

INDEX OF AUTHORS

- Ahearn, Gregory A. and Gomme, Jørgen.** Transport of exogenous D-glucose by the integument of a polychaete worm (*Nereis diversicolor* Müller) 243
- Ahearn, Gregory A. and Townsley, Sidney J.** Integumentary amino acid transport and metabolism in the apodous sea cucumber, *Chiridota rigida* 733
- Atkinson, H. J.** The functional significance of the haemoglobin in a marine nematode, *Enoplus brevis* (Bastian) 1
- Baginski, Richard M. and Pierce, Sidney K., Jr.** Anaerobiosis: a possible source of osmotic solute for high-salinity acclimation in marine molluscs 589
- Ballintijn, C. M. and Bamford, O. S.** Proprioceptive motor control in fish respiration 99
- Bamford, O. S.** *See* BALLINTIJN and BAMFORD
- Blaney, W. M.** Behavioural and electrophysiological studies of taste discrimination by the maxillary palps of larvae of *Locusta migratoria* (L.) 555
- Brokaw, C. J.** Effects of viscosity and ATP concentration on the movement of reactivated sea-urchin sperm flagella 701
- Bennett, R. R.** *See* TREHERNE, BUCHAN and BENNETT
- Bennett, R. R., Buchan, P. B. and Treherne, J. E.** Sodium and lithium movements and axonal function in cockroach nerve cords 231
- Berridge, Michael J., Lindley, Barry D. and Prince, William T.** Stimulus-secretion coupling in an insect salivary gland: cell activation by elevated potassium concentrations 629
- Berry, M. S. and Pentreath, V. W.** Problems associated with the use of tetraethylammonium to test for monosynaptic connexions 797
- Buchan, P. B.,** *See* BENNETT, BUCHAN and TREHERNE
- *See also* TREHERNE, BUCHAN and BENNETT
- Buckley, S. K. L.** *See* WELLS, O'DOR and BUCKLEY
- Burrows, Malcolm.** Monosynaptic connexions between wing stretch receptors and flight motoneurons of the locust 189
- Cabada, Marcelo O.** Sperm concentration and fertilization rate in *Bufo arenarum* (Amphibia: Anura) 481
- Chen, Liming.** *See* WINE, KRASNE and CHEN
- Cook, Anthony.** The withdrawal response of a freshwater snail (*Lymnaea stagnalis* L.) 783
- Crowe, John H.** *See* WRIGHT, JOHNSON and CROWE
- Evans, P. D.** The uptake of L-glutamate by the central nervous system of the cockroach, *Periplaneta americana* 55
- Fay, Richard R. and Popper, Arthur N.** Modes of stimulation of the teleost ear 379
- Field, Laurence H. and Larimer, James L.** The cardioregulatory system of crayfish: neuroanatomy and physiology 519
- The cardioregulatory system of crayfish: the role of circumoesophageal interneurons 531
- Frost, B. J.** Eye movements in *Daphnia pulex* (De Geer) 175
- Galbreath, R. A.** Water balance across the cuticle of a soil insect 115
- Gomme, Jørgen.** *See* AHEARN and GOMME
- Hartline, Daniel K. and Maynard, Donald M.** Motor patterns in the stomatogastric ganglion of the lobster, *Panulirus argus* 405
- Harvey, William R.** *See* JUNGREIS and HARVEY
- Heinrich, Bernd and Pantle, Curt.** Thermoregulation in small flies (*Syrphus* sp.): basking and shivering 599
- Jen, Philip H.-S.** *See* SUGA and JEN
- Johnson, Treve L.** *See* WRIGHT, JOHNSON and CROWE
- Jungreis, Arthur M. and Harvey, William R.** Role of active potassium transport by integumentary epithelium in secretion of larval-pupal moulting fluid during silkworm development 357
- Knowles, G.** The reduced glucose permeability of the isolated Malpighian tubules of the blowfly *Calliphora vomitoria* 327
- Koopowitz, Harold.** Activity and habituation in the brain of the polyclad flatworm *Freemania litoricola* 455
- Electrophysiology of the peripheral nerve net in the polyclad flatworm *Freemania litoricola* 469
- Krasne, Franklin B.** *See* WINE, KRASNE and CHEN
- Lardner, T. J.** *See* YUNDT, SHACK and LARDNER
- Larimer, James L.** *See* FIELD and LARIMER
- Laverack, M. S.** *See* THORPE, SHELTON and LAVERACK
- Lindley, Barry D.** *See* BERRIDGE, LINDLEY and PRINCE
- McMahon, B. R. and Wilkens, J. L.** Respiratory and circulatory responses to hypoxia in the lobster *Homarus americanus* 637
- Maddrell, S. H. P. and Phillips, J. E.** Active transport of sulphate ions by the Malpighian tubules of larvae of the mosquito, *Aedes campestris* 367
- Secretion of hypo-osmotic fluid by the lower Malpighian tubules of *Rhodnius prolixus* 671

