

Table S1. Collection numbers and origin of dissected specimens from the MCZ collection.

Table S2. Measurements of dissected specimens \pm S.D. (mm)

Table S3. Results of the paired *t*-test *testing for sexual dimorphism* in the residual data.

Table S4. Pearson correlation coefficients of the correlation between relative limb dimensions and sprint speed.

Table S5. PGLS Analyses testing for the effect of the different variables on maximal sprint speed.
