behaviour of moths:

Physiology of insect ecdysis: neural and hormonal factors involved in (TRUMAN and ENDO) 47

Nucleus and Cytoplasm

Henry Harris

This book provides an introduction to the most important problems in the field of nucleo-cytoplasmic relationships. The treatment is analytical, each subject being approached by a detailed examination of experimental evidence. The recent development of assays for the biological activity of cellular messenger ribonucleic acids, the analysis of transcriptional and translational controls in molecular terms, and the continuing progress in the field of cell fusion have, however, done much to clarify problems that appeared intractable a few years ago. Third edition illustrated £4.20 paper covers £1.90

The Biology of Tribolium

With special emphasis on Genetic Aspects

Volume II

A. Sokoloff

Flour beetles of the genus *Tribolium* are primary pests of stored products. Because of their economic importance, and the ease of handling in the laboratory, they are widely used by entomologists, population ecologists, and geneticists. This volume brings together widely scattered information on *Tribolium* ecology. It also has a chapter on physiological and biochemical studies, as well as one on mathematical models relating to population ecology. An appendix summarizes the techniques available for handling these beetles in the laboratory. £19.50

Essays on the Nervous System

A Festschrift for Professor J. Z. Young

Edited by R. Bellairs and E. G. Gray

The topics covered in this book range from problems of development, pathology, and sensory and motor systems in peripheral nerves, to neuro-endocrinology, peripheral and central pathways of the visual system, synaptology, and higher mechanisms of the central nervous system. There are numerous illustrations from light and electron micrographs. Illustrated £11.50

An Introduction to the Study of Man

J. Z. Young

'In its combination of biological erudition, concern for profound issues, scientific and social, sensitivity to the problems of mankind and not least to values and aspirations, this is a work of rare distinction.' – *Nature*

All communications should be addressed to the Editor,
The Journal of Experimental Biology, Department of Zoology,
Downing Street, Cambridge CB2 3EJ, England.

MANUSCRIPTS

Authors are requested to present their work in as *concise* a form as possible. Two copies of MSS must be submitted, together with five copies of an abstract (see below). The text should be *typewritten* (double-spaced) on one side only of the paper, and the pages numbered. Serial numbers must not be incorporated in the title. *Tables* and *Legends* should be numbered and on separate sheets: their position in the text should be indicated in the margin of the MS. Bibliography should be given under the heading of 'References' and in the following form: surname of authors (in alphabetical order), initials, date of publication, title of paper, title of journal (abbreviated according to the *World List of Scientific Periodicals*), volume and pages of references (*first and last*). In the text a reference must be quoted by the author's name and the date (in brackets), not by the numerical order of the paper in the list of references. Every paper must contain a short and concise summary of the chief results of the enquiry, to be placed before the *Introduction*.

ILLUSTRATIONS

Line blocks should be used wherever possible. Text half-tone blocks should only be used when it is essential to show depth of shading. Plates will only be accepted for essential illustrations in which the most accurate reproduction of fine detail is called for, such as photomicrographs.

Illustrations should be numbered as they are to appear in print: plates will be placed at the end of the article.

Authors are asked not to submit sheets of illustrations which are of more than foolscap size or, if this cannot be avoided, to include photographic reductions to be sent to referees.

(i) *Line blocks*. Pen drawings should be in Indian ink (*jet black and waterproof*) on smooth white Bristol board, heavy drawing paper or good quality tracing paper. Drawings must not be folded or creased in any way. Where a drawing is labelled, *the label lines should be drawn in black but the lettering should be put in lightly with a soft pencil*. Where considerable reduction is required it is essential that the drawing be of such a character as to bear such reduction. *All brush work, tinting or pencil shading is to be avoided*. Mechanical stipple, if too fine, may not stand reduction in size when the block is made.

Charts and curves can often be drawn to best advantage on *graph paper ruled in pale blue*. The blue lines, while ensuring accuracy, are easily eliminated by the printer, only the blackened lines that are desired remaining. Whenever possible oscilloscope recordings should be submitted in a form suitable for reproduction with line blocks.

(ii) *Text half-tone blocks*. Photographs can be produced in this way if a good glossy bromide print is supplied. Illustrations should be gummed on *white card*, grouped and numbered as they are to appear in print. All lettering should be drawn in position on a covering sheet of transparent paper.

(iii) *Plates*. Plates are expensive and the Editor may require an author to defray the cost of plates which in his opinion are not essential. The photographs making up the plate should be gummed on *white card*, grouped and numbered, as they are to appear in print. Exclusive of margin the plate figures should not cover, when reduced, an area greater than $7\frac{1}{2}$ in. in length \times 5 in. in width (19.1×12.7 cm.) for reproduction as a single plate, or $7\frac{1}{2} \times 11\frac{1}{2}$ in. (19.1×29.2 cm.) in the case of double plates. All lettering should be shown in position on a covering sheet of transparent paper.

ABSTRACTS

The five copies of the abstract are required for biological abstracting journals. The abstract will not appear in *The Journal of Experimental Biology* but will be scrutinized by the Editor before being passed for publication. The text of the summary may serve as an abstract provided that it conforms to the following requirements. The abstract should outline as briefly as possible the results and the definite conclusions of the work. Details of method are generally not required. A paper of average length should be abstracted in about 100 words and the abstract should never exceed 3% of the original. Each copy of the abstract should bear the title of the paper, the name(s) of the author(s) and an address to which applications for offprints should be sent. The abstract should be typewritten (double-spaced).

PROOFSHEETS AND OFFPRINTS

Authors will receive one set of slip proofs for correction and return to the Editor. A page proof will also be sent if the slip proof is marked by the author 'Revise'. An allowance of 50p per sheet of sixteen pages will be made for alteration errors not made by the printers. Authors may be charged for any excess over this average. They will receive 50 complimentary copies of their papers: additional copies may be purchased and should be ordered when the proofs are returned to the Editor.