- Magura, I. S., Valeyev, A. E. and Zamekhovsky I. Z.** The effect of temperature on the outward currents in the soma of molluscan neurones in voltage-clamp conditions 265
- Maynard, Donald M.** See HARTLINE and MAYNARD
- Miller, Jennifer B.** The length-tension relationship of the dorsal longitudinal muscle of a leech 43
- Neil, D. M.** The control of eyestalk movements in the mysid shrimp *Praunus flexuosus* 487
- The optokinetic responses of the mysid shrimp *Praunus flexuosus* 505
- The mechanism of statocyst operation in the mysid shrimp *Praunus flexuosus* 685
- Nijhout, H. Frederik.** Excretory role of the midgut in larvae of the tobacco hornworm, *Manduca sexta* (L.) 221
- Noble-Nesbitt, J.** Reversible arrest of uptake of water from subsaturated atmospheres by the firebrat, *Thermobia domestica* (Packard) 657
- O'Dor, R. K.** See WELLS, O'DOR and BUCKLEY
- Page, Charles H.** See THOMPSON and PAGE
- Pantle, Curt.** See HEINRICH and PANTLE
- Pentreath, V. W.** See BERRY and PENTREATH
- Phillips, J. E.** See MADDELL and PHILLIPS
- Piddington, R. W.** See SATTELLE and PIDDINGTON
- Pierce, Sidney K., Jr.** See BAGINSKI and PIERCE
- Pond, Caroline M.** The role of the 'walking legs' in aquatic and terrestrial locomotion of the crayfish (*Austropotamobius pallipes*) (Lereboullet) 447
- Popper, Arthur N.** See FAY and POPPER
- Pratt, Graham E.** See TOBE and PRATT
- Prince, William T.** See BERRIDGE, LINDLEY and PRINCE
- Reynolds, Stuart E.** The mechanical properties of the abdominal cuticle of *Rhodnius* larvae 69
- The mechanism of plasticization of the abdominal cuticle in *Rhodnius* 81
- Sattelle, D. B. and Piddington, R. W.** Potassium-induced motion increase in a central nervous ganglion 753
- Shack, W. J.** See YUNDT, SHACK and LARDNER
- Shelton, G. A. B.** The transmission of impulses in the ectodermal slow conduction system of the sea anemone *Calliactis parasitica* (Couch) 421
- Colonial conduction systems in the Anthozoa: Octocorallia 571
- See also THORPE, SHELTON and LAVERACK
- Sommerville, Barbara A.** Factors affecting the heart activity and blood pressure of the swan mussel, *Anodonta cygnea* 341
- Suga, Nobuo and Jen, Philip H.-S.** Peripheral control of acoustic signals in the auditory system of echolocating bats 277
- Suzuki, Hikaru.** Convergence of olfactory inputs from both antennae in the brain of the honeybee 11
- Thompson, Charles and Page, Charles H.** Nervous control of respiration: oxygen-sensitive elements in the prosoma of *Limulus polyphemus* 545
- Thorpe, J. P., Shelton, G. A. B. and Laverack, M. S.** Electrophysiology and co-ordinated behavioural responses in the colonial bryozoan *Membranipora membranacea* (L.) 389
- Tobe, Stephen S. and Pratt, Graham E.** Corpus allatum activity *in vitro* during ovarian maturation in the desert locust, *Schistocerca gregaria* 611
- Townesley, Sidney J.** See AHEARN and TOWNESLEY
- Treherne, J. E.** See BENNETT, BUCHAN and TREHERNE
- Treherne, J. E., Buchan, P. B. and Bennett, R. R.** Sodium activity of insect blood: physiological significance and relevance to the design of physiological saline 721
- Valeyev, A. E.** See MAGURA, VALEYEV and ZAMEKHOVSKY
- Wells, J.** See WELLS and WELLS
- Wells, M. J., O'Dor, R. K. and Buckley, S. K. L.** An *in vitro* bioassay for a molluscan gonadotropin 433
- Wells, M. J. and Wells, J.** Optic gland implants and their effects on the gonads of *Octopus* 579
- Wilkens, J. L.** See McMAHON and WILKENS
- Wine, Jeffrey J., Krasne, Franklin B. and Chen, Liming.** Habituation and inhibition of the crayfish lateral giant fibre escape response 771
- Wright, D. A.** Sodium regulation in the larvae of *Chironomus dorsalis* (Meig) and *Camptochironomus tentans* (Fabr.): the effect of salt depletion and some observations on temperature changes 121
- The effect of external sodium concentration upon sodium fluxes in *Chironomus dorsalis* (Meig.) and *Camptochironomus tentans* (Fabr.), and the effect of other ions on sodium influx in *C. tentans* 141
- The relationship between transepithelial sodium movement and potential difference in the larva of *Camptochironomus tentans* (Fabr.) and some observations on the accumulation of other ions 157
- Wright, Stephen H., Johnson, Treve L. and Crowe, John H.** Transport of amino acids by isolated gills of the mussel, *Mytilus californianus* Conrad 313
- Yundt, A. P., Shack, W. J. and Lardner, T. J.** Applicability of hydrodynamic analyses of spermatozoan motion 27
- Zamekhovsky, I. Z.** See MAGURA, VALEYEV and ZAMEKHOVSKY

INDEX OF SUBJECTS

Abdominal cuticle:

- The mechanical properties of the, of *Rhodnius* larvae (REYNOLDS) 69
 — The mechanism of plasticization of the, in *Rhodnius* (REYNOLDS) 81

Acoustic signals:

- Peripheral control of, in the auditory system of echolocating bats (SUGA and JEN) 277

***Aedes campestris*:**

- Active transport of sulphate ions by the Malpighian tubules of larvae of the mosquito (MADDELL and PHILLIPS) 367

Amino acid(s):

- Transport of, by isolated gills of the mussel, *Mytilus californianus* Conrad (WRIGHT, JOHNSON and CROWE) 313
 — Integumentary, transport and metabolism in the apodous sea cucumber, *Chiridota rigida* (AHEARN and TOWNSLEY) 733

Anaerobiosis:

- A possible source of osmotic solute for high-salinity acclimation in marine molluscs (BAGINSKI and PIERCE) 589

***Anodonta cygnea*:**

- Factors affecting the heart activity and blood pressure of the swan mussel (SOMMERVILLE) 341

Antennae:

- Convergence of olfactory inputs from both, in the brain of the honeybee (SUZUKI) 11

ATP:

- Effects of viscosity and, concentration on the movement of reactivated sea-urchin sperm flagella (BROKAW) 701

***Austropotamobius pallipes* (Lereboullet):**

- The role of the 'walking legs' in aquatic and terrestrial locomotion of the crayfish (POND) 447

Axonal function:

- Sodium and lithium movements and, in cockroach nerve cords (BENNETT, BUCMAN and TREHERNE) 231

Basking:

- Thermoregulation in small flies (*Syrphus* sp.): and shivering (HEINRICH and PANTLE) 599

Bats:

- Peripheral control of acoustic signals in the auditory system of echolocating (SUGA and JEN) 277

Behavioural responses:

- Electrophysiology and co-ordinated, in the colonial bryozoan *Membranipora membranacea* (L.) (THORRE, SHELTON and LAVERACK) 389

Blood:

- Sodium activity of insect: physiological significance and relevance to the design of physiological saline (TREHERNE, BUCMAN and BENNETT) 721

Blood pressure:

- Factors affecting the heart activity and, of the swan mussel, *Anodonta cygnea* (SOMMERVILLE) 341

Blowfly:

- See *Calliphora vomitoria*

Brain:

- Convergence of olfactory inputs from both antennae in the, of the honeybee (SUZUKI)

***Bufo arenarum*:**

- Sperm concentration and fertilization rate in, (Amphibia: Anura) (CABADA) 481

***Calliactis parasitica* (Couch):**

- The transmission of impulses in the ectodermal slow conduction system of the sea anemone (SHELTON) 421

***Calliphora vomitoria*:**

- The reduced glucose permeability of the isolated Malpighian tubules of the blowfly (KNOWLES) 327

***Camptochironomus tentans* (Fabr.):**

- Sodium regulation in the larvae of *Chironomus dorsalis* (Meig.) and: the effect of salt depletion and some observations on temperature changes (WRIGHT) 121

- The effect of external sodium concentration upon sodium fluxes in *Chironomus dorsalis* (Meig.) and, the effect of other ions on sodium influx in *C. tentans* (WRIGHT) 141
 — The relationship between transepithelial sodium movement and potential difference in the larva of, and some observations on the accumulation of other ions (WRIGHT) 157

Cardioregulatory system:

- The, of the crayfish: neuroanatomy and physiology (FIELD and LARIMER) 519
 — The, of the crayfish: the role of circumoesophageal interneurons (FIELD and LARIMER) 531

Central nervous ganglion:

- Potassium-induced motion increase in a (SATTELLE and PIDDINGTON) 753

Central nervous system:

- The uptake of L-glutamate by the, of the cockroach, *Periplaneta americana* (EVANS) 55

***Chiridota rigida*:**

- Integumentary amino acid transport and metabolism in the apodous sea cucumber (AHEARN and TOWNSLEY) 733

***Chironomus dorsalis* (Meig.):**

- Sodium regulation in the larvae of, and *Camptochironomus tentans* (Fabr.): the effect of salt depletion and some observations on temperature changes (WRIGHT) 121

- The effect of external sodium concentration upon sodium fluxes in, and *Camptochironomus tentans* (Fabr.), and the effect of other ions on sodium influx in *C. tentans* (WRIGHT) 141

- Circumoesophageal interneurons:**
The cardioregulatory system of crayfish: the role of (FIELD and LARIMER) 531
- Cockroach:**
The uptake of L-glutamate by the central nervous system of the, *Periplaneta americana* (EVANS) 55
— Sodium and lithium movements and axonal function in, nerve cords (BENNETT, BUCHAN and TREHERNE) 231
- Conduction systems:**
Colonial, in the Anthozoa: Octocorallia (SHELTON) 571
- Corpus allatum:**
Activity *in vitro* during ovarian maturation in the desert locust, *Schistocerca gregaria* (TOBE and PRATT) 611
- Crayfish:**
The role of the 'walking legs' in aquatic and terrestrial locomotion of the, *Austropotamobius pallipes* (Lereboullet) (POND) 447
— The cardioregulatory system of: neuroanatomy and physiology (FIELD and LARIMER) 519
— The cardioregulatory system of: the role of circumoesophageal interneurons (FIELD and LARIMER) 531
— Habituation and inhibition of the, lateral giant fibre escape response (WINE, KRASNE and CHEN) 771
- Cuticle:**
Water balance across the, of a soil insect (GALBREATH) 115
- Daphnia pulex (de Geer):**
Eye movements in (FROST) 175
- Desert locust:**
See Schistocerca gregaria
- Ear:**
Modes of stimulation of the teleost (FAY and POPPER) 379
- Echolocating bats:**
Peripheral control of acoustic signals in the auditory system of (SUGA and JEN) 277
- Ectodermal slow conduction system:**
The transmission of impulses in the, of the sea anemone *Calliactis parasitica* (Couch) (SHELTON) 421
- Enoplus brevis (Bastian):**
The functional significance of the haemoglobin in a marine nematode (ATKINSON) 1
- Escape response:**
Habituation and inhibition of the crayfish lateral giant fibre (WINE, KRASNE and CHEN) 771
- Eye:**
Movements in *Daphnia pulex* (de Geer) (FROST) 175
- Eyestalk:**
The control of, movements in the mysid shrimp, *Praunus flexuosus* (NEIL) 487
- Firebrat:**
See Thermobia domestica (Packard)
- Fish respiration:**
Proprioceptive motor control in (BALLINTJN and BAMFORD) 99
- Flagella:**
Effects of viscosity and ATP concentration on the movement of reactivated sea-urchin sperm (BROKAW) 701
- Flatworm:**
See Freemania litoricola
- Flight motoneurons:**
Monosynaptic connexions between wing stretch receptors and, of the locust (BURROWS) 189
- Freemania litoricola:**
Activity and habituation in the brain of the polyclad flatworm (KOOPOWITZ) 455
- Ganglion:**
Motor patterns in the stomatogastric, of the lobster, *Panulirus argus* (HARTLINE and MAYNARD) 405
- Giant fibre:**
Habituation and inhibition of the crayfish lateral, escape response (WINE, KRASNE and CHEN) 771
- Gills:**
Transport of amino acids by isolated, of the mussel, *Mytilus californianus* Conrad (WRIGHT, JOHNSON and CROWE) 313
- D-Glucose:**
Transport of exogenous, by the integument of a polychaete worm (*Nereis diversicolor* Müller) (AHEARN and GOMME) 243
- Glucose permeability:**
The reduced, of the isolated Malpighian tubules of the blowfly *Calliphora vomitoria* (KNOWLES) 327
- L-Glutamate:**
The uptake of, by the central nervous system of the cockroach, *Periplaneta americana* (EVANS) 55
- Gonadotropin:**
An *in vitro* bioassay for a molluscan (WELLS, O'DOR and BUCKLEY) 433
- Gonads:**
Optic gland implants and their effects on the, of *Octopus* (WELLS and WELLS) 579
- Haemoglobin:**
The functional significance of the, in a marine nematode, *Enoplus brevis* (Bastian) (ATKINSON) 1
- Heart activity:**
Factors affecting the, and blood pressure of the swan mussel, *Anodonta cygnea* (SOMMERVILLE) 341
- High-salinity acclimation:**
Anaerobiosis: a possible source of osmotic solute for, in marine molluscs (BAGINSKI and PIERCE) 589
- Homarus americanus:**
Respiratory and circulatory responses to hypoxia in the lobster (McMAHON and WILKENS) 63

- Bumblebee:**
Convergence of olfactory inputs from both antennae in the brain of the (SUZUKI) 11
- Hydrodynamic analyses:**
Applicability of, of spermatozoan motion (YUNDT, SHACK and LARDNER) 27
- Hypo-osmotic fluid:**
Secretion of, by the lower Malpighian tubules of *Rhodnius prolixus* (MADDRELL and PHILLIPS) 671
- Hypoxia:**
Respiratory and circulatory responses to, in the lobster, *Homarus americanus* (MCMAHON and WILKENS) 637
- Insect blood:**
Sodium activity of: physiological significance and relevance to the design of physiological saline (TREHERNE, BUCHAN and BENNETT) 721
- Integument:**
Transport of exogenous D-glucose by the, of a polychaete worm (*Nereis diversicolor* Müller) (AHEARN and GOMME) 243
- Leech:**
The length-tension relationship of the dorsal longitudinal muscle of a (MILLER) 43
- Limulus polyphemus:**
Nervous control of respiration: oxygen-sensitive elements in the prosoma of (THOMPSON and PAGE) 545
- Lithium:**
Sodium and, movements and axonal function in cockroach nerve cords (BENNETT, BUCHAN and TREHERNE) 231
- Lobster:**
See *Homarus americanus* and *Panulirus argus*
- Locomotion:**
The role of the 'walking legs' in aquatic and terrestrial, of the crayfish (*Austropotamobius pallipes*) (Lereboullet) (POND) 447
- Locust:**
Monosynaptic connexions between wing stretch receptors and flight motoneurons of the (BURROWS) 189
— See also *Locusta migratoria* (L.) and *Schistocerca gregaria*
- Locusta migratoria** (L.):
Behavioural and electrophysiological studies of taste discrimination by the maxillary palps of larvae of (BLANEY) 555
- Lymnaea stagnalis** L.:
The withdrawal response of a freshwater snail (COOK) 783
- Malpighian tubules:**
The reduced glucose permeability of the isolated, of the blowfly *Calliphora vomitoria* (KNOWLES) 327
— Active transport of sulphate ions by the, of larvae of the mosquito, *Aedes campestris* (MADDRELL and PHILLIPS) 367
- Secretion of hypo-osmotic fluid by the lower, of *Rhodnius prolixus* (MADDRELL and PHILLIPS) 671
- Manduca sexta** (L.):
Excretory role of the midgut in larvae of the tobacco hornworm (NIJHOUT) 221
- Maxillary palps:**
Behavioural and electrophysiological studies of taste discrimination by the, of larvae of *Locusta migratoria* (L.) (BLANEY) 555
- Membranipora membranacea** (L.):
Electrophysiology and co-ordinated behavioural responses in the colonial bryozoan (THORPE, SHELTON and LAVERACK) 389
- Metabolism:**
Integumentary amino acid transport and, in the apodous sea cucumber, *Chiridota rigida* (AHEARN and TOWNSLEY) 733
- Midgut:**
Excretory role of the, in larvae of the tobacco hornworm, *Manduca sexta* (L.) (NIJHOUT) 221
- Molluscan gonadotropin:**
An *in vitro* bioassay for a (WELLS, O'DOR and BUCKLEY) 433
- Molluscs:**
Anaerobiosis: a possible source of osmotic solute for high-salinity acclimation in marine (BAGINSKI and PIERCE) 589
- Monosynaptic connexions:**
Between wing stretch receptors and flight motoneurons of the locust (BURROWS) 189
— Problems associated with the use of tetraethylammonium to test for (BERRY and PENTREATH) 797
- Mosquito:**
See *Aedes campestris*
- Motor control:**
Proprioceptive, in fish respiration (BALINTIJN and BAMFORD) 99
- Motor patterns:**
In the stomatogastric ganglion of the lobster, *Panulirus argus* (HARTLINE and MAYNARD) 405
- Moulting fluid:**
Role of active potassium transport by integumentary epithelium in secretion of larval-pupal, during silkworm development (JUNGREIS and HARVEY) 357
- Muscle:**
The length-tension relationship of the dorsal longitudinal, of a leech (MILLER) 43
- Mussel:**
See *Mytilus californianus* Conrad and *Anodonta cygnea*
- Mytilus californianus** Conrad:
Transport of amino acids by isolated gills of the mussel (WRIGHT, JOHNSON and CROW) 313
- Nematode:**
The functional significance of the haemoglobin in a marine, *Enoplos brevis* (Bastian) (ATKINSON) 1
- Nereis diversicolor** (Müller):
Transport of exogenous D-glucose by the

Nereis diversicolor (cont.)

integument of a polychaete worm (AHEARN and GOMME) 243

Nerve cords:

Sodium and lithium movements and axonal function in cockroach (BENNETT, BUCHAN and TREHERNE) 231

Nerve net:

Electrophysiology of the peripheral, in the polyclad flatworm *Freemania litoricola* (KOOPOWITZ) 469

Neurones:

The effect of temperature on the outward currents in the soma of molluscan, in voltage-clamp conditions (MAGURA, VALEYEV and ZAMEKHOVSKY) 265

Octocorallia:

Colonial conduction system in the Anthozoa: (SHELTON) 571

Octopus:

Optic gland implants and their effects on the gonads of (WELLS and WELLS) 579

Olfactory inputs:

Convergence of, from both antennae in the brain of the honeybee (SUZUKI) 11

Optic gland implants:

And their effects on the gonads of *Octopus* (WELLS and WELLS) 579

Optokinetic responses:

The, of the mysid shrimp *Praunus flexuosus* (NEIL) 505

Osmotic solute:

Anaerobiosis: a possible source of, for high-salinity acclimation in marine molluscs (BAGINSKI and PIERCE) 589

Ovarian maturation:

Corpus allatum activity *in vitro* during, in the desert locust, *Schistocerca gregaria* (TOBE and PRATT) 611

Panulirus argus:

Motor patterns in the stomatogastric ganglion of the lobster (HARTLINE and MAYNARD) 405

Periplaneta americana:

The uptake of L-glutamate by the central nervous system of the cockroach (EVANS) 55

Plasticization:

The mechanism of, of the abdominal cuticle in *Rhodnius* (REYNOLDS) 81

Potassium:

Role of active, transport by integumentary epithelium in secretion of larval-pupal moulting fluid during silkworm development (JUNGREIS and HARVEY) 357

— Stimulus-secretion coupling on an insect salivary gland: cell activation by elevated, concentrations (BERRIDGE, LINDLEY and PRINCE) 629

— Induced motion increase in a central nervous ganglion (SATTELLE and PIDDINGTON) 753

Potential difference:

The relationship between transepithelial sodium movement and, in the larva of *Camptocliironomus tentans* (Fabr.) and some observations on the accumulation of other ions (WRIGHT) 157

Praunus flexuosus:

The control of eyestalk movements in the mysid shrimp (NEIL) 487

— The optokinetic responses of the mysid shrimp (NEIL) 505

— The mechanism of statocyst operation in the mysid shrimp (NEIL) 685

Prosoma:

Nervous control of respiration: oxygen-sensitive elements in the, of *Limulus polyphemus* (THOMPSON and PAGE) 545

Respiration:

Nervous control of: oxygen-sensitive elements in the prosoma of *Limulus polyphemus* (THOMPSON and PAGE) 545

Rhodnius:

The mechanical properties of the abdominal cuticle of, larvae (REYNOLDS) 69

— The mechanism of plasticization of the abdominal cuticle in (REYNOLDS) 81

Rhodnius prolixus:

Secretion of hypo-osmotic fluid by the lower Malpighian tubules of (MADDRELL and PHILLIPS) 671

Saline:

Sodium activity of insect blood: physiological significance and relevance to the design of physiological (TREHERNE, BUCHAN and BENNETT) 721

Salivary gland:

Stimulus-secretion coupling in an insect: cell activation by elevated potassium concentrations (BERRIDGE, LINDLEY and PRINCE) 629

Salt depletion:

Sodium regulation in the larvae of *Chironomus dorsalis* (Meig.) and *Camptocliironomus tentans* (Fabr.): The effect of, and some observations on temperature changes (WRIGHT) 121

Schistocerca gregaria:

Corpus allatum activity *in vitro* during ovarian maturation in the desert locust (TOBE and PRATT) 611

Sea anemone:

See Calliactis parasitica (Couch)

Sea cucumber:

See Chiridota rigida

Sea urchin:

Effects of viscosity and ATP concentration on the movement of reactivated, sperm flagella (BROKAW) 701

Shivering:

Thermoregulation in small flies (*Syrphus* sp.): basking and (HEINRICH and PANTLE) 594

Shrimp:

See *Praunus flexuosus*

Silkworm:

Role of active potassium transport by integumentary epithelium in secretion of larval-pupal moulting fluid during development (JUNGREIS and HARVEY) 357

Snail:

See *Lymnaea stagnalis* L.

Sodium:

Regulation in the larvae of *Chironomus dorsalis* (Meig.) and *Camptochironomus tentans* (Fabr.): the effect of salt depletion and some observations on temperature changes (WRIGHT) 121

— The effect of external, concentration upon, fluxes in *Chironomus dorsalis* (Meig.) and *Camptochironomus tentans* (Fabr.), and the effect of other ions on, influx in *C. tentans* (WRIGHT) 141

— The relationship between transepithelial, movement and potential difference in the larva of *Camptochironomus tentans* (Fabr.) and some observations on the accumulation of other ions (WRIGHT) 157

— And lithium movements and axonal function in cockroach nerve cords (BENNETT, BUCHAN and TREHERNE) 231

— Activity of insect blood: physiological significance and relevance to the design of physiological saline (TREHERNE, BUCHAN and BENNETT) 721

Soil insect:

Water balance across the cuticle of a (GALBREATH) 115

Soma:

The effect of temperature on the outward currents in the, of molluscan neurones in voltage-clamp conditions (MAGURA, VALEYEV and ZAMEKHOVSKY) 265

Sperm:

Concentration and fertilization rate in *Bufo arenarum* (Amphibia: Anura) (CABADA) 481

— Effects of viscosity and ATP concentration on the movement of reactivated sea-urchin, flagella (BROKAW) 701

Spermatozoan motion:

Applicability of hydrodynamic analyses of (YUNDT, SHACK and LARDNER) 27

Statocyst:

The mechanism of, operation in the mysid shrimp *Praunus flexuosus* (NEIL) 685

Stomatogastric ganglion:

Motor patterns in the, of the lobster, *Panulirus argus* (HARTLINE and MAYNARD) 405

Sulphate ions:

Active transport of, by the Malpighian tubules of larvae of the mosquito, *Aedes campestris* (MADRELL and PHILLIPS) 367

Swan mussel:

See *Anodonta cygnea*

Syrphus sp.:

Thermoregulation in small flies: basking and shivering (HEINRICH and PANTLE) 599

Taste discrimination:

Behavioural and electrophysiological studies of, by the maxillary palps of larvae of *Locusta migratoria* (L.) (BLANEY) 555

Teleost ear:

Modes of stimulation of the (FAY and POPPER) 379

Temperature:

Sodium regulation in the larvae of *Chironomus dorsalis* (Meig.) and *Camptochironomus tentans* (Fabr.): The effect of salt depletion and some observations on, changes (WRIGHT) 121

— The effect of, on the outward currents in the soma of molluscan neurones in voltage-clamp conditions (MAGURA, VALEYEV and ZAMEKHOVSKY) 265

Tetraethylammonium:

Problems associated with the use of, to test for monosynaptic connexions (BERRY and PENTREATH) 797

Thermobia domestica (Packard):

Reversible arrest of uptake of water from subsaturated atmospheres by the firebrat (NOBLE-NESBITT) 657

Thermoregulation:

In small flies (*Syrphus* sp.): basking and shivering (HEINRICH and PANTLE) 599

Tobacco hornworm:

See *Manduca sexta* (L.)

Uptake of water:

Reversible arrest of, from subsaturated atmospheres by the firebrat, *Thermobia domestica* (Packard) NOBLE-NESBITT 657

Viscosity:

Effect of, and ATP concentration on the movement of reactivated sea-urchin sperm flagella (BROKAW) 701

Voltage clamp:

The effect of temperature on the outward currents in the soma of molluscan neurones in, conditions (MAGURA, VALEYEV and ZAMEKHOVSKY) 265

Water balance:

Across the cuticle of a soil insect (GALBREATH) 115

Wing stretch receptors:

Monosynaptic connexions between, and flight motoneurones of the locust (BURROWS) 189

Withdrawal response:

The, of a freshwater snail (*Lymnaea stagnalis* L.) (COOK) 783

Simple Nervous Systems

Editors: P. N. R. USHERWOOD and D. R. NEWTH

The book consists of papers delivered at an international symposium held in Glasgow and Edinburgh in 1973. The subject matter is from a wide range of research projects in neurophysiology which have relevance in both biological and medical fields.

Ultrastructure and the Biology of Plant Cells

BRIAN E. S. GUNNING and MARTIN W. STEER

More than 220 largely original and previously unpublished electron micrographs (mostly taken using transmission electron microscopes, but including light and scanning micrographs as aids to 'orientation') are the basis of this essentially visual approach to the structure and function of the internal components of plant cells. Each of the plates carries a comprehensive caption which is integrated with the text by a simple cross-referencing system. The bibliography contains 1000 entries. This book can be used in conjunction with *Plant Cell Biology – an ultrastructural approach*, by the same authors, (see below).

Plant Cell Biology – an ultrastructural approach

BRIAN E. S. GUNNING and MARTIN W. STEER

Teachers and students of biology in both schools and universities have for a long time needed a reasonably-priced and up-to-date collection of illustrations depicting the ultrastructure of plant cells. The 49 plates presented here cover major aspects of cell biology particularly in relation to plant cells. The pictures, together with their comprehensive captions give a wide-ranging view of the subject and can be used in a variety of teaching and learning situations. Teachers will find the larger volume *Ultrastructure and the Biology of Plant Cells* by the same authors, (see above), a great asset in preparing courses for which members of the class could use this set of illustrations.

Publication September

Handy Matrices

For the Conversion of Units in Mechanics and Biology

C. J. PENNYCUICK

Scientists confronted with the various systems of units used in the scientific and technical literature have long been in need of a convenient source of conversion factors. The main purpose of this book is to provide a generous selection of such conversion factors, arranged in such a way that the particular one required can be rapidly located. Information on dimensions and on the origins of some units has been included, and the book can also be used as a rudimentary guide to the SI systems.

Paper 95p net

Principles of Environmental Physics

Contemporary Biology Series

JOHN L. MONTEITH

The author reviews the relevant basic physics before progressing to a discussion of radiation exchange and heat, mass and momentum transfer. The second half of the book examines the application of these transfer principles to the heat balance of plants and animals, and to the micrometeorology of crops.

Cloth £6.00 net Paper £3.00 net

The Locomotion of Soft-Bodied Animals

Contemporary Biology Series

E. R. TRUEMAN

The book presents a coherent picture of locomotory structures and mechanisms in invertebrates in the context of modern biomechanical studies, to consider their evolutionary importance and to indicate some of the ways in which we can begin to make comparative quantitative assessments of the locomotory ability of soft-bodied animals.

Cloth £8.50 net Paper £4.25 net

All communications should be addressed to the Editor,
The Journal of Experimental Biology, Department of Zoology,
Downing Street, Cambridge CB2 3EJ, England.

MANUSCRIPTS

Authors are requested to present their work in as *concise* a form as possible. Two copies of MSS must be submitted, together with five copies of an abstract (see below). The text should be *typewritten* (double-spaced) on one side only of the paper, and the pages numbered. Serial numbers must not be incorporated in the title. *Tables* and *Legends* should be numbered and on separate sheets: their position in the text should be indicated in the margin of the MS. Bibliography should be given under the heading of 'References' and in the following form: surname of authors (in alphabetical order), initials, date of publication, title of paper, title of journal (abbreviated according to the *World List of Scientific Periodicals*), volume and pages of references (*first and last*). In the text a reference must be quoted by the author's name and the date (in brackets), not by the numerical order of the paper in the list of references. Every paper must contain a short and concise *Summary* of the chief results of the enquiry, to be placed before the *Introduction*.

ILLUSTRATIONS

Line blocks should be used wherever possible. Text half-tone blocks should only be used when it is essential to show depth of shading. Plates will only be accepted for essential illustrations in which the most accurate reproduction of fine detail is called for, such as photomicrographs.

Illustrations should be numbered as they are to appear in print: plates will be placed at the end of the article.

Authors are asked not to submit sheets of illustrations which are of more than foolscap size or, if this cannot be avoided, to include photographic reductions to be sent to referees.

(i) *Line blocks*. Pen drawings should be in Indian ink (*jet black and waterproof*) on smooth white Bristol board, heavy drawing paper or good quality tracing paper. Drawings must not be folded or creased in any way. Where a drawing is labelled, *the label lines should be drawn in black but the lettering should be put in lightly with a soft pencil*. Where considerable reduction is required it is essential that the drawing be of such a character as to bear such reduction. *All brush work, tinting or pencil shading is to be avoided*. Mechanical stipple, if too fine, may not stand reduction in size when the block is made.

Charts and curves can often be drawn to best advantage on *graph paper ruled in pale blue*. The blue lines, while ensuring accuracy, are easily eliminated by the printer, only the blackened lines that are desired remaining. Whenever possible oscilloscope recordings should be submitted in a form suitable for reproduction with line blocks.

(ii) *Text half-tone blocks*. Photographs can be produced in this way if a good glossy bromide print is supplied. Illustrations should be gummed on *white* card, grouped and numbered as they are to appear in print. All lettering should be drawn in position on a covering sheet of transparent paper.

(iii) *Plates*. Plates are expensive and the Editor may require an author to defray the cost of plates which in his opinion are not essential. The photographs making up the plate should be gummed on *white card*, grouped and numbered, as they are to appear in print. Exclusive of margin the plate figures should not cover, when reduced, an area greater than $7\frac{1}{2}$ in. in length \times 5 in. in width (19.1×12.7 cm.) for reproduction as a single plate, or $7\frac{1}{2} \times 11\frac{1}{2}$ in. (19.1×29.2 cm.) in the case of double plates. All lettering should be shown in position on a covering sheet of transparent paper.

ABSTRACTS

The five copies of the abstract are required for biological abstracting journals. The abstract will not appear in *The Journal of Experimental Biology* but will be scrutinized by the Editor before being passed for publication. The text of the summary may serve as an abstract provided that it conforms to the following requirements. The abstract should outline as briefly as possible the results and the definite conclusions of the work. Details of method are generally not required. A paper of average length should be abstracted in about 100 words and the abstract should never exceed 3% of the original. Each copy of the abstract should bear the title of the paper, the name(s) of the author(s) and an address to which applications for offprints should be sent. The abstract should be typewritten (double-spaced).

PROOFSHEETS AND OFFPRINTS

Authors will receive one set of slip proofs for correction and return to the Editor. A page proof will also be sent if the slip proof is marked by the author 'Revise'. An allowance of 50p per sheet of sixteen pages will be made for alteration errors not made by the printers. Authors may be charged for any excess over this average. They will receive 50 complimentary copies of their papers: additional copies may be purchased and should be ordered when the proofs are returned to the Editor.
